For the linguistics focus area of study, the written examination will be based on coursework. Candidates are required to take exams in the following areas: SP 502 and an elective, Spanish language and linguistics, and literature. From the selection of questions provided in each area, the candidate must generate six written answers.

Romance Languages, without a concentration - Combination of Romance Languages with a Thesis and Non-Thesis

From the selection of questions provided, the candidate must generate six written answers (four pertaining to the primary main language and two pertaining to the secondary language; however, if the candidate has 18 or more hours in both French and Spanish, then the candidate will generate three written answers for each).

General scheduling and assessment of the written MA Comprehensive Examination

For all plans and areas of the MA in Romance Languages degree program, typically, there are three exam days, with two exam sessions each day, spread out over the course of a week. Each exam day lasts 3 hours, divided into two sessions. During each exam session, the examinee writes answers to one question. A typical sequence for taking the exam would follow this schedule: Monday, Wednesday, and Friday for 3 hours each. After evaluating the written answers, the professor in each area of specialization decides if the candidate passes his/her question. In order to pass the entire exam, a candidate must earn a pass in five of the six areas. Should the candidate fail more than two areas, he/she will have one final opportunity to repeat the failed areas, normally in the following semester (without expectation of renewed support in the form of an assistantship). Should the candidate fail in two areas, normally he/she must repeat both areas two weeks later. Should the candidate pass both repeated areas or fail in only one of the two repeated areas, then the candidate will earn a pass on the overall exam. Should the candidate fail both repeated areas, then he/she has one final opportunity to retake the failed exams, normally the following semester (without expectation of renewed support in the form of an assistantship).

Plan I - Thesis Process Requirements

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the candidate's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Candidates set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the candidate's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full

or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the candidate's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the candidate is ready for the final oral thesis defense. A final oral thesis defense is required of all candidates completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found in this catalog.

Plan II - Non-Thesis Process Requirements

For the literature and culture focused areas of study a minimum of 30 hours are required. For the linguistics focused areas of study a minimum of 36 credit hours are required. Candidates in both areas are required to take the Comprehensive exams in their last semester in the program.

Romance Languages, Ph.D.

The Romance Languages, PhD program faculty mentor students in all aspects of their graduate experience, including coursework, teaching, examinations, and writing of doctoral dissertations. Graduate students have the chance to learn and research in an engaging environment, as well as teach while supported by training and mentorship. The department is committed to providing this training by means of the best facilities and technology available, and by relying on a staff of teachers and scholars with commensurate international experience and expertise. Our dedicated professionalization activities prepare students for success in gaining employment as they embark on careers as teachers, scholars, and in non-academic positions involving the language industry and government agencies. The Romance Language, Phd program has four main focused areas of study, French, Spanish, and French and Spanish and Linguistics with either French or Spanish.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- **Writing Sample:** In the target language (French, Spanish) the writing sample should be about 10 pages (double spaced) in length and the candidate seeking admission will need to demonstrate a commensurate level of proficiency in the target language as well as critical thinking skills.
- **Statement of Purpose:** The applicant should describe how prior academic experience has prepared them for graduate study in the target language at The University of Alabama (UA) and specify the fields of interest. The statement should indicate how the Modern Languages and Classics (MLC) Department's programs and courses align with the applicant's goals both as a student at UA and after graduation. PhD applicants, need to describe their research goals in detail and refer to the MLC professor whose research most aligns with their research. If the applicant is interested in GTA support, include information on why teaching and pedagogical training during their Graduate program will support their professional goals.
- **Video Recording in the target Language:** Submit a 3-5 minute (.mpv4 or .mov format) video recording in which the applicant speaks freely about themselves in a conversational manner in the target language (do not read a prepared text). Then read a paragraph from a target language text of the applicant's choice or a short poem.
- A resume
- 3 letters of recommendation

No entrance exam scores are required. However, applicants to all programs who seek to position themselves for possible consideration for additional financial support in the form of an enhanced assistantship or fellowship should submit an entrance score (GRE or MAT), even when it is not required for admission. Applications for both full-time and part-time status are welcome. All applicants seeking full-time student status are considered for financial support in the form of a graduate teaching assistantship.

For applicants with insufficient undergraduate preparation, admission may be contingent upon completion of designated undergraduate requirements. Qualified students with an appropriate undergraduate degree may be admitted directly to the Doctoral program in Romance Languages. However, in such circumstances completion of all

requirements for the appropriate Master of Arts program, including comprehensive testing and subsequent awarding of the Master of Arts degree, will be a prerequisite for completion of the Doctoral degree.

When available, we offer teaching assistantships to qualified full-time MA and PhD candidates. Assistantships include a stipend paid over nine months, a tuition waiver and health insurance. Exceptionally qualified candidates may be eligible for fellowships or enhanced assistantships.

We have rolling year-round admissions.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Romance Language, Phd program has four main focused areas of study, French, Spanish, and French and Spanish and Linguistics with either French or Spanish.

In addition to the program-specific requirements presented below, all doctoral candidates, regardless of the option selected, must adhere to the following.

The minimal formal coursework required for the doctoral degree is 60 semester hours. Appropriate MA hours earned at The University of Alabama can also count toward the total required accumulation of hours. Students who have completed a master's thesis need accumulate only 54 hours of coursework. Once all coursework is completed, an additional 18 hours of Dissertation Research (FR 699 Dissertation Research, SP 699 Dissertation Research or RL 699 Dissertation Research) with the dissertation director(s) are required. All doctoral candidates must possess reading knowledge of one language in addition to English, their native language, and their language of specialization.

Code and Title		Hours
Research Course		3
RL 557	Critical Theory (For literature students)	
RL 514	Qual Methds/Applied Ling Res (For linguistics students)	
RL 523	Quantitative Methods in Ling (For linguistics students)	
These courses need not be language-specific; they can be general and inclusive of all literature and languages.		
French or Spanish Teaching Practicum		3
FR 512	Practicum Appl Linguist	
SP 502	Pract Appl Linguistics	
Focused Area of Study		54
Students will select French, Spanish, French and Spanish, or Linguistics with French or Spanish as their focused area of study.		
Literature and Cultural Studies with French - Focused Area of Study		
French coursework - 42 hours must include four of the following fields:		
Early Modern (17th and 18th Centuries)		
FR 545	17th Cent French Lit I	
FR 546	17th Cent French Lit II	
19th Century		
FR 552	Spec Top 19th Cent French Lit	
20th and 21st Centuries		
FR 553	20th-Century French Novel	
FR 554	20th-21st FR Lit Sp Topics	
FR 577	French Cinema	

Francophone Studies

FR 531	Francophone Sub-Saharan Africa
FR 535	Bande Dessinée
FR 555	Quebecois Lit & Culture
FR 578	Writing Immigration

18 hours in other language or an allied discipline which might include another language, linguistics, German, Italian studies, or other areas approved by the Director of Graduate Studies.

Literature and Cultural Studies with Spanish - Focused Area of Study

Spanish coursework - 42 hours must include four of the following fields:

Thematic Courses

These courses cover any of the chronological periods and geographical areas specified below:

SP 527	Spanish Women Authors
SP 537	Gender in Hispanic Works

Golden Age Peninsular

SP 591	Cervantes
SP 593	16th C Peninsular Lit
SP 594	17th C Peninsular Lit

19th Century Peninsular

SP 521	19th-Century Spanish Prose

20th-21st Century Peninsular

SP 526	20th C Span Novel Post Civil W
SP 528	Historical Memory in Spain
SP 530	Contemporary Iberian Culture

Colonial Latin America

SP 515	Span Amer Colonial Texts

19th Century Latin American

SP 516	19th C Span Amer Lit

20th-21st Century Latin American

SP 538	Spanish American Short Story

U.S. Latinx Studies

SP 689	Sem Spanish-American Lit (Any relevant topic.)

18 hours in other language or an allied discipline which might include German, linguistics, Italian studies, or other areas approved by the Director of Graduate Studies.

French and Spanish - Focused Area of Study

All PhD in Romance languages candidates choosing this area of focus have maximal flexibility in course selection. There is no slate of required courses for either of the two languages. The candidate must simply amass 30 hours (including transferred MA hours) in each of the two languages. A maximum of 18 hours in either language (French or Spanish) can be transferred from a prior MA to satisfy requirements towards either language in the French and Spanish focus area of study.

Linguistics with French and/or Spanish - Focused Area of Study

30 hours in the language and 30 hours in linguistics

Romance languages candidates seeking a linguistics-oriented curriculum, must accumulate 30 hours in linguistics (including transferred MA credits), in addition to French or Spanish (including transferred MA credits).

Some courses can be counted as either language or linguistics, depending upon the student's programmatic needs. For example, a student with a focus on Spanish with linguistics can count a course on Spanish linguistics under the language category or under the linguistics category in order to free up additional hours in the category that best serves the student's programmatic needs. In all cases, a minimum of 60 hours of graduate credit must be accumulated (54 hours for students with an MA thesis). Both French and Spanish require a descriptive linguistics course:

FR 561	French Linguistics
SP 556	Intro Spanish Linguistics

The remaining coursework for this area of study is determined in consultation with the appropriate graduate advisor.

Some representative courses are:

FR 521	Pronunciation & Phonetics
FR 535	Bande Dessinée
SP 584	Phonetics and Dialectology
SP 585	History of Spanish Language
RL 587	Bilingualism
RL 586	Pragmatics

Dissertation Requirements**18**

FR 699 or	Dissertation Research
SP 699	Dissertation Research
or	
RL 699	Dissertation Research

Total Hours**78**

Transfer Credit

Up to half of the total hours of the doctoral degree may consist of transferred credits earned at another institution.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirements

Once enrolled, all doctoral candidates must submit a Plan of Study to the Office of the Graduate School and abide by all other policies of the Graduate School. The student's Plan of Study for the PhD degree must be approved by the department and the Graduate School by the time the student completes 30 graduate semester hours of UA and/or transfer course work.

Graduate School information on the Doctoral Plan of Study (p. 21).

Comprehensive Exam

At the outset of the semester following the conclusion of the candidate's required doctoral coursework, an exam committee will be formally constituted, normally being composed of five professors having taught the candidate's coursework or whose area of expertise is appropriate to the proposed dissertation topic. The selection of the other committee members is normally determined by virtue of consultation between the committee chair and the candidate, with the advice of the appropriate Graduate Advisor(s) if needed. (If for any reason the original exam committee chair cannot continue to function in that capacity at any time during the exam cycle or cannot serve as the subsequent dissertation director, a new exam committee chair or dissertation director will be designated in consultation with the appropriate Graduate Advisors or the department Chair.)

After ample prior consultation and guidance from the prospective exam committee chair (who is also the prospective dissertation director, as

indicated above), the candidate will submit to the exam committee chair a written “pre-prospectus,” that is, a preliminary version of the prospectus. If deemed acceptable by the exam committee chair, said chair will distribute the pre-prospectus to the rest of the committee. If the exam cycle takes place during a fall semester, the exam committee should receive the pre-prospectus no later than October 1st (or the next nearest business day). If the exam cycle takes place during a spring semester, the exam committee should receive the pre-prospectus no later than March 1st (or the next nearest business day). In order to meet the stated deadlines, the candidate must have already begun work on the pre-prospectus well prior to the outset of the exam semester.

After reading the pre-prospectus, the exam committee members will submit to the exam committee chair a set of written questions. Each committee member will submit one question. That question, which may pertain to the pre-prospectus or to any of the candidate’s course work taught by the examiner, may be narrow or broad and may contain multiple parts. If the exam cycle takes place during a fall semester, the exam committee members should normally submit their questions to the committee chair no later than October 7th (or the next nearest business day). If the exam cycle takes place during a spring semester, the exam committee members should normally submit their questions no later than March 7th (or the next nearest business day). After reviewing all the questions to verify that format guidelines have been followed, the exam committee chair will then submit all the questions simultaneously to the candidate. (In the event, however, that some of the examiners’ questions are late in arriving, the other questions should be given to the candidate on the stated deadline, with the late questions following as soon as they are supplied. If Fall Break or Spring Break interferes with the stated deadlines, appropriate adjustments can be made.)

Once the questions have been submitted to the candidate, he/she will have a total of two full weeks to generate written responses to all of the questions. Each response should be a minimum of four standard pages in length (plus a reference bibliography, if required) and a maximum of ten standard pages in length (plus a reference bibliography, if required). A reference bibliography is required if the student cites any sources in the text of the response. The written responses must be typed, using the New Times Roman font (except for phonetic notation and other special characters) set for 12 points, and must be double-spaced with one-inch margins on all sides. Completed answers will be delivered to the exam committee chair, usually in electronic format, who will then be responsible for distributing the answers to the rest of the committee. Every member of the exam committee should be provided with a copy of all the written answers. If the exam cycle takes place during a fall semester, the exam committee members should receive the set of answers no later than October 25th (or the next nearest business day). If the exam cycle takes place during a spring semester, the exam committee members should receive the set of answers no later than March 25th (or the next nearest business day). (If Fall Break or Spring Break interferes with the stated deadlines, appropriate adjustments can be made.)

The exam committee members will have a maximum of ten days to evaluate the candidate’s answers. They will then vote on the acceptability of the written exam (which includes both the pre-prospectus and the written answers). Every questioner votes primarily on his/her section of the exam, but may also take into account overall performance. Each individual examiner should register a vote according to the following gradation:

- PASS with distinction
- PASS

- PASS with reservation
- FAIL

This voting gradation is for department-internal use only; the final overall outcome will be reported to the Graduate School as either PASS or FAIL. In order to obtain an overall outcome of PASS, at least four of the five examiners must vote for any of the three gradations of PASS. In the event that the candidate does not obtain at least four positive votes, the overall outcome is reported to the Graduate School as a FAIL. The candidate will have, in accordance with Graduate School policy, one additional chance to retake the exam. In such a case, the candidate must retake all of the failed sections of the exam at a later date, to be determined by the exam committee in consultation with the student. In the event that there is a lack of consensus concerning the appropriate date for the retake, the departmental Chair, in consultation with all parties, will make the final determination.

Admission to Candidacy Requirements

When the candidate passes the written exam, he/she uses the feedback gained during the examination process, in consultation with the prospective dissertation director (that is, the former exam committee chair), to arrive at the final version of the dissertation prospectus (that is, the final revision of what was formerly the pre-prospectus). Prior to the end of the semester, the prospectus will be defended orally in the presence of the dissertation committee. Ideally, to facilitate continuity, the membership of the dissertation committee will be the same or nearly the same as the previous exam committee, but circumstances may arise where changes will occur in the composition of the committee (for example, an examiner who had coursework with the candidate but whose expertise lies outside the parameters of the proposed dissertation topic might rotate off of the committee and be replaced by someone else when the dissertation committee is constituted). According to Graduate School policy, to constitute a successful defense, the prospectus must meet with the approval of at least three members of the committee. At the close of a successfully defended prospectus presentation, the members of the dissertation committee will sign the “Application for Candidacy” form. This is also an appropriate moment for the “Appointment or Change of Doctoral Dissertation Committee” to be completed and initialed by all members of the dissertation committee, if that obligation remains to be fulfilled. Both forms should then be delivered to the Graduate School, along with an “Outline of Ph.D. (Plan of Study)” form, if this item has not yet been filed.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

The following benchmarks and recommendations should be observed in order to ensure the timely completion of the dissertation. The two-fold rationale for establishing these benchmarks is (1) to assist the dissertating candidate (and dissertation research director) with the management of the completion calendar, and (2) to allow faculty members a suitable amount of time to read dissertation material at the applicable intervals and then respond with appropriate feedback and support for the candidate. Dissertating candidates are expected to make every effort to meet the following benchmarks.

Part I (The benchmarks established for Part I apply primarily to full-time candidates who hold Graduate Teaching Assistantships. Part-time candidates, who may be in the workforce, can establish a different pace for coursework completion and for writing the dissertation, keeping in mind the degree completion time limit imposed by the Office of

the Graduate School for completion of all degree requirements. All candidates are subject to the benchmarks established for Part II.)

1. No later than the fourth semester of PhD program: completion of all coursework and fulfillment of the language proficiency requirement. (Note: the fourth semester is the benchmark for candidates who began the program with approximately 30 semester hours of transferable credit from a prior M.A.; candidates entering directly from the B.A. will typically face this same benchmark in the eighth semester of the PhD program; candidates whose M.A. credits have partly or fully expired, being more than six years old, will need to consult with the MLC departmental Graduate Director to establish the appropriate benchmark semester for completion of coursework requirements).

2. No later than the fifth semester of PhD program: completion of the Pre-prospectus / Exam / Prospectus cycle, including the successful defense of the final prospectus (consult the Comprehensive Exams section). Student is admitted to candidacy for the PhD degree.

3. Sixth and seventh semesters of the PhD program (assuming a successful fifth-semester prospectus defense): Subsequent to the successful prospectus defense (Admission to Candidacy), the candidate will sit down with the dissertation director, and they will mutually decide on a timeline for the sixth and seventh semesters, such that the candidate will be able to meet the benchmarks described below in Part II leading up to and including the final doctoral semester. It is expected that the bulk of the dissertation will be drafted during the sixth and seventh semesters.

4. No later than the eighth semester of the PhD program: completion and successful defense of the dissertation, and uploading of final draft of the dissertation to ProQuest.

Part II (The benchmarks established for Part II will be in force for all candidates, regardless of full-time or part-time status and regardless of GTA or non-GTA status.)

1. Subsequent to the successful prospectus defense, the candidate will sit down with the dissertation director, and they will mutually decide on a specific timeline, such that the candidate will be able to meet the benchmarks described below leading up to and including the final doctoral semester. (Note: for GTAs, this benchmark overlaps with the more specific timeline given in I.3 above). The candidate and dissertation director will also come to an understanding about how available the director will be during intervening breaks (such as summer). They will review the likely structure for the dissertation, including how many chapters will be included and when each chapter will be submitted for review by the dissertation director. If necessary, IRB approval procedures will be addressed and related calendars set. For non-GTA dissertators, the timeline agreed upon may be different from what has been established for GTAs in I.3 above, but in all cases candidates must be aware of their seven-year completion deadline. Note that the Admission to Candidacy for the Doctoral Degree Form should be ready for signatures at the close of the successful prospectus defense and should then be submitted to the Office of the Graduate School, along with the following two forms, if they have not yet been submitted: Appointment/Change of the Doctoral Dissertation Committee Form and Outline of the PhD Program (Plan of Study) Form.

2. No later than three months prior to the expected dissertation defense, following consultation with the dissertation director, the candidate will send the most current version of the dissertation

to the complete committee (approximately December 10-15 for a spring graduation, or in early July for a fall graduation).

3. The proposed complete draft of the dissertation should be sent to the dissertation director at least two weeks prior to its submission to the full committee (approximately the second week of February for a spring graduation, or the second week of September for a fall graduation). Candidates having co-directors should submit this a week earlier, allowing time for consultation between the co-directors.

4. The complete penultimate draft of the dissertation should be sent to the committee at least three weeks prior to the dissertation defense (approximately the last week of February for a spring graduation, or the last week of September for a fall graduation).

5. The dissertation defense should occur at least two weeks prior to the deadline for uploading the completed dissertation to ProQuest (hence the defense date would be approximately March 10-15 for a spring graduation, or October 10-15 for a fall graduation).

6. By approximately the last week of October (for fall graduation) or March (for spring graduation), the dissertation must be uploaded to ProQuest and the Committee Acceptance Form for Electronic Thesis or Dissertation must be submitted, in accordance with the requirements stipulated by the Office of the Graduate School. Candidates must check the specific day of the deadline for the relevant semester. The calendar of academic deadlines for students is consultable online at the Graduate School website.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 15).

Student Progress Requirement

Acceptable academic progress in the PhD program should conform to the MLC Dissertation timeline and Graduate School Requirements.

Additional Academic Requirements

All new graduate teaching assistants must enroll for the appropriate teaching practicum, either FR 512 Practicum Appl Linguist or SP 502 Pract Appl Linguistics.

All doctoral candidates must possess reading knowledge of one language in addition to English, their native language, and their language of specialization.

MUA501 Secondary Applied Study

Hours .5-1

Private instruction.

MUA527 Horn Choir

Hours 1

Applied ensemble for horn students at the graduate level.

MUS501 Intro Grad Study In Mus

Hours 3

An introduction to the basic bibliographic tools and research techniques in music. Offered fall semester.

MUS502 Film Scoring

Hours 3

A study of the art of scoring music for films. The course will examine aesthetics of film scoring and apply it in this course. Offered fall semester.

[View All Courses](#)

Music, DMA

The School of Music offers the Doctor of Musical Arts (DMA) in conducting (wind, choral and orchestral), composition, and performance.

Admission Requirements

The Master of Music (MM) degree is required from The University of Alabama or the equivalent from another accredited institution. The

MM equivalent must include recitals and/or major creative work, as appropriate.

In the performance areas, an audition at the MM level that includes at least 20 - 25 minutes of performance time is required. It must include representative works drawn from a variety of historical periods. In composition, scores and recordings of original works, together with evidence of public performances, must be submitted.

Diagnostic entrance examinations are required in musicianship, music theory and writing skills; vocal performance majors also take diagnostic examinations in IPA transcription and song text translation in German, Italian, French, and, where appropriate, Latin and English. All theory and history deficiencies revealed in these examinations must be removed by the end of the first fall semester after matriculation. All deficiencies in diction revealed in these exams must be removed by the end of the first spring semester after matriculation. A schedule of remediation will be determined by appropriate faculty and the director of graduate studies (DGS) in music and may include enrollment in MUS 595 Graduate Theory Review, MUS 591 Readings in Music History, or MUS 510 Advanced Arranging and, for vocal performance majors MUS 532 Graduate Diction Review. Students may not earn graduate credit in theory or history until all deficiencies in the respective areas have been removed.

In addition to the regular Graduate School application requirements, the following are required as part of the application process:

- Portfolio Submission of a portfolio is necessary in composition.
- Interview An on-campus interview is encouraged but not required.
- Audition An audition is required for performance and conducting majors (sometimes replaced by an audition recording).
- Departmental Exam An examination in musicianship and music theory is needed at the time of audition. Also, diagnostic examinations in music theory and music history, and diction for vocal performance majors, are required at the beginning of the first semester of study.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements For the DMA Degree

Course distribution (hours required beyond the MM degree).

Major area: 20–25 hours, including document (see below for description)

Theory/music history: 18 hours (minimum of 9 in each area)

Pedagogy: 3–6 hours

Electives: 5-7 hours

Total Hours	48

Recital requirements

In performance, a minimum of three recitals are required. In conducting there is a requirement for a minimum of three concerts, one of which must be a lecture-recital. In composition, the requirement includes a

full recital, or equivalent in length, of music written at the DMA level, exclusive of work done on the document.

Advisory Committee

A committee shall be appointed to supervise the student's program and progress toward the degree. The constitution of the committee is described in the Graduate Handbook of the School of Music.

Written comprehensive examinations

All students must pass written comprehensive examinations in the major area. No student may attempt the written comprehensive examination sooner than the first Fall or Spring semester after successful completion of all required MUS courses. A description of the written comprehensive examinations is included in the Graduate Handbook of the School of Music.

Document

In performance, choral conducting, and wind conducting, a final project that includes a research and writing component is required. The subject, content, and length of the project must be approved by the student's advisory committee. The School of Music offers options for the format of the final project; these are described in detail in the School of Music's Graduate Handbook (available on the School of Music's website) under "DMA Curriculum Outlines." In composition, there must be a large original work in an unspecified medium, in addition to and distinct from any work done for degree credit in the DMA program. Every project is subject to approval by the student's advisory committee. Work is supervised by the major teacher and the student's advisory committee.

Public lecture

In performance and composition, there is a required 50-minute lecture demonstrating the candidate's ability to communicate about the area of specialization.

Language requirement

There is no specific language requirement for the DMA. Depending on the student's academic program, the advisory committee may require proficiency in a foreign language.

Residency requirement

A minimum of two consecutive, full-time academic semesters must be spent in residence at the University; one may consist of a full summer, if approved by the advisory committee. A minimum of 18 semester hours must be earned in residence. Only degree credit may be counted toward the 18 hours.

Transfer Credit

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a doctoral degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School. Only courses in which a student earned a "B" grade or better may be transferred. Document Research (699) may not be transferred in from an outside institution.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School's website a Request for Transfer of Graduate Credit earned at another institution. It is also the student's responsibility to assure that the Graduate School receives an official transcript from the other institution where the transfer credit has been requested, well in advance of the final semester.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a doctoral degree may be transferred from another institution. The approved transferred coursework must be earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Departments may have more restrictive timelines. Revalidation or recertification of graduate credits that will be more than 18 semesters old at the time of UA doctoral program completion is not an option.

Doctoral Plan of Study Requirement

See the Graduate School Policy on the Doctoral plan of study (p. 21).

Comprehensive Exams

All students must pass written comprehensive examinations in the major area. No student may attempt the written comprehensive examination sooner than the first Fall or Spring semester after successful completion of all required MUS courses. A description of the written comprehensive examinations is included in the SOM Graduate Handbook.

Admission to Candidacy Requirements

DMA students may be admitted to degree candidacy after passing the written comprehensive examination and obtaining advisory committee approval of a final project prospectus. The advisory committee will sign the Admission to Candidacy form when both conditions have been met.

From this point, the Graduate Catalog requires continuous enrollment in MUS 699 in all fall and spring semesters until graduation.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment Policy (p. 21).

DMA Final Project Requirements and Procedures

The Advisory Committee

The Director of the School of Music (SOM) with advice from the Director of Graduate Studies (DGS) appoints the SOM advisory committees for all DMA students in the first semester of enrollment. The student is provided, via email, a copy of the Committee Appointment Memo signed by the Director of the School of Music. The student should "invite" the faculty to serve on their committee via the committee formation interface.

The external member of the DMA committee will be appointed after preliminary approval of the thesis or final project prospectus.

The advisory committee for all DMA students will consist of at least six members, five drawn from the graduate faculty of the SOM and an external member who must hold appropriate graduate faculty status in another discipline. The membership must include

1. the student's major professor (usually serving as chair)
2. one other faculty member from the student's major area or, when appropriate, from a related area;

3. one member of either the Theory/Composition or the Musicology faculty;
4. one member of the graduate faculty of the SOM drawn from outside the student's major area;
5. an additional member of the graduate faculty of the School of Music from any area;
6. an external member who holds UA graduate faculty status in an area other than SOM.

School of Music committee members grade all recitals, the lecture or lecture-recital, and comprehensive exam. All members, including the external member, evaluate the DMA final project prospectus and first draft, and grade the final project defense. All grading is pass/fail. Grades for oral exams and thesis defenses will be agreed upon at the meeting; those for comprehensive examinations and recitals, lectures, etc., will be submitted by committee members through current official procedures. Recordings of recitals and lectures will be available for committee members who cannot attend performances.

Final Project Prospectus:

1. Prospectus Preparation

Through research and consultation with the major professor, other committee members, and other appropriate persons, the student selects a final project and writes a formal prospectus. The prospectus details the scope of the project and its significance, the components required, working methods, and other supporting information. A brief narrative, an outline, and a working bibliography are required.

2. Prospectus Submission

The prospectus may be submitted after the student earns 12 DMA credit hours (excluding remediation).

With the major professor's approval, the student submits the prospectus to the DGS, who reviews the format and submits the prospectus to the advisory committee.

3. Prospectus Approval

The DGS polls the committee and, if all agree, schedules a prospectus defense.

Approval by the advisory committee is required for work to proceed. See 4.6 Admission to Candidacy.

4. Document Advisor

At the prospectus defense, the DGS appoints a document advisor from among the committee members.

Students planning to conduct interviews as part of their research must provide evidence of contact with each intended interviewee, as well as a list of sample questions. Before you start your research with human participants, you must submit an application with the University of Alabama's Institutional Review Board (IRB).

DMA Final Project First Draft

1. First Draft Preparation

After successful defense of the prospectus, the student completes a draft of the written component and a progress report on other parts of the project (recording, recitals), with supporting evidence.

The written component must conform to Graduate School regulations for electronic theses and dissertations and to a style guide approved by the Graduate School. The Graduate School website gives full information

under the heading "Current Students" and then "Preparing Theses and Dissertations." The SOM's default style guide is *The Chicago Manual of Style*, notes and bibliography format; individual committees may approve a different style guide if it is accepted by the UA Graduate School. *The Chicago Manual of Style* is available online through UA Libraries.

Note: Students should include the dedication and acknowledgments pages with headings and page numbers only; texts of those sections should not be added until after the defense.

2. First Draft Submission

With the approval of the document advisor, the student sends the first draft to the DGS, who reviews the format and submits the draft to the advisory committee.

3. First Draft Approval

The DGS polls the committee and, if all agree, schedules a first-draft meeting. The first draft components are evaluated. Corrections and suggestions must be incorporated into the final version of the project.

DMA Final Project Final Draft

1. Final Project: Submission

After completion of all components, and with the major professor's approval, the student sends all components of the project to the DGS, who reviews the format and submits to the advisory committee.

Option I: 60 – 70-page document.

Option II: professional-quality recording, track listings, cover art with program notes, and the 25–30-page manuscript.

Option III: non-professional recordings of the two recitals with the 25–30-page manuscript.

2. Final Project Defense

With the advisory committee's approval, and if all other requirements for the degree have been completed successfully, the DGS convenes the committee for the project defense.

3. Grading

The advisory committee grades the defense pass or fail.

4. Minor Changes after the Successful Defense

The advisory committee may require minor changes to components of the project; the major professor is responsible for monitoring the changes before the student submits the project to the Graduate School.

5. Substantial Changes after the Defense

If substantial changes are recommended during the defense, the project will not be submitted, and forms will not be signed until a complete revision has been presented to the advisory committee.

6. Graduate School Submission

After a successful defense, the student submits the document or manuscript to the Graduate School, following procedures given on the Graduate School website.

The DMA Final Project

All DMA students must complete a final project that includes a scholarly written component. More specific information about the written component may be found in the School of Music (SOM) Graduate Handbook. Three options are available; they are described in detail with requirements and procedures in the SOM Graduate Handbook.

Option I: Any DMA student may choose to write a document of approximately 60

– 70 pages.

For Performance and Conducting Students

The DMA document is of narrower scope than a dissertation but involves the same high level of research and rigorous documentation. It demonstrates the candidate's ability to communicate general and specific information about the area of specialization and results in an original contribution to knowledge. Topics might include an analysis of a work or set of works, a critical edition of a work for which none exists, a catalog of a composer's works or a substantial update if none exists, a descriptive inventory of an archival collection, a description of a musical document (collection of antebellum sheet music, etc.), a study of a performance practice, a biography or original contribution to the biography of a significant musical figure, a history of a musical organization. More specific information about the DMA Document may be found in Section 11 of the SOM Graduate Handbook.

For Composition Students

The student must compose a large original work (medium unspecified) in addition to and distinct from any work done for other degree credit in the DMA program. Work on the document will be supervised by the major professor and the advisory committee. The project does not require a recording of the composition.

Option II: Performance and Conducting students may produce a professional-quality recording featuring the student as primary soloist, primary ensemble performer, or conductor, accompanied by a 25 – 30-page contextualizing manuscript, liner notes, and cover art.

The student is responsible for execution of all aspects of the recording and must assume a leadership role in all aspects of the project, including planning, production, and editing of the recording.

The recording must be a professional-quality, produced, studio recording; it cannot be simply a recording of a live concert.

Approximately 50% of the recording may be taken from material on the recitals required for the DMA degree.

The content of the recording must constitute a cohesive program (see Cohesive Program below).

The student must be registered for applied lessons with the major professor in the semester the recording is completed.

The student must submit a 25–30-page manuscript that provides a context for the recital, the rationale behind the choice of program, historical and/or analytical information where pertinent, biographical notes about the performers, etc.

The student must submit cover art and liner notes condensed from the manuscript.

Option III: Performance students may add two recitals (in addition to the three required for the degree); the fifth recital must be accompanied by a contextualizing manuscript of 25 – 30 pages.

The content of the fifth recital must constitute a cohesive program (see Cohesive Program below).

The student must submit a 25 – 30-page manuscript that provides a context for the recital, the rationale behind the choice of program, historical and/or analytical information where pertinent, etc.

Duplication of material from any previous recital for which credit for a degree has been earned is not allowed.

Cohesive Program: Options II and III

Possibilities for the cohesive program required for the recording in Option II and the fifth recital in Option III might include performances of a composer's complete works in a particular genre or for a particular instrument; tracing a genre, such as the sonata, through several centuries; featuring representative works in a national tradition; or exploring meaningful connections between seemingly unrelated composers or works (e.g., innovative works for the instrument). For conductors in particular, a single large work may suffice. A program of unrelated works is unacceptable.

Time Limits for Degree Completion Requirements

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program.

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Plan of Study and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

Graduate School information on Time Limits (p. 21) for Degree Completion.

Student Progress Requirement

A student may be dismissed from any SOM graduate program for failure to make satisfactory progress toward degree completion. Lack of progress includes failure to follow the most recent SOM Plan of Study on file and failure to attend SOM advising sessions each semester. Following notification from the SOM Director of Graduate Studies, the appropriate MM or DMA Advisory Committee may move for dismissal.

Additional Academic Requirements

In addition to the required applied lesson credits, DMA candidates must register for applied lessons in their specific discipline during each semester in which a recital or lecture is given.

Music, MM

The School of Music offers the Master of Music (MM) in composition (arranging emphasis option), conducting (wind & choral), musicology, performance, and theory.

Admissions Requirements

All courses of graduate music study must meet the general requirements of the Graduate School as given in the Admission Criteria section of this catalog.

See the Admission Criteria section of this catalog for more information.

In addition, the School of Music imposes the following special requirements:

The Bachelor of Music degree in the chosen field of study from The University of Alabama or the equivalent from another accredited institution.

In special cases, a student holding the bachelor's degree but without a formal major in the chosen field may be admitted by examination.

Diagnostic entrance examinations are required in musicianship, music theory and writing skills; vocal performance majors also take diagnostic examinations in IPA transcription and song text translation in German, Italian, French, and, where appropriate, Latin and English. All theory and history deficiencies revealed in these examinations must be removed by the end of the first fall semester after matriculation. All deficiencies in diction revealed in these exams must be removed by the end of the first spring semester after matriculation. A schedule of remediation will be determined by appropriate faculty and the director of graduate studies (DGS) in music and may include enrollment in MUS 595 Graduate Theory Review, MUS 591 Readings in Music History, for vocal performance majors MUS 532 Graduate Diction Review. Students may not earn graduate credit in theory or history until all deficiencies in the respective areas have been removed.

Any deficiencies revealed by analysis of undergraduate transcripts prior to enrollment must be removed within one year of initial enrollment.

Information about the entrance examinations may be obtained from the director of graduate studies in music.

Individual Area Requirements

Performance

An audition on the major instrument. A complete repertoire list must be submitted, noting those works prepared for the audition.

Voice

The demonstration of a satisfactory vocal technique in the classical style, and satisfactory singing diction and comprehension in French, German, Italian and English.

Composition

Submission of a group of original works, including at least one in large form.

Theory

Submission of examples of work that illustrate analytical and writing skills. Students must have a reading knowledge of a foreign language (usually German, French, or Italian). Those who do not have this skill

at matriculation will be required to remove the deficiency, through the completion of appropriate language courses or by examination, before they are admitted to candidacy.

Musicology

Submission of work that illustrates research and writing skills. Students must have a reading knowledge of a foreign language (usually German, French, or Italian). Those who do not have this skill at matriculation will be required to remove the deficiency, through the completion of appropriate language courses or by examination, before they are admitted to candidacy.

Conducting

An audition with a University ensemble. Two major works, in contrasting styles, must be conducted. Ear training and sight-singing proficiency must be demonstrated.

Curricular Requirements

These differ with the area of focus; a complete outline of requirements in each field is contained in the Graduate Handbook of the School of Music, which may be secured from the director of graduate studies in music or may be viewed on the School of Music Web page.

Focused areas of study in musicology, theory, and composition follow Plan I, which requires a written thesis. A composition student is required to present a recital of original compositions in addition to the thesis. Focused areas of study in performance, choral conducting, wind conducting, and church music, follow Plan II, which does not require a written thesis but which does require additional course hours and a recital. The focused areas in musicology and theory require a public lecture.

All MM degrees require at least 12 hours in graduate courses in music history and music theory, with at least 6 hours in each. MUS 501 Intro Grad Stdy In Mus must be taken in the first fall semester of enrollment. A minimum of 33 semester hours of graduate work is required to complete any MM degree.

Additional Requirements:

The equivalent of one recital of works written and performed during study towards the MM degree in the School of Music. The requirement may be met in one of the following three ways:

One Recital

A public recital of performances of the student's works
The equivalent of one recital performed on multiple public recitals
The equivalent of one recital presented as a professional-quality recording produced and edited by the student

Thesis

An original composition written under the direction of the major professor during study for the MM degree

Documents original research on a topic in relevant area	
Total Hours	30

Transfer Credit

Information on transfer credit can be found in G (p. 15)graduate school Transfer policies.

Comprehensive Exam/Capstone

MM students under Plan I (thesis) must pass written comprehensive examinations in theory, history, and the major area. A description of the written comprehensive examinations is included in the Graduate Handbook of the School of Music. MM students under Plan II (non-thesis) are required to take an oral examination.

All students must pass an oral examination. For students under Plan I, the oral examination will be a defense of the thesis. For students under Plan II, the oral examination will be based on the student's coursework in the MM program and will determine the student's ability to articulate a broader perspective derived from that study. For students following Plan II, the oral examination is the final step in the completion of the degree and is administered only after all other requirements have been completed.

PHL564 Mind, Language and Reality

Hours 3

This course concerns the nature of meaning and its connection to metaphysics and epistemology. Students will study classic works by Gottlob Frege, Bertrand Russell, Saul Kripke, and others. Students will also study more recent work in philosophical semantics and its application to arguments in the philosophy of mind. This course concerns the nature of linguistic reference, meaning, and their connection to metaphysics, epistemology, and the philosophy of mind. Students will also study more recent works by David Chalmers, Amie Thomasson, Jennifer Saul, and others.

View All Courses

Philosophy, MA

The Philosophy, MA will be the only graduate philosophy program in the state of Alabama and will provide students at The University of Alabama and from the state of Alabama the opportunity for graduate study in philosophy. The concentrations in this M.A. program will also give students the opportunity to extend their philosophical studies related to Law, Medicine, or Mind/Brain to apply more successfully to and prepare for professional schools (Law and Medicine) and Ph.D. graduate schools (Philosophy, Psychology and the Neurosciences). This program will also help prepare students for their professional careers afterward in medicine, law, public service, and more, by helping them develop valuable general skills: analytic methods, critical thinking, problem solving, communication, argument building and information organization.

Admission

The Department of Philosophy maintains a selective M.A. program and invites applications for consideration by the department's Graduate Studies Committee. Admissions to the M.A. program are only considered for the Fall semester. While funding for M.A. students is uncommon, applicants should apply by December 1 for full funding consideration. Otherwise, applications are due by April 15. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Statement of purpose
- Writing sample

- Resume or CV
- Two letters or recommendation

See the Admission Criteria section of this catalog for more information.

Transfer Credit

Graduate School information on Transfer Credit (p. 15).

Plan I

Students who choose Plan I will complete 24 credit hours of course work, 6 credit hours of Philosophy Thesis Research, a thesis, and a final oral examination of the thesis. Plan I students will complete 6 program required credit hours (PHL 500 Proseminar and PHL 590 Capstone), 6 concentration required credit hours, 3 concentration specific elective credit hours, and 9 common elective credit hours.

Plan II

Students who choose Plan II will complete 30 credit hours of course work. Plan II students will complete 6 program required credit hours (PHL 500 Proseminar and PHL 590 Capstone), 6 concentration required credit hours, 3 concentration specific elective credit hours, and 15 common elective credit hours.

- Chao-Chin Yang

Graduate credit will not be granted to physics students for 400-level physics or astronomy courses. Graduate students enrolled in 500-level courses that are also offered at the 400 level are expected to perform extra work of an appropriate nature.

Astronomy Courses

AY521 Theoretical Astrophysics

Hours 3

This course provides a broad introduction to the theoretical foundations of astrophysical phenomena, demonstrating how fundamental phenomenology arises from physical laws. Several broad domains of astrophysics are covered, including planetary and stellar orbits, radiation, radiative transfer, ionization, star and planet formation, stellar evolution, binary stars, special and general relativity (including black holes), galactic structure and dynamics (including dark matter), active galaxies, spacetime structure, formation of large scale matter structure, and cosmology (including the accelerating expansion of the Universe, dark energy, and Grand Unification of forces in the early Universe).

AY533 Observational Techniques

Hours 3

Theoretical and practical aspects of modern astronomical observational techniques. Photometry, spectroscopy, interferometry, and optical and radio data reduction and image processing.

Physics Courses

PH501 Classical Dynamics

Hours 3

Variational principles and Lagrange's equations; two-body central-force problems; kinematics of rigid-body motion; rigid-body equations of motion; special relativity; Hamilton's equations of motion; and canonical transformations.

PH505 Physics For Science Teachers

Hours 3

Selected topics in contemporary physics for high school and post-secondary science teachers.

[View All Courses](#)

Physics, MS

The Department of Physics and Astronomy offers the master of science degree in physics with the option of a focused area of study in astronomy. Although we offer a course-only MS, our graduate program is mostly oriented toward current physics research.

Research toward a degree may be conducted in either experimental/observational or theoretical areas. Experimental programs include materials physics, particle physics, astrophysics, and particle astrophysics.

Admissions

A student who wishes to take graduate work leading to the MS or PhD degree should have the equivalent of an undergraduate major in physics. Any undergraduate courses required to complete a student's preparation should be taken as soon as possible. A comprehensive background in general physics is considered as important as mastery of a specialized field.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

M.S. in Physics (thesis option)

A total of 24 semester hours of coursework is required (18 of which must be in physics and astronomy), in addition to 6 semester hours of research. Physics students must take:

Code and Title		Hours
Required Courses		
PH 501	Classical Dynamics	3
PH 531	Electromagnetic Theory	3
PH 541	Quantum Mechanics	3
PH 571	Statistical Physics	3
PH 599	Thesis Research	6
PH 597	Physics Seminar (taken every semester in residence)	1
Elective Courses		9

All full-time students must take one hour of seminar PH 597 Physics Seminar each semester. Up to three semester hours of pass/fail coursework ((PH 597 Physics Seminar, PH 598 Non-Thesis Research) and up to three semester hours of PH 590 Research Techniques can count toward the 24 hour course requirement. An oral examination covering coursework and the thesis is required for completion of the degree.

