## Summary

---

Backend Developer with expertise in designing and maintaining scalable service APIs, optimizing legacy systems, and implementing best practices in API security, performance, and reliability. Experienced with Lumen, Node.js, Redis, NGINX, Docker, and MySQL, as well as CI/CD pipelines using GitHub Actions. Skilled in system monitoring with Grafana and adept at collaborating across teams for seamless system integration.

## Experience

---

**PT Mitra Integrasi Informatika, site BRI | Associate Application Developer** **Feb 2024 - Present**

- Design, develop, and maintain RESTful service APIs using **Lumen** for **BRIguna** products, handling up to **13k requests per API per day** with high availability.
- Perform live monitoring of API traffic using **Grafana**, identifying anomalies and troubleshooting root causes to deliver long-term fixes.
- Integrate internal and third-party APIs to support digital loan disbursement workflows.
- Implement rate limiting and structured logging to harden API security and performance, reducing incident tickets by **10%**.
- Optimize **the monitoring API** by aggregating data from multiple microservices, ensuring response times **under 10 seconds**.
- Optimize and tune **database queries and indexing strategy**, reducing average query time by **10–20%**.
- Proactively design and harden API access control, collaborating closely with QA and security teams to **analyze and prevent penetration testing risks**.
- Work with **Docker**, **MySQL**, **Redis**, **Jira**, and **Bitbucket** in daily development and deployment workflows.

**Apple Developer Academy @ UC | iOS Developer, Product & Project Manager** **Mar 2023 - Dec 2023**

- Trained **over 100 videos** to achieve a **98% accuracy rate** in **movement classification** for a body motion detection using **Core ML**.
- Successfully retrieve daily user health data, including **standing minutes and step counts**, using **HealthKit**.
- Successfully extract gyroscope data from the Apple Watch using **Core Motion** and established **seamless data transfer** between iOS using **Watch Connectivity** and **HealthKit Session**.
- Achieved **80% accuracy** in applying gyroscope data as physics effects to a 2D object within **SceneKit**.
- Accomplished the integration of **automatic object placement** and **interactive gestures** using **ARKit**.
- Conducted user feedback, including **User Testing** and **Usability Testing** with **3 teachers, parents, 10 children, and 2 schools**, resulting in an **80% improvement** in engagement rates.

**PT. Terobosan Anak Bangsa | Backend Engineer Part Time** **Sept 2022 - Present**

- Expanded user base up to **1800 members** by developing the backend of the web platform using **Vue.js**, **TypeScript**, **Pinia**, and **Appwrite**.
- Successfully developed a **live transcription feature** using the **Web Speech API** and expanded it to include **file-based transcription** using **Deepgram**, supporting multiple languages.
- Successfully developed a transcription room **enabling multiple users to transcribe simultaneously** by utilizing **Socket.IO**.
- Building a Zoom client marketplace app by utilizing **WebRTC** and **Socket.IO** enabling **live synchronous system between platforms**.

**UPN Veterans East Java | Backend Developer Freelance** **Aug 2021 - Oct 2021**

- Successfully implemented **dynamic shuffled questions** in a computer-based exam application using the **Laravel** framework.
- Established a robust bidirectional flow of requests between the client and the server for **150 participants** by implementing an **asynchronous system** on the **VPS**.
- Executed production in a **Docker** environment using **CI/CD**.

**Diskominfo Jawa Timur | Web Developer Internship** **Jul 2021 - Sept 2021**

- Implemented the **Spatie Role-Based Access Control (RBAC)** system in a Host Management Web Application using **Laravel** and a **MySQL database**.

## Skills

---

Lumen • Swift • Vue.js • Next.js • React.js • TypeScript • Node.js • Git • Appwrite • NGINX • Docker • MySQL • Tailwind-CSS • C/C++ • Python • Java • Oracle

## Projects

---

<b>Moco Kids   Developer, Product &amp; Project Manager</b> <i>Moco Kids</i>	<b>Oct 2023 - Dec 2023</b>
• Moco is an iOS application that will assist your child in reading comprehension through interactive activities such as flashcards, mazes, and an interactive AR world.	
<b>Bowlmo</b> <i>Bowlmo</i>	<b>Jul 2023 - Aug 2023</b>
• Bowlmo is a Bowling Game that allows users to throw a ball using their Apple Watch, calculating rotation and speed in the throwing force.	
<b>Petto Life   Developer</b> <i>Petto Life</i>	<b>Jun 2023 - Jul 2023</b>
• Petto Life is an iOS App that provides users with relaxation activity reminder through game which is by taking care of a pet and compete through leaderboard.	
<b>RedCal</b> <i>RedCal</i>	<b>May 2023</b>
• RedCal is simple app that help track menstrual cycle and predict the next period.

## Education

---

<b>Bina Nusantara University</b> Bachelor's Degree	
Major in Information System.	<b>2024 – Present</b>
GPA: 3.79 / 4.0	
<b>Politeknik Elektronika Negeri Surabaya</b> Diploma 3 Degree	
Major in Informatics Engineering.	<b>2019 – 2022</b>
Diploma Thesis: Internal Quality Audit Information System	
Thesis Tech Stack: MVC <u>PHP</u> Native, <u>Oracle</u>	
GPA: 3.75 / 4.0	

## Achievement

---

<b>Toyota Astra Financial Incubation   Awardee</b> <i>Online Incubation</i>	<b>Nov 2021 - Des 2021</b>
• Being <b>1 of 20 people selected from 160 candidates</b> , I received training on project management, data analysis, digital technology trends, IT infrastructure, and cyber security.	
• Collaborated with 4 other members to create a technology-related business plan at TAF within a week, involving <b>market analysis, product research, and competitor analysis</b> .	
• Earned the <b>Best Group Collaboration Award</b> by actively participating in daily challenges.	

## Coursework

---

<b>Foundations of Project Management   Google, Coursera</b>	<b>Aug 2023</b>
• Project Management • Change Management • Strategic Thinking • Career Development • Organizational Culture	
<b>Data Science Course   PKS Digital School</b>	<b>Feb 2022 - Apr 2022</b>
• Basic Python • Data Scientist Library and Package • Basic SQL • NLP • Final score of 93 points out of 100	

## Activity Experience

---

<b>Secretary I, Forum Mahasiswa Tulungagung se-Surabaya</b>	<b>Aug 2021 - Jul 2022</b>
Perform the functions of control, coordination, development and improvement of administrative and financial management systems as well as communication in building internal and external relations of the organization.	
<b>Chairman, UKM Teknologi dan Kesehatan PENS</b>	<b>Mar 2021 - Feb 2022</b>
Adhering to the general policy of the administrator, responsible for all organizational activities, presided over every comprehensive board meeting, responsible both inside and outside the organization, and carry out management reshuffles if necessary.	
<b>External Relations Department Staff, Forum Mahasiswa Tulungagung se-Surabaya</b>	<b>Oct 2020 - Jul 2021</b>
Established relationships with relevant stakeholders in the scope of education and local cities of origin, as a distributor of information from and to external organizations, providing insight and increasing student interest in participating in external activities as well as held public events such as community service.