M.S. in Physics (non-thesis option)

A total of 30 hours of coursework is required, 24 of which must be in physics and astronomy. Students must take:

Code and Title		Hours
Required Courses		
PH 501	Classical Dynamics	3
PH 531	Electromagnetic Theory	3
PH 541	Quantum Mechanics	3
PH 571	Statistical Physics	3
PH 597	Physics Seminar (taken every semester in residence)	1
Elective Courses		15

All full-time students must take one hour of seminar PH 597 Physics Seminar each semester. Up to three semester hours of pass/fail coursework (PH 597, PH 598 Non-Thesis Research) and up to three

semester hours of PH 590 Research Techniques can count toward the 30 hour course requirement. An oral examination covering coursework is required for completion of the degree.

M.S. in Physics with Astronomy focused area of study (thesis option)

A total of 24 semester hours of coursework is required (18 of which must be in physics and astronomy), in addition to 6 semester hours of research (PH 599 Thesis Research). Students must take:

Code and Title		Hours
Required Courses		
PH 501	Classical Dynamics	3
PH 531	Electromagnetic Theory	3
PH 541	Quantum Mechanics	3
AY 521 or AY 533	Theoretical Astrophysics Observational Techniques	3
AY 597	Astrophysics Seminar	1
Elective Courses		9

All full-time students must take one hour of seminar AY 597 Astrophysics Seminar each semester. Up to three semester hours of pass/fail coursework (AY 597,PH 598 Non-Thesis Research) and up to three semester hours of PH 590 Research Techniques can count toward the 24 hour course requirement. An oral examination covering coursework and the thesis is required for completion of the degree.

M.S. in Physics with Astronomy focused area of study (non-thesis option)

A total of 30 hours of coursework is required, 24 of which must be in physics and astronomy. Students must take:

Code and Title		Hours
Required Courses		
PH 501	Classical Dynamics	3
PH 531	Electromagnetic Theory	3
PH 541	Quantum Mechanics	3
AY 521 or AY 533	Theoretical Astrophysics Observational Techniques	3
AY 597	Astrophysics Seminar (taken each semester in residence)	1
Elective Courses		15

All full-time students must take one hour of seminar AY 597 Astrophysics Seminar each semester. Up to three semester hours of pass/fail coursework (AY 597,PH 598 Non-Thesis Research) and up to three semester hours of PH 590 Research Techniques can count toward the 30 hour course requirement. An oral examination covering coursework is required for completion of the degree.

Precision Timing Concentration

Students can take a precision timing concentration if they complete the following courses. This concentration is only available as an option with completion of a thesis.

Precision Timing Concentration (Available only for thesis option)		Hours
Electives - Choose two from the following:		6
PH 590	Research Techniques	
PH 542	Quantum Mechanics	
PH 532	Electromagnetic Theory	

PH 534	Digitl Elect Comp Interfc	
PH 681	Adv Solid State Physics	
PH 591	Advanced Laboratory	
Electrical Engineering Courses		
ECE 593	Special Topics (Control Systems Analysis)	3
ECE 579	Digital Control Systems	3
ECE 693	Special Topics (in Precision Timing Applications)	3
Statistics Course		
MATH 551	Math Stats W/Applict n I	3
Total Hours		18

Transfer Credit

Transfer of credit should be discussed with the departmental graduate director before submitting a transfer request to the graduate school.

See general Academic Policies: Degree Requirements for Masters Degrees (p. 15).

Accelerated Master's Program

Accelerated master's students must fulfill the same requirements, except that they need not register for PH 597 or AY 597 during the second-to-last year of their program.

See general Academic Policies: Admission Criteria for the Accelerated Masters Program (p. 7).

Comprehensive Exam

All master's students must complete a comprehensive (oral) exam with a committee approved by the department. For students completing a masters with thesis, their thesis defense forms the comprehensive exam.

Time Limits for Degree Completion Requirements

See general Academic Policies: Degree Requirements for Masters Degrees (p. 15).

Student Progress Requirements

Students are expected to complete the master's program within 2 years after entry. Departmental assistantships are generally targeted exclusively for students pursuing a PhD, however see the "Funding for Students" tab for how the progress requirement may pertain to continuation of an assistantship.

Note that the general Academic Policies: Grades and Academic Standing (p. 28) pertaining to Academic Standing provide for dismissal of students based on their GPA and hours.

Academic Misconduct Information

See general Academic Policies: Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

See general Academic Policies: Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

See General Information: Grievance Procedure (p. 255).

Grades and Academic Standing

See general Academic Policies: Grades and Academic Standing (p. 28).

Graduate School Deadlines Information

See Graduate School Deadlines.

Application for Graduation Information

See the Application for Graduation sub-section of the general Academic Policies: Degree Requirements for Master's Degrees (p. 15).

Physics, PhD

Students pursuing a doctor of philosophy (Ph.D.) in Physics are expected to acquire and demonstrate proficiency in the major topics of physics as well as perform original research in physics or astrophysics culminating in a dissertation. Specialties available in our department include condensed matter and materials physics, particle physics, astrophysics, astroparticle physics, and the physics of precision timing instruments.

Admissions

Applicants are expected to have, at minimum, the equivalent of an undergraduate degree in physics.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Courses

A total of 48 hours of coursework is required, 36 of which must be in physics or astronomy.

24 hours of dissertation research is also required.

Required coursework		Hours
Core courses:		
PH 501	Classical Dynamics	3
PH 531	Electromagnetic Theory	3
PH 532 or AY 640	Electromagnetic Theory (Substitution available for astrophysics or astroparticle physics) Radiation Processes Astrophys	3
PH 541	Quantum Mechanics	3
PH 542 or AY 521	Quantum Mechanics (Substitution available for astrophysics) Theoretical Astrophysics	3
PH 571	Statistical Physics	3
Sub-area courses:		
12 hours approved by advisor and department		12
Seminar:		
Physics or Astronomy Seminar (PH/AY 597, taken every semester in residence)		9
Electives		9
Dissertation Research		24
Total Hours		72

The 12 hours of graduate courses requiring approval will be within the student's chosen sub-area and approved by both their advisor and the departmental advising committee. A further 18 hours should be determined in consultation with the student's advisor, at least 6 of which must be in physics or astronomy. Example sub-areas include condense matter, particle, astroparticle, and astrophysics, each of which may be experimental or theoretical. The applicability of core course substitutions will be consistent with the sub-area courses chosen. All full-time students in residence must take one hour of seminar (PH 597 Physics Seminar or AY 597 Astrophysics Seminar) appropriate to their sub-area each semester.

See Graduation Requirements in the general Academic Policies concerning Grades and Academic Standing (p. 28) for limitations on the number of hours that are allowed to be pass/fail.

Precision Timing Concentration

Students are eligible for the precision timing concentration if their curriculum includes the courses below.

Precision Timing Concentration Curriculum		Hours
Choose six hours from the following:		6
PH 542	Quantum Mechanics	
PH 532	Electromagnetic Theory	
PH 534	Digitl Elect Comp Interfc	
PH 681	Adv Solid State Physics	
PH 591	Advanced Laboratory	
Electrical Engineering courses		
ECE 593	Special Topics (Control Systems Analysis)	3
ECE 579	Digital Control Systems	3
ECE 693	Special Topics (in Precision Timing Applications)	3
Statistics courses		
MATH 551	Math Stats W/Applictn I	3
MATH 554	Advanced Math Statistics I	3
Choose six hours from the following:		6
ECE 508	Communications	
ECE 509	Communications Lab	
ECE 530	Solid State Devices	
ECE 561		
MATH 557	Stochastic Processes I	
Courses outside the above may be used with approval from the Department Chair.		
Total Hours		27

Transfer Credit

Students should consult with the department graduate director before submitting transfer requests to the graduate school. Individual course transfers and block transfers for students who hold a master's degree are considered based on similarity of coverage.

See also the Transfer of Credit subsection in the general Academic Policies concerning Degree Requirements (p. 21).

Doctoral Plan of Study Requirement

The student's Ph.D. Plan of Study must be approved by the student's research advisor and the department before submission to the graduate school.

See Plan of Study in the general Academic Policies concerning Degree Requirements (p. 21) for additional requirements, including the deadline.

Qualifying Exams

There are two separate examinations each prospective PhD candidate must pass: the (written) qualifying exam and the (oral) preliminary exam.

The physics Ph.D. qualifying exam consists of 4 separate sections of written exam on advanced undergraduate physics. Exams are administered just before the start of each Fall and Spring semester, 2 at a time, with Classical Mechanics and Electromagnetism offered in January and Quantum Mechanics and Thermal Physics offered in August.

Each section need not be re-taken once passed. Beginning after the first semester (i.e. the exams offered at the beginning of the second semester enrolled), financial support may be withdrawn if a student does not pass at least one as yet un-passed section each time it is offered. Students become ineligible for a Ph.D. degree if the qualifying exam is not passed within 5 exam administrations after the first semester, corresponding to completion well before the end of the third year. (Students entering in Fall have 3 attempts at the January exams and 2 attempts at the August exams, and students entering in Spring have 3 attempts at the August exams and 2 attempts at the January exams.)

Due to disruptions from COVID-19, students who entered during the 2019-20 academic year have one more year than outlined above.

Admission to Candidacy Requirements

Passing both the (written) qualifying exam (described above) and the (oral) preliminary exam (described here) are required for admission to candidacy.

The preliminary exam is an oral exam on the student's research plan and on courses in the student's area of specialization, and corresponds to the examination mentioned in the Preliminary or Comprehensive Examination sub-section of the Academic Policies: Degree Requirements for Doctoral Degrees (p. 21). The makeup of the committee administering the preliminary exam must be approved by the department. The student's research supervisor does not sit on the preliminary exam committee.

Members of the committee must include faculty outside the sub-area in which the student is working and specialists in both theory and experiment. Students are required to submit a written research plan to the committee in advance of the exam.

See also general guidelines in the Admission to Candidacy sub-section and the Dissertation Proposal sub-section in the general Academic Policies: Degree Requirements for Doctoral Degrees (p. 21).

Continuous Enrollment Policy

See requirements concerning Continuous Dissertation or Document Registration in the general Academic Policies section (p. 21).

Dissertation Requirements

The makeup of the dissertation committee must be approved by the department. Members of the committee must include faculty outside the sub-area in which the student is working and specialists in both theory and experiment.

See also guidelines in the Dissertation sub-section in the general Academic Policies: Degree Requirements for Doctoral Degrees (p. 21).

Dissertation committees in the department of physics and astronomy frequently include individuals from other universities as their outside member.

Time Limits for Degree Completion Requirements

All requirements must be completed in the seven years (21 fall, spring and summer semesters) following admission to the program. Extensions up to the limit imposed by the general Academic Policies section are considered on a case-by-case basis.

See also guidelines in the Time Limits subsection of the general Academic Policies: Degree Requirements for Doctoral Degrees (p. 21).

Student Progress Requirement

Progress requirements that pertain to degree completion are outlined above in the Qualifying Exams sub-section (a 2.5 year limit) and the Time Limits sub-section (a 7 year limit).

Many, but not all, students in the department of physics and astronomy receive financial support through teaching or research assistantships.

These students are evaluated on a semester and annual basis by the departmental graduate advising committee and/or the faculty member(s) supervising their assistantship to ensure the student meets progress expectations before continuing support. Expectations relate to progress in qualifying exams, prompt completion of coursework, and performance of original research. Quality performance in duties specified by the assistantship itself are also expected. To maintain support, generally students should complete coursework and qualifying exams in 2 years, be admitted to candidacy no later than year 4, and complete their degree by the end of year 6. A wide variety of factors are considered for each individual and more detailed procedures for evaluating progress can be obtained by consulting the departmental graduate director or the graduate advising committee.

Academic Misconduct Information

See the information in the general Academic Policies section on Misconduct (p. 7).

Withdrawals and Leave of Absence Information

See guidelines in the general Academic Policies section on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

See general section on Grievance Procedures. (p. 255)

Grades and Academic Standing

See general Academic Policies section on Grades and Academic Standing (p. 28).

Graduate School Deadlines Information

Consult the graduate school deadlines page for relevant deadlines.

Application for Graduation Information

See guidelines concerning Application for graduation in the general Academic Policies section (p. 21).

Department of Political Science

- Majors
 - Political Science, MA (p. 407)
 - Political Science, PhD (p. 409)
 - Public Administration, MPA (p. 412)

Chair

- Smith, Joseph

Professors

- Albrecht, Holger
- Caillier, James
- DeRouen, Karl
- Fording, Richard
- Katsinas, Steven
- McKnight, Utz
- Smith, Joseph

Associate professors

- Hale, Christopher
- Levine, Daniel
- Linken, Allen
- Miller, Ted
- Patton, Dana
- Royed, Terry

Assistant professors

- Del Ponte, Alessandro
- Edgell, Amanda
- Kalaycioglu, Elif
- Hawley, George
- Ji, Hyunjung
- Wagner, Regina

Program Directors

- Albrecht, Holger
- DeRouen, Karl
- Fording, Richard
- Linken, Allen
- Patton, Dana

Prerequisite: Graduate standing.

Note: The MA is earned en route to the Ph.D.

PSC500 Departmental Seminar I

Hours .5-1.5

This course covers information on teaching, research, and the profession of political science.

PSC501 Departmental Seminar II

Hours .5-1.5

This course covers information on teaching, research, and the profession of political science. A continuation of PSC 500.

[View All Courses](#)

Political Science, MA

The Master of Arts (MA) degree primarily serves students who seek a career in public service, or who intend to pursue a PhD degree at a later date, either at the University of Alabama or at another institution. Students in the MA program will take many of the same courses that PhD students take. MA students typically complete the degree in two years. The Department of Political Science offers two paths to the MA degree in Political Science, which are detailed in the Requirements tab. All students in the MA program are subject to the rules and conditions specified in this handbook and in the University’s Graduate Catalog.

Admissions

The Political Science Department maintains a selective MA program and invites applications for consideration by the department’s Graduate Studies Committee. Admissions to the M.A. program are only considered for the Fall semester. While funding for M.A. students is uncommon, applicants should apply by December 1 for full funding consideration. Otherwise, applications are due by February 15.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- 3 letters or recommendation
- A resume

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students will be expected to attain a satisfactory degree of knowledge and competence in two of the following fields of Political Science: American Politics, Comparative Politics, International Relations, Public Policy & Administration, and Political Theory. Students choose a major field and minor field. They also choose between two study plans: Plan I (thesis process requirement) and Plan II (non-thesis process requirement). In either event, students pursuing the M.A. degree must also complete 6 semester hours of methodology courses (PSC 521 Research Design and PSC 522 Quantitative Methods) along with 3 semester hours of professionalization (PSC 500 and PSC 501; 1.5 credits each).

MA Curriculum (Plan I)		Hours
Required Courses		
Major field: 12 credit hours (4 courses)-core course required		
Minor: 6 credit hours (2 courses)-core course required		
Methods: 6 credit hours (2 courses)		
PSC 521	Research Design	3
PSC 522	Quant Methods PSC I	3
Elective: 3 credit hours (1 course)		
Professionalization: 3 credit hours (2 1.5-hour courses)		
PSC 500	Departmental Seminar I	1.5
PSC 501	Departmental Seminar II	1.5
Thesis: 6 credit hours (2 courses)		
PSC 599	Thesis Research	1-6
Total: 36 credit hours (13 courses)		

MA Curriculum (Plan II)		Hours
Required Courses		
Major field: 12 credit hours (4 courses)-core course required		
Minor: 6 credit hours (2 courses)-core course required		

Methods: 6 credit hours (2 courses)		
PSC 521	Research Design	3
PSC 522	Quant Methods PSC I	3
Elective: 9 credit hours (3 courses)		
Professionalization: 3 credit hours (2 1.5-hour courses)		
PSC 500	Departmental Seminar I	1.5
PSC 501	Departmental Seminar II	1.5
Total: 36 credit hours (13 courses)		

Transfer Credit

M.A. students may request to transfer a maximum of 9 credit hours from another institution, subject to Departmental approval. Students must provide syllabi for all courses for which transfer credit is requested. Decisions on granting transfer credit will be made by the Director of Graduate Studies in consultation with the faculty member(s) teaching the most nearly equivalent UA course. In order to receive transfer credit, courses must be judged to have a workload and content comparable to departmental graduate courses. Core seminars in each field must be taken in residence.

Refer to the Graduate School [Master's degree requirements \(p. 15\)](#) page for more information.

Accelerated Master's Program

The Department of Political Science participates in UA's Accelerated Master's Program (AMP), which allows gifted and highly motivated Political Science and International Studies majors to obtain an MA degree while completing their Bachelor of Arts (BA) degree. Students need to meet UA's residency requirement and have completed three-quarters of the hours required for the major by the start date of the program. Based on normal 3-hour courses, this means completion of 24 hours, or 8 courses for the BA in Political Science and 27 hours, or 9 courses for the BA in International Studies. International Studies majors applying to the MA program in Political Science must have completed a minimum of 9 PSC credit hours by the start date of the graduate program.

Refer to the Graduate School [accelerated master's program \(p. 7\)](#) page for more information.

Comprehensive Examination

The written comprehensive examination will cover the student's major field and will require integration of material across courses in the field. Students are eligible to take comprehensive exams no earlier than the last semester of their required coursework. Students with incompletes may not take comprehensive examinations.

Major field comprehensive examinations for the Fall semester will take place the third Tuesday of each September. Major field comprehensive examinations for the Spring semester will take place during the second half of March at a date to be determined by the Director of Graduate Studies each year. The Director of Graduate Studies solicits exam coordinators for each field. The exam coordinators will develop the comprehensive examination in consultation with relevant colleagues in the field.

Plan I

Students who choose Plan I will complete 36 credit hours of course work, 6 credit hours of PSC 599 Thesis Research, a thesis, and a final oral examination of the thesis. Plan I students will complete 12 credit hours in the major field, 6 credit hours in the minor, and 3 elective credit hours. In addition, students must complete PSC 521 Research

Design and PSC 522 Quantitative Methods I, the PSC 500 and PSC 501 Professionalization Seminars, as well as the core seminar in their major field and minor field.

Plan II

Students who choose Plan II will complete 36 credit hours of course work and a written comprehensive examination in their major field. Students will complete 12 credit hours in the major field, 6 credit hours in the minor, and 9 elective hours. In addition, students must complete PSC 521 Research Design and PSC 522 Quantitative Methods I, the PSC 500 and PSC 501 Professionalization Seminars, as well as the core seminar in their major field and minor field.

Time Limits for Degree Completion Requirements

MA students typically complete the degree in two years.

Refer to the Graduate School [Master's degree requirement \(p. 15\)](#) page for more information.

Student Progress Requirement

Students in the MA program will take many of the same courses that PhD students take and will be expected to conduct the same course work to qualify for course credits. Students are required to meet with the Director of Graduate Studies prior to registering for classes each semester.

Additional Academic Requirements

MA students are required to register for PSC 500 Departmental Seminar I in the Fall semester and PSC 501 Departmental Seminar II in the Spring semester. These courses are professional socialization seminars that are offered on a pass/fail basis for 1.5 credit each. These courses cover numerous topics such as effective teaching strategies; attending and participating in political science conferences; publishing your work in professional journals; the academic job market; and ethical issues facing instructors and researchers. These courses will meet approximately once each month, with the Director of Graduate Studies and/or a faculty member coordinating the discussion. In addition to the class meetings, students will also attend research presentations and job talks as part of the professionalization process.

Academic Misconduct Information

The Department is committed to creating and maintaining a pleasant and safe working environment for all of its faculty, staff, and students. We do not tolerate sexual harassment of any sort, and offenders will be reported to the proper University authorities.

Refer to the Graduate School [academic misconduct policy \(p. 7\)](#) for more information.

Withdrawals and Leave of Absence Information

Refer to the Graduate School [withdrawal and leave of absence policy \(p. 244\)](#) for more information.

Academic Grievances Information

Refer to the Graduate School [academic grievance procedure \(p. 255\)](#) for more information.

Grades and Academic Standing

Refer to the Graduate School grades and academic standing (p. 28) for more information.

Graduate School Deadlines Information

Refer to the Graduate School student deadlines page for more information.

Application for Graduate Information

Refer to the Graduate School [Master's degree requirements](#) (p. 15) page for more information.

Political Science, Ph.D.

The Department of Political Science offers a Political Science, Doctor of Philosophy (PhD).

Admissions

The PhD is primarily a research degree, and students in this program will be trained rigorously in the literature and methods necessary to conduct original research in the discipline. Students will also gain valuable experience in classroom teaching, thus improving their prospects on the academic job market and preparing them for life as a full-time faculty member.

The Political Science Department maintains a selective PhD program and invites applications for consideration by the department's Graduate Studies Committee. Applicants should submit their applications by December 1 for full funding consideration. The final deadline for all applications is February 15 for admission the following fall.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- 3 letters or recommendation
- A resume

Graduate Teaching Assistantships (GTAs) are available through the Department on a competitive basis. All new applicants to the Ph.D. program will automatically be considered for funding. Most GTA positions are awarded beginning in the fall term.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students will be expected to attain a satisfactory degree of knowledge and competence in two of the following fields of Political Science: American Politics, Comparative Politics, International Relations, Public Policy & Administration, and Political Theory.

PhD students must complete at least 39 credit hours of graduate coursework. Students will designate one field as the major field of study and the other as a minor field. At least 15 hours above the bachelor's degree (including transferred credit) must be in the major field, and 9 hours in the minor field. Students pursuing the PhD degree must also complete 9 semester hours of methodology courses: PSC 521 Research Design, PSC 522 Quantitative Methods I, and PSC 621 Quantitative Methods II. Please see "PhD Courses by Subfield" below for a detailed list of the courses that count for each subfield.

PhD Curriculum	Hours
Major field: 5 courses - core course required	15
1st Minor: 3 courses - core course required	9

Methods: 3 courses

PSC 521	Research Design	3
PSC 522	Quant Methods PSC I	3
PSC 621	Quant Meth In PSC II	3
Elective: 1 course		3

Professionalization: 2 courses

PSC 500	Departmental Seminar I	1.5
PSC 501	Departmental Seminar II	1.5

Total Hours **39**

PhD Courses by Subfield **Hours**

Required Department/Methods Courses:

PSC 500	Departmental Seminar I	1.5
PSC 501	Departmental Seminar II	1.5
PSC 521	Research Design	3
PSC 522	Quant Methods PSC I	3
PSC 621	Quant Meth In PSC II	3

Independent Studies/Directed Readings/Thesis Research (not required; can potentially count for any field)

PSC 595	Dir Reading & Research	1-6
PSC 598	Dir Reading & Research	1-6
PSC 679	Internship & Research	3-6
PSC 699	Dissertation Research (Required for PhD)	1-12

American Politics

PSC 610	American Core (Required if majoring or minoring in subfield)	3
PSC 511	Public Opinion	3
PSC 515	US Institutions	3
PSC 552	American Political Thought	3
PSC 611	Amer Polit Behavior	3
PSC 612	Judicial Politics	3
PSC 614	Race and American Politics	3
PSC 616	Topics In American Politics	3

Public Policy and Administration

PSC 562	Public Personnel Admin	3
PSC 565	Foundations of Public Admin	3
PSC 668	Program Evaluation	3
PSC 664	Public Policy Analysis	3
PSC 662	Organization Theory	3
PSC 667	Public Budgeting	3
PSC 665	Local Government Admin	3
PSC 522	Quant Methods PSC I	3
PSC 679	Internship & Research	3-6

International Relations

PSC 642	Core Seminar in IR (Required if majoring or minoring in subfield)	3
PSC 542	Internatl Conflict	3
PSC 641	Issues Internatl Rel	3
PSC 643	IR Theory (I): Realism	3
PSC 645	IR Theory (II): IR-Liberalism	3
PSC 646	Civil Wars	3
PSC 647	Foreign Policy Decision Making	3

Comparative Politics

PSC 631	Sem Comparative Politic (Required if majoring or minoring in subfield)	3
PSC 632	Spec Topics Comparative Pol	3
Political Theory		
PSC 651	Political Theory Sem (Required if majoring or minoring in subfield)	3
PSC 552	American Political Thought	3
PSC 653	Special Topics	3

Transfer Credit

PhD students may request to transfer a maximum of 19 credit hours from another institution, subject to Departmental approval. Students must provide syllabi for all courses for which transfer credit is requested. Decisions on granting transfer credit will be made by the Director of Graduate Studies in consultation with the faculty member(s) teaching the most nearly equivalent UA course. In order to receive transfer credit, courses must be judged to have a workload and content comparable to departmental graduate courses. Core seminars in each field must be taken in residence.

Refer to the Graduate School Doctoral degree requirements (p. 21) page for more information.

Doctoral Plan of Study Requirement

Refer to the Graduate School Doctoral degree requirements (p. 21) page for more information.

Comprehensive Exams

These examinations will be taken in the student's major field of study and the minor field. Students are eligible to take comprehensive exams no earlier than the semester after completing their required coursework, and when they have completed not less than two full years of graduate study. Unless extraordinary extenuating circumstances prevent it, graduate students are expected to take comprehensive exams in both their major and minor fields the semester after completing the required coursework.

Major field comprehensive examinations for the Fall semester will take place the third Tuesday of each September, and a minor field comprehensive exam will take place the fourth Tuesday of each September. Major field comprehensive examinations for the Spring semester will take place the second half of March on a date to be determined by the Director of Graduate Studies each year. Spring minor field comprehensive examinations will take place one week after the major field examinations. The Director of Graduate Studies solicits exam coordinators for each field. The exam coordinators will develop the comprehensive examination in consultation with relevant colleagues in the field.

Fieldwork/Practicum/Internship Requirements

Foreign language competence may be required of Ph. D. students if appropriate to the student's research interests as determined by relevant faculty in the student's major field of study.

Admission to Candidacy Requirements

Students who have fulfilled the course requirements and passed the comprehensive examinations in their major field and minor field become PhD candidates. No student may formally declare a dissertation topic until advancing to candidacy, but earlier preliminary inquiry and research on the dissertation topic is strongly encouraged.

Continuous Enrollment Policy

Following admission to candidacy, students must remain in continuous registration until completion of the dissertation. Students must register each semester for at least one hour of PSC 699 Dissertation Research.

Refer to the Graduate School Doctoral degree requirements (p. 21) page for more information.

Dissertation Requirements

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field for the PhD. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work. Individual chapters may be co-authored so long as the student is the first author, and such co-authoring must be approved by the committee. Typically, other students will not be co-authors to dissertation chapters except under unanimous consent by the dissertation committee. Students who have already defended prospectuses can be retrospectively approved for article-style dissertations. A minimum of eighteen credit hours of PSC 699 Dissertation Research is required for the PhD.

The dissertation committee consists of a minimum of five members. Faculty from the University of Alabama Department of Political Science must make up a majority of the committee, and the committee must include at least one member from outside the University of Alabama Department of Political Science. Typically, the chair of the dissertation committee will be a full (i.e. tenured) member of the Graduate Faculty and tenured member of the Department of Political Science. The dissertation committee is formally established by the department chair. All members must be approved by the dean of the Graduate School.

Students are expected to submit and defend their completed dissertation prospectus by the end of the semester following successful completion of comprehensive examinations. This will typically be the end of the sixth semester. The dissertation committee chair will determine when the prospectus is ready for distribution to the dissertation committee. Upon approval by the dissertation committee chair and consent of the dissertation committee, an oral defense of the prospectus will occur.

Time Limits for Degree Completion Requirements

All requirements for the PhD program must be completed within the nine-year period (27 fall, spring, and summer semesters) following admission to the PhD program if the student enters the program without a Master's degree in Political Science. Students entering the program

with a Master's degree must complete all requirements within eight years (24 fall, spring, and summer semesters).

Refer to the Graduate School Doctoral degree requirements (p. 21) page for more information.

Student Progress Requirement

To be making "good progress", students are generally expected to: 1) complete all coursework by the end of the fourth semester; 2) take comprehensive examinations during the fifth semester; 3) successfully defend the prospectus by the end of the sixth semester; and 4) demonstrate substantive progress on their dissertation each semester of taking 699, as determined by the dissertation advisor.##Students who fail to maintain good progress in the program risk dismissal.##Sometimes life events can complicate such a timeline, but students will typically be expected to adhere to this schedule. Substantial deviations must be discussed with and approved by both the Director of Graduate Studies and the Department Chair.

After the end of each Spring semester (prior to May 15), there will be a faculty-wide review of all graduate students.##We anticipate most of these reviews will be positive, and all students will receive brief written feedback from the Director of Graduate Studies regarding their review.

However, if students are deemed not to be making sufficiently "good progress" through the program, they will be notified in writing that they have until the end of the spring of the following school year to get back to making degree progress, and they will be given clear guidelines for remediation. Typically, this will mean getting back on time with the degree schedule elaborated above.

If the student fails to complete the remediation plan by the time of the next faculty-wide review in May, the student may be dismissed from the program with the opportunity to earn a Master's degree.

If a student fails to take comprehensive examinations by the end of the fifth semester, that student will be notified in writing by the Director of Graduate Studies that they must take comprehensive exams by the end of the sixth semester. Failure to do so may result in dismissal from the program.##Similarly, if a student fails to defend a prospectus by the end of the sixth semester, that student will be notified in writing by the Director of Graduate Studies that they must defend the prospectus by the end of the seventh semester.##Failure to do so may result in dismissal from the program with a Master's degree.

Students may petition the Director of Graduate Studies for a delay in taking comprehensive examinations and defending the prospectus under extraordinary circumstances (e.g., medical emergency).

Additional Academic Requirements

First-year Ph.D. students are required to register for PSC 500 Departmental Seminar I in the Fall semester and PSC 501 Departmental Seminar II in the Spring semester. These courses are professional socialization seminars that are offered on a pass/fail basis for 1.5 credit each. These courses cover numerous topics such as effective teaching strategies; attending and participating in political science conferences; publishing your work in professional journals; the academic job market; and ethical issues facing instructors and researchers.

These courses will meet approximately twice each month, with the Director of Graduate Studies and/or a faculty member coordinating the discussion. In addition to the class meetings, students will also attend research presentations and job talks as part of the professionalization process.

Academic Misconduct Information

Refer to the Graduate School academic misconduct policy (p. 7) page for more information.

Withdrawals and Leave of Absence Information

Refer to the Graduate School withdrawals and leave of absence policy (p. 244) page for more information.

Academic Grievances Information

Refer to the Graduate School academic grievance procedure (p. 255) page for more information.

Grades and Academic Standing

Refer to the Graduate School grades and academic standing (p. 28) page for more information.

Graduate School Deadlines Information

Refer to the Graduate School student deadlines page for more information.

Application for Graduate Information

Refer to the Graduate School Doctoral degree requirements (p. 21) page for more information.

Graduate Teaching Assistantships (GTAs) are available through the Department on a competitive basis for Ph.D. students. All new applicants to the Ph.D. program will automatically be considered for funding. Most GTA positions are awarded beginning in the Fall term. To ensure full consideration for GTA positions applicants must submit all required application materials by the application deadline. Funding decisions will begin soon after that and will continue until all positions are filled.

International students who are awarded GTA positions must enroll in the International Teaching Assistant Program (ITAP) and pass a proficiency exam before teaching their own courses. They must pass this exam by the end of the summer following their first year of funding or risk losing funding.

In addition to GTA positions, the Graduate School and College offer fellowships and financial awards. All new applicants to the Ph.D. program are considered for these fellowships and awards. The decision process on these awards runs from December through early March. Applications received by December 1 will be eligible for consideration for all rounds of funding.

Graduate Teaching Assistants are appointed for a term of either one semester or one academic year (although GTA's may be subject to immediate termination if they repeatedly fail to meet their GTA responsibilities). In most cases, assistantships are available for a total of 10 semesters. Application is required each academic year. Renewal is not automatic. Factors affecting renewal include maintenance of an exemplary academic record, progress toward the degree sought, and successful conduct of GTA duties.

To remain eligible for continuing appointment, the Graduate School requires that a student's overall grade point average must always remain at or above 3.00. The computation of grade point averages includes treating incompletes as grades of "F" if they are not removed within 2 weeks of the semester following that in which the incomplete grade was given. If such a computation occurs, a GTA will have the assistantship

removed by action of the Graduate Studies Committee, unless acceptable arrangements are made, or the grade of incomplete is removed.

Each spring semester, the Director of Graduate Studies will send out an email announcing the deadline to apply for a GTA position for the following academic year. In a few cases, typically in conjunction with a Graduate Council Fellowship or some other fellowship, the Department will commit to providing an assistantship to a student for more than one year. In such cases, the student should still apply for re-appointment to remind the graduate studies committee to hold a GTA slot for the student. All commitments of this type are contingent upon the students remaining in good standing in the graduate program and performing all GTA duties in keeping with the Department's specifications and standards. As with other GTAs, multi-year GTAs must meet all Department and Graduate School requirements, including those relating to minimum grade point averages.

To be making "good progress", students are generally expected to: 1) complete all coursework by the end of the fourth semester; 2) take comprehensive examinations during the fifth semester; 3) successfully defend the prospectus by the end of the sixth semester; and 4) demonstrate substantive progress on their dissertation each semester of taking 699. Students who fail to maintain good progress in the program risk loss of GTA funding and/or potential invitation to exit the PhD program with an M.A. degree. Sometimes life events can complicate such a timeline, but students will typically be expected to adhere to this schedule. Substantial deviations must be discussed with and approved by both the Director of Graduate Studies and the Department Chair.

After the end of each Spring semester (prior to May 15), there will be a faculty-wide review of all graduate students carrying a graduate teaching assistantship. We anticipate most of these reviews will be positive, and all students will receive brief written feedback from the Director of Graduate Studies regarding their review. However, if students are deemed not to be making sufficiently "good progress" through the program, continued GTA funding may be at risk, and post-comps students may be recommended to exit the program with a Master's degree. Pre-comps students will be invited to take M.A. comprehensive exams in the Spring semester of the second year and exit with a Master's degree.

Emphasis will be given to first-year students. If the first-year reviews by faculty indicate serious concern about a student's ability to be successful in the PhD program, faculty in attendance will vote regarding whether the student should be steered toward exit from the PhD program with an M.A. degree. This would include a second year of funding to finish the M.A.

Public Administration, MPA

The mission of the Master of Public Administration (MPA) program at The University of Alabama is to prepare students to lead and manage public service organizations. We strive to develop critical thinking skills enabling our graduates to formulate policies and approaches to management while ensuring the integrity of the public service. Our program emphasizes public service values while facilitating intellectual and professional development through learning experiences that integrate theory with practice. We provide an institutional culture that promotes diversity and advances governance while preparing students to reach standards of excellence in the public service.

The Master of Public Administration (MPA) program is designed to prepare students for leadership and administrative roles in federal, state, and local government. It is directed at pre-career students seeking to enhance their employability and level of entry into public service, as well as students already working in public service who desire to upgrade their skills, enhance promotion opportunities, or deepen their appreciation for

the science and art of public administration. Through exposure to a rich body of theoretical and applied knowledge, students develop talents for managing employees, formulating budgets, structuring organizations, analyzing policies, and evaluating programs.

Admissions

The Master of Public Administration is an accredited professional degree program designed primarily for those who plan a career in federal, state, or local government.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students are required to complete 39 semester hours of coursework. The 39 hours are subdivided as follows: 21 hours of public policy and administration core courses, 3 hours of quantitative methods, 12 hours of approved electives if a 3 hour internship is completed or 15 hours of approved electives if a 3 hour internship is not completed. An internship is required for all pre-service students. In addition to the 39 hours of coursework, students must successfully complete a Portfolio Project.

Transfer Credit

Refer to the Graduate School Master's degree requirements page for more information.

Accelerated Master's Program

Information on the Accelerated Master's Program can be found on the department website.

Refer to the Graduate School [Accelerated Master's Program](#) page for more information.

Comprehensive Exam/Capstone

Successful completion of the Portfolio Project is required to graduate with an MPA degree.

The purpose of the Portfolio Project is to assess the extent to which MPA students have achieved the core competencies set forth by our accrediting body, the Network of Schools of Public Policy, Affairs, and Administration (NASPAA). The five core competencies are:

1. Lead and manage in public governance;
2. Participate in and contribute to the public policy process;
3. Analyze, synthesize, think creatively, solve problems, and make decisions;
4. Articulate and apply public service perspectives; and
5. Communicate and interact productively with a diverse and changing workforce and citizenry.

For each core competency, the student will complete a structured reflection essay assessing the core competency. Explicit instructions regarding the Portfolio Project are provided to students in their final semester of coursework. Portfolio Projects are evaluated by the MPA faculty.

Fieldwork/Practicum/Internship Requirements

The MPA Program requires students to complete 300 hours of work in their internship for 3 credit hours. Students typically pursue an internship after completing 18 hours in the program, but exceptions to the 18-hour completion rule may be made by the MPA Director. Internships may be completed during the semester or, more commonly, during the summer. They may be paid or unpaid.

Once an internship is approved by the MPA Director, the student may register for 3 credit hours of PSC 679 MPA Internship. The MPA Director will provide an information and evaluation form for the student to complete at least two weeks before the internship begins.

Upon completion of the internship, the immediate work supervisor of the student during the internship will complete the evaluation form and return it to the MPA Director. To receive a final grade for the internship hours, the student must complete an academic exercise that enhances the quality of the internship learning experience. The final grade will be determined based on the evaluation of the immediate work supervisor at the internship site and the quality of the academic exercise.

Time Limits for Degree Completion Requirements

Refer to the Graduate School Master's degree requirements page for more information.

Student Progress Requirement

Refer to the Graduate School scholastic requirements for more information.

Academic Misconduct Information

Refer to the Graduate School academic misconduct policy for more information.

Withdrawals and Leave of Absence Information

Department of Psychology

- Major
 - Psychology, MA (p. 414)
 - Psychology, PhD (p. 415)

NOTE: The MA is earned en route to the PhD. Chair

- Thompson E. Davis

Director of Graduate Studies

- Randy Salekin

Associate Professor and Director of Experimental Psychology

- Andrea Glenn

Associate Professor and Director of Clinical Psychology

- M. Lindsey Jacobs

Professor and Director of the Alabama Research Institute on Aging

- Rebecca Allen

Professor, Doddridge Saxon Endowed Chair and Director of the Center for the Prevention of Youth Behavior Problems

- Susan White

Professor, Executive Director, Alabama Life Research Institute

- Sharlene D. Newman

Associate Professor and Director of the Psychology Clinic

- Interim- M. Lindsey Jacobs

Associate Professor, ASD Clinic Director

- Laura Hansen

Professor, Director of ISSR

- Despina Stavrinou

Director of UA-Acts Program

- Megan Davis

Professors

- Rebecca Allen
- Thompson E. Davis
- Lark Lim
- Sharlene D. Newman
- Randy Salekin
- A. Lynn Snow
- Despina Stavrinou
- Alexa Tullett
- Susan White

Associate professors

- Sheila Black
- Jennifer Cox
- Matthew Cribbet
- Jenny M. Cundiff
- Ansley Gilpin
- Andrea Glenn
- William Hart
- M. Lindsey Jacobs
- Matthew Jarrett
- Kristina McDonald
- Jeffrey Parker
- Karen Salekin
- Theodore Tomeny
- Bradley White

Assistant professors

- Lisa Beck
- Sharla Biefeld
- Summer Braun
- Peter Castagna
- Jennifer Crowder
- Craig Cummings
- Megan Davis
- Gayle G. Faught
- Katie Garrison
- Heather Gunn
- Allison Scrivner
- Kelsey West

Instructors

- Demetrius Barksdale
- Allison Davis
- Darren George
- Ryan Lang

General prerequisites: Graduate standing and permission of both the director of graduate studies and the instructor. Graduate students enrolled in 500-level courses that are also offered at the 400 level are expected to perform extra work of an appropriate nature.

PY581 Readings In Py Grad
SP

Hours 1-3

Selected supervised readings.

Special Topics Course

PY591 Seminar In Py Grad
SP

Hours 3

In-depth examination of a selected contemporary psychological area. Different sections offered each semester. Section descriptions are available at registration.

Special Topics Course

Psychology, MA

The department requires that students entering the PhD program without a Master's degree earn their MA while enrolled in the PhD program.

Admissions

Students applying for graduate work in psychology must present at a minimum undergraduate courses in general psychology, statistics, and experimental psychology (or research methods). In addition, it is desirable for students to have prior coursework in a laboratory science (particularly biology), college mathematics, and in the area of their intended concentration.

Admission is competitive and is influenced by the overall quality of the applicant's record, including grades, letters of recommendation, past experience, and a match between the students' and faculty interests. The application deadline is November 15th (11:59 P.M. CST) for the clinical and experimental psychology areas. Completed applications must be received by this deadline to ensure full consideration for admission for the following term. Please remember this is a MA degree en route and this information pertains to applying to the PhD program. The Department does not offer a terminal Master's degree only the degree en route to the PhD.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students earn the MA degree en route to the PhD (p. 415). The MA degree is awarded after 24 credit hours of coursework, 6 credit hours of thesis, and an approved completed thesis. The 24 hours of coursework may vary by focus area, but must include the following:

Code and Title		Hours
Required Courses		
PY 602	Advanced Statistics I	3
PY 603	Advanced Statistics II	3
PY 607	Research Methods Psych	3
Required Major Course Options		9
PY 500-698		
Thesis Course		
PY 599	Thesis Research	6
Total Hours		24

Psychology, Ph.D.

The Department of Psychology houses a PhD program with an Area in Clinical Psychology and an Area in Experimental Psychology. Each Area has specific Subareas. In Clinical Psychology the Subareas are: Child, Health, Geropsychology and Psychology Law. In Experimental Psychology the Subareas are: Cognitive, Developmental, and Social psychology. Our Psychology program focus on developing skilled researchers and university level teachers. The Clinical Psychology area also focuses on developing skilled practitioners and clinical scientists. Coursework and training are in person; this is not an online program.

The basic philosophy of the Department of Psychology is to promote independent scholarship and to ensure competence in the fundamental areas of psychology and the specific subareas offered. The department trains psychologists who are scientists and scientist-practitioners and, in so doing, provides broad research training, substantive academic areas of study, teaching opportunities, and applied experience.

Admissions

The deadline for applications to the Psychology PhD program is November 15th (11:59 P.M. CST). Interviews occur during January and February, and admissions offers are made by March/April of each year.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

Documents

- A personal statement under "Statement of Purpose" in the application system. Personal statements should speak to the applicant's preparation for graduate study, writing, and quantitative skills, and, if relevant, how students have handled past challenges. We are also interested in how students' cultural, ethnic, or personal backgrounds will bring a unique and diverse perspective to the graduate program. Please also include the names of 1-3 potential faculty mentors within the Psychology Area's Subarea that you are applying to (i.e., Clinical (Child, Health, Geropsychology, or Psychology & Law) or Experimental (Cognitive, Developmental, or Social Psychology) and why you want to work with the faculty member(s). To find out if faculty members are planning to take students, please visit the department directory, and use the Accepting Students filter in the left-hand sidebar. There is no required length or format for the personal statement but see guidance here on our web page.
- Three letters of recommendation are required. These should be written by professors or supervisors who are familiar with your academic ability and career aspirations. Letters should speak to applicants' writing skills, quantitative skills, ability to handle challenges, and potential to conduct high-quality empirical research. Letters must be received by December 1st to ensure full consideration. Should your letter writers have problems submitting letters through the application portal, please contact the program assistant, Nicole Dover.
- Curriculum Vitae (CV).
- We also encourage applicants to submit other writing samples and syllabi from statistics or research methods courses that they have taken. These latter documents can be added under the "Portfolio" section of the graduate school application. This is not essential but can help in the evaluation process.

Admission is competitive and is influenced by the overall quality of the applicant's record, including grades, letters of recommendation, past experience, and a match between the students' and faculty interests.

Prerequisites and Minimum Requirements

- Undergraduate coursework in general psychology, statistics, and research methods is typically required for admission. Other desirable undergraduate courses include developmental psychology, physiological psychology, social psychology, abnormal psychology, cognition, learning, sensation and perception, history and systems, mathematics, and natural science.
- The minimum GPA required for regular admission is 3.0. However, successful applicants typically exceed this minimum.

Psychology Area, specific subareas, and the names of potential faculty mentors

- For "Area" in the application, select either Clinical or Experimental
- For "Subarea" in the application select one of the following specific subareas
 - Clinical: Child, Health, Geropsychology, or Psychology & Law
 - Experimental: Cognitive, Developmental, or Social
- Once you have identified potential mentors, please also add these mentors as "contacts" when completing your graduate school application.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The minimum number of credit hours required for the PhD in psychology varies by Psychology Area. Typically, graduate students complete the General Psychology Core, the Research Skills Core, a master's thesis, and a doctoral dissertation. In addition, clinical students complete the Clinical Core and a year-long clinical internship. Students in the Clinical Psychology Area and the Experimental Psychology Area also complete advanced coursework in their specific Subarea. The exception to this is when students transfer in credits.

Code and Title		Hours
General Psychology Core		
Select three of the following: ^{1,2}		9
PY 650	Cognition and Learning	
PY 629	Biological Bases of Behavior	
PY 652	Affect & Lifespan Dev. Psych	
PY 672	Adv Social Psychology	
Research Skills Core		
PY 607	Research Methods Psych	3
PY 602	Advanced Statistics I	3
PY 603	Advanced Statistics II	3
Select one of the following:		3
PY 615	Structural Equation Modeling	
PY 614	Categorical Data Analysis	
PY 616	Multilevel Modeling	
PY 618	Statistical Consulting	
Advanced Coursework as Applicable ^{1,2}		12
PY 695	Teaching Of Psychology	3
Advanced Coursework in Student's Focused Area of Study		
Clinical Core (required for clinical only)		
Thesis and Dissertation Hours		
PY 599	Thesis Research	6
PY 699	Dissertation Research	18

Footnotes

- ¹ Some focused areas of study require additional or specific courses.
- ² See details at the Psychology website or contact the Graduate Director.

Transfer Credit

Students who wish to transfer previous graduate coursework from another institution must meet briefly with the Graduate Program Assistant to initiate the approval process. Coursework to be transferred must have an equivalent in the Psychology Department. The student must submit syllabi of previous coursework for review by the department faculty members who currently teach the equivalent departmental courses. This process should be completed by the end of the first year of study. For the PhD degree, the Graduate School allows up to 50% of the required coursework (exclusive of dissertation hours) to be transferred from another institution. Only coursework completed within six years prior to beginning the UA Psychology Graduate Program will be considered for transfer under this mechanism. In addition, Graduate School policy allows transfer of credits taken concurrently with enrollment in our department, subject to the same 50% requirement, if approved for the student's Plan of Study. The courses must be from accredited institutions and be taught by their graduate faculty. Credits will only be considered for transfer from institutions in which the student has earned a B average or better on all graduate work attempted. The Director of Graduate Studies will conduct the final review.

Approval of a thesis or dissertation completed elsewhere: The PhD Program in Psychology requires the completion of a master's thesis unless a student has completed a master's thesis at another institution. If a student has completed a master's thesis or dissertation within the last six years at another institution, s/he may submit it for approval and satisfaction of the thesis requirement. A committee of three faculty members will review the document for content and rigor to determine whether it is similar to what is expected in our program. This committee shall include the student's Area Director (Clinical or Experimental), the Director of Graduate Studies, and one other faculty member to be chosen by the first two. Students coming in from another field other than psychology may submit their thesis or dissertation (when applicable) for review; however, for approval, the content must be viewed as within the expected range of psychology theses or dissertations. If a student's document is approved, the thesis requirement for the PhD degree is satisfied. However, the student will not receive thesis credits and will not earn a master's degree in psychology at UA. If a student's initial thesis document from another institution is not approved, or they have completed a master's (without a written thesis project) at another institution, the student will have to complete an additional research project similar to a thesis (via PY 698 rather than PY 599). The research project will have a three-member committee (Chair, Member, External Member) and a formal proposal meeting and defense meeting will occur for this thesis-like research project. This project does not require a committee formation in the student portal or approval of the Graduate School. There will be a vote as to whether this research project meets the standard similar to the UA Psychology thesis project. The final document will not be uploaded to ProQuest, it will be uploaded to the student's UA Box "Thesis-Like Project" folder.

Comprehensive Exams

The dissertation preliminary examination consists of the completion of the full dissertation proposal (the "preliminary document") and an oral examination. The student is eligible to take the preliminary examination following completion of the master's thesis and the research skill

requirement. For those students entering the program with a master's thesis document that is not accepted or who have completed a master's psychology program that does not include a written thesis project, those students will have to complete a thesis-like project as well as the research skill requirement before moving forward to the dissertation proposal state. The thesis-like research project will have a three-member committee (Chair, Member, External Member) and a formal proposal meeting and defense meeting, like a thesis. This committee will not be submitted through the student portal for graduate school approval, nor will the final document be uploaded to ProQuest.

Practicum Experience and Internship Requirements

Practicum and Internship Requirements apply to graduate students in the Clinical Psychology PhD Area.

Practicum Experience: Students shall have a copy of Ethical Principles of Psychologists and Code of Conduct and the Psychology Clinic Manual for study and discussion in various seminars and classes. Students are required to abide by the APA Ethical Principles, and they must sign a statement affirming that they have read and will abide by the Standards. A copy of this signed statement will be kept in the student's Clinical file.

During Year 1, students are introduced to clinical assessments, diagnostic interviews, and report writing, and they conduct mock assessments and assessments with volunteers. Students also begin learning case conceptualization, treatment planning, and helping skills. They practice skills via role-plays, write mock treatment plans and progress notes, and complete training in suicide risk assessment and mandated reporting. Additionally, students receive an orientation to the Psychology Clinic to acquaint them with current clinic policies on such issues as record keeping, confidentiality, and room assignments.

In Year 2, Clinical students take one full year of Basic Practicum in the Psychology Clinic. Students are assigned cases for assessment and intervention and are supervised by clinical faculty. The direct contact hour goal for Basic Practicum is approximately 100 hours for the 3-semester sequence. Four to five active clients per week are needed to achieve this level of contact. As appropriate for the needs of the client, students are expected to arrange for termination or transfer of their clients by the end of the summer semester or to continue as the primary therapist into the fall term.

Supervision in the psychotherapy practicum typically involves an individual weekly meeting with one's supervisor(s) and a small group supervision meeting. Individual supervision typically involves review of case files, direct observation (i.e. listening to audio or video recordings or live observation), and additional methods deemed most appropriate by the supervisor. As per APA accreditation guidelines, direct observation via audio, video, or live observation is required at least once per student per evaluation period. Case review and note-taking is expected of the student prior to supervision. Supervisors vary in their style, emphasizing problem-solving, case formulation, coverage of specific techniques, and discussion of therapeutic issues (e.g., ethics, termination, resistance, specific treatment questions). Group supervision typically includes discussion of cases, didactics, and preparation for Clinical Case Conference presentations in the Spring semester.

Although our program does not typically use telesupervision, such an approach may be needed in certain circumstances (e.g., COVID-19 in 2020 and 2021).

Students present at a Clinical Case Conference during the Spring semester of their second year. The Clinical Case Conference is evaluative

and provides an opportunity for students to receive feedback on their progress with clinical skills at an early stage of training. Attendance is required for practicum students, supervisors, and designated clinical faculty. Other faculty and students are invited to attend.

In addition to Basic Practicum, students take an additional 3 or more semester hours of advanced practicum usually within a specific Subarea (Child, Health, Geropsychology, or Psychology Law). A variety of off-campus placements are also available to clinical students.

Clinical Placements: Advanced students (usually 3rd year and beyond) may be afforded an opportunity to work part-time in a clinical setting for remuneration. These paid clinical placements are not meant to provide all or most of the required clinical training. However, they give students an opportunity to receive financial aid while performing some duties of clinical relevance. Students will also be provided access to training facilities as unpaid workers. In some cases, these paid and unpaid clinical placements may also serve as meeting advanced practicum requirements. Students interested in multiple placements/practica MUST discuss this with the Director of Clinical Training (DCT) and/or Associate DCT. If approved, the DCT and/or Associate DCT will determine the appropriate course registration, and documentation will be placed in the student's program file.

Placement negotiations are made only through the DCT. Placement decisions are made by the DCT, through consultation with the sponsoring agency and the coordinator of the student's specific Subarea. It is the norm that clinical placements are for a one-year (or 9-month) period. This guideline is in the best training interest of the student because it maximizes student exposure to a broad range of clinical experiences. Also, limiting placements to one-year terms maximizes the number of students provided the opportunity to be placed at particular agencies.

ANY clinical work engaged in by a graduate student, paid or unpaid, must be approved by the DCT and/or Associate DCT and must be supervised by a licensed psychologist. A description of the activities, including a memorandum from the supervisor detailing the supervision arrangement, shall be provided by the student to the DCT and/or Associate DCT for the student's file. This includes any volunteer or paid work done that might be construed as "psychological" in nature. The host agency is expected to provide a professionally sound training setting for the student, which includes adherence to the Standards for Providers of Psychological Services. Students should expect to receive feedback from their supervisors on a regular basis. End-of-term (fall, spring, summer) feedback is solicited by the Department and becomes a part of the student's Clinical file.

Several paid clinical practica do not carry a tuition grant as part of the contract. Because of this, the DCT has negotiated a higher salary rate to help defray the cost of the tuition the student will have to pay.

Internships: A full-year pre-doctoral clinical internship is required of all clinical students. Unless an exceptional case can be presented, students must intern at APA-accredited training sites. Although application during the fourth or fifth year is typical, students are eligible to begin applying to internship sites in their third year of residency assuming all core courses are completed by the end of that year. Students must have passed the preliminary doctoral examination by October 15th of the year they apply for internship. Furthermore, students must have their initial mini-proposal meeting 8 weeks prior to the October 15th deadline.

Students eligible for internship meet with the DCT and the Associate DCT to receive information about the application process. Extensive information about internship sites is available from the APPIC website: <http://www.appic.org>.

A list of recent internship sites is located on our Clinical Psychology website. The Department solicits feedback from internship programs at 6 months and at the end of training. The internship training director typically provides a detailed letter regarding the intern's progress, strengths, and weaknesses. A copy of this evaluation is maintained in the student's clinical file.

Students MUST have completed the internship before the university will confer the degree. The Graduate School will provide a "Completion of Degree" if needed in order for the student to be eligible for a post-doc or employment before the degree is conferred.

****The department also requires that the student upload appropriately labeled thesis and dissertation raw data, variable labels, and final thesis and dissertation documents to UA Box folder, before being cleared by the department for graduation. Students coming in from another field other than psychology may submit their thesis (when applicable) for review; however, for approval, the content must be viewed as within the expected range of psychology theses. If a student's document is approved, the thesis requirement for the PhD degree is satisfied. However, the student will not receive graduate credits and will not earn a master's degree in psychology at UA. If a student's initial thesis document from another institution is not approved, or they have completed a master's (without a written thesis project) at another institution, the student will have to complete an additional research project similar to a thesis (via PY 698 rather than PY 599). The research project will have a three-member committee (Chair, Member, External Member) and a formal proposal meeting and defense meeting, like a thesis. This committee will not have to be formed in the graduate student portal for Graduate School approval. There will be a vote as to whether the student's document and oral defense pass or fail. This document will not be uploaded to ProQuest for Graduate School review. It will be uploaded into the student's UA "Thesis-Like Project" Box folder.**

Admissions to Candidacy Requirements

The Admission to Candidacy form will be initiated by the Graduate Program Assistant after the successful writing of the dissertation prospectus and oral presentation meeting.

Once a student has been admitted to candidacy they will begin to enroll in dissertation hours (PY 699) the following semester. The student must be enrolled continuously, for 3 credit hours or more each fall and spring semester, until the final dissertation is submitted to the Graduate School. Registration during the summer term (3-hour minimum) is expected if the student is using university and/or faculty resources. If the final dissertation is submitted to the Graduate School in the same semester in which it is defended, no further dissertation hours are necessary, including the semester in which the student graduates. However, if the dissertation is submitted to the Graduate School after the semester ends, the student must register for either 1 or 3 additional dissertation hours in the following semester, depending on when the document is submitted. This includes registering for summer term if graduation will be in August. For questions about this, please contact the Graduate Program Assistant.

Continuous Enrollment Policy

See Graduate School policies (p. 21)

The Department does not admit part-time students. The typical load is considered to be 12 hours. A 9-hour maximum is sometimes imposed on students with certain graduate fellowships, particularly graduate research fellowships (i.e., thesis and dissertation fellowships). Although it is most wise to remain in full-time residence (i.e., maintain a residence in

Tuscaloosa, be on the University campus at least several times per week, have regular, face-to-face contact with the dissertation chair) until after successfully defending the dissertation, students must remain in full-time residence until after successful completion of their preliminary exam.

Enrollment for dissertation credit must be continuous once the dissertation project is started. This means that once a student has passed his/her prelims, he/she must register for a minimum of 3 dissertation hours during subsequent fall and spring semesters, including the internship year until the dissertation has been successfully defended and submitted to the Graduate School. See the Graduate Catalog policy on "Final Semester Dissertation Minimum Registration..." to determine dissertation research hour registration requirements once the dissertation has been submitted to the Graduate School. An exception regarding registration in the final semester is granted to those students on internship whose dissertation has been approved by the Graduate School prior to the final semester. Specific guidelines for the number of hours in relation to the amount of anticipated work are detailed in the Graduate Catalog.

Dissertation Requirements

The dissertation is the culmination of the Doctoral Program in Psychology. The dissertation serves two major purposes. First, it is an educational experience that demonstrates the ability to address a major scholarly problem relevant to the field of psychology using research methods appropriate to the field. Second, the dissertation is a piece of original research that makes a contribution to existing knowledge. The quality of the dissertation should be equivalent to a study judged acceptable for publication in an APA, APS, or other journal widely recognized for its publication standards. The subject matter is limited only by the availability of faculty competent to direct the project. Ordinarily, dissertation studies fall into the categories of experimental research, correlational research, or a combination of experimental and correlational research. Dissertations that are research reviews, theoretical papers, or historical papers may also be acceptable, provided that the dissertation committee approves the student's specific plan.

Forming the Dissertation Committee: The doctoral student should form the dissertation committee and begin the development of the doctoral project as early as possible after completing the Master's thesis or "thesis-like" project, or by the spring semester of the third year of graduate study, whichever occurs later (this may be earlier for students coming in with a master's degree). The dissertation committee will be composed of at least five members. The student shall select the dissertation director (chair); two committee members from the Psychology Department; and one committee member from outside the Psychology Department. The outside committee member is usually a full, associate, or temporary graduate faculty member in a department at the university. However, the student may choose someone from inside or outside the university who is not currently a graduate faculty member, under two conditions. First, that person must have a terminal degree in his/her field. Second, s/he must be appointed to the temporary graduate faculty before the mini-proposal meeting. Temporary graduate faculty appointments are made only twice a year, in October and March, so plan accordingly. The Director of Graduate Studies will provide information to the student's outside member about the various meetings and lengths of meetings that are expected.

When the student has agreements from these individuals to serve on his/her committee, s/he should inform the Director of Graduate Studies of these members and the topic and request the final committee member. The final committee member will be selected by the Director of Graduate

Studies on the basis of balance of faculty workloads and consideration of the topic of the project.

The dissertation committee can be expanded beyond five members with the addition of faculty from other departments, additional psychology department faculty, or postdoctoral fellows. To avoid potential conflict of interest, faculty who are married generally should not serve as members of the same dissertation committee. However, it is acceptable for married faculty to co-chair a dissertation committee if they are engaging in collaborative research related to the dissertation topic. (There can be only one chair; the other may be a co-chair.) In this case, it is recommended (though not required) that the student add a sixth committee member from within the department. It should be noted that only Full members of the graduate faculty may chair dissertation committees. Associate members and Temporary members of the graduate faculty may co-chair a dissertation, but the Chair must be a full-time member. Full members of the graduate faculty who retire may maintain their status as Full members for three years following retirement. Thereafter, they may be appointed as a Temporary graduate faculty member and, at their discretion, continue to serve on thesis/dissertation committees with no restructuring of these committees necessary (although a committee member who is a Full member of the Graduate Faculty shall be designated as Chair, and the retired member may serve as Co-Chair). If a committee member resigns from UA s/he also may be appointed as a Temporary graduate faculty member and at his/her discretion, continue to serve on the committee as a co-chair. A full faculty member must be assigned as committee Chair. If an "outside" member of a committee becomes a department faculty member, s/he may continue to serve on the committee, but a new outside member must be appointed. When a committee member who retires or resigns elects not to continue to serve on a dissertation committee, s/he shall be replaced through an appointment made by the Director of Graduate Studies in consultation with the student. Once the dissertation committee is formed, a committee member cannot be replaced simply because of difficulty scheduling meetings or because the committee member elects not to meet during the summer.

Proposal: The proposal consists of a written document and an oral proposal meeting. The student is eligible to complete the proposal following the successful completion and submission of the master's thesis and successful completion of the research skill requirement. If a student's thesis document from another institution is not approved, or they have completed a master's (without a thesis project) at another institution, the student will have to complete an additional research project similar to a thesis (via PY 698 rather than PY 599). The student's "thesis-like" project will have a three-member committee (Chair, Member, External Member) and a formal meeting and defense meeting, like a thesis. This committee does not need to be created in the graduate student portal for approval by the Graduate School.

Proposal document. Following formation of the committee, the student shall prepare a written prospectus or "mini-proposal" and present it orally to their committee. The purpose of the prospectus is to inform the committee members of a possible plan for the dissertation. The prospectus document must be no longer than 20 pages in the current APA editorial style. A reference list should be included in addition to the text. Appendices are neither required nor expected, but if they are included, they must be included within the 20-page limit. The student shall distribute the prospectus document to committee members at least 5 working days prior to meeting with the committee (working days are days on which UA offices are open), in electronic form and upload it to UA Box (contact the Graduate Program Assistant for assistance). The

student should contact the Department Office Assistant to schedule a meeting room if being held in person.

Proposal meeting. One or more 1-hour meetings will be held to discuss the feasibility of the project and make suggestions for improvement. It is the responsibility of the student to schedule the meeting(s) at a time that is suitable to all committee members. These meetings may be scheduled during the summer if all committee members agree to meet during the summer. However, it is the prerogative of faculty members to decline to meet during the summer and thus students are encouraged to schedule the meeting during the fall or spring semester. The Clinical Area has specific rules on the timing of the prospectus and preliminary examination (see Clinical Training Toolkit). Proposal meeting(s) are working meetings, after which, the committee will determine if the student is admitted to candidacy. The student will give an informal 5-10 minute presentation of his/her proposal followed by open discussion. The number of these meetings will be based on the student's and committee's perceived need for them. Providing food/drinks at proposal meetings is prohibited. After the dissertation proposal meeting, the student should complete the Appointment/Change of Doctoral Dissertation Committee Form, accessible here.

Preliminary Examination: The preliminary examination consists of the completion of the full written dissertation proposal (the "preliminary document") and an oral examination. The student is eligible to take the preliminary examination following the successful completion of the dissertation proposal.

Preliminary document. Once the dissertation proposal has been approved by the committee, the student shall prepare the full dissertation proposal (the "preliminary document") using the guidelines found on the Graduate School's Thesis-Dissertation-Microsoft-Word-Template-2024.docx. There is no page limit on the preliminary document, but it is expected to be developed substantially beyond the mini-proposal. The writing and copy editing of the document is the responsibility of the student alone. Although committee members are not expected to review portions of the full proposal during its writing, they may be asked their advice at any time on matters related to the dissertation. The dissertation chair has the option of reviewing the completed full proposal before it is distributed to the entire committee. The dissertation chair may point out to the student areas in the proposal that need additional work; however, the intent of such a review is not to provide the student with faculty-written substitutes or additions to the proposal text. When available, or as suggested by the dissertation committee in advance, the results of pilot studies should be reported in the preliminary document.

The student should notify the Graduate Program Assistant and the Director of Graduate Studies by email of the date of the Preliminary Examination/Defense. The notification should be typed and contain the following information:

- **Your Name – CWID - email address**
- **Program/Area, Date of Defense**
- **Title of Document**
- **Name and email address of Committee Chair**
- **Name and email address of Co-chair (if there is one)**
- **Name and email address of external committee member**
- **Name(s) and email address(es) of other committee member(s)**

The Graduate Program Assistant will create a folder for the student in UA Box and send an invitation to the student to upload the "preliminary" document there. The Graduate Program Assistant will upload the above information (Information Sheet) into the UA Box folder.

The student should upload the document to UA Box *at least ten working days* prior to the meeting (working days are days on which UA offices are open). Also, at this time, *raw data and variable labels* should be uploaded to UA Box Upload Thesis and Dissertation. The student should also at this time email their committee a copy of the document.

Preliminary examination meeting. The student should arrange a 2-hour meeting of his/her dissertation committee for the preliminary examination. The student should contact the Department Office Assistant to schedule a room for the meeting if being held in person. The meeting may be scheduled during the fall, spring, or summer semester. However, it is the prerogative of faculty members to decline to meet during the summer and thus students are encouraged to schedule the meeting during the fall or spring semester. It is the responsibility of the student to find a 2-hour meeting time that is suitable to all committee members, and to communicate the start and end time of the meeting to each committee member (both at the time the meeting is set and a week prior to the meeting). It is advisable to begin scheduling several weeks in advance of the desired meeting date.

During the first week after distribution of the preliminary document, committee members are encouraged to look over the document. If a committee member should decide that the preliminary document is of such low quality that the formal examination is not warranted, s/he will notify the Director of Graduate Studies and student's dissertation chair. In such instances, the committee will be convened without the student to decide whether or not the examination should be held. If the majority decision is against holding the examination, this will be viewed as failing the preliminary examination. Should there be no objection received within one week of the distribution of the dissertation proposal, the examination shall proceed as scheduled.

The preliminary oral examination is conducted by the entire committee. It does not begin until all committee members arrive. Every effort should be made to communicate the start and end time of the meeting well ahead of time so that all committee members will be present for the entire meeting. However, from time to time an emergency arises and a committee member is unable to attend the meeting at the last minute or must leave the meeting before it is completed. In case of such an emergency, the action to be taken depends on whether the student's committee has 5 or more than 5 committee members.

1. If there are more than 5 members on the student's committee, there is no need to replace the committee member or to take any special action. The 5 remaining members only will cast a vote. For the record, the dissertation chair should communicate with the Director of Graduate Studies about the circumstances under which a committee member was absent for all or part of the meeting and notify the Graduate Program Assistant, so the person will not be included on the Candidacy form when initiated.
2. If there are only the required 5 members on the student's committee, then some action must be taken.

If due to an emergency, a committee is unable to attend the meeting at the last minute, and the meeting cannot be rescheduled, the Director of Graduate Studies and the committee chair should appoint an emergency replacement such that there are at least 5 committee members present including the emergency replacement. The Committee Chair should notify the Graduate Program Assistant (Nicole Dover) of the change.

If an emergency causes a committee member to leave the meeting early, the committee must decide whether to (a) reconvene with the full committee to complete the meeting or (b) complete the meeting without the departing committee member and allow him/her to vote. If option (b) is chosen, the committee may decide that the departing committee

member will vote before leaving or will vote afterward, after having been briefed on the content of the remainder of the meeting. The committee's decision may depend on how much of the meeting has been completed before the committee member had to leave, the overall strength of the student's defense, etc. The dissertation chair should communicate with the Director of Graduate Studies about the circumstances of the emergency and the decision of the committee on how to proceed.

Although unusual, it is the prerogative of any additional graduate faculty member in the Department of Psychology to read the dissertation proposal and then to participate and vote in the preliminary examination. It is also the prerogative of the student to invite other graduate students in the Department of Psychology to attend. At the beginning of the preliminary examination, the student is allowed a period of 15-20 minutes to formally present the proposal. During the presentation, committee members should avoid interrupting the student, except for questions of clarification. The student is then examined orally on the document and related topics. The intent is not to examine the student on general areas of psychology unrelated to the dissertation topic; however, it is to be expected that some of the committee members' questions will develop from the student's answers.

Upon completion of the preliminary examination, the student will leave the meeting and the committee will hold a nonbinding, pass-fail vote via the chat or poll feature on Zoom to serve as a starting point for discussion of the student's performance. All committee members, including the dissertation chair, have a vote. After discussion, the committee members shall cast their formal votes via the chat or poll feature on Zoom, jointly considering the suggested criteria (listed at the end of this section of the 2024 Student Toolkit for the written document and the oral presentation. If there are fewer than 2 negative votes, the student passes; if there are 2 or more negative votes, the student fails. The student will then re-enter the meeting to hear the outcome of the vote. If the outcome is "pass," it is not unusual for the committee to make some recommendations for the project and/or the final dissertation document. After a "pass" vote, the committee chair should notify the Graduate Program Assistant.

The student is permitted two attempts at passing the preliminary examination. If a second attempt is necessary, the original committee shall remain intact for the second attempt with one exception: Should the topic of the proposal change substantially, the original committee may elect to disband with a unanimous vote. A new committee would then be formed. However, it should be noted that, once assigned to a student's committee, a faculty member cannot be removed involuntarily, even in cases where the dissertation topic has been changed.

The dissertation chair should collect electronic Oral Exam and Written Document rubrics and upload them to UA Box folder "Rubric and Committee Acceptance Form with Vote". Upload within 48 hours of the examination. The dissertation chair should notify the Graduate Program Assistant that the student passed the preliminary exam. The Graduate Program Assistant will initiate the Admission to Candidacy form for committee members to sign.

Conduct of the Dissertation

1. **Use of substitute dissertation researchers.** Normally, the student is expected to collect his or her own data. Any deviation from this policy should be for reasons beyond the convenience of the student and must be approved by the dissertation committee. In considering the use of substitute researchers, the committee should keep in mind that the collection of data is an integral educational component of the dissertation process. In addition, the committee should consider issues such as experimenter bias, ethics, sensitization

of participants, and may be well advised in order to strengthen the methodological integrity of the project. Should that be the case, the student should make certain that the substitute receives carefully detailed training and close supervision during the conduct of the project.

2. **Altered topics.** Should the student substantially alter the dissertation topic following the successful completion of the preliminary examination, another full dissertation proposal must be developed and distributed to committee members. In addition, the written proposal must be presented in an oral examination. Although the examination is no longer considered a preliminary examination, the same voting procedures will be followed. In the event of a failure, the student must retake the examination until it is passed.

Final Oral Examination: Two weeks prior to the final defense, students should complete the Public Notice of Dissertation Defense form.

Dissertation document. The copy of the completed dissertation document that is presented by the student to committee members should be in final form and electronically distributed. Students should consult the Graduate School website Thesis and Dissertation – Graduate School for information on required sections, style, and formatting. The student should notify by email the Graduate Program Assistant and the Director of Graduate Studies of the date of the Dissertation Examination and the name of the Committee Chair. The notification should include the following information:

- **Name – CWID & email address**
- **Program Area/Subarea, Date of Defense**
- **Title of Document**
- **Name and email address of Committee Chair**
- **Name and email address of Co-chair (if there is one)**
- **Name and email address of external committee member**
- **Name(s) and email address(es) of other committee member(s)**

If the student already has a folder in UA Box, s/he should upload the dissertation document to that folder. Otherwise, the Graduate Program Assistant will create a folder for the student in UA Box and send an invitation to the student to upload the document there. The same applies for the committee chair and the folder for rubrics. At the time the student uploads the document to UA Box *raw data and variable labels* should be uploaded to UA Box.

The dissertation must be emailed to committee members *at least 10 working days* in advance of the final oral examination meeting (working days are days on which UA offices are open).

Final oral examination meeting. The student should arrange a 2-hour meeting of his/her dissertation committee for the final oral examination. The student should contact the Department Office Assistant to schedule a room for the meeting if it is held in person. The meeting may be scheduled during the fall, spring, or summer semester. However, it is the prerogative of faculty members to decline to meet during the summer and thus students are encouraged to schedule the meeting during the fall or spring semester. It is the responsibility of the student to find a 2-hour meeting time that is suitable to all committee members. It is advisable to begin scheduling several weeks in advance of the desired meeting date. More information about paperwork needed for thesis and dissertation meetings is included in **Appendix B** and on the department website.

During the first week after distribution of the dissertation document, committee members are encouraged to look over the document. If a committee member should decide that the document is of such low quality that the formal examination is not warranted, s/he will notify

the Director of Graduate Studies and the student's dissertation chair. In such instances, the committee will be convened without the student to decide whether or not the examination should be held. If the majority decision is against holding the examination, this will be viewed as failing the final oral examination, and the student will be expected to make improvements and schedule another final oral examination. Should there be no objection received within a week of the distribution of the dissertation, the examination shall proceed as scheduled.

The final oral examination is conducted by the entire committee. It does not begin until all committee members arrive. Every effort should be made to communicate the start and end time of the meeting well ahead of time so that all committee members will be present for the entire meeting. However, from time to time an emergency arises and a committee member is unable to attend the meeting at the last minute, or must leave the meeting before it is completed. In case of such an emergency, the action to be taken depends on whether the student's committee has 5 or more than 5 committee members.

1. If there are more than 5 members on the student's committee, there is no need to replace the committee member or to take any special action. The 5 remaining members only will cast a vote and sign the student's Committee Acceptance Form. For the record, the dissertation chair should communicate with the Director of Graduate Studies about the circumstances under which a committee member was absent for all or part of the meeting and notify the Graduate Program Assistant of the change so the missing member will not be included on the Committee Acceptance form.
2. If there are only the required 5 members on the student's committee then some action must be taken.

If due to an emergency a committee member is unable to attend the meeting at the last minute, and the meeting cannot be rescheduled, the Director of Graduate Studies and the committee chair should appoint an emergency replacement such that there are at least 5 committee members present including the emergency replacement. If an emergency replacement is appointed, s/he should be directed to the link for the oral exam rubric. The student should file an Appointment/Change of Doctoral Dissertation Committee to reflect the change.

If an emergency causes a committee member to leave the meeting early, the committee must decide whether to (a) reconvene with the full committee to complete the meeting or (b) complete the meeting without the departing committee member and allow him/her to vote. If option (b) is chosen, the committee may decide that the departing committee member will vote before leaving or will vote afterward, after having been briefed on the content of the remainder of the meeting. The committee's decision may depend on how much of the meeting has been completed before the committee member had to leave, the overall strength of the student's defense, etc. The dissertation chair should communicate with the Director of Graduate Studies about the circumstances of the emergency and the decision of the committee on how to proceed.

Although unusual, it is the prerogative of any additional graduate faculty member in psychology to read the dissertation proposal and then to participate and vote in the final oral examination. It is also the prerogative of the student to invite other psychology graduate students to attend. At the beginning of the examination, the student is allowed a period of 15-20 minutes to formally present the results of the dissertation project. During the presentation, committee members should avoid interrupting the student except for questions of clarification. The student is then examined orally on the document.

Upon completion of the final oral examination, the student will leave the meeting and the committee will hold a nonbinding, pass-fail vote via the

chat or poll feature on Zoom to serve as a starting point for discussion of the student's performance. All participating committee members, including the chairperson, have a vote. After discussion, a formal vote via the chat or poll feature on Zoom is taken, considering jointly the written document (with emphases on the results and discussion sections) and the oral presentation of the student. The committee members will also provide Oral Exam Rubric ratings on each of the criteria listed at the end of this section of the Graduate Handbook. If there are fewer than 2 negative votes, the student passes; if there are 2 or more negative votes, the student fails. After the formal vote, the student will reenter the meeting to hear the outcome of the vote. If the student passes, it is not unusual for the committee to require some changes to the document before it is submitted to the Graduate School. Three attempts at passing are permitted including the first attempt.

Following the final oral defense, the dissertation chair will notify Graduate Program Assistant of the final vote. Also, the dissertation chair should collect electronic Oral Exam and Written Document rubrics and upload them to UA Box folder "Rubric and Committee Acceptance Form with Vote". Upload within 48 hours of the examination.

The student is then responsible for making revisions to the document as suggested by the committee and preparing the document for electronic submission to the Graduate School. Once again, students should consult the Graduate School website for information on required sections, style, and formatting (Thesis and Dissertation – Graduate School). Completed dissertations must be submitted to the Graduate School in electronic format. More information on electronic theses and dissertation (ETDs) can be found at Thesis and Dissertation – Graduate School. Once the student has completed revisions and the committee chair has approved those revisions, the student should submit the completed dissertation to the Graduate School in electronic format through ProQuest. S/he should then notify the Graduate Programs Assistant that the document has been submitted; the Graduate Programs Assistant will then initiate the ETD Committee Acceptance form. The signature of the student and committee chair on this form indicates the document is ready to be published in terms of content, form, and style (which includes copy-editing). The copy-editing can be done by the thesis chair or by a professional copy editor. Students should have a conversation about when to allow their projects to be published through ProQuest. Typically, taking the farthest date out is advised because this will allow the student time to publish their study in a journal before their findings are released through ProQuest.

Electronic Copies of the Dissertation: Electronic departmental copy. Note that the Graduate School and the department no longer require bound copies of the completed dissertation. The student should upload an electronic copy of the final corrected dissertation text to their UA Box Dissertation folder. This should be in MS Word in a single file, with all formatting intact, include a PDF version in addition to the MS Word version.

Electronic departmental copy of the raw data. The student should also submit the raw data that were analyzed for the results section of the dissertation. The raw data should be in spreadsheet form such as SPSS or Excel and should include data labels. This should also be uploaded to the student's UA Box Dissertation folder.

Certification of completion of internship. For students in the Clinical Area, the Psychology Department requires a letter from the internship supervisor certifying that the student has successfully completed the APA approved internship in good standing. Because the internship is a requirement of the PhD degree, we need this letter to sign off on graduation. At the end of the internship the student should arrange for

this letter to be sent to the Director of Clinical Psychology or the Graduate Program Assistant.

Time Limits for Degree Completion Requirements

Each fall, students who are nearing their time limit for completion of the PhD will be notified of this in writing. One copy of this notification is placed in the student's file and another is sent to the Graduate School. Students who are nearing their time limit are encouraged to discuss their plans with the Director of Graduate Studies.

The time limit for completion of a doctoral degree in the Department of Psychology is 9 years after entry for students who enter with or without a master's degree. This is a Graduate School time limit and includes the internship year for clinical students. After 9 years, the Graduate School automatically drops the student from the program. If this happens, the student may reapply for the program and, if admitted, will have another 9-year period in which to complete the PhD. However, only coursework that was completed within the 6 years before reentry will be counted toward the PhD. Thus, coursework from the first three years of study must be retaken. Further, the student must adhere to the program requirements that are in effect at the time of reentry. Finally, students should be advised that there is no guarantee of being readmitted, and in fact, readmission may be unlikely. In unusual and compelling cases that are beyond the student's control, the Graduate School allows a student to request a one-time, one-semester extension beyond the 9-year limit. If approved, revalidating of outdated UA or transfer coursework is not required as long as this coursework has been approved previously in the student's Plan of Study (though the Dean of the college can request that a student repeat an outdated course that is especially integral to the student's course of study). If a student who has been granted a one-semester extension does not complete the degree in that semester, s/he will be automatically dropped from the program and must reapply for admission. For more information on Graduate School policy, see the Graduate Catalog Degree Requirements | University of Alabama (ua.edu) (p. 21)

To apply for a one-time, one-semester extension, the student should prepare a written request including (a) a description of the compelling circumstances that caused the delay in degree progress, (b) a description of the current status of the dissertation, and (c) a timeline showing each important remaining step in the completion of the dissertation. This request is submitted to the student's Area Director (Clinical or Experimental) for consideration by the Area faculty. The Area Director forwards the Area faculty's recommendation to the Director of Graduate Studies, who forwards it to the Dean of the College of Arts and Sciences, who forwards it to the Dean of the Graduate School. The request should be made during the second semester of the 8th year of study. If the one-semester extension is granted, the student must meet deadlines for graduation in the extension semester. For example, if the extension is for fall semester, the student must meet deadlines for December graduation. The last step and date in the timeline should reflect this.

Other considerations. Students should be aware that time spent during an authorized leave of absence or during an internship program counts toward the time limit (i.e., the clock does not stop).

Program-specific Time Limits In addition to the Graduate School and departmental time limits for completion of the doctoral degree, the Experimental Area has specific milestone-related time limits. Note that different time limits may apply depending on whether or not you have entered with a Master's degree.

The Experimental Area has two very important deadlines that must be met to continue in the program:

1. **Third-year deadline: Master's thesis defense.** Students must pass their master's thesis defense by the last day of the spring final exam period of their third year in the Experimental Psychology graduate area. If a student fails to do so, s/he will not be allowed to continue on to the PhD. The student will be allowed a maximum of one additional year to complete the thesis and the MA degree. However, the student will no longer be in good standing and will not be eligible for funding during the additional year. This third-year requirement does not apply to students whose thesis document from another institution is approved. However, If a student's document is not approved, or they have completed a master's (without a thesis project) at another institution, the student will have to complete an additional research project similar to a thesis (via PY 698 rather than PY 599) in the three-year timespan mentioned above. The "thesis-like" research project will have a three-member committee (Chair, Member, External Member) and a formal proposal meeting and defense meeting, like a thesis. The "thesis-like" project does not require the formation of a thesis committee in the Graduate Student portal for approval by the Graduate School. Also, this document will not be uploaded to ProQuest for review by the Graduate School but to the student's UA "Thesis-Like Project" Box folder.
2. **Fifth-year deadline: Dissertation Proposal Defense (aka Preliminary Oral Examination).** Students must pass their dissertation preliminary defense by the last day of the spring final exam period of their fifth academic year in the Psychology Graduate Program. Failure to do so will result in immediate dismissal from the program.

Note: These deadlines are considered as extremely lenient deadlines. It is expected that all students will finish thesis and dissertation deadlines well before these up-or-out deadlines. Students should not expect exceptions for failing to meet up-or-out deadlines. Students experiencing rare extenuating circumstances (e.g., factors that interrupt the research process for month(s) such as major health issues, pandemic or natural disaster) may request an extension in writing to their advisor and the Director of the Experimental Psychology to be voted on by the Experimental faculty. The reason for the request and a detailed timeline should be included in the request. The "up-or-out" rule will be enforced at the end of the approved new timeline if the student has not passed the required defense.

Student Progress Requirement

Non-academic failure occurs when a student is dismissed from the program for reasons to do with his or her ethical or professional conduct rather than academic performance. Examples include (but are not limited to) plagiarism, falsifying data, lying or cheating, acting maliciously against others, developing personal relationships with clients, and in general violating the APA Ethical Principles of Psychologists and Code of Conduct. <http://www.apa.org/ethics/code/index.aspx>

At the end of each year of graduate study, all students are evaluated by the Area faculty (Experimental or Clinical). In addition, a student may be evaluated at any time of year if a problem is perceived by the faculty. At the time of the evaluation, both academic and nonacademic factors are considered. One of six possible preliminary recommendations may result from this evaluation:

1. Continue - the student is encouraged to continue in the program for another year.

2. Continue with Warning - the student is encouraged to continue in the program for another year, but is apprised, in writing, of problems perceived by the faculty and advised concerning their remediation.
3. Continue with Remediation Plan (without Probation) - the student is permitted to continue in the program pursuant to his or her successfully completing a specific written plan of remediation prescribed by the faculty.
4. Continue with Remediation Plan (with Probation) - the student is permitted to continue in the program pursuant to his or her successfully completing a specific written plan of remediation prescribed by the faculty. The situation is serious enough to warrant probation status, which will necessitate self-identification on clinical internship applications.
5. Dismissal due to Failed Remediation Plan - the student is dismissed from the program because the remediation plan noted in (c) or (d) has not been successfully completed (see text below).
6. Dismissal without Remediation Plan - the student is dismissed from the program without a remediation plan for pronounced violations of ethical and professional conduct standards or for persistent patterns of conduct that are judged to be resistant to remediation.

If the outcome of the evaluation is other than (a) Continue, the following steps will be taken:

- **Communication of the problem to the student.** The director of the student's Area (Clinical or Experimental) will, with input from the program faculty, compose a committee to gather information and document the problem. This committee may be composed of 3 persons, 2 area faculty and 1 person from outside the area. However, the composition of the committee is at the discretion of the Area's Director. Faculty (or staff) members providing significant information relevant to the student's evaluation will provide such information as completely as possible, specifying the sources of the information. During the information gathering phase, the student shall be afforded an opportunity to consult with the faculty member(s) involved and to provide information to the committee. Once the committee has gathered information and documented the problem, it will present its recommendation to the area faculty at a meeting in which a quorum of the area faculty is present. At that meeting, a majority vote by the area faculty will indicate approval of the committee's recommendation. Then, the committee will present a statement to the student in writing that will include the exact recommendation (Recommendation b, c, d, e, or f) and supporting information. If the recommendation involves a remediation plan (Recommendations c or d), the details of the remediation plan will also be presented to the student in written form at this time. Remediation plans will be explicit with stated criteria for judging their success or failure as well as a timeline. Criticisms and remediation plans will be signed by the student (if he or she agrees), the student's Area Director (Clinical or Experimental), the Director of Graduate Studies, and the student's advisor. Then they will be placed in the student's file.
- **Appeal of problem statement and/or remediation plan.** If the student does not agree with the criticisms or the plan for remediation, he or she will be given a maximum of four weeks to prepare a request for reconsideration. The student may select any consenting representative (including another student) to appear with, or instead of her or him, at a reconsideration hearing before the area faculty who will subsequently vote to affirm or modify the documents in question. If the majority vote is to affirm the documents in question, this will be documented, and one copy will be given to the student and one copy will be placed in the student's file. If the majority vote is to modify the documents in question, the modifications will be documented and

presented to the student in writing. The modified criticisms and/or remediation plan will be signed by the student (if he or she agrees), the student's Area Director (Clinical or Experimental), the Director of Graduate Studies, and the student's advisor, then placed in the student's file.

- **Evaluation of the remediation plan.** If a remediation plan was put into place, the student's progress toward meeting the specified criteria will be reviewed according to the timeline described in the remediation plan. The initial review will be done by the committee that was originally chosen by the Area Director to document the problem and write the remediation plan. The review will require gathering of information from the student, faculty, and any other persons involved in the remediation plan. This committee will present a recommendation to the area's faculty (Clinical or Experimental) at a meeting in which a quorum of the area's faculty is present. At that meeting, a majority vote by the area's faculty will indicate approval of the committee's recommendation. The Department Chair will not vote. This final decision shall take place within one month of the period specified for remediation. The decision will be documented with supporting details and a copy will be given to the student and a copy will be placed in the student's file.
- **Appeal of a dismissal decision.** If a decision was made to dismiss the student from the program, the student may make a formal appeal. This should be done according to the University of Alabama's University-wide Academic Grievance Procedures, described in the faculty handbook and available online at Faculty Handbook – | The University of Alabama (ua.edu).

Academic Misconduct Information

The Department of Psychology will not tolerate academic misconduct. Procedures for reporting and resolving such cases are described in The University of Alabama Faculty Handbook and the University of Alabama Student Handbook. Should the Dean or Academic Affairs Officer find the student guilty of academic misconduct, the faculty may review the student's record. If they deem it appropriate, the faculty may dismiss the student from his/her area of study in the Department of Psychology. Procedures for filing a student complaint regarding an academic action taken by instructional or administrative personnel are detailed in the [Faculty Handbook](#) (Appendix D).

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

If a temporary health-related or personal circumstance poses a significant barrier to a student's progress, the student may request a leave of absence for a designated period of time. To request a leave of absence, the student should write a letter to the Area Director (Clinical or Experimental) requesting the leave of absence. The letter should be signed and dated and should provide a detailed explanation of the circumstances and why they will pose a barrier to his/her degree progress. It should also specify the beginning and ending dates of the requested leave period. The area's faculty (Clinical or Experimental) will then meet to consider the leave and will make a recommendation. The Area Director will forward this recommendation to the Director of Graduate Studies in the form of a memo, along with a copy of the student's letter for final approval. *If the student cannot return at the end of the time period designated in the leave of absence request, they must request another leave of absence. If the student does not return and does not request another leave of absence, they will be dropped from the program.* The time a student spends on leave still counts toward the student's degree

time limit (i.e., the clock does not stop). To be given full consideration for funding following their return to the program, students on leave are required to notify the department of their decision to return at least one semester prior to re-enrollment in coursework.

The graduate school does not need to be informed of the leave unless the student is enrolled in 699 and/or the student is on a fellowship and especially a multi-year fellowship. In either of these cases the student will need to contact the graduate school and inform them of the leave. Leaves can be related to ODS (Office of Disability Services) determined disability, medical withdrawal, family care/health issues, and military-related activity.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

Funding Overview

All students in good standing in the Psychology PhD program are normally supported by a graduate teaching assistantship (GTA) funded through the department, a graduate research assistantship (GRA) funded by their mentor, or a fellowship. Both types of assistantships provide roughly an equivalent stipend and benefits along with paid tuition and fees. Financial support is typically guaranteed through the first four years in the program for all PhD students who meet performance expectations and who do not meet any Conditions for Termination of Financial support (see below). Students will be informed of impending financial support termination prior to the support termination date except in the special cases noted under Conditions for Termination of Financial Support. Students in good standing may request continuing GTA/GRA and clinical assistantship support beyond the fourth year on a semesterly basis to the Director of Graduate Studies. Students in good standing with GTA/GRA support beyond the fifth year may continue at their advisor's discretion until GTA/GRA support is either exhausted or terminated by the Department.

Fellowship Nominations

Eligible students who excel in the program may be nominated by the Department for UA fellowships. Nominees are nominated primarily by their mentors for fellowships that are then reviewed by a panel of faculty members (e.g. 3-4 raters). Nominees are selected by departmental faculty rankings based upon prospective nominee research productivity, academic performance, and contributions to the Department. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits at least commensurate with those provided through GRA or GTA support.

Performance Expectations for Continuing Financial Support

To receive continuous support the student must:

- be in good academic standing in the Psychology PhD program.
- remain clear of all infractions outlined under Conditions for Termination of Financial Support.
- complete all mandatory annual training and abide by all rules and policies held by the University of Alabama, the UA College of Arts and Sciences, UA Environmental Health and Safety, and the Department of Psychology.
- adequately perform all duties assigned to them as a GTA/GRA in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.
- exhibit continuous research progress as directed by the research advisor and the student's thesis and dissertation committees.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria will be subject to termination of financial support pending Department of Psychology administrative review. Depending on the severity of the infraction or the extent of non-compliance, the Department Chair and Graduate Director - with input from the Graduate Committee - will recommend immediate termination of financial support, termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

- *Dereliction of duty.* Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee (for teaching assistants) or the research advisor (for research assistants); or failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee (for teaching assistants) or by the research advisor (for research assistants) and the student's departmental memorandum of appointment.
- *Resolved findings of Academic Misconduct.* Penalties, including potential loss of financial support, will be determined with guidance from the UA Graduate School and/or the UA College of Arts and Sciences.
- *Loss of good academic standing.* Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing - with the non-passing grade exception noted below. Financial support will be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of C (in courses at any level) or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the Graduate Committee. This review will determine whether the student should continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered prior to the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.
- *Insufficient continuous program progress.* The faculty area committee determines if a student is making adequate program progress

commensurate with their time in the program during required annual reviews. If the committee determines the student is not making adequate program progress, the student will be granted one probationary semester (i.e., academic semester or full summer term) with financial support to remedy productivity deficiencies, as assessed by the area faculty. Failure to meet minimum Departmental expectations by the end of the probationary semester may result in immediate termination of financial support at the discretion of the Graduate Director and Department Chair.

Department of Religious Studies

- Major
 - Religion in Culture, MA (p. 425)

Chair

- Steven Ramey

Graduate Director

- Vaia Touna

Undergraduate Director

- Richard Newton

Professors

- Michael Altman
- Steven L. Jacobs
- Russell T. McCutcheon
- Steven Ramey
- K. Merinda Simmons
- Theodore L. Trost

Associate Professors

- Daniel Levine
- Nathan Loewen
- Richard Newton
- Vaia Touna

Assistant Professors

- Edith Szanto
- Jeffrey Turner

Assistant Teaching Professor

- Hannah Jung

Administrative Secretary

- Andrea Shepherd

General prerequisites: Graduate standing and permission of both the director of graduate studies and the instructor. Graduate students enrolled in 500-level courses that are also offered at the 400 level are expected to perform extra work of an appropriate nature.

REL501 Social Theory and Religious Studies

Hours 3

This three credit hour graduate seminar introduces students to terms and ideas from social theory and their relevance to the academic study of religion. Throughout the course, students will apply theories to analyze examples relevant in Religious Studies, both ancient and modern. Each student will also select an important work in their chosen field of study in consultation with their advisor and analyze that work in depth in relation to the various issues discussed in the course.

Prerequisite(s): None, except admission to degree program

REL502 Public Humanities and Religious Studies

Hours 3

This graduate seminar introduces students to public humanities and digital humanities approaches to the study of religion. Students learn methods and tools for conducting digital research and explore ways to communicate theoretical and religious studies research to public audiences through digital media. Students are introduced to a number of digital tools for research, scholarly communication, and public engagement and will work to apply those tools to their individual research interests and goals.

Prerequisite(s): None, except admission to degree program

[View All Courses](#)

Religion in Culture, MA

Description

Taking the Department's motto seriously – studying religion *in* culture – this MA degree explores cross-disciplinary social theory and applies it to the study of religion, seeing each site studied as a test case in identity formation. Unlike other graduate programs in the study of religion, the MA in Religion in Culture at The University of Alabama presses beyond mere description and cross-cultural comparison, instead using social theory to understand the effects that narratives, practices, classification systems, and institutional structures have on social groups and their members. The degree program maintains this approach with a combination of analytic tools and digital skills, training students to use innovative technologies so as to communicate their findings effectively to wide audiences.

Two Key Foundations

The premise of the degree is that the work taking place in our field has wide relevance. **Critical analysis** and **innovative communication skills in the public humanities** are therefore both cornerstones of this MA. While all students will carry out their own independent research and gain co-writing experience with their supervisor, courses will require them to produce original article-length research papers and to create substantive digital presentations. These emphases begin in the first semester of the program, with two Foundations courses: one in social theory and the other in public humanities. In consultation with their supervisor, their culminating thesis project will emphasize one or the other of these two modes of scholarly communication – allowing students to tailor the thesis to suit their own interests and career plans.

Supervision

Supervisors are assigned by the graduate committee during a student's first semester typically, based on the **statement of purpose** and discussions, both in seminars and informal conversations. The statement of purpose is vital as the primary means by which the graduate committee determines whether there is sufficient overlap of faculty

expertise with incoming students' interests and needs. (The assignment of a supervisor is open to revision, at the discretion of the graduate director, should student interests change.) Faculty supervisors assist students in navigating the degree program, advising courses based on student interests, and mentoring the completion of a culminating thesis project.

Degree Structure

The **36 credit hour** graduate degree (2 years of course work, including the final thesis) focuses on providing students with two critical foundations: (i) becoming conversant in contemporary social theory and applying it to their area of interest in the study of religion and (ii) developing competencies in the tools of the public, digital humanities. In their first semester students will be not only reading widely in social theory (and applying it to an historical, regional, or ethnographic example of their choice) but also gaining familiarity with a wide variety of digital tools (from video and audio recording and editing, to making web pages and working with "big data") that will assist them in sharing their research. Students are also encouraged in their second semester to take a course examining the history of the study of religion in order to think critically about the application and relevance of those foundational elements in the field of religious studies.

Accelerated Masters Program (AMP)

Qualified undergraduates during their junior year can apply for the Accelerated Masters Program. If accepted, during their senior year they will take 4 MA courses that will count towards their BA Religious Studies major and MA Religion in Culture degree. After their senior year, they will need to complete 24 additional credit hours in the MA program to complete the graduate degree.

Relevance of the Degree

The program is designed not only for students hoping to pursue doctoral work but also for those aiming to use these skills in any number of other professions – places where the analytic skills gained from working in social theory are enhanced by their communication skills and digital expertise. Rigorous coursework and original research with the mentorship of faculty prepares students for prestigious PhD programs; meanwhile, experience applying digital platforms to those research interests equips students with sought-after skills that can be applied to a number of careers.

Non-credit Colloquium

A required, non-credit **Graduate Colloquium** meets twice each semester and exposes students to a range of professional issues relevant to higher education today. The kinds of topics covered include, but are not limited to: teaching, C.V. preparation, applying for future graduate study, and career opportunities outside academia.

Internships

Although not required, the degree's aim to help prepare a wide variety of students for futures beyond their M.A. means that the Department encourages its graduate students to consider participating in an internship at some point in their degree. The Department has already established relationships with a variety of on- and off-campus groups which are eager to work with our graduate students, and our students earn course credit in REL 565. Whether students hope to apply to a Ph.D. or look for work in any number of other careers, the practical experience of putting their various skills to use during an internship will come in hand.

Funding

There are a limited number of **graduate teaching assistantships** (GTA) – full or partial – that are awarded annually on a competitive basis. Full GTA positions (i.e., 0.5 FTE) come with a full stipend and full tuition waiver (whether in- or out-of-state); partial GTA positions (e.g., 0.25 FTE) come with a half stipend and half tuition waiver.

Contact

For more information, contact Prof. Vaia Touna (vaia.touna@ua.edu), REL's graduate director.

Admissions

Students seeking an M.A. degree in the study of religion at The University of Alabama must first have earned an undergraduate degree in either the academic study of religion or related field and demonstrate how their areas of interest intersect with the program and Religious Studies faculty expertise.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- CV
- Statement of Purpose including the planned program of study
- Writing sample
- Three letters of recommendation.

Note: students who have graduated from UA's Religious Studies program – if overlapping with current faculty – do not need to submit letters of recommendation. Only one letter of recommendation is required of those students who have not majored in REL but who have taken courses with current faculty.

For full consideration of possible funding, applications to begin the program in the fall semester must be completed no later than **December 1**. Applications to begin in the spring semester are possible as well and must be submitted no later than **October 15**.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

It is expected that, in their first Fall semester, all graduate students will enroll in both REL 501 and REL 502 along with an additional graduate seminar. The aim of this first semester is to acquire skills (social theory + public humanities skills) while also beginning to explore, in those courses, the specific historical, regional, or ethnographic e.g. on which each student will focus during their culminating research project.

In all subsequent semesters (i.e., Fall and Spring), students will normally enroll in three courses (for 9 credit hours), so as to complete the degree in 2 academic years.

With permission of their supervisor and in consultation with the Graduate Director, some of these hours may be taken outside the Department, so that students can benefit from campus-wide resources (e.g., language training necessary for carrying out their research).

In their final Spring semester, students pursuing the formal thesis option will usually enroll in 6 hours of Thesis and 3 hours of the Capstone Seminar (a collaborative course dedicated to supporting their research by inviting feedback from a faculty member other than their supervisor as well as from all other students in their cohort). Students pursuing the non-thesis option will take the 3-hour Capstone Seminar, as well as six hours of electives relevant to their research.

Thesis Option**Hours****Required Courses**

1. Six hours of Foundation courses will be taken in the Fall semester of the 1st year:

REL 501	Social Theory Foundations	3
REL 502	Public Humanities Foundations	3

2. Nine hours of required courses will be taken in the Spring of the second year:

REL 590	Capstone Seminar	3
REL 599	Thesis Hours	6

Elective Courses¹ **21**

REL 503	Methods Digital Study of Rel	
REL 504	Special Topics	
REL 511	History of Religious Studies	
REL 512	Debates in Method and Theory	
REL 521	Self & Society	
REL 522	Power & Persuasion	
REL 523	Discourse & Practice	
REL 524	Past & Present	
REL 525	Identity & Place	
REL 560	Independent Study	
REL 561	Independent Study	
REL 565	Religion in Culture Applied	
REL 580	Academic Writing in REL	

Total Hours **36****Non-Thesis Option****Hours****Required Courses**

1. Six hours of Foundation courses will be taken in the Fall semester of the 1st year:

REL 501	Social Theory Foundations	3
REL 502	Public Humanities Foundations	3

2. Nine hours of required courses will be taken in the Spring of the second year:

REL 590	Capstone Seminar	3

Elective Courses¹ **27**

REL 503	Methods Digital Study of Rel	
REL 504	Special Topics	
REL 511	History of Religious Studies	
REL 560	Independent Study	
REL 565	Religion in Culture Applied	
REL 525	Identity & Place	
REL 522	Power & Persuasion	
REL 521	Self & Society	
REL 561	Independent Study	
REL 580	Academic Writing in REL	
REL 524	Past & Present	
REL 512	Debates in Method and Theory	
REL 523	Discourse & Practice	

Total Hours **36****Footnotes**

¹ In consultation with your supervisor, students will complete an additional twenty-one hours of graduate course work, including independent study courses and seminars in REL, plus graduate courses from other departments (in consultation with your supervisor and the Grad Director). For e.g., depending on the student's program of study, courses in foreign languages, taught through Modern Languages and Classics, and may be recommended. In addition, a required, non-credit Graduate Colloquium, led by the Graduate Director, meets monthly, to discuss a variety of professional issues in the study of religion in particular, or higher ed in general. REL faculty are invited as well.

Transfer Credit

Graduate-level credit earned at an accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in the REL degree program.

Evaluation of credit for transfer will not be made until the student has enrolled in the graduate school of the University of Alabama. Courses that received a grade of less than a "B" will not be accepted for transfer of credit.

A student initiates at the Office of the Graduate School the request for transfer of graduate credit obtained at another institution. The student must also ensure that the Office of the Graduate School has an official transcript of the credit involved.

With the approval of the student's advisory committee and the Dean of the Graduate School, up to 12 hours of coursework for a graduate degree may be transferred from another institution. All credit toward the master's degree must have been earned during the six years immediately preceding the date on which the degree is awarded. Details about the Graduate School's policy on Transfer Credit is available in the Degree Requirements section (p. 15) of the Graduate Catalog.

Accelerated Master's Program (AMP)

Graduate School information on the Accelerated Master's Program.

Capstone Seminar Requirement

All students in the Spring semester of their final year will enroll in REL 590 Capstone Seminar as their culminating experience in the M.A. Religion in Culture program. This is required for students completing either Plan I or Plan II.

Internships

Students are not required to complete an internship. Any student who wishes to learn through an internship should discuss options for enrolling in REL 565 Religion in Culture Applied with their supervisor and the Graduate Director. The Graduate Director will set up each internship in consultation with the advisor and interested student.

Plan I – Thesis Process Requirements

In consultation with the Grad Director and supervisor (if applicable), a student can opt to complete a defended thesis as the culminating project (defined as a piece of original research that is potentially publishable as an academic article).

If pursuing the formal/official thesis option, certain deadlines must be met. By the end of the first semester, a student should know what kind of thesis they will pursue (see two options below), as well as its broad research topic.

All MA students who choose Plan I will complete 6 thesis hours in their second/culminating year of study. These hours will be completed under the supervision of a faculty advisor and will require a public defense at its completion.

If choosing Plan I, a student will have a choice between two thesis options: a traditional written thesis or a digital project. In both cases, you will form a committee to direct the development of the project and formally defend both the proposal and the work upon completion. The faculty advisor will oversee the process and offer feedback and guidance along the way.

- Traditional Thesis: This will culminate in an article-length (25-35 pages) project of original, substantive research that can be submitted for peer review publication.
- Digital Project: This will culminate in a substantive, research-based digital project that relies upon social theory and digital skills gained across the degree program.

Plan II – Non-Thesis Process Requirements

In consultation with the Grad Director and supervisor, a student can opt to pursue either of the following non-thesis options. 1) the comprehensive exam route, which can entail a set of exams in the last semester or, 2) participation in the already required REL 590 Capstone Seminar – this later route is recommended, as it can still result in an original seminar paper that you present to faculty and students. If choosing the comprehensive exam route, the student should declare that choice by the end of the second semester. Failure to declare by the end of the second semester will default to the culminating experience in the Capstone Graduate Seminar.

Time Limit for Degree Completion Requirements

The Department of Religious Studies normally expects completion of the degree program within two years. However, for multiple reasons, students may take longer to complete their degree. For more details on the general policies of the Graduate School, consult the Degree Requirements section (p. 15) of the Graduate Catalog.

Academic Misconduct Information

The Department of Religious Studies expects its graduate students to interact with each other, their professors and the REL staff, and undergraduate students in a professional and courteous manner. Academic misconduct includes all acts of dishonesty in any academically related matter and any knowing or intentional help or attempt to help, or conspiracy to help, another student commit an act of academic dishonesty. Academic dishonesty includes, but is not limited to, each of the following acts when performed in any type of academic or academically-related matter, exercise, or activity: cheating, plagiarism, fabrication of information, misrepresentation, and abetting any of the above. For more information on academic misconduct, consult the Misconduct section (p. 7) of the Graduate Catalog.

Withdrawals and Leaves of Absence Information

Any student considering a leave of absence or withdrawing from the program is encouraged to consult their supervisor and the Graduate Director. For more information about processes in the Graduate School,

consult the Withdrawals and Leaves of Absence section (p. 244) of the Graduate Catalog.

Academic Grievances Information

Students with a concern about a course or a grade (or similar dispute) should consult the appropriate faculty in the following ascending order. First, the instructor of the course, then the student's supervisor, then the Graduate Director, and finally the Department Chair. Details about the academic grievance process in the Graduate School is available in the Grievance Information section (p. 255) of the Graduate Catalog.

Grades and Academic Standing

The requirements to maintain academic standing are available in the Grades and Academic Standing section (p. 28) of the Graduate Catalog.

Graduate School Deadlines Information

Student deadlines as set by the Graduate School are available in the Student Deadlines section of the Graduate Catalog.

Application for Graduation Information

Each candidate for a master's degree must apply for graduation (through myBama) no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed. Consult details in the Degree Requirements section (p. 15) of the Graduate Catalog.

Funding for Students

The department of Religious Studies puts significant effort into securing funding for graduate students. The Graduate Committee in the department makes decisions about merit-based funding for graduate students and nominations for university-wide fellowships for each academic year. Typically, a funding offer is for one year, with GTA and GRA positions for the subsequent years determined in the preceding spring.

Decisions within the committee are merit-based, reflecting the application materials for first year students and current performance of returning students.

Offers of funding can be revoked based on performance not meeting expectations. Failure to make academic progress towards the degree and failure to complete assigned duties in an acceptable time frame (for GTA and GRA positions) are grounds for revocation of funding. Faculty may bring any concerns to the Graduate Director, who will meet with the student as appropriate to address the concerns and to make a plan for resolving the concerns, including a time frame for reevaluation.

If academic progress or the timely completion of duties are not resolved in a timely fashion, the Graduate Director, in consultation with the Graduate Committee, concerned faculty, and the department chair, will make a decision about revocation of continued funding. A student receiving a notice of revoked funding may appeal the decision of the Graduate Committee to the chair.

In extreme cases where the actions or inaction of the GTA / GRA is detrimental to student learning and / or the functioning of the department, the Graduate Committee may revoke funding immediately and without warning. Students facing an immediate revocation may appeal the Graduate Committee decision to the chair.

Prerequisites for 500- and 600-level courses: Graduate standing and permission of the instructor

A sampling of courses is shown below. Use link below to see a full list of courses from the department.

DN500 Performance Practicum I-A

Hours 1-3

This course will prepare students for practical application of technique and the creative process required for dance performance at the graduate level.

Prerequisite(s): Graduate standing in Dance (MFA) or Instructor consent.

DNCA630 Professional Issues in Dance

SP

Hours 3

This course is designed to help students prepare for positions in academic and professional settings. Students will create a personal website, write their resume/CV, articulate personal goals and career aspirations, practice interview skills, and examine resources for network building.

Prerequisite(s): Dance MFA student or permission of the instructor

Special Topics Course

TH551 Hist Of The Theatre I

Hours 3

Beginnings to the Restoration. Offered every fall semester.

TH600 Advanced Practicum I

SP

Hours 1-3

This course provides for participation in productions by graduate level students within Acting, Arts Management, Costume Design and Production, Design and Technical Production, Directing, Stage Management, or other areas.

Special Topics Course

[View All Courses](#)

Dance, MFA

The Master's of Fine Arts (MFA) degree in Dance at the University of Alabama will develop students' creative, performance, and scholarly work and prepare them for multiple professional destinations as dance artists, scholars, and teachers. The Dance (MFA) degree program will support the development of diverse skills in classical and contemporary dance techniques, dance pedagogy, historical perspectives and critical

theory, as well as technical and artistic integration of dance-specific technologies.

Admissions

An audition and interview is required for all MFA applicants. Acceptance into the Department of Theatre and Dance (MFA) program requires admission to the UA Graduate School as well as admission to the department. The audition will include movement classes to demonstrate technical and performance proficiency. Each prospective MFA student will be scheduled for a 20-30 minute individual interview with members of the faculty during the audition process. Applicants will open the interview with a brief presentation that highlights their interests in graduate work at UA and outlines possible areas of emphasis.

Statement of Purpose: Candidates will compose a two to three page, double-spaced artist/research statement explaining their interest in pursuing an MFA degree within the UA program. The essay should situate candidates within the field at the present time, gathering significant details of candidates' previous experiences, clarifying current involvement and interest in dance, discussing creative influences, sharing their studio practice and research process, and speculating about the candidates' future intentions within the field. Reviewers are interested in getting to know something about the candidates as dance professionals through this writing, but applicants should also demonstrate their ability to handle language with fluency.

Curriculum Vitae: This document should accurately reflect candidates' completed educational background and all of their professional and related experiences to date. The document should be thorough and comprehensive.

Work Samples: List Vimeo, YouTube or similar resources as hyperlinks in a Word or PDF attachment. These samples should demonstrate candidates' expertise and interests, such as excerpts of choreography, documentation of performances, samples of lighting plots, dance notation, or dance media projects. All materials must be accompanied by a clearly written legend identifying the contents, including title, order of materials, date and explicit identification of your contribution. Film clips may be edited or unedited and there is no time limit.

At least three letters of recommendation must be submitted. Letters should speak to candidates' artistic and academic strengths. At least two letters should be from someone at an academic institution (past or present) who can speak to these strengths, even if previous academic work was not in Dance.

Transcripts

Unofficial transcripts will be required to apply. Official transcripts from prior institutions will be required after admission/acceptance.

GRE scores are not required.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Over the course of three years, students will complete a minimum of 60 credit hours in a range of dance studies courses. Students are expected to complete their coursework on the Tuscaloosa campus where faculty may nurture and support their progress through the curriculum. Students will also complete and present a substantial MFA Capstone Project demonstrating a synthesis of craft, artistic vision, and conceptual rigor, as well as professional competence in their selected research area. The Capstone Project is based on creative work, a choreographic/creative

project usually presented in a concert, accompanied by a scholarly paper and an oral defense of the project and paper.

Code and Title		Hours
STUDIO/CREATIVE/PERFORMANCE		39
Credit Hours Subtotal:		39
Students will choose a minimum of 39 credits from the following options, 6 of which will include DN 540 and DN 541, and 3 of which will include DN 595 toward the Capstone project.		
DN 511	Contemporary Tech I-A	
DN 512	Contemporary Tech I-B	
DN 521	Graduate Ballet Technique I-A	
DN 522	Graduate Ballet Technique I-B	
DN 531	Graduate Movement Practice I	
DN 551	Graduate Jazz Technique I-A	
DN 552	Graduate Jazz Technique I-B	
DN 611	Contemporary Tech II-A	
DN 612	Contemporary Tech II-B	
DN 621	Graduate Ballet Technique II-A	
DN 622	Graduate Ballet Technique II-B	
DN 631	Graduate Movement Practice II	
DN 651	Graduate Jazz Technique II-A	
DN 652	Graduate Jazz Technique II-B	
DN 540	Improv and Comp I	
DN 541	Improv and Comp II	
DN 505	Graduate Teaching Practicum	
DN 535	Rhythm, Music and Dance	
DN 580	Independent Movement Study	
DN 640	Collaborative Practice	
DN 650	Creative Process in Dance I	
DN 655	Creative Process in Dance II	
DN 670	Dance in the Digital Age	
DN 680	Laban/Bartenieff Studies	
DN 500	Performance Practicum I-A

DN 600	Performance Practicum II-A	
DN 601	Performance Practicum II-B	
DN 602	Staging Repertoire	
DN 595	Capstone Creative Research	
ACADEMIC (15 credits) Students will choose a minimum of 15 credit hours from the following options, 3 of which will include DNCA 503 during the first year, 3 of which will include DNCA 570, 3 of which will include DNCA 660, and 3 of which will include DNCA 595 toward the Capstone project.		15
DNCA 503	Graduate Teaching Methods	
DNCA 565	Science of Dance Training	
DNCA 570	Research Methods in Dance	
DNCA 580	Independent Contextual Study	
DNCA 630	Professional Issues in Dance	
DNCA 660	Body Politics in Dance	
DNCA 595	Capstone Scholarly Research	
ELECTIVES (6 credits) Students will choose 6 credits of electives based on their research focus. Courses may be within the dance degree or without.		6

Transfer Credit

Subject to approval by the department chairperson and the dean of the Graduate School, a maximum of 15 semester hours of graduate work may be transferred from another institution. These hours must be in dance or in a closely allied subject, and they must contribute to the student's educational objective.

Graduate School information on Transfer Credit (p. 15).

Comprehensive Exam/Capstone

Students will follow the Plan II Program Requirements, as described by the Graduate School, to complete the degree. A final "culminating" or "capstone" experience for a degree is required of all University of Alabama candidates for the master's degree. In the culminating experience, students are expected to integrate prior learning and demonstrate mastery in their field of study. This will take form through the following three required components:

- A choreographic/creative project, presented at a public performance or exhibition
- A contextualizing process and research paper
- An oral defense of the project and paper

By the end of the third semester of the degree program, a written proposal for the Capstone project must be presented to the graduate dance faculty as part of the semester review. The faculty will evaluate the feasibility and innovation of the proposal as well as how the project will further the field of dance. Faculty can either approve the project as proposed or suggest revisions. Students will receive considered advice from faculty, however, the responsibility of articulating an idea and completing the proposed work in a fashion acceptable to the faculty rests with the student.

All students are required to take 3 credit hours of DN 595 Capstone Creative Research which focuses on the creative elements of the project. The course is centered around movement, rehearsal, and creative work building up to regular showings and faculty feedback toward the final creative product showing. Students are also required to take 3 credit hours of DNCA 595 Capstone Scholarly Research in which they will implement the research plan for their MFA Capstone Project focusing more on the scholarly research. The process may include research, reading, writing, interviews, viewings, and working with digital media. This course is designed for the implementation of the MFA Capstone Project research plan leading up to the final written document and oral defense. Students will take 1 credit each of DN 595 and DNCA 595 in their final three semesters of the program. The creative project should be presented at the end of the 5th semester or the beginning of the 6th semester. The final paper submission and oral defense will occur in the middle of the 6th semester. This process may shift dependent upon recommendations from the student's Capstone Committee.

The written project must be submitted to the committee at least two weeks before the oral defense date which should be scheduled no later than the first week of April. Students' projects and papers must be submitted to their committee Chair in appropriate digital formats. The most preferred format for the final paper is a Portable Document File (PDF). The most preferred format for the creative project is .mov file or a weblink to the work on Vimeo or in UABox. The contents of the files should be appropriately organized as if for publication. The Capstone committee will review student materials and progress throughout the process to ensure that the final product submitted is acceptable. The Capstone committee will determine the grade assignment for DN 595 and DNCA 595, as well as whether the student passes the oral defense

of their project and paper. The graduate advisor will store the work in a digital repository for Dance MFA Capstone Projects for Department archival purposes.

Timelines for Degree Completion Requirements

Graduate School Information on Time Limits (p. 15).

Student Progress Requirement

The Dance Program will hold reviews at the end of the 1st-4th semesters for each MFA candidate. Students in their final year are reviewed through the Capstone Project process. The review is designed to give graduate students an idea of their progress toward the successful completion of their degree program, identify strengths and weaknesses, document areas of professional and personal development, and evaluate assistantship duties (as applicable).

Faculty will provide numerical scores from 1 (unacceptable) to 4 (exceeds expectations) on academic progress, work ethic, professional development, and assistantship duties (as applicable), as well as provide narrative commentary to support the scores. For scores of 2 or 1 in any given area, a student may be placed on probation and a specific plan for improvements will be included to implement in the following semester. Should students not be able to implement the necessary improvements by their next review, continuing to earn a score of 2 or 1, they may be dismissed from the program.

Two weeks before their review, students must complete a self-assessment of their skills and progress in response to the Department Self-Reflection instructions to submit to the Graduate Director. Before the review meeting, the faculty will submit the completed assessment to the student with the scores and written comments, so the conversation can be more focused during the meeting. In addition to the verbal conversation, students may add additional comments to the written review before signing. Signed and completed reviews will be stored digitally by the Department for archival purposes.

Application for Graduation Information

Information on the Application for Graduation.

Based on students' experience and expertise, select graduate candidates are eligible for assistantships which are applied toward tuition, course fees, and health insurance, and provide a stipend. Students may be

considered for a .25 assistantship, which covers half of the tuition, course fees, and insurance costs with a stipend and requires an average of 10 hours per week of work for the program, or a .5 assistantship, which covers full tuition, course fees, and insurance costs and provides a larger stipend while requiring an average of 20 hours per week of work for the program. Assistantship work is above and beyond a student's normal academic load and assignments for their degree program. MFA candidates on assistantship typically serve as TAs for professors, assist with program needs, or teach courses for undergraduate students based on their areas of expertise.

Graduates with funding are evaluated on a semesterly basis. Faculty will provide numerical scores from 1 (unacceptable) to 4 (exceeds expectations) on a review of students' performance of assistantship duties, as well as provide narrative commentary to support the scores. For scores of 2 or 1 in any given area, a student may be placed on probation and a specific plan for improvements will be included to implement in the following semester. Should students not be able to implement the necessary improvements by their next review, continuing to earn a score of 2 or 1, they may lose their funding. Please note that a loss in funding does not equal dismissal from the MFA program for students in good academic standing and who have not been found to have committed misconduct worthy of dismissal.

Theatre, MFA

The Master of Fine Arts degree in Theatre offers intensive training in six areas of study giving students the tools necessary to pursue a career in the entertainment industry. Programs typically only accept students in Fall Semesters.

Acting

The Acting Concentration is a rigorously structured sequence of study that provides the actor a solid base of technique and proficiency in an array of acting styles and methods.

Arts Management

The Arts Management Concentration offers a well-rounded education through coursework from the Department of Theatre and Dance, the Manderson Graduate School of Business, and the College of Communications and Information Sciences. There is also the opportunity to simultaneously pursue an MBA through the Manderson Graduate School of Business.

Note: The Arts Management concentration total enrollment is capped at six students.

Costume Design and Production

The Costume Design and Production Concentration includes general and advanced courses in costume design, history, construction, and crafts.

Design and Technical Production

The Design and Technical Production Concentration includes study in Lighting Design, Scenic Design, Sound Design, Technical Direction, and associated areas. Students are exposed to all areas within coursework throughout their time in the program. Students' realized production work can be centered around a particular area or they can have opportunities in multiple areas.

Directing

The Directing Concentration is an intense three-year program with a dual focus on production and preparation for academia. It is geared towards nascent directors who have already mastered the basics of theatre directing and helmed a few productions (of any size or budget, including very small).

Note: The Directing program typically accepts only one new MFA candidate per year.

Stage Management

The Stage Management Concentration is a production-oriented, three-year intensive that focuses on providing a diversity of management experience to candidates as well as ongoing mentorship and teaching opportunities in an academic environment.

Note: The Stage Management program typically accepts only one new MFA candidate per year.

Admissions

The Theatre MFA degree requires specialization and admission to one of the following areas of study: acting, arts management, costume design and production, design and technical production, directing, or stage management. Admission to the MFA degree program in theatre requires satisfaction of all admission requirements as described in the Admission Criteria section of this catalog. Admission is awarded based upon a portfolio review, interview, and acceptance into The University of Alabama Graduate School for specialization in arts management, costume design and production, design and technical production, directing, and stage management. Admission is awarded based upon audition, interview, and acceptance into The University of Alabama Graduate School for the acting specialization.

The MFA program is normally a three-year program. Students who hold the MA degree in theatre upon admission to the program may expect a shortened course of study, dependent upon faculty evaluation of the previous work. Students seeking such a shortened program must apply to have previous work evaluated. Normally, a two-year minimum residency is required for students with shortened programs. Courses related to Theatre in other Departments may be considered within the 45 required credit hours upon approval of the Area Head within a specialization and the involved Department.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Should deficiencies in the student's undergraduate program be perceived, appropriate undergraduate courses will be required. While these undergraduate courses may not be counted toward the graduate degree, they may be taken in addition to the maximum allowable number of graduate hours.

All students must follow Plan II (non-thesis) and complete a **minimum of 60 credit hours** of graduate coursework for the degree. The MFA program has a required core curriculum and the individual program Concentrations have both required and elective coursework.

Continuation in the MFA degree program is contingent upon recommendation by the theatre faculty, following an annual review of the student's academic and production work. Students may be placed on probation following the review; students placed on probation have one semester in which to reestablish good academic standing. Under no

circumstances will a student be permitted to continue in the program on probation for more than one semester.

Program Core		Hours
History, Theory, and Criticism Requirements		6
TH 530	Hy Costume For Stage	
TH 543	Script Analysis Interpnt	
TH 551	Hist Of The Theatre I **

The program typically accepts one new MFA candidate in stage management a year.

Additional Curricular Information

The following information applies to all MFA Concentrations.

Transfer Credit

Subject to approval by the department chairperson and the dean of the Graduate School, in specified programs, a maximum of 15 credit hours of graduate work may be transferred from another institution. These hours must be in theatre or in a closely allied subject, and they must contribute to the student's educational objective.

Graduate School information on Transfer Credit (p. 15).

Comprehensive Exam/Capstone (Plan II - Non-Thesis Process Requirements)

MFA Theatre students follow the Plan II program requirements, as described by the Graduate School, to complete their degree. For the Department of Theatre and Dance, a requirement for this degree plan is that a student must complete a culminating or capstone experience. The Capstone Experience is one in which students are expected to integrate prior learning and demonstrate mastery of their field of study. At a minimum, this will typically take the form of one or more of the following:

- A research paper, a policy and practice paper, or equivalent experience
- A public performance or exhibition along with a contextualizing paper
- A practicum or internship

Every Capstone submittal must include a significant writing component. The specific topic of a student's individual Capstone will be chosen by the beginning of their final year in the program. Each student's Capstone work must be an individual project rather than a group project. While it is understood that students often work together on particular productions, the nature and choice of an individual student's Capstone must be such that their work can be individualized and reviewed as a distinct piece of work so that their grade is reflective of the work they have done, rather than the work of a group. In some cases, the actual development of the project or documentation of the Capstone may occur over multiple semesters, depending on the concentration and the direction of the Area Head.

Work on a student's capstone will be performed under the TH 695 Capstone Experience in Theatre course. Each student will receive an individual grade within that course that not only reflects what they have submitted but also reflects their demonstration of their overall mastery of their field of study. Each student's submission must be complete and submitted to their Area Head by the last day of Final Exams in their last semester. Any submittal past that date will be penalized according to the discretion of their Area head.

Each student's submittal must be in the form of a single digital file of an appropriate digital format. The most preferred format would be a Portable Document File (PDF). Files from particular software products such as Microsoft Word will not be accepted. The contents of the file should be appropriately organized as if for publication. This file will be submitted as directed by the student's individual Area Head. It is advised that the student have their Area Head review their materials and progress throughout the process to ensure that the final product the student will be submitting is acceptable.

The Area Head will thoroughly review what the student has submitted before making any determination of a grade assignment. With the grade assignment, the Area Head will provide the student with a digital copy of the formal review of their submittal. The Area Head will then take the student's submittal and their formal review to save within the digital repository for MFA Theatre Capstone Projects so that they can be held for archival purposes.

Capstone Projects are evaluated with scores of 1 (unacceptable) to 4 (exemplary) on the following competencies:

- Competency 1: Mastery of fundamental technical skills and methods
- Competency 2: Mastery of specialized skills appropriate to area/ Capstone Project
- Competency 3: Well-articulated conceptual framework for the project
- Competency 4: Demonstrated fulfillment of project in alignment with the project proposal or planning
- Competency 5: Demonstrated problem-solving abilities and creative, critical thought processes
- Competency 6: Clarity of supporting materials that provide explanation of the project
- Competency 7: Critical assessment of the work and the creative process
- Competency 8: Clear description of the development of skills or acquisition of new skills related to the production of the project
- Competency 9: Professionalism throughout the process

Students must receive a score of 3 or higher on competencies 1 and 2, on at least 2 competencies within 3-6, and on at least 2 competencies within 7-9 to successfully pass their Capstone Experience.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 15).

Student Progress Requirement

The Concentration areas will hold reviews at the end of the 1st-4th semesters for each MFA candidate. Students in their final year are reviewed through the Capstone Project process. The review is designed to give graduate students an idea of their progress towards the successful completion of their degree program, identify strengths and weaknesses, document areas of professional and personal development, and evaluate assistantship duties (as applicable). Faculty will provide numerical scores from 1 (unacceptable) to 4 (exceeds expectations) on academic progress, work ethic, professional development, and assistantship duties (as applicable), as well as provide narrative commentary to support the scores. For scores of 2 or 1 in any given area, a student may be placed on probation and a specific plan for improvements will be included to implement in the following semester. Should students not be able to implement the necessary improvements by their next review, continuing to earn a score of 2 or 1, they may be dismissed from the program. Two weeks before their review students must complete a self-assessment of their skills and progress in response to the Department Self-Reflection instructions to submit to their Area advisor. Before the review meeting, the faculty will submit the completed assessment to the student with the scores and written comments, so the conversation can be more focused during the meeting. In addition to the verbal conversation, students may add additional comments to the written review before signing. Signed and completed reviews will be stored digitally by the Department for archival purposes.

Grades and Academic Standing

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines Information

Information on the Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 15).

Based on experience, expertise, and through the interview/audition process, select graduate candidates are eligible for a 0.5 FTE

assistantship which covers tuition, course fees, health insurance, and provides a monthly stipend.

Students on 0.5 FTE assistantship are required to work an average of 20 hours per week for the program. Assistantship work is separate from a student's normal academic load and assignments for their degree program. MFA candidates on assistantship serve as teaching assistants for professors, assist with program needs, work in production shops, or teach courses for undergraduate students based on their area of expertise, experience, and assessment of readiness.

Graduate students are evaluated each semester for their academic performance and, when applicable, for the fulfillment of their assistantship responsibilities. In situations where a student is evaluated as not meeting the requirements of the assistantship, students will be put on probation. Should students not be able to address concerns presented in their review by their next review, they may be removed from their assistantship.

Note that a loss of assistantship does not equal dismissal from the MFA program for students in good academic standing and meeting all the requirements for continuing their studies with the university.

Manderson Graduate School of Business

The Manderson Graduate School of Business is the graduate division of the Culverhouse College of Business. The mission of the College is to foster an inclusive community, committed to personal engagement and dedicated to shaping the future of business through excellence in teaching, research, and service. Manderson offers several Master's and Ph.D. degree programs. Master's degrees may serve as terminal professional degrees; that is, they are designed primarily for people who plan for professional careers in business, government, or nonprofit organizations. They may also function as preparatory programs for the pursuit of doctoral level education. The Ph.D. programs prepare graduates for careers as university level professors or as professional researchers. The Ph.D. requires an extensive, in-depth investigation of a subject area in their major field of study, culminating in the completion of a doctoral dissertation.

The Manderson Graduate School of Business features MBA and EMBA degree programs, along with ten (10) Specialized Master's and seven (7) Ph.D. degree programs (see navigation below). All programs are accredited by AACSB International—The Association to Advance Collegiate Schools of Business.

Program Overview

The objective of the Manderson MBA program at The University of Alabama is to prepare high-achieving, high-potential students for successful business careers in a globally competitive environment. The MBA program has a commitment to providing a high value-added experience within a diverse and collaborative learning environment.

The academic curriculum emphasizes fundamental business concepts, knowledge, and skills through an interdisciplinary perspective. Case studies, projects, teamwork, and technology contribute to a dynamic applied learning environment. Co-curricular involvement is an integral component of the MBA program experience. In addition to satisfactory completion of the academic curriculum, MBA students must participate in co-curricular opportunities to satisfy degree requirements and graduate from the program. Multiple co-curricular opportunities and activities, which are aligned with professional development competencies, will be provided each academic term. Progress toward the completion of the co-curricular requirement will be tracked throughout the duration of the program.

MBA Program Formats

The Manderson MBA Program is offered in a variety of formats. The Traditional MBA is a full-time, two-year program that requires a focused area of study and is entered after the completion of an undergraduate degree. The STEM and CREATE Paths to the MBA are five-year programs integrated with quantitative and creative undergraduate disciplines, respectively, at The University of Alabama. The STEM and CREATE MBA programs also require a focused area of study. Students on one of these paths must graduate with their undergraduate degree before starting their "full-time" MBA year.

Traditional MBA

The Traditional MBA program begins in the fall semester. Students must be enrolled for four consecutive Fall and Spring semesters that span over the two-year program. During the intervening summer, students are expected to be involved in meaningful internships to further enhance their professional experiences. Students take a prescribed program of courses and cross-discipline work that blends the analytical tools of management and the functional areas of business into a general management perspective. Topics include accounting, economics, finance, management, marketing, operations, strategy, communications, information systems, and statistics. In addition, each student pursues elective courses leading to a mandatory focused area of study. Teaching methods combine cases, lecture-discussion, and projects. Small class sizes allow faculty members to use a variety of techniques for enhanced learning.

STEM Path to the MBA

The STEM Path to the MBA is a five-year program designed for entering University of Alabama freshmen majoring in a STEM (science, technology, engineering, or mathematics) area. This program integrates business honors courses with the STEM undergraduate degree and culminates in the MBA program. Students will apply to the MBA program during their undergraduate studies as advised. Upon acceptance to the MBA program, students in the STEM MBA program begin the MBA by taking online courses in the summer semester after the completion of their junior year of their undergraduate major. Students will complete another summer semester of online MBA courses after finishing their STEM undergraduate degree. Upon earning and graduating with their undergraduate degree (mandatory), students are then allowed to enter the full-year portion of the MBA program (in-person) to complete their MBA degree. During the two summertime periods, students are expected to be involved in meaningful internships to further enhance their professional experiences.

During each semester of their four years of undergraduate study, students enroll in a 1.5 credit-hour Business Honors course. These honors courses focus on communication and leadership skills. Students work in teams on community projects to develop both an appreciation for and a basic understanding of the importance of management skills in science and technology careers and to create an opportunity to interact with other STEM/CREATE students, as well as with executives from technology companies and MBA faculty members.

The Business Honors courses are taught by a faculty member who is assigned to the cohort in the freshman year and works with them through their senior year. This provides continuity of contact and allows the faculty mentor to track the students through the program.

During the sophomore, junior, and senior years, STEM discipline students can expect to be off campus and involved in internships, cooperative-learning experiences, and other online learning activities. The Business Honors courses include extensive use of digital technology: streaming video of presentations from guest speakers, teleconferencing for student presentations and class meetings, and the use of course management software that allows off-campus students to remain engaged and participate in coursework.

CREATE Path to the MBA

The CREATE Path to the MBA is a five-year program that targets students majoring in one of the various creative disciplines, including, but not limited to: art, music, fine arts, literature, fashion retailing, advertising, apparel and textiles, interior design, modern languages and classics, theater, and dance. This program integrates business

honors courses with the CREATE undergraduate degree and culminates in the MBA program. Students will apply to the MBA program during their undergraduate studies as advised. Upon acceptance to the MBA program, students in the CREATE MBA program begin the MBA by taking online courses in the summer semester after the completion of their junior year of their undergraduate major. Students will complete another summer semester of online MBA courses after finishing their CREATE undergraduate degree. Upon earning and graduating with their undergraduate degree (mandatory), students are then allowed to enter the full-year portion of the MBA program (in-person) to complete their MBA degree. During the two summertime periods, students are expected to be involved in meaningful internships to further enhance their professional experiences.

During each semester of their four years of undergraduate study, students enroll in a 1.5 credit-hour Business Honors course. These honors courses focus on communication and leadership skills. Students work in teams on community projects to develop both an appreciation for and a basic understanding of the importance of management skills in science and technology careers and to create an opportunity to interact with other STEM/CREATE students, as well as with executives from technology companies and MBA faculty members.

The Business Honors courses are taught by a faculty member who is assigned to the cohort in the freshman year and works with them through their senior year. This provides continuity of contact and allows the faculty mentor to track the students through the program.

The program is centered around innovative solutions to real-world problems and runs parallel to its sister program, the STEM Path to the MBA. Using nontraditional classroom methods and experiential learning opportunities, students on the CREATE Path to the MBA have the opportunity to grow both academically deep into their chosen major and functionally broad across different areas like communication, leadership, and professionalism. An added benefit from running parallel to the STEM Path to the MBA is that CREATE MBA students will gain exposure to the technical backgrounds of their peers, further diversifying their frame of reference for problem-solving.

Dual Degrees

JD/MBA Joint Degree Program in Law and Business

The University of Alabama School of Law and the Manderson Graduate School of Business offer students, who are interested in combined business and legal career opportunities, a law and MBA curriculum culminating in the awarding of the juris doctor (JD) and MBA degrees within four years. Admission is required into both programs. Further information about the joint JD/MBA Program may be obtained by contacting the director of the MBA Program and/or the Law School admissions office as well as by visiting the respective websites.

MBA Dual Degrees in Engineering

The Manderson Graduate School of Business and the College of Engineering offer students from an engineering background an opportunity to receive both their MBA and Master of Science in engineering (Civil or Mechanical) within two calendar years. Prospective students must be admitted to both programs before being allowed to pursue the dual curriculum. Further information about the dual MBA/ENG programs may be obtained by contacting the director of the MBA Program and/or the Engineering admissions office as well as by visiting the respective websites.

MBA/MFA Dual Degree

The Manderson Graduate School of Business and the College of Arts and Sciences offer students an opportunity to receive both their MBA and their Master of Fine Arts (Theater Management) within four years. Prospective students must be admitted to both programs before being allowed to pursue the dual curriculum. Further information about the dual MBA/MFA program may be obtained by contacting the director of the MBA Program and/or the Theater Management office as well as by visiting the respective websites.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, an application must include:

- Resume
- Statement of Purpose
- Transcript
- Three (3) Letters of Recommendation
- Applicant Interview
- Test Scores
 - GMAT (old version), GMAT (new version); or GRE required
 - GMAT/GRE exam waivers possible; waiver requests evaluated on a case-by-case basis
 - A TOEFL score of at least 100 or an IELTS score of at least 7.0, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)
 - Please note the MBA program does not accept a Duolingo English Test score.

See the Admission Criteria section of this catalog for more information.

Admission Deadlines and Information

TRADITIONAL Full-Time MBA

- October 15: 1st round deadline
- January 5: 2nd round deadline
- February 15: 3rd round deadline
- April 15: 4th round deadline (only offered if space remains in the class)
- May 30: 5th round deadline (only offered if space remains in the class)

STEM/CREATE Path to MBA

- Application Deadline: November 15th
- Term Start: Applicants in the Path program only: Select "summer" term for the year you plan to start (summer after Junior year).
- To qualify for the Path MBA option, students must have a minimum 3.0 cumulative GPA and be on track to complete 91 credits by the end of spring for their planned Junior year and enrolled in the STEM/CREATE Path Undergraduate program from your Freshman year at the University of Alabama. *Please contact the STEM/CREATE Path to the MBA Director for more information.*
- Participation in the program as a Freshman through Junior year does not guarantee acceptance to the MBS portion of the STEM/CREATE Path program. **Moreover, students must earn and graduate with their undergraduate degree before entering their full-time year in the MBA program.**

Co-Curricular Requirements

Manderson's co-curricular requirement is based on a comprehensive approach to providing students with the skills, experiences, and resources needed to be successful beyond the classroom and graduate school. The premise is to aid students in developing new strategies and skills to enhance business acumen and professionalism.

The goals are closely tied and consistent with the Manderson Standard, with an emphasis on experiential learning, and include the following main competencies:

- Emotional Intelligence
- Global and Cultural Engagement
- Communication Development
- Career Management

Prior to the start of the MBA program, students will learn about co-curricular attendance and participation requirements on both a per term and program basis.

Curricular Requirements

The Traditional MBA program requires the completion of 57 credit hours and offers nine (9) focused areas of study: Business Analytics, Cyber Security, Finance, Financial Risk/Engineering (FERM), Information Systems, Marketing, Real Estate, Strategic Management, and Supply Chain & Operations Management (SCOM). The Traditional MBA program has 36 credit hours of Core Requirements, 12 credit hours related to a focused area of study (FAS), and 9 credit hours of business electives.

The STEM/CREATE MBA program requires the completion of 51 credit hours and also offers nine (9) focused areas of study: Business Analytics, Cyber Security, Finance, Financial Risk/Engineering (FERM), Information Systems, Marketing, Real Estate, Strategic Management, and Supply Chain & Operations Management (SCOM). The STEM/CREATE MBA program has 39 credit hours of Core Requirements. The remaining 12 credit hours are related to a focused area of study (FAS).

The Core Requirements are listed below followed by the Focused Areas of Study (FAS) for the Traditional and STEM/CREATE MBA programs.

Executive Masters of Business Administration, EMBA**Executive MBA (EMBA) Weekend Program**

The Manderson Graduate School of Business offers an Executive MBA program that brings together successful managers, professionals, and executives across a broad spectrum of industries and job positions to earn an MBA degree. Weekend class sessions allow students to pursue their MBA degree without sacrificing current employment. This program requires a total of 48 credit hours of coursework in a lock-step, cohort-based experience. The 17-month program is delivered through a hybrid-instruction model. Students meet in-person one weekend each month (on Friday and Saturday) on the Tuscaloosa campus. In support of the monthly in-person sessions, additional course content and instruction is provided to students, typically in an online, asynchronous manner. The program is based in Tuscaloosa and generally enrolls in the spring. The program includes a mandatory global business trip/experience.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, an application must include:

- Resume
- Applicant Interview
- Completed Statement of Purpose
- GMAT or GRE exam is typically no longer required for EMBA applicants who meet specific criteria established. To qualify for this exemption, an applicant must have strong work experience (at least five years) and an undergraduate GPA of 3.0 or better OR have already earned another master's degree. *Please contact the EMBA office for additional information on this policy.*
- Test score requirements for applicants with a GPA below a 3.0 are a GMAT (old version) score of at least 500, a GMAT (new version) score of at least 485, a GRE of at least 300, or a score in the 50th percentile on the Executive Assessment.
- Minimum of five years of professional work experience

- Active support by your current employer
- An undergraduate degree from an accredited institution with a solid grade point average (prefer 3.0 GPA or better)
- 2 Letters of Recommendation. One letter must be from your supervisor; the second letter may be from another person within your company or a client. Please contact the EMBA office for more guidance on information to include in a letter of recommendation.
- A TOEFL score of at least 79 or an IELTS score of at least 6.5 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).
 - Please note that this program does not accept a Duolingo or PTE Test score.

A student who does not meet all requirements, but excels in other areas, may be admitted with Permission to Continue on a case-by-case basis.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Our team-intensive EMBA curriculum provides a thorough education in business skills, theories, and practices with focused areas of study in financials, strategy, global initiatives, and leadership. Our boardroom approach to learning leverages case studies, simulations, open debate, discussion, and in-depth projects and presentations. This teaches our professional students to make decisions amid uncertainty, conflicting data, complex policies, and intense time and fiscal pressures. The curriculum consists of 16 courses, each with 3 credit hours, for a total of 48 credit hours in the program.

Students work in study teams while in the program, and coursework is a mixture of individual and team assignments. Cases, projects, simulations, presentations, and written assignments are typical class assignments. Teams generally choose to meet each week (in-person or online). Blackboard, an online course management tool, allows students to interact with classmates and instructors and serves as an online data repository for course materials.

The courses below are offered by the Manderson Graduate School of Business. Courses offered by other divisions of the University that business students are either required to take or permitted to elect are listed under the appropriate department in this catalog or in the undergraduate catalog. Prerequisites for any course may be waived if the student has equivalent knowledge or if the student passes an examination on the required prerequisites.

AC501 Basic Acctg Managrl Finan Cont

Hours 3

Study of the fundamentals of financial accounting. Attention is given to the interpretation and uses of information contained in financial statements.

AC502 Acctng Management Decisions

Hours 3

Study of the fundamentals of managerial accounting. Attention is given to the use of accounting by business managers.

Prerequisite(s): AC 501

[View All Courses](#)

Accounting, MMA

The Master of Accountancy degree program is a fifth-year professional program designed for students whose primary career interests are accounting and assurance services. The program prepares students for professional careers in the fields by focusing on the development of research, cognitive thinking, interpersonal and communication skills.

In conjunction with the prerequisite undergraduate accounting coursework, the Master of Accountancy program provides graduates with the accounting courses required to sit for the CPA exam. The program provides graduates with the necessary development of key skills and attributes to facilitate their growth as accounting professionals.

Admissions Requirements

Regular admission and "Permission to Continue" admission decisions are made based upon all application materials: academic transcripts, statement of purpose, resume, letters of recommendation, GMAT score, work experience, etc.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- Official Transcript
- Statement of Purpose
- 3 Letters of Recommendation (at least one of which should be from an accounting professor)
- GMAT score of 500* (old version) or GMAT (new version) score of 485*
- TOEFL score of at least 79, or an IELTS score of at least 6.5, a Duolingo score of at least 110, or a PTE score of 59 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).

Admission with Permission to Continue: Students who do not meet the GMAT score requirement, but who excel in other areas may be considered for "Admission with Permission to Continue".

***GMAT Waiver Policy: Applicants who meet any of the following criteria qualify to have the GMAT requirement waived (applicants that do not meet any of the criteria may apply for a waiver which will be considered on a case-by-case basis):**

- Applicants with an Accounting GPA of 3.25 or above in a minimum of 15 upper-division credit hours.
- Applicants with a graduate degree.
- Applicants who have passed the Certified Public Accountant (CPA) exam.

- Applicants with five years of management experience that includes significant budgetary and leadership responsibility and a 3.0 (or better) upper-division undergraduate GPA from an accredited university.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Before admission to the program, students should have completed the following accounting courses or their equivalents. *Applicants should contact the program coordinator for questions regarding equivalent course requirements.*

With the approval of the program director, applicants who have not completed certain prerequisite courses prior to admission may have the option to complete the prerequisite requirements during the summer term prior to the start of graduate-level coursework.

Required Undergraduate Courses		Hours
AC 310	Inter Financial Accounting I	3
AC 311	Inter Financial Accounting II	3

Accounting, Ph.D.

The PhD Program in Accounting is a research-intensive program that provides excellent preparation for a career in academics. The four-year program is designed to provide the tools needed for long-term success as an accounting scholar in all areas, including research, teaching, and service.

The Culverhouse School of Accountancy's faculty supports students interested in archival/empirical and behavioral/experimental research in auditing, financial accounting, and tax. We seek to admit, train, and graduate students who have initiative, enthusiasm, and a desire to become scholars at major academic institutions.

Admissions Requirements

Admission recommendations are made by the PhD program committee after considering the applicant background, admission test scores, grade point averages (GPAs), statement of purpose, letters of reference, fulfillment of prerequisites, and an on-campus interview. The GMAT is preferred, but students may choose to take either the GMAT or the GRE.

- Application Fee
- Resume
- 3 Letters of Recommendation
- GRE score with a quantitative score ≥ 162 , a verbal score ≥ 160 , and an analytical writing score ≥ 4.5 , GMAT score ≥ 660 (old version), or GMAT (new version) score ≥ 615 .

- TOEFL score of at least 100, an IELTS score of at least 7.0, or a PTE score of at least 68 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

- Please note that this program does not accept a Duolingo Test score.

An applicant who is accepted for admission to the Culverhouse School of Accountancy PhD Program will be admitted as a regular full-time in-residence PhD student. The Culverhouse School of Accountancy PhD Program has no other category of admissions.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Ph.D. Program in Accounting involves two years of rigorous coursework. In addition to Accounting seminars, students take courses in Statistics and Economics. Depending on their research focus, students often will take additional electives in other departments such as Psychology or Finance.

Required Courses:		Hours
AC 610	Intro Accounting Res I	3
AC 620	Acctg Research Sem I	3
AC 630	Archival Acctg Research	3
AC 640	Experimental Acctg Research	3
AC 650	Directed Research	3
AC 691	Research Practicum I	3
AC 692	Research Practicum II	3
EC 600 or	Advanced Mathematical Economic (Preferred over EC 570)	3
EC 570	Mathematical Economics	3

PY 670	Perception And Action	
PY 693	Seminar:Adv General Py	

Courses not listed above require permission from faculty advisor.

Dissertation Research Hours (AC 699 - with advisor approval, distributed appropriately throughout the program) 24

Total Hours 69

Transfer Credit Policy

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

Graduate School information on the Doctoral Plan of Study can be found here (p. 21).

Comprehensive/Qualifying Examination

- The Second Year Project (Research Practicum II (AC 692, 3 hr.)) is conducted in lieu of a comprehensive field exam. The project should commence *no later* than upon completion of the First Year Project. As with the First Year Project, the second summer paper will be supervised by a faculty member who has agreed to the assignment.

Admission to Candidacy Requirements

Students are certified by the dean of the Graduate School for Admission to Candidacy for the PhD degree after they have met the following requirements

Successful passing of the second-year paper.

Dissertation Requirements

A Dissertation Committee contains at least five individuals. At least 20% (no more than 40%) of the committee is to be an external member whose home department is outside of accounting.

The doctoral proposal must be presented to at least 50% of the tenure track accounting faculty. A successful proposal occurs when at least 50% of those in attendance vote "pass". A student has two attempts to successfully pass the proposal. It is recommended that the proposal be presented no later than August 1 at the start of the student's fourth year.

The dissertation is to be presented to the student's entire dissertation committee. The School of Accountancy will follow University procedures regarding IRB, formatting, and submission of the dissertation. A three-paper dissertation will include three working papers. A traditional dissertation is required to be more than one working paper.

Continuous Enrollment

Graduate School information on Continuous Enrollment (p. 21).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 21).

Student Progress Requirement

The program has two significant research milestones that students must meet before progressing to the dissertation phase. The first year paper, typically a scholarly review of existing accounting literature that addresses a specific research area, is completed by students in their first year and presented by June 30 following their first year of coursework.

The second year paper is a complete, original, empirical study undertaken under the direction of the student's faculty advisor. Students must present the second year paper by June 30 following their second year of

coursework. Students must successfully present and defend the second year paper before progressing to the dissertation phase.

Writing a dissertation is the final test of research skill. Students must demonstrate an understanding of relevant literature and methodology, and the ability to think independently. Ph.D. candidates must identify an original topic, plan a test of hypotheses, gather data, complete a written version of the dissertation, and defend it at a final oral examination, after which they finalize a document acceptable to the dissertation committee and to the Graduate School.

This policy applies to all prospective and current students enrolled in the Culverhouse School of Accountancy PhD program. This policy is not a contract between PhD students and the Culverhouse School of Accountancy. With the PhD student's advisor, the Culverhouse School of Accountancy PhD Committee evaluates each student throughout the year. The Committee and advisor will perform a written annual evaluation each summer. At this time, the Committee and advisor will evaluate whether the student has demonstrated to the Committee that they have met the academic requirements of the Culverhouse School of Accountancy. The annual evaluation letter will contain a discussion as to whether the student is meeting or not meeting the Committee's expectations. This letter will provide suggestions as to how the student can improve their performance.

This evaluation will include, as appropriate, the student's coursework performance, first and second-year paper performance, performance in workshops and colloquiums, and the performance during the dissertation idea generation and dissertation proposal. The Committee reserves the right to dismiss a student at any point in the program. Dismissal occurs once the majority of the Committee believes that the student has not met the program's academic standards. Students may be terminated from the PhD program even if they have completed the first or second-year paper presentation or have passed their dissertation proposal. If the Culverhouse School of Accountancy PhD program deems it necessary to dismiss a PhD student, the following procedure will generally be followed:

1. The dismissal will be discussed and documented by the PhD Committee and the student's advisor.
2. The PhD program director will advise the student they are being dismissed from the program and the reason for the dismissal.
3. The Director of the PhD program will provide the student with information regarding the university's counseling services.
4. The student will turn in all University property to the Accounting Assistant.

Tax Accounting, MTA

The Master's of Tax Accounting (MTA) degree program is a multidimensional approach to the education of the modern tax specialist which includes a coursework in the key tax specialty practice areas and incorporates opportunities for students to utilize leading software and technology platforms to enhance their knowledge. By drawing on their comprehensive knowledge of accounting and taxation principles, Manderson Graduates are well-positioned for a successful career in the continuously evolving field of taxation.

Admissions

Admission and Conditional Admission decisions are made based upon all application materials: academic transcripts, statement of purpose, resume, letters of recommendation, GMAT score, work experience, etc.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- Official Transcript
- Statement of Purpose
- 3 Letters of Recommendation (at least one should be from an accounting professor)
- GMAT score of 500* (old version) or GMAT (new version) score of 485*
- TOEFL score of at least 79, or an IELTS score of at least 6.5, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).

Admission with Permission to Continue: Students who do not meet the GMAT score requirement, but who excel in other areas may be considered for "Admission with Permission to Continue".

***GMAT Waiver Policy: Applicants who meet any of the following criteria qualify to have the GMAT requirement waived (applicants that do not meet any of the criteria may apply for a waiver which will be considered on a case-by-case basis):**

- Applicants with an Accounting GPA of 3.25 or above in a minimum of 15 upper-division credit hours.
- Applicants with a graduate degree.
- Applicants who have passed the Certified Public Accountant (CPA) exam.

- Applicants with five years of management experience that includes significant budgetary and leadership responsibility and a 3.0 (or better) upper-division undergraduate GPA from an accredited university.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Before admission to the program, students should have completed the following accounting courses or their equivalents. *Applicants should contact the program director for questions regarding equivalent course requirements.*

With program director approval, applicants who have not completed certain prerequisite courses prior to admission may have the option to complete the prerequisite requirements during the summer term prior to the start of graduate-level coursework.

Required Undergraduate Courses		Hours
AC 310	Inter Financial Accounting I	3
AC 311	Inter Financial Accounting II	3

Economics

Intermediate macro- and microeconomic theory (EC 309 Intermediate Macroeconomics and EC 308 Intermediate Microeconomics or their equivalents) are considered prerequisites for all graduate coursework in economics, except for MBA-designated courses.

EC500 Managerial Economics

Hours 3

An introduction to the foundations of both micro- and macroeconomic analysis, including consumer demand, production and cost analysis, price determination, and macroeconomic theory and policy. Emphasis is on the theory of the firm.

EC508 Microeconomic Theory

Hours 3

An examination of the theory of resource allocation. Topics include demand theory, production and cost functions, theory of markets, general equilibrium analysis, and welfare theory.

Finance

EC 110 Principles of Microeconomics and EC 111 Principles of Macroeconomics or their equivalents are prerequisites for all graduate coursework in finance, except for MBA-designated courses.

FI504 Financial Management for MBA

Hours 1-4

Corporate financial planning and decision making; working capital management, capital budgeting, financing, risk-return analysis, valuation, and dividend policy.

FI505 Corporate Valuation

Hours 3

A case study course that focuses on the valuation of publicly held firms.

View All Courses

Finance, MS

The Master's of Science in Finance offers a specialized curriculum with focused training in finance. The degree is designed to offer advanced,

applied and theoretical experience in investment banking, corporate finance, actuarial science and/or financial derivatives.

The course of study is designed to provide insight into the following topics:

- The important role of financial intermediaries
- The management of financial intermediaries and an understanding of the markets in which they participate
- The valuation of financial assets such as stocks, bonds, derivatives, and other specialized assets and how they are managed in a portfolio
- The determination and behavior of interest rates and rates of return on assets
- The incentives and determinants of corporate behavior.

The program offers focused areas of study:

1. Corporate Finance Focus
2. Financial Engineering Focus
3. Actuarial Focus
4. Real Estate Focus

Admissions

The Master's of Science in Finance admission standards are significantly higher than other Business School programs. All application materials are carefully considered. Students are not required to have obtained an undergraduate degree in business.

Traditional Students: Fall semester start only; accepting applications year round

AMP Students: Fall & Spring start; upon acceptance into AMP program

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation
- GPA of 3.5 or Greater for Regular Admission
- GRE score of at least 310 (verbal + quantitative) or a GMAT score of at least 640 (old version) or GMAT (new version) score of at least 595
- TOEFL score of at least 79 or an IELTS score of at least 6.5, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue." *Traditional MSF students only, AMP students not eligible.*

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog (p. 7).

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The choice of undergraduate major does not preclude successful completion of the MSF program. It is important to realize, however, that most graduate finance courses assume that students are familiar with a common core of fundamental concepts in accounting, statistics, calculus, linear algebra, economics, and finance. Students with deficient backgrounds in these core courses, especially calculus and

microeconomics, should prepare for the graduate courses, prior to commencing the program.

Undergraduate Courses (not required)

Fundamental Common Core Classes		Hours
AC 210	Intro To Accounting	
MATH 121	Calculus & Applications	
Or		
MATH 125	Calculus I

EC 610	Seminar In Microeconomic Theor	3
EC 660	Game Theory	3
Tool Courses- 9 hours		
EC 670	Econometrics	3
EC 671	Seminar : Econometrics	3
EC 597	Special Topics In Economics (Causal Inference)	3
Choose 2 electives that complement the intended finance concentration area, with faculty/advisor approval. (see footnote 1.)		
Dissertation		
FI 699	Dissertation Research	18
Total Hours		66

Footnotes

1. The department strongly encourages students take additional Tool classes when choosing their 6 elective course hours.

Research Development Courses		Hours
FI 697	Special Topics in Finance	3
FI 698	Research In Finance	3

Footnotes

1. Once a student has been admitted to doctoral candidacy, he or she should fill the remaining 9 credit hours taken each semester with FI 699. For example, a student in his/her fourth year who has completed all coursework should register for FI 698 and 6 credit hours of FI 699. A student in his/her third year who is still taking courses should also register for FI 698 and 3 credit hours of FI 699.

Transfer Credit

In rare circumstances, Finance PhD students are allowed to transfer a credit for a course already taken and to substitute a required course by taking another graduate course. Approval must be granted prior to starting the class that is serving as a substitute.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School Information on the Doctoral Plan of Study can be found here. (p. 15)

Comprehensive Exams

Students are required to pass a Microeconomics Qualifying Examination, which is administered at end of the first year. The exam is generally administered on Monday of the first full week in June. To be eligible to continue in the Ph.D. program, a student must pass the exam.

Students who do not pass the exam when it is first administered will be given one chance to retake the failed exam. The retake exam is usually administered on Monday of the last full week in August prior to classes starting. If a student is absent from an exam without prior approval, it will be counted as a failed attempt. A student who has not passed the exam after two attempts will not be allowed to continue in the Finance Ph.D. program. The student may elect to complete 30 hours of graduate coursework and receive a MSF degree. Course substitutions for specific MSF program requirements may be approved in advance by the coordinator of the MSF program in order to facilitate completion of the degree in a timely manner.

If the committee determines, by majority vote, that the student has failed the Comprehensive Exam, it will provide its concerns in writing to the student, who will have one additional opportunity to successfully defend the research paper. A revised version of the research paper, with a separate response indicating how the committee's concerns were addressed, must be submitted to the primary advisor and the academic coordinator of the Finance Ph.D. program, no later than September 1 of the student's fourth year in the program. The student must then present the revised research paper to a committee of the faculty, constituted in the manner described above, no later than October 1 of the student's fourth year in the program. The committee determines the outcome of the second presentation in a manner similar to that described above.

A student who has failed the Comprehensive Exam by failing to defend by May 1 of the student's third year in the program must also successfully orally defend their research by October 1 of the student's fourth year in the program. Procedures for the oral defense in this case are identical to those for a timely first attempt with the exception that no further attempts are permitted.

In any event, failure to successfully defend by October 1 of the student's fourth year in the program constitutes a second failed attempt. A second failure will result in dismissal from the program. Students dismissed for a second failure may apply for a MSF degree and are exempted from the MSF Comprehensive Exam requirement.

A student passing the Comprehensive Exam is eligible to defend a dissertation proposal. All dates specified herein are the latest dates at which the requirements can be met and students are encouraged to complete the research paper and orally defend it at the earliest possible date.

Admission to Candidacy Requirements

After passing the written comprehensive exam at the end of the second year and completing the second year's course work, a student begins working on the dissertation. A student must ask a faculty member to serve as Chairperson of his/her Dissertation Committee. The Chairperson must be identified prior to the start of the third year. The Dissertation Chairperson must be approved by the Finance Ph.D. Coordinator and Department Head.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

A Dissertation Committee consists of at least 5 members, including the Dissertation Chairperson. The remaining faculty members of the Dissertation Committee are selected by mutual agreement between the student and the Dissertation Chairperson and do not have to be formally selected until a student is ready to propose a dissertation. One member of the Dissertation Committee must be from outside the student's major department.

The student and Committee Chairperson arrange a formal "Proposal Defense." The Proposal Defense is a preliminary oral examination during which the student orally presents and defends the dissertation proposal. The Dissertation Committee may question the student's knowledge of the dissertation topic and offer suggestions for improvement. In unusual circumstances, the Dissertation Committee may direct the student to prepare further for the Proposal Defense and another meeting may be scheduled.

A student must propose his or her dissertation prior to April 30th of the fourth year to guarantee a fifth year of funding. A student who has not successfully proposed a dissertation by this time is viewed as not making sufficient progress towards a dissertation and may lose departmental funding.

Quantitative Economics, MA

The MA program in Quantitative Economics is designed to provide students with a rigorous training in econometrics and quantitative economics, as well as in economic theory and policy. The Economics MA, is well suited for students who wish to pursue high-level professional careers in industry and government, or further study for a Ph.D. degree in economics. The Economics MA, is classified as a STEM degree, which allows for a 24 month extension of the F1 Optional Practical Training (OPT).

The Program offers two focused areas of study: Econometrics and Quantitative Economics, and Economic Policy.

Admissions

Quantitative Economics Traditional: Fall & Spring Term Starts

Application Deadlines: Fall term- Aug 15. Spring term- January 1.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation
- GPA: 3.50 minimum
- GRE minimum score of 310 (verbal + quantitative; GMAT not accepted) required with a quantitative score of at least 160 and a verbal score of at least 150.
- TOEFL score of at least 100 or an IELTS score of at least 7.0, a PTE score of at least 59 for non-native English speakers who are required to submit an English Language Test score (see below admissions criteria link).
 - Please note that this program does not accept a Duolingo Test score.
- AMP students must score a 310 (verbal & quantitative; GMAT not accepted) required with a quantitative score of at least 160 and a verbal score of at least 150.

Students not pursuing the AMP who do not meet these requirements, but who excel in other areas, maybe considered for "Admission with Permission to Continue."

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Quantitative Economics MA program is extremely quantitative. Entering graduate students are expected to have completed undergraduate coursework in economics, statistics, and mathematics. Students must have completed the following undergraduate courses or their equivalents. Any deficiencies should be made up by taking courses during the summer before entering the master's program.

Required Undergraduate Courses

Undergraduate Required Courses		Hours
EC 308	Intermediate Microeconomics	3
EC 309	Intermediate Macroeconomics	3
ST 260	Statistical Data Analysis	3
MATH 121 or MATH 125	Calculus & Applications Calculus I	3

Quantitative Economics with Focused Area of Study (FAS)

The Quantitative Economics MA requires 30 hours of coursework: 18 hours of required courses and 12 hours in a chosen focused area of study. Students must choose one of the Focused Areas of Study to complete the MA degree in Economics: Applied Economic Analysis or Policy Economics

Required Core Courses		Hours
EC 508	Microeconomic Theory	3
EC 509	Macroeconomic Theory/Policy	3
EC 513	Economic Forecastg Analysis	3
EC 570	Mathematical Economics	3
EC 571	Econometrics	3
EC 596	Capstone Project	3
Credit Hours Subtotal:		18

FAS Course Hours	12
Total Hours	30

Applied Economic Analysis

FAS Required Courses		Hours
ST 540	Stat Prog & Comp with R	3
EC 572 or ST 560	Financial Econometrics Statistical Methods	3
Credit Hours Subtotal:		6

Electives:	
Choose one 500-level Statistics elective course with faculty advisor approval.	
Choose one 500-level EC/ST/CE elective course with faculty advisor approval.	

FAS Courses	12
Required Core Hours	18
Total Hours	30

Economic Policy

FAS Required Courses		Hours
Electives: choose any 4 courses from the list below.		
EC 510	Law and Economics	
EC 512	Indust Org Public Policy	
EC 516	Monetary Theory & Policy	
EC 530	International Trade	
EC 531	International Finance	
EC 572	Financial Econometrics	
EC 573	Games and Decisions	
EC 597	Special Topics In Economics

Transfer Credit

Graduate School information on Transfer Credit (p. 15).

Accelerated Master's Program

Graduate School information on Accelerated Master's Program (p. 7).

Comprehensive Exam/Capstone

Plan I Requirements:

Plan I requires successful completion of 24 semester hours of course work, and a thesis (6 hours of EC 599) supervised by a graduate faculty member in Economics. A student planning to graduate in the Spring semester ought to start thinking about the thesis topic as early as possible, and no later than in early Fall of the preceding year. The thesis must be defended in front of a committee, and then submitted electronically on line through ProQuest once it has been approved by the committee. See the student guide on preparing electronic theses. Please note that a copy of the thesis or project must be available to each committee member at least two weeks prior to the presentation.

Plan II Requirements:

Students are required to take EC 596 Capstone Project. The purpose of this course is to provide students an opportunity to complete a final project using economic analysis and methods. EC 596 Capstone Project will generally be offered in the spring, to allow students to complete their program within one calendar year.

Quantitative Economics, Ph.D.

The Ph.D. program in Quantitative Economics is designed to provide students with the advanced training and substantive knowledge necessary to pursue positions in economics at research and teaching institutions of higher learning, or in the private sector and in public offices within local, state, or federal government.

Admissions Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation
- GRE score with a quantitative score of at least 160 and a verbal score of at least 155
- At least a B (3.0 out of 4.0) for the last two years of coursework
- TOEFL score of at least 79 or an IELTS score of at least 6.5, a PTE score of at least 59 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).
- Please note that this program does not accept a Duolingo Test score.

Students who do not meet the minimum standards may be offered "Admission with Permission to Continue" on a case-by-case basis.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The following courses are required for the Economics Ph.D. They are listed in the order that they should be taken. Students receiving an assistantship or fellowship through the University of Alabama are obligated to take these classes in the sequence detailed below. The economics faculty strongly urges students who do not receive financial support from the university to take the courses in the designated sequence.

The First Year

Required Courses		Hours
Summer/Fall		
EC 600	Advanced Mathematical Economic	3
Fall		
EC 610	Seminar In Microeconomic Theor	3
EC 611	Sem in Macroeconomic Theory	3
EC 670	Econometrics	3
Spring		
EC 660	Game Theory	3
EC 661	Macroeconomic Theory II	3
EC 671	Seminar : Econometrics	3
Total Hours		21

Footnotes

1. After the first year (and passing the Qualifying exams), students must take six (6) field and tool courses and at least two (2) supplementary courses.

Field Courses

Required Courses, Group A and Group B (18 hours - 6 courses) Hours

Group A - Tool Courses for Economic Research (at least 6 hours)

EC 672	Financial Econometric Modeling	3
EC 673	Nonparametric Econometrics	3
EC 674	Experimental Economics	3
EC 597	Special Topics In Economics (Bayesian Economics)	3

EC 597	Special Topics In Economics (Causal Inference)	3

Group B - Topic Courses (at least 6 hours)

EC 612	Sem Industrial Organizat	3
EC 624	Political Economy	3
EC 597	Special Topics In Economics (Environmental Economics)	3
EC 597	Special Topics In Economics (Urban Econ)	1 to 6
EC 613	Empirical Industrial Organizat	3
EC 614	Behavioral Economics	3
EC 616	Sem Monetary Economics	3
EC 597	Special Topics In Economics (Dynamic Stochastic General Equilibrium)	3
EC 597	Special Topics In Economics (Other Special Topics (Ph.D. level))	3

Supplementary Courses (at least 6 hours) see footnote 2. Consult your Ph.D. coordinator and dissertation chairperson for course approval.

Footnotes

- Note that these are the courses that have been offered previously or currently in the department. As faculty changes, so will the tool and topic courses available. For any questions regarding which courses are considered tool or topic courses, contact the Economics Ph.D. Coordinator.

Footnotes

- Students must choose at least two (2) additional courses. If a student chooses a supplementary course from Group B, they are allowed to take the course pass/fail. Note that core courses, topic and tool courses (Group A and B), and supplementary courses from Group A must be taken for a letter grade. Only supplementary courses from Group B can be taken as pass/fail. Students may also take courses outside of the department as a supplemental course, with faculty advisor permission. For example, students can take a computer programming course as one of the supplemental courses.

Research Development Courses

Research Development Courses Hours

EC 697	Special Topics in Economics	
EC 698	Research In Economics (Prof Development Workshop, at most 18 hours.)	
EC 699	Dissertation Research (at least 18 hours after candidacy)	

Footnotes

- Once a student has entered candidacy, he or she should fill the remaining 9 credit hours taken each semester with EC 699. For example, a student in his/her fourth year who has completed all coursework should register for EC 698 and 6 credit hours of EC 699. A student in his/her third year is taking one supplementary course should also register for EC 698 and 3 credit hours of EC 699.

Transfer Credit

In rare circumstances, Economics Ph.D. students are allowed to transfer a previously taken course and to substitute a required course by taking another graduate economics course. Approval must be granted prior to starting the class that is serving as a substitute.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School Information on the Doctoral Plan of Study can be found here. (p. 21)

Comprehensive/Qualifying Exam

Students are required to pass a Qualifying Examination, which is administered at the end of the first year. The exam consists of two separate qualifying exams: microeconomics and macroeconomics, both exams are generally administered during the first full week in June. *To be eligible to continue in the Ph.D. program, students must pass both exams.*

- Upon successfully passing both exams, the Doctoral Qualifying Exam Form must be completed and signed by the committee members and the Ph.D. Coordinator and the Department Head. The form is then forwarded to the Culverhouse College of Business Dean for signature, and finally to the Graduate School.
- Students who do not pass one or both exams will be given one chance to retake the failed exam(s). Students are only required to retake the exam they failed. *The retake exam(s) are usually administered the last full week in August prior to classes starting.*
- If a student is absent from an exam without prior approval, it will be counted as a failed attempt.
- A student who has not passed both exams after two attempts will not be allowed to continue in the Economics, Ph.D. program, but is eligible to obtain a Master's degree.

Admission to Candidacy Requirement

After passing the qualifying exams and completing the second years course work, the student begins working at a dissertation.

- The student must ask a faculty member to serve as Chairperson of their Dissertation Committee.
- The Chairperson must be identified prior to the start of the third year.
- The Chairperson must be approved by the Economics Ph.D. Coordinator and Department Head.

Continuous Enrollment Policy

Graduate School Information on Continuous Enrollment (p. 21).

Dissertation Requirements

During the third year, students are expected to commence work on the dissertation. Students are expected to have identified a primary advisor by the start of the fall semester of their third year and formally begin work on their dissertation.

- Writing a dissertation is the final test of research skills. It requires an understanding of relevant literature and methodology, as well as the ability to think independently. Ph.D. candidates must find an original topic, plan a test of hypotheses, propose this topic to their committee, and write and defend at a final oral examination a document acceptable to the dissertation committee and to the Graduate School.
- The dissertation committee consists of at least 5 members, including the Chairperson.
- The student must propose their dissertation prior to April 30th of the fourth year to guarantee fifth year funding. If a student has not successfully proposed a dissertation by this time, the student may lose departmental funding and will be viewed as not making sufficient progress.

Management Information Systems

MIS501 Application Development for the Data-Driven Organization
Hours 3

This course will highlight one or more core programming languages (e.g., Java, Python) used within modern, data-driven organizations for the purpose of data collection, manipulation, and analysis. The first portion of the course will focus on essential programming knowledge and practices. The second portion of the course will emphasize the development of programmatic solutions, which will acquire data (e.g., web content, social media data, geospatial data, sensor-based data) through the integration of APIs and/or web services as well as ethical scraping techniques and then store the data in a modern backend database.

MIS502 Database Design and Management in the Data-Driven Organization
Hours 3

This course will cover the essentials of database design and management in modern, data-driven organizations. The first portion of the course will focus on relational database design as well as SQL for the storage and access of structured data. The focus of the second portion of the course will highlight modern database structures/systems (e.g., Apache Hadoop, graph databases) as well as their query languages for storing, accessing, and analyzing more unstructured data or data having relationships not easily queried by traditional databases. Additional topics may include data cleansing, query optimization, and extract-transform-load (ETL) processes.

Operations Management Courses

OM500 MGT Science & Spreadsheet Mod
Hours 3

This course provides Operations Management concepts and applications in data-driven decision making. Emphasis is on data clean-up, data analysis, problem formulation, and interpretation of results using spreadsheet-based modeling and solution procedures including optimization and simulation approaches.

Prerequisite(s) with concurrency: ST 509 or ST 560

OM501 Advanced Applied Modeling and Analysis
Hours 3

Building on the foundations of spreadsheet modeling analysis, this course provides a deeper understanding of optimization and simulation. Course topics include discrete optimization, duality and sensitivity, large scale optimization, multi-objective optimization, dynamic programming, and Monte Carlo and process simulations with an emphasis on practical applications. In addition to spreadsheets, the students will learn specialty optimization and simulation software, including heuristic methods and algorithms. Extensive use of software.

Prerequisite(s): OM 500

Statistics Courses

ST509 Stat For Business Appl
Hours 3

A broad introduction to statistical and probabilistic methods useful for managerial decision making. Topics include graphical displays, numerical summaries, basic probability models, confidence intervals, hypothesis testing, and regression analysis.

ST521 Statistical Data Management
Hours 3

Introduction to the management of data using SAS. The collection and management of data from business or scientific research projects are emphasized.

[View All Courses](#)

Applied Statistics, MS

Launched over 40 years ago, the Master’s of Science in Applied Statistics (MSAPST) is a highly respected program at the Manderson Graduate School of Business. Students enrolled in the MSAPST program are presented with an opportunity to acquire and enhance quantitative competencies essential for excelling in contemporary analytical professions. This program is meticulously structured to offer flexibility, thereby enabling learners to tailor their coursework to align with specific career aspirations. The curriculum encompasses a diverse range of subjects, from the foundational principles of statistics to the practical implementation of statistical and data science techniques in real-world scenarios.

Furthermore, the program presents additional opportunities for experiential learning through the University of Alabama’s Institute of Data and Analytics, which oversees the Marilyn A. Hewson Data Analytics Lab. In this state-of-the-art facility, students have access to advanced technological resources and can collaborate with an interdisciplinary cohort of students and faculty on complex data-driven projects. Importantly, the prerequisite for admission to the Master of Science in Applied Statistics program does not mandate a background in business studies.

The MSAPST program offers robust training in statistics fundamentals and professional development to prepare students for the vibrant job market and foster competency and an interest in analytical research. As a STEM-designated program, APST facilities up to three years of Optional Practical Training (OPT) for international students on an F-1 visa.

Admissions

Candidates for admission to applied statistics are normally expected to have completed courses in mathematics equivalent to three semesters

of undergraduate calculus and to have a working knowledge of computer programming and linear or matrix algebra.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- At least two letters of recommendation
- TOEFL score of at least 79, an IELTS score of at least 6.5, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score.

Note: A GRE/GMAT score is recommended but not required for admission. A GRE/GMAT score is required for students who, upon admission, may wish to be considered for some limited scholarships, offered on a competitive basis, depending on availability.

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The M.S. degree in Applied Statistics requires 30 hours to complete. Students can choose one or two Specialized Concentrations; Analytics or Statistics Or one Focused Area of Study (FAS): Data Science.

- *A Fall term start is recommended to complete the sequential course path of study*

Applied Statistics, Ph.D.

The Ph.D. program in Applied Statistics is a research intensive program designed for students who demand the depth in the understanding of statistical methods to solve applied problems with innovation. The techniques and skills that students learn prepare them to become professionals in a broad range of statistics-driven fields, from academia to research-based industrial settings.

The Applied Statistics professors support students interested in a diverse range of statistical topics including linear models, data mining and analytics, statistical process control, spatial statistics, longitudinal analysis, statistical computing, nonparametric and robust methods, change and anomaly detection, Bayesian inference, and statistical network analysis.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation.
- GRE score of at least 310 (verbal + quantitative, with a quantitative score of at least 160), a GMAT (old version) score of at least 650 and the new GMAT (new version) of at least 595.
- Students who graduated from or are currently enrolled in the Applied Statistics, MS program at the University of Alabama are eligible for a GRE test score requirement waiver, subject

to completing at least 12 credit hours in the program with a minimum of 3.8 overall GPA, including at least a grade of B in ST 554 and ST 555.

- TOEFL score of at least 90, an IELTS score of at least 7.0, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below).
- Please note this program does not accept a Duolingo test score.

See the Admission Criteria section of this catalog for more information.

Or any other graduate level course with faculty approval		
Elective Course Hours		21

Transfer Credit

Subject to evaluation by the PhD program committee, some coursework (but no more than 24 credit hours) may be transferred from previous graduate programs.

Graduate School Information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study can be found here. (p. 21)

Comprehensive Exams

Entrance and Qualifying Exam:

At the end of the first academic year, PhD students are required to take a written qualifying examination. The exam is usually administered in the end of the spring semester and is based on the required MS level courses including ST 552 Applied Regression Analy, ST 553 Appld Multivariate Analy, ST 554 Math Statistics I, ST 555 Math Statistics II and ST 560 Statistical Methods. The qualifying exam requirement may be waived for students holding an MS degree in statistics. Students interest in waiving the exam must take an entrance exam in August before the start of the fall semester. The entrance exam represents a light version of the entrance and qualifying exam that is based on major and fundamental concepts covered in the required MS level courses. Students failing the entrance exam are expected to register for MS level courses in which knowledge and skill deficiencies have been identified.

Comprehensive Exam:

At the end of the second year or upon the completion of at least four (12 credit hours) PhD level statistics classes, student must take a comprehensive exam. The goal of the exam is to assess the potential of a student to conduct independent research. Individual research projects are assigned to students for independent work over a two-week period in April. By the end of the two-week term, student must submit a written report and present their findings at an Applied Statistics PhD seminar.

The graduate faculty assess the quality of completed projects based on the following rubrics:

- comprehensive literature review
- soundness of the proposed research approach and adequacy of future research plans
- strength of experimental support
- quality of oral presentation and ability to address questions and concerns
- quality of written report

By the end of the comprehensive exam at the latest, students are expected to find a dissertation advisor.

Admission to Candidacy Requirements

Students must pass the qualifying and comprehensive examinations to advance to candidacy.

Continuous Enrollment Policy

Graduate School Policy on Continuous Enrollment.

Dissertation Requirements

- Proposal Defense - within a year after passing the comprehensive exam, student must form a dissertation committee and present and

defend their dissertation proposal. The proposal usually focuses on the already obtained findings and plans regarding research yet to be accomplished.

- Dissertation Defense - Dissertation defense is the final test that usually occurs at the end of the fourth year. A dissertation must present some original contribution to the statistics literature. A PhD candidate must present a written document acceptable to the dissertation committee and Graduate School and pass the oral dissertation defense.

Business Analytics, MSBA

The Master of Science in Business Analytics (MSBA) program is a full-time program designed to be completed on campus in two semesters. The program prepares recent college graduates with limited or no full-time, post graduate work experience who intend to pursue a career working in data-oriented positions in industry and government. The program provides a solid foundation to support the continual learning necessary throughout their career to manage data, apply cutting-edge methodologies to transform data into insights, interpret and communicate data effectively, make recommendations, and manage implementations.

Admissions

Admissions Term Start: Fall only

Application Deadline: April 15

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Unofficial Transcripts
- Evidence of strong quantitative skills including the completion of an undergraduate introductory statistics course with a letter grade

of B or higher, and an undergraduate calculus course with a letter grade of B or higher.

- Resume
- Statement of Purpose
- 3 Letters of Recommendation
- GPA of 3.3 or better
- GMAT (old version), GMAT Focus Edition, or GRE scores at the 60th percentile or greater
 - GRE/GMAT waiver consideration for applicants with a graduate degree. Contact the Program Coordinator for eligibility.
- TOEFL score of at least 90, an IELTS score of at least 7.0, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

Permission to Continue: On a case by case basis, the MSBA admissions committee may consider students who do not meet the minimum GPA or GMAT/GRE standards, but may have relevant work experience or other qualifying factors for "Permission to Continue" in the program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Master of Science in Business Analytics (MSBA) program requires 30 credit hours and includes the following courses (substitutions are allowed with the approval of the program coordinator)

Required Courses		Hours
Fall Term Required Courses		
BAN 500	Bus Intelligence & Data Visual	3
MIS 501	App Dev Data-Driven Org	3
MIS 502	DB Des & Mgt Data-Driven Org	3
OM 500	MGT Science & Spreadsheet Mod	3
ST 541	App Stat Mod Analytics I	3
Credit Hours Subtotal:		15
Spring Term Required Courses		
BAN 501	Predictive Model with Bus Appl	3
BAN 580	Business Analytics Capstone	3
OM 501	Adv App Model & Analysis	3
ST 542	App Stst Mod Analytics II	3
Credit Hours Subtotal:		12
Elective Course Hours (any graduate level CBA course with Coordinator Approval)		3
Total Hours		30

Footnotes

1. Course substitutions are allowed with the approval of the program coordinator.

Transfer Credit

Transfer credits are not considered for MSBA courses.

Graduate School information on Transfer Credit (p. 15).

Comprehensive Exam/Capstone Requirements

The MSBA program includes a mandatory Capstone Experiential Learning component in the program's last semester (BAN 580). This Capstone Project will require students to work in teams to:

- Design an analytical study and data collection tools.
- Use various software to manipulate and analyze data.
- Interpret and present the result of their analysis.
- Recommend strategies based on the results of their analysis for a case or a project provided by an industry partner.

The assignment will require the student teams to use the analytic concepts and software they have learned in the program to generate solutions for the assigned case or industry project. The student teams will be evaluated based on:

1. A comprehensive written report.
2. A formal presentation of their methodology, results, and recommendation(s).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 15).

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

The Capstone project course is offered in the Spring. Thus, if a student has to withdraw during the Spring semester, they would need to retake the seminar class the following Spring to join a current team for the Capstone Project.

Business Cyber Security, Certificate

The Business Cyber Security (BCS) graduate certificate program provides students with a fundamental understanding of the principles and practices of cyber security in business and organizational settings. The objective of this certificate program is to introduce students to tools, techniques, and methods that aid cyber security professionals to participate in the full spectrum of security program planning, including security policy development and planning for incident response, business continuity, disaster recovery, and crisis management. The certificate will also provide students with the skills required for the more applied practices of network security, application security, threat detection analysis, prevention, and remediation.

Admissions

Application for admissions deadlines:

- Fall admit- August 10
- Spring admit- January 1

To be considered for admission, applicants must hold a bachelor's degree from an accredited college or university. Previous academic history, one letter of recommendation, demonstrated motivation and aptitude to undertake graduate-level work, and professional experience are all taken into consideration.

To apply, you must complete an application and provide transcripts from each undergraduate and graduate academic institution as well as a professional resume, one letter of recommendation from a person with relevant professional or academic standing concerning cyber security, and a statement of purpose. GMAT or GRE scores are not needed.

Current graduate students may combine their degree with a graduate certificate. Courses completed for the certificate may be applied towards the elective requirements.

Curricular Requirements

- All 12 credit hours earned in the BCS certificate program may be used directly in the Management Information Systems (M.S.) degree program.
- NOTE: Students who have completed a slash-listed 4XX course may not take the corresponding 5XX course for graduate credit (e.g., cannot complete MIS 405 and then take MIS 505 for graduate credit). Students may, however, re-take the 5XX course for the purpose of earning the graduate certificate.

Transfer Credit

No transfer credit is accepted. See the Graduate School's Policy on Transfer of Credit (p. 15).

Time Limit

See the Graduate's School Policy on Time Limits (p. 15).

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University's Academic Misconduct Policy will be followed. More information is available here. (p. 7)

Withdrawal of Leave of Absence Information

Students who need to withdraw from a course at the university or take a leave of absence should contact their academic advisor within the Manderson Graduate School of Business. Additional information is available on the Graduate School website (p. 244) related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlines in the University of Alabama Faculty Handbook.

Grades and Academic Standing

See here for Graduate School Policy information (p. 28)

Data Analytics, Certificate

The Data Analytics (DA) graduate certificate program provides students with a fundamental understanding of statistical data analysis in a business environment. The objective of this certificate program is to introduce students to tools, techniques, and methods that aid data analytics professionals in properly identifying, evaluating, and analyzing which then supports effective decision-making to improve the strategic planning of firms in every aspect.

Admissions

To be considered for admission, applicants must hold a bachelor's degree from an accredited college or university. Previous academic history, letters of recommendation, demonstrated motivation and aptitude to undertake graduate-level work and professional experience are all taken into consideration.

To apply, you must complete an application and provide transcripts from each undergraduate and graduate academic institution as well as a professional resume, one letter of recommendation from an individual that can assess your readiness for a Master's level certificate program, and a statement of purpose. GMAT or GRE scores are not needed.

Current graduate students may combine their degree with a graduate certificate. Courses completed for the certificate may be applied towards elective requirements.

Curricular Requirements

- Prerequisites: demonstrated ability to handle quantitative material (ascertained from student application)
- Minimum Required Hours: 12 credit hours
 - All 12 credit hours earned in the DA certificate program may be used directly toward the completion of the Applied Statistics master's degree program.
- This certificate program is a small subset of its associated degree programs and is designed to be beneficial to students internal and

external to the degree programs. The certificate encapsulates a set of specialized knowledge and provides skills that the holder can use to improve their career possibilities or advance them in their current role.

See the Graduate's School Policy on Time Limits (p. 15).

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University's Academic Misconduct Policy will be followed. More information is available here. (p. 7)

Withdrawal of Leave of Absence Information

Students who need to withdraw from a course at the university or take a leave of absence should contact their academic advisor within the Manderson Graduate School of Business. Additional information is available on the Graduate School website (p. 244) related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlines in the University of Alabama Faculty Handbook.

Grades and Academic Standing

See here for Graduate School Policy information (p. 28)

Information Systems Solutions, Certificate

The Information Systems Solutions (ISS) graduate certificate program provides students with little or no information systems industry experience with critical knowledge, skills, and abilities in leading the definition, creation, and deployment of systems serving businesses and other organizations. This includes both planning and managing systems projects and making direct technical contributions to those systems. Expressed in more detail, this includes creating and aligning information technology (IT) strategies, determining systems requirements and designs, planning and executing project work,

directly developing software capabilities, and creating architectures and deployment processes to deliver these systems capabilities to organizations. In addition to these technical skills, the program emphasizes soft skills, including communication, teamwork, negotiations, and ethical behavior.

Admissions

Application for admissions deadlines:

- Fall admit- August 10
- Spring admit- January 1

To be considered for admission, applicants must hold a bachelor’s degree from an accredited college or university. Previous academic history, one letter of recommendation, demonstrated motivation and aptitude to undertake graduate-level work, and professional experience are all taken into consideration.

To apply, you must complete an application and provide transcripts from each undergraduate and graduate academic institution as well as a professional resume, one letter of recommendation from a person with relevant professional or academic standing concerning solutions delivery, and a statement of purpose. GMAT or GRE scores are not needed.

Current graduate students may combine their degree with a graduate certificate. Courses completed for the certificate may be applied towards elective requirements.

Curricular Requirements

- Prerequisites: Requirement of prior programming and database courses/skills: Students must have completed: A) two undergraduate programming courses equivalent to UA courses MIS 221 and MIS 321 and B) an undergraduate database course OR demonstrate equivalent knowledge via professional experience or direct demonstration of skills to faculty.
 - Minimum Required Hours: 12 credit hours
 - All 12 credit hours earned in the ISS certificate program may be used directly in the Management Information Systems (M.S.) degree program.
- The overlap of the certificate with the associated degree program is intentional as the certificate may serve as a stepping stone to the full degree program for those that are non-degree students. This is a stackable credentials approach to graduate education that offers individuals knowledge advancement and flexibility.

Management Information Systems, MS

The Master of Science in Management Information Systems (MS-MIS) program emphasizes the development of students’ information technology (IT) leadership skills. Students admitted to the MS-MIS build on the foundation of a four-year undergraduate major in Management Information Systems (MIS), Computer Information Systems (CIS), Computer Science (CS), or a closely related field, enabling MS-MIS students to focus on advanced courses in solutions delivery, cyber security, and IT strategy. Further, students develop their problem identification, critical solution creation, and communications abilities via the execution of experiential projects and a research paper focused on practical, relevant industry topics.

The MS-MIS is an on-campus program requiring 30 hours of coursework. It is offered in both traditional and Accelerated Master’s Program (AMP) versions.

The MS-MIS is not a STEM-designated program for purposes of Optional Practical Training (OPT). Therefore, students completing this degree qualify for a maximum 12-month Optional Practical Training (OPT) F-1 visa.

Admissions Requirements

Applicants are expected to hold a four-year undergraduate major in Management Information Systems (MIS), Computer Information Systems (CIS), Computer Science (CS), or a closely related field, at the time of enrollment. If a student’s major is not through a business school, there should be evidence of the completion of business school core education courses or equivalent work experience.

- Admission Terms for Traditional Students: Fall, Spring
- AMP Students: Fall, Spring; upon acceptance into AMP Program

Deadline for Regular Admission Applications:

- May 1- Spring Admit Term
- Nov 1- Fall Admit Term

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation
- GPA of 3.3 or higher on 4.0 scale
- GRE score of at least 307 (verbal + quantitative), a GMAT score of at least 580, or a GMAT Focus Edition score of at least 485.
 - GRE/GMAT Score Waiver: Any student who previously graduated with a BS degree from The University of Alabama and has a graduation date within five calendar years of the date application is submitted can be considered for a GRE/ GMAT waiver. *Contact MIS program director for additional information.*
- TOEFL score of at least 90, an IELTS score of at least 7.0, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below).

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue" if they have a GPA greater than 3.0 in the last 60 credit hours.

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Completion of 30 hours of graduate-level credit via a course plan approved by the MS-MIS Program Director.

Or any other graduate level course with MS-MIS Program Director approval.

Transfer Credit

Transfer credit must meet UA's transfer credit policy and be approved by the MS-MIS Program Director.

Graduate School information on Transfer Credit (p. 7).

Accelerated Master's Program

The MS-MIS AMP program allows qualified undergraduate students to begin taking graduate courses during their senior year of undergraduate study. Students who have not graduated with their undergraduate degree are not eligible for graduate assistantships or graduate student scholarships.

Further information on the Accelerated Master's Program (p. 7).

Comprehensive Exam/Capstone

The MS-MIS Capstone Project consists of two requirements.

Research Paper - This requirement is completed in MIS 598 Res In Management Info Systems. The research paper requirement is satisfied by the successful completion of an industry-relevant "policy and practice" paper which focuses on developing and demonstrating the student's ability to:

- Recognize and interpret information systems/ information technology trends to examine their potential value and impacts in order to evaluate opportunities to formulate novel uses of those technologies.
- Explain and support findings and recommendations in writing.

Capstone Project - This requirement is completed via the integrated course offerings of MIS 530 Sys Development/ Implementation and MIS 535 Information Systems Consulting. The capstone project requirement focuses on developing and demonstrating the student's ability to:

- Identify business problems to sketch and analyze opportunities for digital transformation, including valuing them to formulate effective systems solutions.

- Via an understanding of requirements principles, apply those principles to analyze business requirements to evaluate alternatives in order to design effective solutions.
- Explain and support findings and recommendations orally.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 15).

Student Progress Requirement

Student's progress is reviewed at the end of each semester against the following standards:

- Cumulative GPA 3.5 or better in all coursework for second and subsequent semesters after admission to the MS-MIS program.
- Most recently completed semester GPA 3.3 or better in all coursework.
- No grades of C or lower in graduate-level coursework.

At the end of each semester, for any student not meeting all the criteria above, the following actions may be implemented at the sole discretion of the MS-MIS Program Director:

- First semester in which any criteria not met: student placed on Academic Probation.
- Subsequent semester after Academic Probation, if any criteria not met: student dismissed from the MS-MIS program.

Operations Management, MS

Operations management focuses on the analysis, design, and management of the operations that produce and deliver goods and services. It applies structured, quantitative techniques to analyze and design business operations and to support effective business decision making. Operations management helps evaluate and select actions based on information, process analysis, and quantitative modeling. There are tremendous opportunities for the effective application of these tools, techniques, and methods in a wide range of business operations including service operations, manufacturing, distribution, transportation,

logistics, supply chain management, revenue management, quality management, finance, human resources, information systems, marketing, and strategic planning. Operations management can be effectively applied to virtually every component of an organization. The OM master's degree program features two curriculum options, operations management and operations management with the decision analytics concentration.

Admissions

Traditional OM MS students: Applications accepted year-round
In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation. One letter must be written by an individual holding a graduate degree.
- GRE score of at least 307, a GMAT (old version) score of at least 580, or a GMAT Focus Edition score of 545.
 - GRE/GMAT Score Waiver: Any student who previously graduated with a BS in OM from The University of Alabama and has a graduation date within five calendar years of the date application is submitted can be considered for a GRE/GMAT waiver. *Contact OM program coordinator for additional information.*
- Grade of B- or higher in Calculus I (The University of Alabama equivalent is MATH 121)
- TOEFL score of at least 90 or an IELTS score of at least 7.0 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below).
 - Please note that this program does not accept Duolingo or PTE test scores.

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Operations Management

The program consists of 30 hours of coursework which students can complete in 12 to 24 months starting in the summer semester. All students are expected to complete the program within 24 months. Students may choose between the OM (Traditional) or the OM (with Decision Analytics concentration) curriculum options. The program has a common 9-credit hour core. Students then fulfill the remaining 21 credit hours according to their chosen curriculum option. Regardless of the chosen curriculum option, elective courses allow students to obtain additional instruction in other subjects such as project management, supply chain strategy, quality management, amongst others.

Required Core Courses		Hours
ST 560	Statistical Methods	3
OM 500	MGT Science & Spreadsheet Mod	3
OM 540	Systems Simulation	3
Credit Hours Subtotal:		9

Choose either OM (Traditional) or OM (with Decision Analytics Concentration) 21

Accelerated Master's Program

Information on the Accelerated Master's Program (p. 7).

Comprehensive Exam/Capstone

- The MSOM Written Comprehensive Exam (WCE) consists of two parts: Course exams and case studies, and is administered through Blackboard Learn during a 7-day period approximately 5-6 weeks prior to Commencement:

(1) For course exams, each student must choose three courses among OM 517, OM 522, OM 523, OM 524, OM 527, and OM 540, and must take those three course exams. The WCE course exams will only include topics that have been covered during the first 10 weeks of these courses, so courses in which students are currently enrolled are eligible choices. Each course exam must be completed within a 1-hour period (of the student's choice) during this 7-day period. All exams are open-book, open-note exams.

(2) The case study part of the exam is not timed, and the students can work on it at any time during this 7-day period.

The MSOM program has four Student Learning Outcomes (SLOs):

(1) Recognition, identification, and definition of an operational problem or process improvement.

(2) Selection of appropriate tools and techniques to achieve desired improvement.

(3) Correct and complete application of tools and techniques to achieve desired improvement.

(4) Satisfactory communication of technical subject matter.

The course exams assess SLOs 2 and 3; the case studies assess SLOs 1 and 4.

An overall score of 70% or higher (averaged over the three course exams and the case study exam) is considered passing. Any other score is considered failing. Note that per the University of Alabama policy, "Failing the exam twice will result in dismissal from the degree program and the Graduate School." If you fail your first attempt, you have the option of taking the WCE for a second (and last) time during the same semester. The second WCE will be given only for those courses for which your original score was below 70%. An overall score of 70% or higher (averaged over the three course exams and the case study exam, with the revised score(s) used if the exam is retaken) is still needed for passing.

Once the student applies for graduation (typically during the first two weeks of the academic semester they are expected to graduate), WCE dates and detailed course-specific information will be provided.

Operations Management, Ph.D.

Operations management focuses on the analysis, design, and management of the operations that produce and deliver goods and services. It applies structured, quantitative techniques to analyze and design business operations and to support effective business decision making. Operations management helps evaluate and select actions based on information, process analysis, and quantitative modeling. There are tremendous opportunities for the effective application of these tools, techniques, and methods in a wide range of business operations including service operations, manufacturing, distribution, transportation, logistics, supply chain management, revenue management, quality management, finance, human resources, information systems, marketing, and strategic planning. Operations management can be effectively applied to virtually every component of an organization.

Admissions

The program generally admits two to four applicants each year, depending on the availability of financial support and the overall current enrollment. This policy ensures that each doctoral student will have adequate support from the faculty.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation
- GRE score of at least 312 (verbal + quantitative), a GMAT (old version) score of at least 600, or GMAT (new version) of at least 555.
- TOEFL score of at least 94, an IELTS score of at least 7.0, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)
 - Please note that this program does not accept a Duolingo Test score.

Students who do not meet these requirements, but who excel in other areas, may be considered for Admission with Permission to Continue.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students admitted to the program must complete 36 coursework hours and 24 dissertation hours to fulfill graduation requirements. In addition to curriculum hours, students must pass a two-stage qualifying exam.

Footnotes

- ¹. OM 695 Operations Management Seminar (1 hr.); required every semester of Ph.D. program.

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School Information on the Doctoral Plan of Study can be found here (p. 21).

Comprehensive Exams

Students must pass a two-stage qualifying exam. The first stage exam, known as the First-Year Individual Review of Scholarship and Teaching (FIRST Review), occurs at the end of the first year in the program. The FIRST Review measures the student's competency based on the

FYRE written and oral presentation, classroom performance, and TA performance.

The Second stage exam, known as the Research Qualification Exam (RQE), typically occurs during the second year in the program. The RQE measures the student's ability to review, analyze and conduct doctoral-level research. The exam consists of a research paper and presentation by the student. Failure to pass the WQE or RQE will result in the student's dismissal from the program.

Admission to Candidacy Requirements

Students may apply for candidacy after passing the two-stage qualifying exam.

Continuous Enrollment Policy

See Graduate School Policy for more information. (p. 21)

Dissertation Requirements

Dissertation Committee:

Together with the advisor, the candidate must select a dissertation committee (on, or before, the end of the student's third year) consisting of the dissertation chairperson (usually the advisor) and at least four other graduate faculty, at least one of whom must be outside the Operations Management program and the ISM Department. The dissertation committee is responsible for admission of the student to candidacy, supervision of the dissertation, and administration of the final oral examination. Failure to form a dissertation committee by the beginning of the fourth year in the doctoral program may result in the student's dismissal from the program.

Proposal Defense:

Students should defend their dissertation proposal by the end of the third year/beginning of the fourth year. The proposal usually focuses on the already obtained findings and plans regarding research yet to be accomplished. The proposal defense is a public presentation and the student is expected to be able to address the questions and concerns of the dissertation committee and other attendees. If a student fails to defend their proposal defense, they may be given a second chance. Failure to successfully defend in the second attempt may result in dismissal.

Supply Chain Analytics, Certificate

The Supply Chain Analytics (SCA) graduate certificate program provides students with a fundamental understanding of the complex relationships involved in a supply chain and techniques related to their analysis.

The objective of this certificate program is to introduce students to tools, techniques, and methods that aid supply chain professionals in properly identifying, evaluating, and analyzing supply chain issues, which then supports effective decision-making to improve the efficiency and productivity of firms that compose a complex supply chain.

Admissions

To be considered for admission, applicants must hold a bachelor's degree from an accredited college or university. Previous academic history, a letter of recommendation, having earned a B- or higher in a Calculus course, having demonstrated motivation and aptitude to undertake graduate-level work, and professional experience are all taken into consideration.

To apply, you must complete an application and provide transcripts from each undergraduate and graduate academic institution as well as a professional resume, one letter of recommendation from an individual who can assess your readiness for a Master's level certificate program, and a statement of purpose. GMAT or GRE scores are not needed.

Current graduate students may combine their degree with a graduate certificate. Courses completed for the certificate may be applied towards the elective requirements.

Curricular Requirements

- Minimum Required Hours: 12 credit hours
- All 12 credit hours earned in the SCA certificate program may be used directly toward the completion of the MS Operations Management degree program.
- The overlap of the certificate with the associated degree program is intentional as the certificate may serve as a stepping stone to the full degree program for those who are non-degree students. This is a stackable credentials approach to graduate education that offers individuals knowledge advancement and flexibility.

Management

MGT512 Management Presentations

Hours 3

Instruction and practice of information presentation in a business environment. Topics include conference room presentations, media briefings, team presentations, television interviews and audiovisual development.

MGT517 Leadership & Ethics

Hours 3

This course is an overview of leadership theory and models including discussions of ethical issues that corporate decision makers face.

General Business Admin

GBA515 Effective Negotiations

Hours 3

This course will employ negotiations exercises, expert guest speakers and additional readings to help students master negotiation skills.

GBA525 Business Policy

Hours 3

An integrative study of the manager's role as chief strategy maker and chief strategy implementer, using case analysis and management simulation techniques.

International Business Administration Courses

IBA550 Global Business

Hours 1-3

A seminar emphasizing the environmental factors affecting international business operations, and studying different economic, social, cultural, legal, and other environmental conditions and their influence on both the formulation and execution of business policy of firms engaged in multinational business.

IBA555 Global Market Management

Hours 3

The object of this course is to investigate the effects of cultural similarities and differences on marketing practices worldwide. Also examined are the effects of market idiosyncrasies on globally oriented products, promotion, pricing, and distribution strategies.

[View All Courses](#)

Management, MA

The Master of Arts in Management is offered in three formats: online, hybrid, and accelerated.

Online Format

The online format features concentrations in Global Business Management and Human Resources Analytics, where all classes are offered online. This flexible program is designed for supervisors, administrators, coordinators, managers, military personnel, and others who seek to advance their awareness of the impact of evolving opportunities in the workplace or who have developed the need for more advanced management skills in their current positions.

Hybrid Format

The hybrid format features concentrations in Global Business Management, Human Resources Analytics, and Strategic Innovation, Entrepreneurship, and Growth, where classes are offered either on campus or online (with some courses offered in both formats). The hybrid program is meant to combine on-campus as well as online coursework for residential students. This program prepares students for a variety of positions as managers, entrepreneurs, or human resource professionals.

Accelerated Format

The accelerated format is for talented undergraduate management majors allowing them to combine both undergraduate and graduate studies through double counting up to 12 hours of graduate course to both the graduate and undergraduate degrees.

The Accelerated Masters Program (AMP) in Management is only available to main campus students.

Admissions Requirements

Application Deadline for Traditional MGT, MA students (main campus only):

- Oct 15, for Spring term start
- Apr 15, for Summer & Fall term start

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation
- GRE score of at least 300 (verbal + quantitative), a GMAT (old version) score of at least 500, or GMAT (new version) score of at least 485.
 - Test score waivers may be granted if the applicant: 1) already has a graduate degree from an accredited university, or 2) has at least 10 years of management experience.
- TOEFL score of at least 79, or an IELTS score of at least 6.5, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).

Students who do not meet these requirements, but who excel in other areas, may be considered for Admission with Permission to Continue.

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The MA degree features 15 hours of core courses, which is common across all three concentrations, and 15 hours of courses residing in the selected concentration (including one or two elective courses).

The MA in Management Program expects qualified student applicants to be self-funded or be funded by their employer or government. The MA in Management Program does not offer funding to international or domestic students applying to the program.

Management, Ph.D.

The Ph.D. in Management is a rigorous four-to-five year program preparing students for careers in management and higher education. Students enter into a research-oriented program centered on the development of top-level business professionals and educators. The mission of the doctoral program in Management is to advance the careers of students with research and teaching skills who can continue the creation, verification, application, and dissemination of knowledge to academic colleagues, future generations of students and business professionals.

The Ph.D. Program in Management faculty supports students interested in:

- Human Resources
- Entrepreneurship
- Organizational Behavior
- Person-Organizational Fit
- Employee Well-Being
- Leadership
- Training
- Group and Team Processes
- Work-life Balance
- Strategic Human Capital
- Strategic Management
- Workplace Stress
- Business and Managerial Communication

- Healthcare Analytics
- Cybersecurity
- International Business

Admissions

Applicants are admitted into the Ph.D. program in Management annually for the fall semester. All completed applications received by January 1 of that year, meeting the minimum qualifications, will be included in the applicant pool for review. In exceptional circumstances, applicants may be considered for admission in other semesters.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- A Statement of Purpose that identifies faculty research interests that appeal to them.
- 3 letters of recommendation. These must speak specifically to the ability of the applicant to successfully complete the Ph.D. program and their potential for teaching and research.
- A writing sample is encouraged (solely authored by the applicant; an example of scholarly research, if available)
- A test score from either the GMAT or GRE exam taken in the past 5 years
- A TOEFL score of at least 79, or an IELTS score of at least 6.5, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).

Students admitted “with permission to continue” will not necessarily be offered assistantships.

- While there are no absolute minimum cutoff test scores or grades, students with less than the following scores are rarely admitted: (1) a 3.0 undergraduate and a 3.5 graduate grade-point average (or equivalent for students with degrees from other countries), (2) a 600 GMAT (old version), 555 GMAT Focus Edition, or 310 GRE score with a reasonable balance between verbal and quantitative scores, and (3) a 79 TOEFL score. The above grades and test scores do not guarantee admission.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Each student is required to complete at least three quantitative courses, specifically MKT 688 Quant Modeling in Marketing and MGT 690 Research Methods I and MGT 691 Research Methods II (or equivalent). Students must get written approval from the Ph.D. program coordinator to take an equivalent or to replace the three courses described here.

Students are encouraged to take additional quantitative courses that are not required to strengthen their methodological training (AC 650 Directed Research, ST 550 Stat Methods In Res I/ST 560 Statistical Methods, ST 552 Applied Regression Analy, ST 553 Appld Multivariate Analy).

Dissertation Research Hours (MGT 699 - with advisor approval, distributed appropriately throughout the program)		24
Total Hours		69

Transfer Credit

Students may submit appropriate courses they have taken at their previous university for consideration of approval for transfer credit, the faculty discourages the transfer of topical seminar courses and key methods courses. To apply for transfer credit student must meet with the PhD Coordinator during their first semester of residency at The University of Alabama to identify which classes they wish to be considered for transfer. At this meeting students should bring to appropriate transcripts, syllabi from the classes, and a detailed listing of the classes they wish to have considered for transfer credit and The University of Alabama classes they believe the potential transfer classes should replace.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

- Graduate School information for the Doctoral Plan of Study (p. 21).

Comprehensive Exam

Each student is required to pass a written comprehensive examination at the end of his/her second year. The examination is designed to determine students’ ability to show relationships among the various segments of knowledge they have gained during their coursework. Students must demonstrate knowledge of research methods, mastery of knowledge of management research, familiarity with major concepts in the extant literature, and the ability to identity and understand connections between topics.

The comprehensive exam will consist of four sections, one each in research methods, management theory or history, entrepreneurship or strategy, and OB or HR.

If a student fails on his or her first attempt, (s)he is usually given a second opportunity to retake either all or part of the exam, depending upon the faculty’s recommendations. A retake may include an oral exam if deemed necessary by the faculty. If a student fails the second attempt of an exam, (s)he will be terminated from the program.

If a student does not receive a passing grade on their first attempt on the comprehensive exam and he or she is required to retake the exam, the second administration of the exam will be set by the Doctoral

Coordinator, or his/her assigned representative, in consultation with the faculty.

Typically, the exam will be administered over two weekends in May or June, on dates discussed between students and the PhD program coordinator. Students taking the exam will be provided with one set of questions covering two of the test subjects at 3 PM on Friday of that week and will have until 9 AM the following Monday to complete it. The second set of questions covering the remainder of the topics will be distributed the following Friday and will once again be expected to be turned in the following Monday at 9 AM.

Admission to Candidacy Requirements

Students are certified by the dean of the Graduate School for admission to candidacy for the Ph.D. degree after they have met the following requirements:

1. Satisfactorily complete all required coursework
2. Pass all examinations, including the comprehensive exam

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

Satisfaction of the course requirements and passing all examinations, including comprehensive examination, advances the student to the candidacy for the Ph.D. program.

A dissertation showing power of independent research and literary skill must be prepared on a topic in the major field.

The dissertation must comply with the regulations in A Manual for Students Preparing Theses and Dissertations. Copies may be obtained from the Graduate School office or on the graduate school web page. Deadlines and other information useful to doctoral students are also listed in both these sources.

The subject of the dissertation must be approved by the student's dissertation committee.

A student who completes the coursework but fails to complete the dissertation within five years after being admitted to candidacy will be required to retake the written examination and the preliminary oral examination.

All candidates are expected to register for dissertation supervision each semester and summer session until the dissertation is completed.

Time Limits for Degree Completion Requirements

A student entering the Ph.D. program must complete all requirements for the Ph.D. degree within nine years of the date of admission in the graduate program. If a student is suspended from the program for exceeding the time limits for completion, the individual may petition the department chair and the Culverhouse College of Business Ph.D. Programs Committee.

Extension of time and/or additional requirements for readmission to the program must be recommended to the Graduate School of The University of Alabama by the student's departmental graduate faculty and the dean of the college.

A maximum one-semester extension may be granted in those rare instances in which the student presents documentation of compelling

circumstances beyond the student's control that made it impossible to complete the degree within the required time frame.

Graduate School information on Time Limits (p. 21).

Student Progress Requirement

Each student's progress will be reviewed by the Department Head, and the Ph.D. Coordinator at the end of each semester. A graduate student with regular status in a graduate program who drops below a 'B' average (at any time after earning 6 semester hours), or if the student earns a "D" or "F" in a graduate course, will be placed on probation and may be dismissed from the program.

While on probation, the student will not be permitted to apply for admission to candidacy. Probationary status must be removed by raising the overall average to a "B" or better during the 12 hours of graduate work immediately following the period in which the probation was incurred. Failure to do so will result in the student being dropped from the program. The departmental policy frowns upon the grade of "I". It will only be given under extenuating circumstances.

A grade of 'I' (Incomplete) is evaluated as an 'F', and must be removed within two weeks during the next term of enrollment if the student's overall grade point average drops below a 'B' as a result of the incomplete grade. The evaluations of academic progress of students who register with 'I' grades still on their records can result in academic probation or dismissal.

Courses may not be repeated for graduate credit; this includes courses initially taken on an audit basis. However, a course that is required in a student's curriculum in which a 'D' or 'F' is earned may be repeated for credit, upon the recommendation of the major department or program area and the dean of the Graduate School. Both grades will be considered in the computation of the grade point average.

The dean of the Graduate School may allow a graduate student to be reinstated or readmitted only at the special request of the graduate faculty in the student's department.

Marketing Courses

MKT 300 Marketing or its equivalent is a prerequisite for all 400-level courses; MKT 518 Marketing Management & Decision Making or its equivalent is a prerequisite for all 500- and 600-level courses.

MKT510 Product Design Marketing Strategy

Hours 3

An intensive investigation of the process of new product development, including its role in the organization, analysis of market opportunities, creative idea generation, concept screening, design, forecasting, manufacturing, and launch. Teaching emphasis is on processes, tools, and techniques. A group project provides real-world product development experience.

MKT518 Marketing Management & Decision Making

Hours 3

A combination of lectures and cases is used to examine and analyze the marketing process. Emphasis is on decision making: the refinement of skills needed to recognize and solve marketing problems, and to effectively communicate recommendations both within and without the organization. The following components of the marketing mix are examined: product management, pricing, promotion, personal selling, buyer behavior, marketing channels, distribution, and segmentation.

[View All Courses](#)

Digital/Social Media Marketing, Certificate

The Digital/Social Media Marketing (DSM) certificate program involves a deep dive into the ever-evolving world of digital marketing, with courses in marketing strategy, digital/social media marketing strategy, digital marketing analytics, and advanced digital marketing. Students earning a graduate certificate in digital/social media marketing will be prepared to contribute to the digital marketing efforts of firms in nearly every industry.

Admissions

To be considered for admission, applicants must hold a bachelor's degree from an accredited college or university. Previous academic history, one letter of recommendation, demonstrated motivation and aptitude

to undertake graduate-level work, and professional experience are all taken into consideration.

To apply, you must complete an application and provide transcripts from each undergraduate and graduate academic institution as well as a professional resume, one letter of recommendation from an individual that can assess your readiness for a Master's level certificate program, and a statement of purpose. GMAT or GRE scores are not needed.

Current graduate students may combine their degree with a graduate certificate. Courses completed for the certificate may be applied towards the elective requirements.

Curricular Requirements

- Prerequisites: demonstrated ability to handle quantitative material (ascertained from student application)
- Minimum Required Hours: 12 credit hours
- All 12 credit hours earned in this certificate program may be used directly toward the completion of the Marketing (M.S.) degree program.
- The overlap of the certificate with the associated degree program is intentional as the certificate may serve as a stepping stone to the full degree program for those that are non-degree students. This is a stackable credential approach to graduate education that offers individuals knowledge advancement and flexibility.

Transfer Credit

No transfer credit is accepted. See the Graduate School's Policy on Transfer of Credit (p. 15).

Time Limit

See the Graduate School Policy on Time Limits (p. 15).

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University's Academic Misconduct Policy will be followed. More information is available here. (p. 7)

Withdrawal of Leave of Absence Information

Students who need to withdraw from a course at the university or take a leave of absence should contact their academic advisor within the Manderson Graduate School of Business. Additional information is available on the Graduate School website (p. 244) related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlines in the University of Alabama Faculty Handbook.

Grades and Academic Standing

See here for Graduate School Policy information (p. 28)

Marketing, MS

The Master of Science in Marketing is an intensive, non-thesis program designed to give students advanced analytical marketing skills and hands-on experience to launch a career in one of marketing's many fast-growing fields: Digital and Social Media Marketing; Marketing Analytics and Decision Making; Marketing Research and Insight Development; Management Consulting and Project Management; Professional Selling and Sales Management.

The MS program requires 30 hours of coursework (33 hours for the marketing analytics concentration), with the expectation that the degree will be completed in two semesters (plus a summer for marketing analytics).

An Accelerated Master's Program (AMP) is offered which allows academically gifted undergraduate majors in Marketing or with a double major which includes Marketing to begin taking graduate courses. This will in many cases allow them to complete both the BA and the MS degree in four years.

Admissions Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 2 Letters of Recommendation
- GRE score of at least 309 (verbal + quantitative), a GMAT (old version) score of at least 550, or a GMAT Focus Edition score of at least 515

To be considered for admission to the Marketing MS program with a concentration in Marketing Analytics, the requirements are:

- Overall GPA of 3.3
- GRE score of at least 313 (verbal + quantitative), a GMAT (old version) score of at least 580, or a GMAT (new version) score of at least 545
- Grade of "B" or higher in undergraduate calculus
- TOEFL score of at least 100 or an IELTS score of at least 6.5, a Duolingo score of at least 110, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Test score (see admissions criteria link below).

It is critical to note that meeting minimum admission requirements simply qualifies applicants for consideration and is not a guarantee of acceptance. If a student meets the minimum admission requirements, then their application is considered for competitive entry. The average GPA of recently accepted students has been approximately 3.8 with a GMAT (old version) score of 620.

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Required Core Courses		Hours
MKT 530	Advanced Marketing Analysis	3
MKT 587	Advanced Market Strategies	3
MKT 596	Capstone Project	3

Required Core Courses		9
Total Hours		30

Marketing Analytics Concentration

The Marketing Analytics concentration involves a heavy curriculum in statistics, including SAS and other programming languages, emphasizing data analysis and data mining. Graduates with this concentration earn a SAS/Data Mining Certification and are prepared to sit for the SAS programming certificate. Marketing Analytics graduates are highly sought after by a wide variety of organizations because of their ability to work with "Big Data." Students concentrating in Marketing Analytics are required to apply for summer entry and complete an introductory graduate course in statistics in the summer term prior to the start of the program.

Marketing, Ph.D.

The Doctor of Philosophy degree is awarded for scholarly attainment and represents the highest degree in business administration that the University may bestow upon a student. The PhD in marketing program will enable students to be competent in the advancement and dissemination of marketing theory, research, and practice. The doctoral program in marketing is designed principally to prepare students for a career in academic research and higher education.

Admissions

The application deadline for fall admission is February 1.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 Letters of Recommendation
- GRE score of at least 300 (verbal + quantitative), a GMAT (old version) score of at least 550, or a GMAT (new version) score of at least 515.
- TOEFL score of at least 79 or an IELTS score of at least 6.5, a Duolingo score of at least 125, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language Test score (see admissions criteria link below).

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission" to Continue.

See the Admission Criteria section of this catalog for more information.

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School Information on the Doctoral Plan of Study can be found here. (p. 21)

Comprehensive/Qualifying Exam

Our qualifying exam process consists of three parts, a first and second-year paper exam, and a methods based comprehensive exam. The first-year paper is completed during the summer between the first and second year. The primary goal of the first-year paper is for students to exhibit the ability to identify a unique research idea, provide a strong theoretical underpinning for the idea, draw on that theoretical perspective to develop and support testable hypotheses, and suggest a research methodology to allow the testing of the hypotheses. Evaluation of the first-year paper includes both written and oral components. The second-year paper occurs during the late spring of the second year. The focus of the second-

year paper is to provide evidence of the ability to carry out a research project including data collection, analyses, and interpretation. After the second-year paper, a comprehensive exam focusing on methods learned through coursework will be given. A final oral presentation and evaluation following the second-year paper and methods comps will conclude the qualifying examination process. All examinations may include oral and written components.

The examinations are conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. In accordance with University policy, a student may attempt each examination no more than two times. However, each student should consult his or her program's policies for the written comprehensive examination because programs may vary in approach and requirements. Having to take multiple exams twice may result in dismissal from the program. Failing any examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy Requirements

Students are admitted to Candidacy for the Ph.D. degree after they have met the following requirements:

- Complete all required coursework
- Complete a 3-part qualifying exam:
 - Pass their first-year paper (during the summer after their first year)
 - Pass their second-year paper (during the summer after their second year)
 - Pass their methods comps (during the summer after their second year)

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment Policy (p. 21).

Dissertation Requirements

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The dissertation committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. Students

may set up their committee through the Graduate Academic Activities portal on the Graduate School website.

All members of a dissertation committee must hold Graduate Faculty status at The University of Alabama and must represent at least two academic departments. The chair of the committee must be a full member of the Graduate Faculty, as described in the Catalog's section on Qualifications of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., if s/he is a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's dissertation committee.

The graduate dean's approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the Appointment/Change of a Doctoral Dissertation Committee through the Graduate Academic Activities portal on the Graduate School website.

The final oral dissertation defense is the culminating experience in the doctoral program. Once the dissertation committee has agreed that the student is prepared for the final oral dissertation defense, the student and committee members will set the defense date. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines.

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council.

Communication Information Sciences (CIS), PhD (p. 511)

Program Administration

The graduate programs in the College of Communication and Information Sciences are administered by the associate dean for graduate studies, by various administrative divisions within the College, and by the Graduate School. The college has one PhD degree program (p. 511). It is a multidisciplinary program that draws on all subdivisions of the College and is administered by the associate dean for graduate studies and by the graduate studies council. The College offers three Master of Arts degree programs, one Master of Library & Information Studies degree program, and one Master of Fine Arts degree program. These master's programs are administered by the associate dean and by academic unit heads.

Admission Criteria

The Graduate School of The University of Alabama administers admissions for the entire University. The Graduate School's website has detailed admission policies, an electronic application, and other useful information for those considering graduate studies at the University. Graduate students in the College of Communication and Information Sciences must meet the admission criteria of the Graduate School. Specific graduate programs in the college may have additional admission criteria – be sure to check the specific program sections of this catalog for more information.

See the Admission Criteria section of this catalog for more information.

CIS601 Proseminar In Pedagogy

Hours 1

This proseminar helps doctoral students explore methods and effective practices of teaching at the university level. Students examine how to employ different teaching modalities in an effort to engage students. Students discuss the varying teaching demands associated with class design (small classes, large lectures, and online courses). Students learn how to clearly communicate course expectations, deal with potential conflict, and construct and maintain a high level of professionalism. This one-hour proseminar builds on and extends the coverage of pedagogy provided in CIS 610 Foundations of Doctoral Study. It is recommended only for students who have completed CIS 610.

CIS603 Quantitative Research Methods

Hours 3

The course provides detailed study of quantitative research methods appropriate to the various areas of study in communication and information sciences.

CIS604 Mass Communication Theory

Hours 3

This course is a survey of the foundational theories of mass communication and media processes and effects.

CIS605 Cultural and Critical Theory in Communication

Hours 3

Survey of foundational cultural and critical theories in communication.

CIS606 Knowledge & Information Theory

Hours 3

This course offers a survey of theoretical developments in the study of knowledge and information.

CIS607 Theory Constructn Epistemolgy

Hours 3

This course provides detailed study of the philosophical foundations of theory construction and current issues in theories of the nature of knowledge.

CIS608 Qualitative Research Methods

Hours 3

This course is an introduction to qualitative research methods in communication, yet with a doctoral level of sophistication and expectations. The aim is to introduce students to all primary forms of qualitative methodologies from a social science perspective; however, each method or approach described could easily be the subject of a course itself.

CIS609 Humanistic Research Methods

Hours 3

Founded on a logical conceptualization of knowledge creation, this course surveys eight modes of knowing in the humanities: philological interpretation, phenomenological interpretation, explanatory history, narrative history, aesthetic/technical criticism, cultural criticism, theoretical analysis, and theoretical synthesis. Treatment of modes includes investigation of theories and examination of applications. The course is designed to support disciplinary research and publication by participants.

CIS610 Foundations of Doctoral Study in Communication & Information Sciences

Hours 3

Students develop familiarity with college graduate faculty members, their professional lives, teaching specialties, research interests, and service involvements. Students become familiar with the norms of doctoral life. Students develop their own unique approach to research, teaching, and service in the context of their area of expertise.

CIS650 Seminar: Communication & Information Sciences

SP

Hours 3

Topics vary. Course supports research in areas appropriate for advanced study and original research in communication and information sciences. Depending on the interests of participants and on the topic of the seminar, students may conduct research individually or may work together on research projects. May be repeated.

Special Topics Course

CIS651 Interpersonal Approaches to Health Communication

Hours 3

This graduate seminar explores the major interpersonal issues related to health communication, focusing on both classical and contemporary perspectives.

CIS652 Sem Culture Criti Rhetor Stdy

SP

Hours 3

The examination of a wide range of mediated texts through the intersecting perspectives of cultural, critical and rhetorical analysis.

Special Topics Course

CIS656 Electronic and Contemporary Publishing

Hours 3

Focuses on both scholarly and commercial networked digital publishing within the context of the information cycle and information chain from the vantages of contemporary publishing and communication. The course is concerned with the numerous and varied problems/opportunities of electronic publishing and the accompanying paradigm shifts.

CIS657 Communication and Culture

Hours 3

This course provides an overview of foundational theoretical and research perspectives focusing on communication and culture from functionalist (post-positivist), interpretive, and critical perspectives. Students study intercultural communication theories addressing the relationship between culture and communication, including theories related to identity (including race, gender, nationality, etc.), face negotiation, transitions and adjustment, pedagogy, and intercultural alliances.

CIS659 Health Information Seeking

Hours 3

Explores the major theories and issues related to health information seeking, focusing on the roles of mediated and interpersonal communication in seeking, understanding, and sharing health information.

CIS660 Interpersonal Communication Theory

Hours 3

This graduate course presents a focused investigation of communication in close personal relationships, with primary emphasis on foundational theories and concepts of relational communication.

CIS662 Mediated Interpersonal Communication

Hours 3

This graduate seminar provides an overview of research in foundational and contemporary mediated interpersonal communication relations, reviewing modern conceptions of interpersonal relationships, communication, and mediated communication from a wide breadth of disciplines.

CIS663 Deception

Hours 3

This course is designed to introduce students to research in interpersonal deception and to acquaint students with deceptive verbal and nonverbal behaviors and their motives and consequences, as well as with the research that has explored deception detection strategies.

CIS664 Health Communication Campaigns

Hours 3

This course covers the process of promoting health by disseminating messages through mass media, emergent media, and interpersonal communication. It covers the role of campaign designers in assessing consumer health needs and communication behaviors and in planning, implementing, and assessing campaigns.

CIS665 Seminar in Communication Message Analysis

SP

Hours 3

Topics may vary. Study and analysis of the development and management of communication institutions and their place in society. May be repeated.

Special Topics Course

CIS666 Information Policy

Hours 3

Theoretical and research perspectives on information policy, the set of interrelated principles, laws, and regulations guiding the oversight and management of the information lifecycle through its production, collection, distribution, use, and preservation.

CIS667 Persuasive Communication

Hours 3

Study and analysis of the persuasive function of communication through theoretical and/or strategic approaches. May be repeated.

CIS668 Social Justice and Inclusion Advocacy

Hours 3

Theoretical and research perspectives in social justice and advocacy in information studies and related information disciplines. This course explores information structures, contexts, technologies, institutions, and policies as structures and sites of power that shape inequalities. Students investigate what socially-just outcomes and interventions might look like for communities, institutions, and individuals in the information studies context.

CIS669 Special Topics in Visual Communication

SP

Hours 3

This seminar course will overview widely used and emerging theories employed in the study of applied communication. The course will consider the implication of theory in designing and conducting research in visual communication.

Special Topics Course

CIS670 Health and Mass Media

Hours 3

This course covers basic concepts of health communication within a mass communication and communications context. It covers methods and theories used to study health communication, the effects of health messages in the media, the content of health messages in the media, influences on conceptions of health and illness, and crisis communication in a health context.

CIS671 Public Opinion

Hours 3

Study and analysis of the formation and expression of public opinion and its relation to communication. May be repeated.

CIS672 Media History

Hours 3

Historical investigations of communication through descriptive, evaluative, critical, and/or archival approaches.

CIS673 Political Communication

Hours 3

This course examines the content, processes, and effects of communication within the American political system with a focus on the roles of human communication and media production and use. Students will learn about foundational theories and research central to political communication and consider normative theories of deliberative systems, the political economy of media and politics, and the complex relationship between media content and individual attitudes and behaviors. Students will critically examine the role of communication technologies in shaping political communication and civic life within today's hybrid media system.

CIS674 Sports Media

Hours 3

Surveys the history and present landscape of sports media research. Students will read and critique existing published research while also learning how to conduct and advance original research in the topic area.

CIS675 Community-Engaged Scholarship

Hours 3

This course introduces students to theoretical and applied community-based frameworks and approaches from the social sciences and allied disciplines to transform the "ivory tower" image of the academy. Students apply the philosophy and practice of community-engaged scholarship in community-based projects and gain experience collaborating with external constituencies. Students pursue opportunities to disseminate their research in professional venues of peer-reviewed publications and presentations.

CIS677 Media Sociology

Hours 3

Theoretical and research approaches to the sociological study of media production. Students explore and analyze the many contexts that shape media practices and media content, including: political and economic systems and institutions; media organizations, professions and technologies; and human cultures and communities.

CIS679 Computational Research Methods

Hours 3

This course introduces basic computational approaches for social scientific research, emphasizing the use of R and Python to collect, organize, and analyze data. Students will learn how to create and manipulate variables, use conditional statements and functions, obtain descriptive statistics, develop a variety of visualizations, and perform both quantitative and qualitative analyses.

CIS680 Seminar in Media Processes and Effects

SP

Hours 3

Covers widely used and emerging theories employed to understand media processes and effects. Considers the implications of theory in designing and conducting research in media processes and effects. Topics vary depending on the interest of the participants and on the topic of the seminar. This course may be repeated.

Special Topics Course

CIS681 Advanced Quantitative Research Methods

Hours 3

Provides students an opportunity to understand and use advanced quantitative research methods widely used in the communication and information science disciplines.

CIS682 Seminar in Applied Communication

SP

Hours 3

Covers widely used and emerging theories employed in the study of applied communication. Considers the implication of theory in designing and conducting research in applied communication. Topics vary depending on the interest of the participants and on the topic of the seminar. This course may be repeated.

Special Topics Course

CIS683 Advanced Topics in Media Processes and Effects

SP

Hours 3

Covers topics especially relevant in the current academic study of media processes and effects, typically focusing on a single theoretical or contextual issue. Topics vary depending on the interest of the participants and on the topic of the course. This course may be repeated.

Special Topics Course

CIS684 Advanced Topics in Applied Communication

SP

Hours 3

This seminar covers specific topics relevant to the current academic study of Applied Communication, typically focusing in-depth on one theoretical or contextual aspect. Topics will vary by semester.

Special Topics Course

CIS697 Directed Research

SP

Hours 1-3

This independent study course is designed to allow doctoral students to pursue independent exploration of a particular field or topical area, under the guidance of an advisor. Material covered will be of an advanced nature aimed at providing students with an understanding of current developments within the field. Discussion and advisor guidance will be focused on readings and methodologies that allow students to develop their research capacity, independent thought, and the ability to interpret professional and/or research materials in their field.

Special Topics Course

CIS699 Dissertation Research

Hours 1-12

This independent research course partially fulfills required doctoral-level research dissertation hours toward the Ph.D. degree in Communication and Information Sciences. The course is conducted under the guidance of the dissertation advisor. Material covered will be of an advanced nature aimed at providing doctoral students with an understanding of the latest research and current developments within the field. Discussion and advisor guidance will be directed towards readings of research articles and development of research methodology, with the aim of producing an original research contribution that represents a novel development in the field, or a novel perspective on a preexisting topic in the field.

MC501 Mass Media Law Reguln

Hours 3

A study of the laws affecting the media, decisions, and case histories that act as guides for the media. Independent readings and papers are required.

MC513 Communication/Diversity

Hours 3

Study and analysis of issues of diversity as they relate to groups in society and in communication fields. Emphasis is on the media's treatment of various groups in society.

MC517 Mass Communication and Public Opinion

Hours 3

Nature, development, formation, and distribution of politically relevant attitudes and opinions; role of leadership, persuasion, and communication in opinion-policy process. Emphasis on the role of the media in the formation of public opinion and on how the media are influenced in turn by public opinion.

Prerequisite(s): There are no specific course prerequisites, but graduate status or consent of instructor is required.

MC526 Race, Gender and Media

Hours 3

This discussion-oriented class examines the mass media through the lenses of race, ethnicity and gender. The course helps future media practitioners be aware of their roles in creating content that reflects increasingly multicultural audiences. Using current, contemporary and classic media texts, students critically analyze media messages and understand the importance of a diverse workforce.

MC530 Video Games and Media

Hours 3

This is an overview course that addresses game user research, theory and the ability to analyze for understanding usability, research, and play in the field, giving students an underpinning of the design and research approaches taken with video games. The course assists students who might employ the study of video games in health, advertainment, and journalism in their professional careers, and who may be expected to complete research relating to games.

MC531 Sports & Social Media

Hours 3

This course will focus on the connections and engagement of social media within sports communication. This will include topics such as personal/professional branding, audience analytics, media campaigns and messaging.

MC546 Issues in Sports Media

SP

Hours 3

This course is designed to synthesize work in mass communication to enable students to construct and critique arguments about modern sports media issues and controversies.

Special Topics Course

MC550 Research Methods

Hours 3

A survey of qualitative and quantitative methods in communication research.

MC551 Sem Communication Theory

Hours 3

A study of the development of selected theories of communication as they pertain to interpersonal, public, and mass communication.

MC564 Sports Media Research

Hours 3

This course focuses on the descriptive and empirical ways to develop and evaluate research related to the sports industry, individual accomplishments, fan participation, and social media. Emphasis will be placed on the way that sports media has influenced contemporary culture and values.

MC595 Special Topics

SP

Hours 3

Special topics in mass communication theory and research. May be repeated.

Special Topics Course

Department of Advertising and Public Relations

The Master of Arts in Advertising and Public Relations is designed for aspiring students who wish to gain advanced knowledge and expertise in creating and managing persuasive communication. The program is designed to help students transition from a tactical to a more strategic, managerial approach to the industry. Through an understanding of theory and industry trends, research-driven critical thinking and connections with top scholars and professionals, students who complete the program should be well-prepared for doctoral studies or to step into roles that will help them advance easily into mid-level management positions within their desired fields.

APR522 Media Strategy and Analytics

Hours 3

This course is designed to provide students with the knowledge and skills to use research to select appropriate media channels to communicate to stakeholders. Students will learn to create media briefings and plans for persuasive communication campaigns that include data-driven recommendations. Students will also learn how to retrieve, assess and visualize social media and web analytics.

APR523 Media Relations

Hours 3

This course is designed to provide students with the knowledge and skills to manage relationships with media gatekeepers in order to facilitate communication through their channels, including media selection, build relationships with gatekeepers, and interacting with the media through interviews and press conferences. Students will also learn how to track and analyze media coverage and sentiment using online tools.

[View All Courses](#)

Advertising and Public Relations, MA

The Master of Arts in Advertising and Public Relations is designed for aspiring students who wish to gain advanced knowledge and expertise in creating and managing persuasive communication. We help motivated students transition from a tactical to a more strategic, managerial approach to advertising and public relations, while becoming ethical and globally competent thought leaders in their future careers.

The Advertising and Public Relations Master of Arts program offers four concentrations that enable students to develop expertise in areas of proficiencies at the forefront of advertising and public relations.

The **Advertising Creative** concentration helps students build portfolios while learning to solve a client's problems by beautifully wrapping smart strategies in provocative, layered, and memorable ideas.

The **Digital Communication** concentration equips students with skills necessary to strategically communicate effective integrated advertising and public relations messages and campaigns across digital platforms.

The **Media Strategy** concentration equips students with analytic skills necessary to analyze traditional, digital, and social media data, uncover actionable insights, and develop brand strategies leveraging those insights.

The online-only **Marketing Communication Management** concentration is designed for emerging leaders who wish to gain advanced knowledge and expertise in creating and managing persuasive communication in an integrated industry landscape in order to pursue managerial careers.

Admissions

Applicants must meet the admission criteria of the Graduate School of The University of Alabama. In addition to the Graduate School requirements, the M.A. program in Advertising & Public Relations adheres to the following application and admission requirements.

Graduate entrance exam scores are not required for admission or assistantships, but GRE and GMAT scores may increase competitiveness for assistantship funding for main campus applicants.

Applicants may be considered for admission on a permission-to-continue basis if they do not meet the GPA criterion for regular admission.

To receive consideration and evaluation for admission, applications must include:

- A video or written statement of purpose; this should be a maximum of five minutes long (for video) or three double-spaced pages (for written)
- Two (2) letters of recommendation; one academic reference and one professional reference is preferred.
- Three (3) samples of academic and/or professional work; samples that demonstrate an ability in advertising, PR, or a related field.

Qualifications are considered comprehensively, so no single factor determines acceptance to the program. The M.A. in Advertising & Public Relations is selective and does not admit every applicant.

Deadlines

On-campus applicants are admitted into the program for the Fall semester only. Applications for on-campus admission should be submitted by March 1 to be considered for departmental funding and May 1 to be considered for admission.

Online applicants may be admitted year round in Fall, Spring, and Summer semesters. Online applications have priority deadlines of June 1 for fall admission, December 1 for spring admission, and April 1 for summer admission.

Curricular Requirements

The M.A. in Advertising & Public Relations is a 30-36 (based on concentration) credit-hour program designed to provide students with knowledge of industry trends, proficiency in research-driven critical thinking and problem solving, and exposure to scholars and professionals who are well-connected to an evolving communication landscape in order to build a unique expertise in managing persuasive communication.

Students will work with a faculty advisor to create their own career emphasis from a wide range of electives within A+PR and other departments that will help them gain in-depth knowledge for their future career. These electives, along with a core specifically designed to provide students with a true blend of academic and industry knowledge, will help guide their capstone project. Students will choose from two options: a strategic plan for aspiring industry professionals or a thesis for aspiring scholars. In addition to coursework, students will be required to receive professional experience during the summer after their first year in order to enhance the training they receive in the classroom.

Each student's progress will be guided by their faculty advisor. Students in each program must maintain a minimum GPA of 3.0 during their tenure in the program. Students who receive more than two "C" grades will undergo a faculty review to determine if they should proceed in the program.

Master of Arts in Advertising and Public Relations		Hours
Core Courses (12 hours)		
APR 551	Foundations of Integrated Comm	3
APR 550	Analysis and Insights	3
APR 570	Ethics and Prof Leadership	3
APR 593	Global Comm Management	3

Elective Courses (15 hours) - students that declared a concentration will have a defined set of courses to complete. If a concentration isn't declared, students complete the following:

Research Course (3 hours - students must choose one of the following or an approved substitution)	3
APR 552 Quantitative Research Methods	
COM 550 Qualitative Research Methods	
Media Course (3 hours - students must choose one of the following or an approved substitution)	3
APR 522 Media Strategy and Analytics	
APR 523 Media Relations	
Strategy Course (3 hours - students must choose one of the following or an approved substitution)	3
APR 524 Reputation Comm Strategy	
APR 525 Brand Communication Strategy	
Electives (6 hours - based on area of speciality)	6
Capstone Project (3-6 hours)	
Students will complete one of the following options:	3-6
Thesis Option (main campus students only; students will complete six hours of the following course)	
APR 599 Thesis Research	
White Paper Option (students will complete either 3 hours (DL students only) or 6 hours (main campus students only) of the following course)	
APR 598 Industry Project	
Integrated Campaign Option (main campus students only; students will complete 3 hours of each of the following courses)	
APR 597 Campaign Research and Planning	
APR 598 Industry Project	
Comprehensive Exam Option (main campus students only; students will complete 3 hours of each of the following courses)	
APR 594 Comprehensive Exam Preparation	
Elective Course	

Total Hours 30-33

Professional Experience Requirement

Students enrolled in the M.A. program will be required to complete an internship or some type of professional experience during the summer of their first year. This requirement is designed to encourage students to use the skills learned in the classroom in a professional setting. Students will be required to submit a job description to the graduate coordinator for approval prior to completing the internship. Internships will be approved on a case-by-case basis, but typical internships that are approved would require at least 10 hours a week and/or 80 hours during the summer semester in an advertising, public relations or a related role in a professional setting. After completing the internship, students will submit a short (1-2 page) description of what they experienced and learned during the internship, as well as a form signed by their immediate supervisor, in order to satisfy the requirement. International students that must receive course credit for the internship requirement will enroll for one hour in APR 596 Independent Study Research.

Capstone Project

The capstone project will be an individual demonstration of your knowledge of the skills, theories and concepts that you learned in your

coursework during the program. Students will work with an advisor to determine the best course of action from the following options:

Thesis (individual only)

Students will work with their advisor to identify a gap in the scholarly research devoted to a topic in advertising and/or public relations. The student will conduct a review of related literature and propose and execute original research that will answer the student's overarching research inquiry. Completing a thesis will be suggested to students that are looking to pursue a doctorate. The thesis can only be completed in the spring semester of a student's second year, or later if needed.

White Paper (individual only)

Students will work with their advisor to identify a problem or opportunity facing the advertising and public relations industry. The student will conduct secondary and primary research in order to assess the problem/opportunity and form insights and recommendations that will address the problem/opportunity. Completing a white paper will be suggested to students that are looking to pursue a career in the advertising and public relations industry. **All distance learning students will complete a white paper.**

Integrated Communication Plan (team-based only)

Students will work in a small team (3-4 students) along with their advisor to create an integrated communication campaign for an organization. The student will conduct secondary and primary research in order to assess the problem/opportunity, create a planning report and develop a campaign book that will address the problem/opportunity faced by the organization. Completing an integrated campaign will be suggested to students that are looking to pursue a career in the advertising and public relations industry that do not have an undergraduate background in the area. The campaign can only be completed by the team during the spring semester of their second year.

Comprehensive Exam

Students will complete a case-focused examination on topics covered in the core theory (APR 551), research (APR 550) and professionalism (APR 570) courses. Students will take a course during the fall semester focused on reviewing those concepts covered in the three courses and will submit a comprehensive case study centered around a topic in advertising and public relations. The comprehensive exam option is available to all main campus students, but the exam option is required for students completing the program the fall semester of their second year (17-month option).

Concentrations

A+PR's M.A. program offers four concentrations that provide expertise in growing areas of advertising and public relations to prepare students for more specialized jobs and train future leaders in global integrated marketing communication:

Advertising Creative concentration (requires additional application; available to main-campus students)

Digital Communication concentration (available to distance learning students)

Media Strategy concentration (requires additional interview; available to main-campus students)

Marketing Communication Management concentration (available to distance learning students)

Advertising Creative Concentration

The **Advertising Creative concentration** helps students build portfolios while learning to solve a client's problems by beautifully wrapping smart strategies in provocative, layered, and memorable ideas. At the completion of the program, students will have a portfolio that highlights their natural talents and emphasizes their newly developed strengths to help students find a job in their area of expertise, either art direction or copywriting. Admission into this concentration requires an additional application. Applications are available the spring semester before students begin the program.

Advertising Creative Concentration		Hours

Acquisition of Financial Support:

All admitted and currently enrolled graduate students in good standing in the College of Communication & Information Sciences, both main campus and online, are eligible to apply for a graduate teaching assistantship (GTA), graduate research assistantship (GRA), and/or graduate administrative assistantship (GAA) position funded by the college by submitting the C&IS Graduate Assistantship Interest Application.

Positions range from 10 hour a week (.25 FTE) positions with half tuition and benefits to 20 hour a week (.5 FTE) positions with full tuition and benefits, although online students are not eligible for university sponsored health insurance. Positions and funding offers vary from one semester in duration to multiple years. Funding levels and lengths are communicated via an offer letter or memorandum of appointment, which will indicate an end date of financial support.

Funding decisions for incoming students are generally made between January and May, and decisions for currently enrolled students without funding are generally made between May and July. Currently enrolled students in good standing whose funding is expiring may petition the Associate Dean of Graduate Studies in writing for continued support, and those decisions are also generally made between May and July.

In addition to college assistantships, excellent students may be nominated by the college for University of Alabama fellowships. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits without work expectations for a defined period set by the Graduate School.

Beyond college-funded assistantships, additional funding opportunities may arise from individual faculty or departments in support of grant work, research projects, teaching specific courses, assisting with administrative projects, etc.

All students funded on assistantships must meet the Performance Expectations for Continuing Financial Support (see below) and funding may be removed prior to the end date of financial support in accordance with the Conditions for Termination of Financial Support (see below).

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in a degree program in the College of Communication & Information Sciences and be

making satisfactory academic progress to the completion of the degree.

- The student must complete all mandatory trainings and abide by all rules and policies held by The University of Alabama, College of Communication & Information Sciences, and the department of their work assignment.
- The student must adequately perform all duties assigned to them in a timely manner as defined by the supervisors of their work assignments, including logging work hours if assigned for the position and submitting a semesterly evaluation of their work assignment.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria may be subject to termination of financial support pending C&IS Office for Graduate Studies administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Academic Unit Head and Associate Dean of Graduate Studies may recommend immediate termination of financial support, termination of financial support at the end of the current semester or termination of financial support at the end of the following semester. Students will be notified in writing of any decision to terminate financial support prior to the original end date of funding.

- *Dereliction of Duty.* Dereliction of duty includes, but is not limited to, failure to comply with UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the supervisor; failure to satisfactorily complete all activities associated with the funded position as defined by the supervisor; failure to submit required performance evaluations, etc.
- *Academic Misconduct.* Penalties for resolved academic misconduct cases, including potential loss of financial support, will be determined with guidance from the UA Graduate School and the Office for Graduate Studies.
- *Insufficient Academic Progress.* Insufficient academic progress, as determined by the student's advisor and the Office for Graduate Studies, includes, but is not limited to, students taking courses that do not align with the program requirements; students admitted to candidacy who do not make adequate research progress on their dissertation, failure to pass comprehensive exam, failure to pass proposal defense, etc.
- *Academic Warning & Academic Suspension.* Students on academic warning from the UA Graduate School are not eligible to hold assistantships. In addition to the loss of the assistantship for the semester of Academic Warning, a review of the student will determine if future committed funding will be revoked regardless of successfully earning good standing within the completion of the next 12 credit hours. In all cases, if a student is suspended, all future funding commitments are revoked.

Digital Communication Certificate

This certificate is designed to cultivate a deeper understanding of how to strategically manage communication across digital platforms. It is geared towards working professionals in advertising, public relations, marketing and related fields, as well as students in graduate programs outside A+PR and marketing.

Admissions

Consistent with the Graduate School and Department of Advertising & Public Relations criteria.

See the Admission Criteria section of this catalog for more information.

Regular Admission: An applicant whose credentials meet the following minimum requirements may be

considered for regular admission:

- **GPA:** The applicant must have a grade point average of 3.0 overall, 3.0 in the last 60 semester hours in a degree program, or 3.0 for a completed graduate degree program.
- **Admission Test Score:** Not required by this certificate program
- **Other Requirements:** Students must also submit a statement of purpose, resume with two references, and three samples of academic and professional work, in accordance with the MA degree guidelines

Conditional Language Admission:

An international graduate applicant may be considered on an individual basis for conditional language admission if he or she does not meet the minimum TOEFL score requirement of 550 on the paper-based TOEFL or 79 on the iBT, 6.5 on the IELTS or 59 on the PTE.

General Requirements:

- Completed Bachelor's degree with a 3.0 minimum GPA
- Acceptance into the certificate program
- 15 hours of coursework must be completed to receive the graduate certificate. Hours can be used later towards an MA in Advertising & Public Relations, if desired. Students can also enroll in another MA program concurrently with the certificate program. Transfer credit is not allowed for use towards the certificate program.
- The certificate program is designed to be completed in one year. Students must complete the program within six years of enrollment.

COM500 Introduction to Graduate Studies
Hours 1,3

This course is an introduction to graduate level learning in the discipline of Communication Studies. The primary goal is to provide new graduate students with an orientation to the discipline and the department. This course provides a broad introduction to the various topics and approaches of studying communication, including the metatheoretical principles guiding knowledge production. As such, students will be introduced to theories and concepts of Communication, as well as how these can be applied to understand phenomena across various contexts. Another goal of the course is to prepare students for success in graduate studies by reinforcing skills such as critical reading, writing, information gathering, syntheses, and presentation. The course covers program requirements, degree completion options, and professional development within and outside academia.

COM501 Introduction to Teaching Public Speaking
Hours 1

The primary goal of this course is to facilitate the instruction of COM 123 Public Speaking. Graduate students enrolled in this course will provide lesson plans for their classes and discuss options for improving classroom learning.

[View All Courses](#)

Communication Studies, MA

Master of Arts in Communication Studies

The 30 hour master of arts degree program in the Department of Communication Studies is designed to promote advanced understanding of the social influence of communication in its various forms and venues. The program celebrates the rich diversity of communication by emphasizing four areas of study: rhetoric and political discourse, interpersonal communication, communication and culture, and organizational leadership (online).

After becoming familiar with the theoretical and methodological foundations of communication, students can customize their plan of study to support their particular interests and professional aspirations, including doctoral study, teaching, public service, communication consulting, entrepreneurship, and corporate or nonprofit leadership.

Areas of Study:

Rhetoric and Political Discourse

Rhetoric and Political Discourse focuses on how communication shapes political identity, community, and public culture. Students gain expertise in ancient and contemporary approaches to rhetoric and political discourse and use those ideas to understand and critique public messages. Ultimately, the program aims to develop engaged citizen-scholars equipped with the skills to invent, understand, and critique impactful communication.

Interpersonal Communication

Interpersonal Communication provides a theoretical and methodological foundation for verbal and nonverbal communication within families, romantic partnerships, social groups, and organizations. Student learn the history, empirical developments and practical applications of interpersonal communication research, aligning with ongoing research with the Interpersonal Research Group (IRG) and the Alabama Life Institute.

Communication & Culture

In this area of study, students learn to understand and appreciate the nuances of human communication within and across multiple cultures. By studying communication in a variety of cultural settings, students become more equipped to meaningfully connect with others in an increasingly global world.

Organizational Leadership (Online)

Whether you want to move up in your company or make a career change, this curriculum is designed to foster effective leadership and improve group and interpersonal dynamics. Through the Organizational Leadership specialization, you will gain additional skills that are directly applicable to any workplace.

Admissions

Main Campus

Applications for main campus admission are reviewed for both fall and spring term entry, though fall entry is encouraged.

Recommended Dates for Submitting Applications for Admission

- **December 1:** for fall applicants requesting departmental nomination for Graduate School fellowship opportunities
- **February 1:** for fall applicants requesting consideration for departmental assistantships
- **May 1:** for applicants seeking fall term entry
- **November 1:** for applicants seeking spring term entry

Distance Learning

Applications for distance learning admission are reviewed year-round for fall, spring, and summer term entry. Decisions for distance learning admission are made on a rolling basis, based on available space.

Recommended Deadlines for Submitting Completed Applications

- **April 1:** for distance learners seeking summer entry
- **July 1:** for distance learners seeking fall term entry
- **November 1:** for distance learners seeking spring term entry

Applicants who submit after these deadlines may be asked to move to a later entry term.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Department of Communication Studies uses a *plan of study*, either pre-approved or planned with a faculty advisor. Each plan of study must meet the minimum program requirements established by the Department of Communication Studies and the Graduate School. A master of arts degree in communication studies requires a minimum of 30 hours. A minimum of 21 graduate hours must be completed in the communication discipline.

Students are encouraged to review the Communication Studies departmental website for advising information and submit a plan of study.

Communication Studies MA		Hours
Foundation Requirement		3
COM 500	Intro Graduate Studies	
Theory Requirement		6
COM 561	Human Communication Theory	
COM 541 or	Contemporary Rhetorical Theory	
COM 571	Organizational Com	

Method I Requirement	3
COM 548 Sem Rhetorical Criticism or COM 550 Qualitative Research Methods	
Method II Requirement	3
Choose one of the following courses, or an advisor approved methods course within or outside the communication studies discipline: COM 550, COM 548, COM 572, COM 573, COM 578, CIS 603, CIS 608, CIS 609, CIS 675, CIS 679, EN 653, BER 631, BER 632, BER 637, PY 602	
Electives	9-15
9-15 credits depending on degree completion option, including up to 6 hours outside of the communication discipline	
Degree Completion Options	3-6
Students must complete one of the following options according to their approved plan of study	
COM 599 Thesis Research (6 hours)	
COM 598 Professional Project (3 hours) or COM 590 Internship	
COM 580 Capstone Seminar (3 hours) Comprehensive Exams (No Course Required)	
Total Hours	30

Accelerated Master's Program

Admission into the program begins when the student applies for admission to the Graduate School. Upon admission to the Graduate School, the student will be allowed to take graduate-level courses and begin a program of study leading to the Master of Arts degree in Communication Studies. For more information, consult the Graduate School policies. Graduate School information on Accelerated Master's Program (p. 7).

Comprehensive Exam

Taken during the final semester, the examination allows students to demonstrate knowledge gained from theory, method, and elective courses. Students will form a committee of three faculty members who will administer and evaluate the exams. Graduate School information on Comprehensive Exams.

Professional Option

Students who choose to pursue the professional option for degree completion must secure permission before enrolling in the completion course (COM 598 or COM 590) by submitting a formal proposal to their academic advisor. Additionally, students in the professional option are required to submit, at the end of their coursework, a Capstone Portfolio for their advisor's approval.

Organizational Leadership Emphasis Requirements

The following courses fulfill the Organizational Leadership Emphasis and can be combined with a recommended pathway to fulfill the Communication Studies MA degree program requirements. The recommended pathway can be found on the Communication Studies Graduate Program website.

Code and Title	Hours
Organizational Leadership Emphasis (12 hours)	
COM 555 Conflict and Negotiation	3
COM 560 Group Leadership	3
COM 571 Organizational Com	3
COM 572 Org Assessment/Intervent	3
Total Hours	12

Transfer Credit

Although the Graduate School permits up to 12 hours of transfer credit, the department rarely approves more than 3-6 hours of graduate course work completed in another program. No transfer requests will be considered prior to a student's entry into the MA program. After having successfully completed at least one semester in the program and with their advisor's approval, MA students may petition the department to consider transfer credit toward completing their plans of study. For approval, graduate coursework completed in another program should either correspond with a required course in the program or be approved as a relevant elective course.

Time Limits for Degree Completion Requirements

See Graduate School policy for more information (p. 15)

Academic Misconduct Information

See Graduate School policy for more information (p. 7)

Withdrawals and Leave of Absence Information

See Graduate School policy for more information (p. 244)

Application for Graduation Information

See Graduate School policy for more information. (p. 15)

Acquisition of Financial Support:

All admitted and currently enrolled graduate students in good standing in the College of Communication & Information Sciences, both main campus and online, are eligible to apply for a graduate teaching assistantship (GTA), graduate research assistantship (GRA), and/or graduate administrative assistantship (GAA) position funded by the college by submitting the C&IS Graduate Assistantship Interest Application.

Positions range from 10 hour a week (.25 FTE) positions with half tuition and benefits to 20 hour a week (.5 FTE) positions with full tuition and benefits, although online students are not eligible for university sponsored health insurance. Positions and funding offers vary from one semester in duration to multiple years. Funding levels and lengths are

communicated via an offer letter or memorandum of appointment, which will indicate an end date of financial support.

Funding decisions for incoming students are generally made between January and May, and decisions for currently enrolled students without funding are generally made between May and July. Currently enrolled students in good standing whose funding is expiring may petition the Associate Dean of Graduate Studies in writing for continued support, and those decisions are also generally made between May and July.

In addition to college assistantships, excellent students may be nominated by the college for University of Alabama fellowships. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits without work expectations for a defined period set by the Graduate School.

Beyond college-funded assistantships, additional funding opportunities may arise from individual faculty or departments in support of grant work, research projects, teaching specific courses, assisting with administrative projects, etc.

All students funded on assistantships must meet the Performance Expectations for Continuing Financial Support (see below) and funding may be removed prior to the end date of financial support in accordance with the Conditions for Termination of Financial Support (see below).

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in a degree program in the College of Communication & Information Sciences and be making satisfactory academic progress to the completion of the degree.
- The student must complete all mandatory trainings and abide by all rules and policies held by The University of Alabama, College of Communication & Information Sciences, and the department of their work assignment.
- The student must adequately perform all duties assigned to them in a timely manner as defined by the supervisors of their work assignments, including logging work hours if assigned for the position and submitting a semesterly evaluation of their work assignment.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria may be subject to termination of financial support pending C&IS Office for Graduate Studies administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Academic Unit Head and Associate Dean of Graduate Studies may recommend immediate termination of financial support, termination of financial support at the end of the current semester or termination of financial support at the end of the following semester. Students will be notified in writing of any decision to terminate financial support prior to the original end date of funding.

- *Dereliction of Duty.* Dereliction of duty includes, but is not limited to, failure to comply with UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the supervisor; failure to satisfactorily complete all activities associated with the funded position as defined by the supervisor; failure to submit required performance evaluations, etc.
- *Academic Misconduct.* Penalties for resolved academic misconduct cases, including potential loss of financial support, will be determined

with guidance from the UA Graduate School and the Office for Graduate Studies.

- *Insufficient Academic Progress.* Insufficient academic progress, as determined by the student's advisor and the Office for Graduate Studies, includes, but is not limited to, students taking courses that do not align with the program requirements; students admitted to candidacy who do not make adequate research progress on their dissertation, failure to pass comprehensive exam, failure to pass proposal defense, etc.
- *Academic Warning & Academic Suspension.* Students on academic warning from the UA Graduate School are not eligible to hold assistantships. In addition to the loss of the assistantship for the semester of Academic Warning, a review of the student will determine if future committed funding will be revoked regardless of successfully earning good standing within the completion of the next 12 credit hours. In all cases, if a student is suspended, all future funding commitments are revoked.

JCM501 Media Production Tools

Hours 3

Instruction in and critical analysis of communication technologies used in the production of community journalism.

JCM502 Producing Community Journalism

Hours 3

This course focuses on gathering, writing, editing, and presenting of news and information across media platforms.

MC501 Mass Media Law Reguln

Hours 3

A study of the laws affecting the media, decisions, and case histories that act as guides for the media. Independent readings and papers are required.

MC513 Communication/Diversity

Hours 3

Study and analysis of issues of diversity as they relate to groups in society and in communication fields. Emphasis is on the media's treatment of various groups in society.

[View All Courses](#)

Journalism & Media Studies, M.A.

The Department of Journalism and Creative Media offers the Master of Arts degree with a major in Journalism & Media Studies. Students work closely with a faculty dedicated to the principles and practices of sound journalism, mass communication and scholarly inquiry. The program offers three options for study (see specific details under the "Requirements" tab):

- **Plan I Thesis option (on-campus)** - Individuals who seek in-depth knowledge and mastery of one or more of the subfields and methodologies of journalism or media studies — for example, mass communication history, mass communication law, critical and cultural communication, mass communication theory and methods. These individuals typically follow Plan I (thesis option) and may go on to pursue doctorates. Those with significant experience in the journalism field may teach without the PhD degree.
- **Plan II non-Thesis option (on-campus)** - Individuals who seek to work professionally in writing, editing, visual journalism, electronic news and/or digital journalism, and who wish to develop conceptual knowledge of the field, as well as critical-thinking and problem-solving skills, typically follow Plan II. In addition to the standard professionally focused curriculum, individuals may also choose from Community Journalism or Sports Media concentrations.
- **Plan II Distance Learning option** - Individuals who wish to earn graduate credit through distance education can enroll online. This option is ideal for people eager to expand their knowledge base,

individuals looking to start a career in news, and those interested in teaching in the field of journalism and media.

The program serves both recent BA recipients, whether in journalism/ mass communication or other fields, and professionals seeking to deepen their knowledge.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- Resume
- Examples of journalistic work if available — e.g., stories, photos or multimedia — via hard copy, disk, or website link
- Statement of Purpose addressing how the degree will advance the applicant's professional and educational goals
- A TOEFL score of at least 90 (with a score at least 24 on each of the speaking and writing sections) for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below). International applicants who prefer to submit IELTS test scores must score at least 7.0 and also score at least 7.5 on the speaking section and 6.5 on the writing section. International applicants who meet these criteria may also be invited to participate in a videoconference with the college application review committee

The department faculty may require up to nine hours of additional coursework for applicants lacking undergraduate classes related to the professional values and competencies that are central to the master's program.

Deadlines (note that earlier applications are given priority for funding)

Thesis & Project-Oriented Tracks on UA Campus

- Applications accepted year-round
- Fall semester admission prioritized, but spring admission may be considered.
- Priority deadline for applicants interested in funding: January 31
- Priority deadline for completed applications: March 31

One-Year Community Journalism Concentration on UA Campus

- Applications ONLY accepted for fall semester
- Priority deadline for applications: February 1
- The one-year concentration in Community Journalism admits a limited number of students each fall. Applicants not accepted for Community Journalism may be considered for other master's paths in the Department of Journalism & Creative Media.

OTIDE Online Journalism & Media Studies MA

- Applications accepted year-round for fall, spring, and summer admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Each student entering the graduate program in Journalism & Media Studies must complete 31 semester hours of credit, under either plan (I or II) of study. Students may choose one of the following options for completing their degree program:

Plan I - Thesis option (available to main campus students)

Plan II - Non-thesis option (available to main campus students)

Plan II - Non-thesis option - Online (offered Online through OTIDE)

Plan II - Non-thesis option - Community Journalism Concentration (available to main campus students)

Plan II - Non-thesis option - Sports Media Concentration (available to main campus students)

Plan I - Thesis Requirements

The thesis option is a research / academic track that allows you to study and think critically about journalism from a variety of scholarly approaches. You will explore news and its role in society and its effects on audiences, factors that shape decisions, the history of journalism and the legal and ethical implications of journalism. This two-year option is highly customizable and allows for 12 hours of elective credit that can be taken across disciplines (available to main campus students only).

Code and Title	Hours
Required Courses	
JCM 500 Grad Studies Orientation ¹	1
MC 551 or Sem Communication Theory	3
CIS 605 Cultural and Critical Theory	
MC 550 or Research Methods	3
CIS 609 Humanistic Research Methods	
JCM 562 or Cont. Issues in Journalism	3
JCM 522 Science & Environment in Media	
or	
JCM 520 Media Effects	
or	
MC 526 Race, Gender and Media	
JCM 563 History of Jour. and Media	3
JCM 599 Thesis Research	6
General Electives ^{2, 3}	12
A minimum of 12 hours in JCM (500-599), MC (500-599), or CIS (600-699) courses.	
Total Hours	31

Footnotes

- ¹ All students must enroll in JCM 500 Grad Studies Orientation their first year of study
- ² With their thesis advisor's approval, research-focused master's students may take elective courses in other UA departments and colleges. For example, a graduate student interested in media effects may take 500-level coursework in psychology if approved by their advisor and the course instructor.
- ³ If a student chooses to pursue an independent study with a faculty member for elective credit, they must sign up for three credit hours of JCM 590 with the supervising professor. A proposal must be submitted and approved by the graduate coordinator and department chair detailing the purpose of the independent study.

Plan II: Non-Thesis (Exam/Project) Requirements

On-Campus Option - Under this option (available to main campus students only), students can complete the on-campus degree and have their studies culminate in an in-depth project or comprehensive exams. This professionally focused option includes skills and conceptual courses that help students master knowledge about journalism and

media. This two-year option is highly customizable and allows for 15 hours of elective credit that can be taken across disciplines. It requires completion of 31 total hours, with 28 hours of graduate courses, and a 3-hour project or comprehensive exams in JCM 597.

Online Option (OTIDE) - This professionally focused option is available entirely online for students who wish to have flexibility to complete coursework around their everyday lives. Students can complete the program in as little as 18 months, taking both skills and conceptual courses that help students master knowledge about journalism and media. This options requires completion of 31 total hours, with 28 hours of graduate courses, and a 3-hour project or comprehensive exams in JCM 597.

On-Campus Community Journalism Concentration (Com-J) - Our award-winning, one-year (August - July), on-campus, professional offering is designed to support community journalism by establishing trained professionals in the field. In this program, you will explore new ways to serve communities through evolving journalism practices and digital innovation. The hands-on curriculum relies heavily on experiential learning, rather than a thesis. It includes a May-through-July internship at the University's Digital Media Center, which includes Alabama Public Radio and WVUA-23, a commercial television station in Tuscaloosa. Students interested in the Community Journalism concentration should indicate interest in their Graduate School application and statement of purpose.

Electives - Select 4		12
JCM 517	Advanced Sports Writing	
JCM 535	Sports Documentary	
MC 530	Video Games and Media	
MC 531	Sports & Social Media	
MC 564	Sports Media Research	
MC 546	Issues in Sports Media	
Total Hours		12

Transfer Credit

Students transferring from another graduate program can have up to 12 hours accepted from their prior program for the M.A. degree, pending a curriculum review by the graduate coordinator. In addition, non-degree seeking students can enroll in M.A. classes, pending review by the graduate coordinator. Non-degree students must seek degree status in order to continue after taking 12 credit hours. For more information see the Graduate School Transfer Policies. (p. 15)

Accelerated Master's Program

Through the Accelerated Program (AMP), rising UA seniors who have demonstrated high performance can take courses that count simultaneously toward their undergraduate and graduate degrees. Interested students apply for the AMP program during their junior year and work with the graduate coordinator to create a plan of study to complete their undergraduate degree during their first year as a graduate student. See the Accelerated Master's Program section of this catalog for more information. (p. 7)

Expedited Admission Track into the CIS Doctoral Program

The Expedited Admission Track into the CIS doctoral program allows highly qualified students who completed an undergraduate degree to join the doctoral program. Such students begin graduate coursework in the JCM program and complete their graduate degree as College-wide doctoral candidates, with a streamlined application process for admission or to transfer credit hours into the doctoral program. In short, if admitted on the expedited track, candidates will be able to count 24 hours of coursework, rather than the usual maximum of 12 hours, toward their doctoral degree. Students cannot simultaneously enroll in the AMP program and Expedited Admission Track. See the C&IS Statement of Purpose Guidelines for complete requirements. Otherwise the process requires admission into the JCM program and the CIS doctoral program. Applicants must submit a statement of purpose indicating interest and commitment to graduate work through the doctoral level. Upon completing 24 hours of graduate coursework at the level (18 hours

of core classes, and two journalism classes), students must pass a comprehensive qualifying exam to continue toward the doctoral degree.

Plan I - Thesis Process Requirements

The following applies to students pursuing a master's degree under Plan I (Thesis):

The student is required to complete a thesis, which must be orally defended. Students will work with their adviser to identify a gap in the scholarly research devoted to a topic in journalism and creative media. The student will conduct a review of related literature, and propose and execute original research that will answer the overarching research inquiry. The thesis can be completed no earlier than the second year of a program. Students will enroll for six hours in JCM 599, as part of that process.

Committee: Students must form a committee of two JCM faculty members and one faculty member outside of JCM. Students are encouraged to have their faculty adviser serve as thesis chair. The thesis chair must be a tenured or tenure-track professor with associate or full graduate faculty status. An form must be submitted to the Graduate School for the dean's approval of the committee members.

Proposal: Students must submit a proposal detailing (1) a specification of the topic and its significance, (2) a review of relevant literature, along with proposed research questions and/or hypotheses, (3) a proposed methodology and (4) a calendar for projected completion. The committee must approve the proposal before the student can proceed with the project.

Final Report: The final thesis must include (1) a specification of the topic and its significance, a review of relevant literature, along with proposed research questions and/or hypotheses, (3) a detailed methodology, (4) an analysis of the results, and (5) a discussion of the theoretical and practical implications of the results. The final report must be submitted to the committee at least two weeks before the oral defense.

Oral Defense: Students will defend their final thesis to their committee for approval. It is the student's responsibility to notify the Graduate School of their defense by submitting the final thesis and the relevant paperwork before the deadlines set by the Graduate School. Defenses are open to all faculty members in the department. Students must be enrolled in JCM 599 during the semester they defend their thesis. During the oral defense, students are questioned on their thesis. Questions often concern the methodological design, theoretical foundation, results, and theoretical/professional implications of the thesis project. For the student to pass the oral defense, committee members must be satisfied the student has gained sufficient knowledge in core areas study and demonstrated this knowledge in the design, execution, and completion of the thesis project. A successful thesis will demonstrate research capacity, independent thought, and the ability to interpret materials.

Plan II - Non-Thesis Process Requirements

Plan II students take a comprehensive exam or produce a Capstone project. Similarly, a Capstone project or a comprehensive exam is required for distance learning students.

Capstone Project: The project option is competitive. Students wishing to pursue a project option must formally submit a brief proposal for the project to the student's MA committee before the end of the first week of the student's final semester. Students will be notified about acceptance during the second week.

The students' master's committees, each of which consists of the JCM 597 instructor and one other faculty member (see committee details below), will collectively review proposals and approve no more than five MA projects each semester –i.e., the five projects that are judged to be the best will be selected each semester. Judgment criteria include relevance, importance, coherence, thoroughness, creativity, practicability and writing quality.

About the project: The MA project may focus on a media work (e.g., an in-depth journalistic report, a documentary, etc.); a media innovation (e.g., an online entrepreneurial media product or app); or a scholarly research study (in the social sciences or the humanities). The project is not a fully completed work, but instead consists of the following three components: (1) a detailed plan for carrying out a completed work; (2) a "prototype" or "pilot" of the work; and (3) a conceptual paper in which the student reflects on the project.

Here are details about each component:

1. A detailed plan (due week 6): In this component, students provide a rationale for the project that includes evidence that demonstrates a need, and a description of how the full project will be completed. For journalistic works, students provide background on the issue, statistics and other evidence that show it is a socially important issue, information about previous journalistic reporting on the issue, and details about how the piece will be reported. For research studies, students produce a literature review, theoretical explanation, and a methodology section. For media innovations or entrepreneurial works, students provide a brief explanation of the innovation, and a business plan, including mission and goals, audience/market analysis, and revenue plans. Students receive feedback that may inform their project moving forward.
2. Prototype/pilot of the finished product (due week 10). In this component, students produce an example of the completed work. For a journalistic work, this is a substantial reported and sourced overview that introduces what would be a more involved journalistic work. For a research project, this would be a pilot study.
3. Reflection paper (due week 12). Students write a six-page conceptual paper that draws implications about the project from the perspective of two of the four core knowledge areas of the program (theory, methods, history, issues/ethics). This paper includes citations and demonstrates understanding of, and an ability to think critically about, these perspectives.

To graduate the same semester, each student must orally defend their projects to their two person committee no later than week 12 of the semester (no later than two full weeks before the last day to submit examination results to the Graduate School). The defense should be in person. A phone conference is acceptable only if there are technological barriers.

Each student pursuing a project will have a committee of two graduate faculty: (1) the JCM 597 class instructor and (2) a second faculty member. The JCM 597 instructor serves as the committee chair and must be a full or associate member of the graduate faculty. The second committee member may be a temporary, associate or full member of the graduate faculty. The second member may come from outside the University, but in this case, must be appointed as temporary graduate faculty. The area of expertise of the second committee member should complement the project's focus.

Committee responsibilities: In the case of project students, committee members provide feedback on the project proposal, feedback on student questions during the JCM 597 class, and feedback on the completed project. Committee members determine if the project proposal is

accepted. Both attend the defense of the project and determine if the project and defense demonstrate competency.

Comprehensive Exam

Students who choose the comprehensive exam option, or are not approved for the project option must complete the comprehensive exam. They will take comprehensive exams by enrolling in JCM 597 (three hours) during their final semester, and a three-hour approved elective, to reach the required 31 hours for a degree. Students must have completed their core required courses before taking JCM 597.

Each student will complete four essay questions in an open-book format over the course of 48 hours to be identified by the department in the JCM 597 syllabus at the beginning of the semester. The questions cover the core classes - contemporary issues and ethics, history, methods, and theory. Four professors ask the questions and evaluate students' responses, determining whether the responses warranted evaluations of (a) passed, (b) revisions, or (c) fail. Students who do not pass the initial question will first be asked to revise the response. Students who decline to complete revisions will fail the course. Students who revise and resubmit their answer will have the response re-evaluated by the relevant faculty member, who will determine whether the student passed or failed.

The examination committee will determine whether the student has passed, must perform additional work to demonstrate competency in one or more areas of the examination, or has failed the examination. This determination will be made within one week (seven days) of completion of the exam. When additional work is required, the examining committee may choose to administer another oral examination within the same semester. In the case of a clear failure, re-examination must take place after six months and before twelve months have elapsed. Each of the four portions of the preliminary examination may be taken only twice. The examining committee will rule either pass or fail on the second examination.

Fieldwork/Practicum/Internship Requirements (COM-J)

Our award-winning, one-year professional offering is designed to support community journalism by establishing trained professionals in the field. In this program, you will explore new ways to serve communities through evolving journalism practices and digital innovation. The hands-on curriculum relies heavily on experiential learning, rather than a thesis. It includes a May-through-July internship at the University's Digital Media Center, which includes Alabama Public Radio and WVUA-23, a commercial television station in Tuscaloosa. Community Journalism students must complete an internship and coursework during the interim and summer months culminating with a Capstone project. For the Capstone project, students will work together to produce a digital reporting project focused on a community issue or problem and report on that topic in depth. Students are required to pay tuition during this period, regardless of whether they served as research/teaching assistants during the previous fall/spring. Admission criteria and core curriculum requirements are identical to the traditional Plan II option.

Time Limits for Degree Completion

See the Degree Requirements section of this catalog for more information. (p. 15)

Student Progress Requirements

Students can be removed if their GPA scores do not meet minimum standards. Students generally must earn a 3.0 GPA in their first 12 hours in the program to maintain admission.

Academic Misconduct Information

See the Academic Misconduct section of this catalog for more information. (p. 7)

Withdrawals and Leave of Absence Information

See the Academic Policies section of this catalog for more information. (p. 244)

Academic Grievances Information

See the General Information section of this catalog for more information. (p. 255)

Grades and Academic Standing

See the Academic Policies section of this catalog for more information. (p. 28)

Graduate School Deadlines Information

See the Student Deadlines section of this catalog for more information.

Application for Graduation Information

Students must register for graduation before the deadline of the semester in which they expect to complete their degree. See the Graduation section of this catalog for more information. (p. 15)

Acquisition of Financial Support:

All admitted and currently enrolled graduate students in good standing in the College of Communication & Information Sciences, both main campus and online, are eligible to apply for a graduate teaching assistantship (GTA), graduate research assistantship (GRA), and/or graduate administrative assistantship (GAA) position funded by the college by submitting the C&IS Graduate Assistantship Interest Application.

Positions range from 10 hour a week (.25 FTE) positions with half tuition and benefits to 20 hour a week (.5 FTE) positions with full tuition and benefits, although online students are not eligible for university sponsored health insurance. Positions and funding offers vary from one semester in duration to multiple years. Funding levels and lengths are communicated via an offer letter or memorandum of appointment, which will indicate an end date of financial support.

Funding decisions for incoming students are generally made between January and May, and decisions for currently enrolled students without funding are generally made between May and July. Currently enrolled students in good standing whose funding is expiring may petition the Associate Dean of Graduate Studies in writing for continued support, and those decisions are also generally made between May and July.

In addition to college assistantships, excellent students may be nominated by the college for University of Alabama fellowships. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits without work expectations for a defined period set by the Graduate School.

Beyond college-funded assistantships, additional funding opportunities may arise from individual faculty or departments in support of grant

work, research projects, teaching specific courses, assisting with administrative projects, etc.

All students funded on assistantships must meet the Performance Expectations for Continuing Financial Support (see below) and funding may be removed prior to the end date of financial support in accordance with the Conditions for Termination of Financial Support (see below).

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in a degree program in the College of Communication & Information Sciences and be making satisfactory academic progress to the completion of the degree.
- The student must complete all mandatory trainings and abide by all rules and policies held by The University of Alabama, College of Communication & Information Sciences, and the department of their work assignment.
- The student must adequately perform all duties assigned to them in a timely manner as defined by the supervisors of their work assignments, including logging work hours if assigned for the position and submitting a semesterly evaluation of their work assignment.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria may be subject to termination of financial support pending C&IS Office for Graduate Studies administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Academic Unit Head and Associate Dean of Graduate Studies may recommend immediate termination of financial support, termination of financial support at the end of the current semester or termination of financial support at the end of the following semester. Students will be notified in writing of any decision to terminate financial support prior to the original end date of funding.

- *Dereliction of Duty.* Dereliction of duty includes, but is not limited to, failure to comply with UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the supervisor; failure to satisfactorily complete all activities associated with the funded position as defined by the supervisor; failure to submit required performance evaluations, etc.
- *Academic Misconduct.* Penalties for resolved academic misconduct cases, including potential loss of financial support, will be determined with guidance from the UA Graduate School and the Office for Graduate Studies.
- *Insufficient Academic Progress.* Insufficient academic progress, as determined by the student's advisor and the Office for Graduate Studies, includes, but is not limited to, students taking courses that do not align with the program requirements; students admitted to candidacy who do not make adequate research progress on their dissertation, failure to pass comprehensive exam, failure to pass proposal defense, etc.
- *Academic Warning & Academic Suspension.* Students on academic warning from the UA Graduate School are not eligible to hold assistantships. In addition to the loss of the assistantship for the semester of Academic Warning, a review of the student will determine if future committed funding will be revoked regardless of successfully earning good standing within the completion of the next 12 credit

hours. In all cases, if a student is suspended, all future funding commitments are revoked.

BA520 Elements of Letterpress Printing

Hours 3

This course is devoted to the fundamentals of letterpress. Students will develop fine craft skills in a studio environment. Through hands on assignments, students will be introduced to hand setting type, press operation, and image making techniques. They will learn fundamental terminology, gain an understanding of the interaction of type, ink, and paper, and develop familiarity with the equipment. The emphasis is on fine printing and relief image making.

BA521 Letterpress and the Printed Book

Hours 3

Students in this course will build on their skills on the press through the production of two assignments, culminating in the design and production of a book project. This course is focused on typographic design, the intersection of text and image, and press work. Readings and discussions in this course will focus on typography and the hierarchy of information in the book format.

Prerequisite(s): BA 520

LS500 Information Science and Technology

Hours 3

This introductory course examines information science through conceptual foundations and historical underpinnings of the field as they relate to the nature and roles of information and information institutions. Students will learn fundamental approaches to understand the relationships between Information and individuals, organizations, and society.

LS501 Information in Communities

Hours 3

This required course introduces students to values and ethics and power structures that impact information and information services to diverse communities. It serves as a foundation for broadly thinking about information, communities, power, and social responsibility of LIS professionals.

[View All Courses](#)

Archival Studies Certificate

The College of Communication & Information Sciences at The University of Alabama provides a program of study that leads to an ACHE-recognized Certificate in Archival Studies. This certificate offers a comprehensive grounding in the academic discipline of archival studies, and an understanding of the theory, art, and practice that informs archival work. Students have the opportunity to develop competencies for work with rare books, manuscripts, traditional records, and digital media.

Graduates of the certificate leave prepared for employment in academic, cultural, public, governmental, and corporate environments. Recent graduates are currently employed at leading institutions, including the Alabama Department of Archives and History (ADAH), the New York State Archives, the University of Washington, and Samford University.

Admissions

Applications are accepted from students pursuing graduate work in allied disciplines, or already possessing graduate degrees in related disciplines.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three (3) letters of recommendation; for applicants who have been in school in the last 5 years, at least two (2) letters must be academic references.

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue." (p. 10)

Students pursuing the MLIS should apply for admission to the archival studies concentration.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students complete a total of 15 hours for the archival studies certificate. Twelve hours come from required archival courses and the final 3 hours are from an approved archival elective.

Archival Studies Certificate		Hours
LS 555	Intro Archival Studies	3

Transfer Credit

Transfer credits are not allowed for the archival studies certificate.

Time Limits for Degree Completion

All requirements for the master's degree must be completed during the six years (18 consecutive semesters) immediately preceding the date on which the degree is to be awarded. Additional information about time limits for degree completion for Masters programs is available at the Graduate School.

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University Academic Misconduct Policy will be followed. More information is available here.

Withdrawal or Leave of Absence Information

Students who need to withdraw from a course, the university or take a leave of absence should contact their academic advisor and the SLIS director. Additional information is available on the Graduate School website related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlined in the University of Alabama Faculty Handbook.

Grades and Academic Standing

See here for Graduate School Policy information.

Book Arts Certificate

The Graduate Certificate in Book Arts prepares students to integrate history, materials and technologies of the book arts into their research and/or professional programmatic objectives. Students completing the certificate will obtain a historical, conceptual, and functional understanding of professional best practices, art processes of the three major studio areas that make up the book arts (papermaking, letterpress printing, and bookbinding), and an understanding of the significance of book arts within the broader context of art and craft.

The Book Arts Certificate is a general 15 credit hour program designed for scholars and professionals in other disciplines. It provides an overview of the book arts as a basis for the integration of material book studies into outside research or creative specializations. As a compliment to a primary field of study or professional practice, the certificate provides the expertise necessary to produce and critically examine creative bookwork within a historical context and contemporary framework.

Admissions

A Bachelor's degree at the time of initial enrollment, 3.0 GPA, and a statement of purpose is required. Students may apply to enroll directly or concurrently with another degree program. Applications will be reviewed on a rolling basis and students may begin their study in the Fall or Spring terms.

Applications to the MFA Book Arts program will receive priority over applications to the certificate program and the numbers of students admitted to each program will be closely monitored to ensure that courses are not filled beyond the capacity of the facilities and faculty.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Candidates for the Book Arts certificate must earn a minimum of 15 semester hours of credit, including at least 6 hours of studio courses and 9 hours of electives within the book arts program. All coursework must be completed with a grade average of "B" or better.

All certificate students must complete, as part of the 15 hours, the following required courses:

Code and Title	Hours
Required Studio Core Course Work	6
Select 2	
BA 501	Mat & Tech of Bookbinding
BA 520	Elements of Letterpress

BA 530	Elements of Bookbinding	
BA 541	Techniques of Hand Papermaking	
Electives		9
students cannot count double credit across core and electives		
BA 501	Mat & Tech of Bookbinding	
BA 502	Beyond Letterpress	
BA 504	Art and Culture of Zines	
BA 505	Introduction to Digital Design	
BA 510	The Whole Book	
BA 520	Elements of Letterpress	
BA 521	The Printed Book	
BA 524	Artist Books	
BA 530	Elements of Bookbinding	
BA 531	Case Binding and Edition Work	
BA 534	Boxmaking	
BA 541	Techniques of Hand Papermaking	
BA 542	Contemporary Hand Papermaking	
BA 593	Workshops In Book Arts	
LS 653	Descriptive Bibliography	
LS 654	Print Culture and Society	
LS 655	Book Artifact Materiality Text	
CIS 656	Electronic/Contemporary Pub.	
Total Hours		15

All graduate coursework required for the proposed certificate is already offered through the existing ACHE approved M.F.A. Book Arts Program. Students who complete the certificate will be provided formal recognition of specialized knowledge in Book Studies. This recognition will communicate that these graduates have skills and academic preparation in the arts and technologies of the book.

Transfer Credit

Up to 3 hours of graduate course credit may be transferred from another accredited university or may be elected from the offerings of other departments with approval of program advisor.

More information about transfer requirements can be found from the Graduate School (p. 15).

Comprehensive Examination/Capstone Requirements

All Book Arts certificate students will be required to build a portfolio of coursework, to be submitted in their final semester of enrollment. Coursework samples will be accompanied by a summation statement by the student about the portfolio and its relevance to their professional, academic, and/or creative goals. The portfolio will be reviewed and assessed by the book arts faculty in a one-on-one session with the student, and will be presented in a public showcase of student work. A passing vote will be required by the book arts faculty for the certificate to be conferred. Certificate portfolios reflect student learning in relation to the MFA Book Arts program learning outcomes (PLOs).

Programmatic Learning Outcomes (PLOs) for the Book Arts Certificate

1.) Students will demonstrate foundational book arts technical skills and the ability to think critically about their work.

2.) Students will demonstrate an understanding of the book as a cohesive object, and the ability to articulately describe the interrelationship between structure, material, and the conceptual framework.

3.) Students will demonstrate a working knowledge of the historical context of the book arts.

4.) Students will demonstrate an understanding of the relevance of the book art within contemporary art and craft, and a familiarity with active book arts institutions and contemporary book artists.

Time Limits For Degree Completion Requirements

Information about time limits is available here.

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University Academic Misconduct Policy will be followed. More information is available here (p. 7).

Withdrawal or Leave of Absence Information

Students who need to withdraw from a course, the university or take a leave of absence should contact their academic advisor and the SLIS director. Additional information is available on the Graduate School website (p. 244) related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlined in the University of Alabama Faculty Handbook.

Grades and Academic Standing

Student Progress Requirement

All graduate students must earn and maintain an overall graduate grade point average (GPA) of 3.0 or better for all graduate courses undertaken at The University of Alabama. Grades below "C" count in computing the GPA but do not carry credit toward a degree. A graduate student with good academic standing whose GPA drops below 3.0 at any time after earning 12 semester hours will have earned Academic Warning.

Students who have earned academic warning or are in non-degree status may not hold graduate assistantships.

A student placed on Academic Warning has the next 12 hours of graduate work to raise the overall graduate GPA to 3.0 or better. The overall graduate GPA after the next 12 hours following academic warning must be at least 3.0 to avoid Academic Suspension (dismissal) from the Graduate School.

Note that academic dismissal from the department or Graduate School differs from dismissal for academic misconduct. Academic misconduct results in dismissal from the University. The Academic Misconduct policy may be found at the Provost's website.

Additional information about student progress and scholastic requirements is available on the Graduate School website (p. 28).

Permission to Continue Admission

Under exceptional circumstances, a student may be admitted to the Book Arts Certificate program if they do not meet the GPA requirement for regular admission (GPA of 3.0). If such an applicant is admitted, they will need to obtain permission to continue in the program after the first 12

semester hours of graduate-level work have been completed. Permission to continue is earned by achieving a GPA of "B" or better (3.0) in the first 12 semester hours. If the 12 hours are completed in a term in which the total credits exceed 12, the evaluation is made on the basis of all graduate-level work completed at the end of that term of enrollment. Once a student has been given the permission to continue they will be evaluated by the same student progress guidelines as regular admission students.

Students admitted under permission to continue designation who do not meet the 3.0 requirement after their first 12 hours of graduate-level work will not receive permission to continue in their graduate program and will be dropped from the program.

Graduate School Deadlines Information

The University of Alabama Graduate School keeps a calendar of specific student deadlines available on the Graduate School website.

Book Arts, MFA

The MFA Book Arts Program is a 60-credit hour course of study in the fine art and traditional practices of making books by hand. Individual artistic expression is cultivated through the development of craft skills based in historical principles, practice, and technique. Courses in letterpress printing and publishing, typography, hand bookbinding, hand papermaking, artist books, and the history of the book provide training and context for the role of the book as a medium for expression in art and society. Our emphasis is on the book as an integrated unit which combines materials, processes, and format with visual and textual voice, although there are opportunities for students who wish to pursue specific interests in one or more of these areas after the initial year of general study.

Admissions

Applications are considered holistically, so no single factor determines acceptance to the program. The MFA Book Arts program is selective, and does not admit every applicant.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include: a statement of purpose, resume, portfolio (in their area of experience), and three letters of reference.

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

Non-degree Admission Requirements

An applicant may be admitted as a non-degree student if the applicant has either a 3.0 undergraduate GPA or a 3.0 graduate GPA. No more than 12 hours may be taken as a non-degree-seeking student and applied to a degree.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Candidates for the MFA Book Arts degree must earn a minimum of 60 semester hours of credit, including at least 6 hours in the history of the book and 3 hours in a historical/theoretical course appropriate to the goals of the individual student; at least 36 hours in the book arts studio; a minimum of 15 hours of electives within or outside the book arts program. All coursework must be completed with a grade average of "B" or better. All students must spend at least four semesters in residence.

All MFA students must complete, as part of the 60 hours, the following required courses:

Code and Title		Hours
Required Courses		33
BA 520	Elements of Letterpress	
BA 521	The Printed Book	
BA 530	Elements of Bookbinding	
BA 531	Case Binding and Edition Work	
BA 541	Techniques of Hand Papermaking	
BA 592	Graduate Seminar

ART 520	Printmaking
ART 620	Printmaking

One elective course must be historical/theoretical non-studio

Students may also take elective courses at the 500 or 600 level from any department in the university if approved by their advisor

Total Hours

60

NOTE: Students who are not enrolled in the MFA program and who wish to take book arts classes must obtain permission from the instructor before enrolling.

Transfer Credit

Up to 6 graduate credits, excluding thesis hours, may be transferred from another accredited university with approval of the approval of the student's advisory committee and the dean of the Graduate School.

More information about transfer requirements can be found from the Graduate School (p. 15).

Comprehensive Examination/Capstone Requirements

All MFA Book Arts students are required to complete a creative thesis project. The creative thesis project demonstrates, by means of a body of work, mastery of selected skills, a strong creative research agenda, and the capacity for critical and independent thought. Creative thesis projects reflect student learning in relation to the MFA Book Arts program learning outcomes (PLOs).

All creative thesis projects must be related to the book arts and must be approved by the student's thesis director and the student's thesis committee. The creative thesis project committee must include three individuals, including at least two full-time Book Arts faculty members, at least one of whom must be a full member of the graduate faculty; a third committee member may be a faculty member from another department of the University, a faculty member from another institution, or a well-qualified practitioner.

The student must obtain committee approval of their creative thesis project proposal prior to enrolling in thesis credit; a formal defense, public presentation, public exhibition, and written paper will constitute the final examination for the MFA Book Arts degree. The candidate must give members of the examining committee a minimum of two weeks to review the creative thesis project and written paper before the date of the final oral defense.

The creative thesis project should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the creative thesis project, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has posed troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects, the principal investigator – normally the student – is responsible for contacting the college's Human Research Review Committee to obtain approval for the planned research. Both the student and the thesis chair are responsible for completing IRB training.

Programmatic Learning Outcomes (PLOs) for the MFA Book Arts Degree

The programmatic learning outcomes (PLOs) for students enrolled in the MFA Book Arts degree are :

- (1) Students will possess fundamental technical skills in the book arts.
- (2) Students will possess advanced technical skills in the area(s) of professional specialization.
- (3) Students will demonstrate a strong knowledge of the heritage, responsibilities, trends, and standards of the Book Arts profession, including an understanding of the interdisciplinary nature of the books arts.
- (4) Students will demonstrate an ability to think and speak critically about their own work and its place within contemporary book arts and book craft.

Time Limits for Degree Completion Requirements

All requirements for the master's degree must be completed during the six years (18 consecutive semesters) immediately preceding the date on which the degree is to be awarded. Additional information about time limits for degree completion for Masters programs is available at the Graduate School. (p. 15)

Student Progress Requirement

All graduate students must earn and maintain an overall graduate grade point average (GPA) of 3.0 or better for all graduate courses undertaken at The University of Alabama. Grades below "C" count in computing the GPA but do not carry credit toward a degree. A graduate student with good academic standing whose GPA drops below 3.0 at any time after earning 12 semester hours will have earned Academic Warning.

Students who have earned academic warning or are in non-degree status may not hold graduate assistantships.

A student placed on Academic Warning has the next 12 hours of graduate work to raise the overall graduate GPA to 3.0 or better. The overall graduate GPA after the next 12 hours following academic warning must be at least 3.0 to avoid Academic Suspension (dismissal) from the Graduate School.

Note that academic dismissal from the department or Graduate School differs from dismissal for academic misconduct. Academic misconduct results in dismissal from the University. The Academic Misconduct policy may be found at the Provost's website.

Additional information about student progress and scholastic requirements is available on the Graduate School website.

Permission to Continue Admission

Under exceptional circumstances, a student may be admitted to the MFA Book Arts program if they do not meet the GPA requirement for regular admission (GPA of 3.0). If such an applicant is admitted, they will need to obtain permission to continue in the program after the first 12 semester hours of graduate-level work have been completed. Permission to continue is earned by achieving a GPA of "B" or better (3.0) in the first 12 semester hours. If the 12 hours are completed in a term in which the total credits exceed 12, the evaluation is made on the basis of all graduate-level work completed at the end of that term of enrollment. Once a student has been given the permission to continue they will be evaluated by the same student progress guidelines as regular admission students.

Students admitted under permission to continue designation who do not meet the 3.0 requirement after their first 12 hours of graduate-level work will not receive permission to continue in their graduate program and will be dropped from the program.

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University Academic Misconduct Policy will be followed. More information is available here (p. 7).

Withdrawals or Leave of Absence Information

Students who need to withdraw from a course, the university or take a leave of absence should contact their academic advisor and the SLIS director. Additional information is available on the Graduate School website (p. 244) related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlined in the University of Alabama Faculty Handbook.

Grades and Academic Standing

See here for Graduate School Policy information. (p. 28)

Graduate School Deadlines Information

The University of Alabama Graduate School keeps a calendar of specific student deadlines available on the Graduate School website.

Application for Graduation Information

Once requirements for the degree are completed, each candidate for a master's degree must apply for graduation through the Office of the Graduate School prior to the deadline posted each semester on the University of Alabama's Registrar Academic Calendar. The form "Application for Degree" is required for this purpose, and must be completed online via mybama.

Acquisition of Financial Support:

All admitted and currently enrolled graduate students in good standing in the College of Communication & Information Sciences, both main campus and online, are eligible to apply for a graduate teaching assistantship (GTA), graduate research assistantship (GRA), and/or graduate administrative assistantship (GAA) position funded by the college by submitting the C&IS Graduate Assistantship Interest Application.

Positions range from 10 hour a week (.25 FTE) positions with half tuition and benefits to 20 hour a week (.5 FTE) positions with full tuition and benefits, although online students are not eligible for university sponsored health insurance. Positions and funding offers vary from one semester in duration to multiple years. Funding levels and lengths are communicated via an offer letter or memorandum of appointment, which will indicate an end date of financial support.

Funding decisions for incoming students are generally made between January and May, and decisions for currently enrolled students without funding are generally made between May and July. Currently enrolled students in good standing whose funding is expiring may petition the Associate Dean of Graduate Studies in writing for continued support, and those decisions are also generally made between May and July.

In addition to college assistantships, excellent students may be nominated by the college for University of Alabama fellowships. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits without work expectations for a defined period set by the Graduate School.

Beyond college-funded assistantships, additional funding opportunities may arise from individual faculty or departments in support of grant work, research projects, teaching specific courses, assisting with administrative projects, etc. Additionally, the School of Library & Information Studies offers scholarships to help graduate students finance their education. Information regarding SLIS scholarships is available on the school's website.

All students funded on assistantships must meet the Performance Expectations for Continuing Financial Support (see below) and funding may be removed prior to the end date of financial support in accordance with the Conditions for Termination of Financial Support (see below).

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in a degree program in the College of Communication & Information Sciences and be making satisfactory academic progress to the completion of the degree.
- The student must complete all mandatory trainings and abide by all rules and policies held by The University of Alabama, College of Communication & Information Sciences, and the department of their work assignment.
- The student must adequately perform all duties assigned to them in a timely manner as defined by the supervisors of their work assignments, including logging work hours if assigned for the position and submitting a semesterly evaluation of their work assignment.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria may be subject to termination of financial support pending C&IS Office for Graduate Studies administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Academic Unit Head and Associate Dean of Graduate Studies may recommend immediate termination of financial support, termination of financial support at the end of the current semester or termination of financial support at the end of the following semester. Students will be notified in writing of any decision to terminate financial support prior to the original end date of funding.

- *Dereliction of Duty.* Dereliction of duty includes, but is not limited to, failure to comply with UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the supervisor; failure to satisfactorily complete all activities associated with the funded position as defined by the supervisor; failure to submit required performance evaluations, etc.
- *Academic Misconduct.* Penalties for resolved academic misconduct cases, including potential loss of financial support, will be determined with guidance from the UA Graduate School and the Office for Graduate Studies.
- *Insufficient Academic Progress.* Insufficient academic progress, as determined by the student's advisor and the Office for Graduate Studies, includes, but is not limited to, students taking courses that do not align with the program requirements; students admitted to candidacy who do not make adequate research progress on their dissertation, failure to pass comprehensive exam, failure to pass proposal defense, etc.
- *Academic Warning & Academic Suspension.* Students on academic warning from the UA Graduate School are not eligible to hold assistantships. In addition to the loss of the assistantship for the semester of Academic Warning, a review of the student will determine if future committed funding will be revoked regardless of successfully earning good standing within the completion of the next 12 credit hours. In all cases, if a student is suspended, all future funding commitments are revoked.

Library and Information Studies, MLIS

The Master of Library and Information Studies (MLIS) degree is a 36-credit-hour program, one of approximately 63 programs in the United States and Canada accredited by the American Library Association and the only ALA-accredited program in the state of Alabama. The degree prepares graduates to work in any type of library setting — public, school (PK-12), academic, or special. The MLIS also equips students for work in archives, information organizations, and in entrepreneurial and research environments, especially those using information technologies and artificial intelligence.

Admissions

Applications are considered holistically, so no single factor determines acceptance to the program. The MLIS program is selective, and does not admit every applicant. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an applicant must include:

- Two (2) letters of recommendation; these letters should be professional or academic in nature, speaking to your ability to succeed in the MLIS program.
- Applicants who wish to be considered for a Graduate Council Fellowship must submit two (2) academic letters of recommendation from instructors who have taught them in undergraduate and/or graduate courses. Without two (2) academic letters of recommendation, applicants will not be considered for Graduate Council Fellowships.

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

For admission to the Class A School Library Media program, applicants must have:

- a valid bachelor's level or valid master's level professional educator certificate in a teaching field or a valid master's level professional educator certificate in another area of instructional support and
- two full years of full-time professional educational work experience in P-12 school system(s)

Also, applicants to the Class A program must have a criminal history background check as required by the Alabama Department of Education.

Applicants with out-of-state licensure who are employed or seeking employment in another state are responsible for knowledge about professional licensure requirements in the prospective states. An applicant with out-of-state licensure who intends to apply for Alabama certification must first apply for the prerequisite certification in Alabama before applying for Class A School Library Media certification in Alabama.

Non-degree Admission Requirements

An applicant may be admitted as a non-degree student if the applicant has either a 3.0 undergraduate GPS or a 3.0 graduate GPA. No more than 12 hours may be taken as a non-degree seeking student and applied to a degree.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Candidates for the MLIS degree must earn a minimum of 36 semester hours of credit from courses the School of Library and Information Studies (SLIS). Courses offered by the College of Communication and Information Sciences, as well as those in other University of Alabama academic units outside SLIS, can be taken on approval by a student's academic advisor. No more than six hours of courses can be taken outside of SLIS. All work must be completed with a grade average of "B" or better. A comprehensive portfolio comprised of course assignments reflecting program learning outcomes is required of all students. All MLIS students must complete, as part of the minimum 36 hours, the following 12 hours of required courses:

Core Requirements		Hours
LS 500	Info Sci & Tech	3
LS 501	Information in Communities	3

Area of Emphasis	24
Total Hours	36

Students may take many pathways to the completion of the MLIS program and should work in conjunction with their assigned academic advisors in the construction of their program. Class A School Library-Media Certification or Archival Studies Concentration may be pursued. In addition, there are informal areas of emphasis offered in Academic Libraries, Digital Stewardship, Information Literacy, Information Organization and Retrieval, Information Science, Public Libraries, Social Justice & Inclusivity, Youth Services, and Collections, Communities & the Physical Book. Courses listed in these areas are suggested (not required). Students should consult with their academic advisor to design their unique course of study to meet individualized learning and career needs.

School Library Media Concentration (Class A Certification)

For candidates admitted to the Class A Library Media program July 1, 2017, and thereafter, a minimum GPA of 3.25 on all courses in the Alabama State Board of Education approved library media program is required for certification. Requirements for State-approved programs are subject to change between catalog publications, so students should check with their advisor for the most up-to-date information.

Students pursuing Library Media certification should refer to the State-approved program checklist to ensure that requirements are met. In addition to completing an approved program of study, the candidate is required to pass a comprehensive assessment administered by the School of Library and Information Studies (SLIS) and earn a passing score on the Praxis for Library Media Specialist.

If courses equivalent to any of these required courses have been taken previously, substitutions may be made, with the approval of a faculty advisor and the SLIS school library media coordinator.

Archival Studies Concentration

The School of Library & Information Studies at The University of Alabama offers a program of study within the MLIS degree that leads to an ACHE-recognized concentration in Archival Studies. This concentration provides a comprehensive grounding in the academic discipline of archival studies, and an understanding of the theory, art, and practice that informs archival work. Students have the opportunity to develop competencies for work with rare books, manuscripts, traditional records, and digital media.

Graduates of the concentration leave prepared for employment in academic, cultural, public, governmental, and corporate environments.

In addition to the MLIS requirements, the Archival Studies Concentration requires completion of the following curriculum:

Archival Studies Concentration Requirements (in addition to MLIS Requirements):

LS 555	Intro Archival Studies	3
LS 556	Archival Theory & Practice	3
LS 557	Archival Appraisal	3

LS 558	Archival Repres., Access & Use	3
Approved archival studies electives		6

Transfer Requirements and Credit for Non-Letter Graded Courses

Graduate credit may be transferred from another accredited university or may be elected from the offerings of other departments outside of SLIS. Thesis credit cannot be transferred from another university. **SLIS Nine-hour Rule:** No more than nine hours of credit can be applied toward the MLIS for any combination of graduate courses taken outside of SLIS, directed research courses, internships, and thesis credit. These hours may be combined as follows:

Coursework

Six hours of approved credit for graduate work taken outside SLIS and three hours of credit for a directed research course or internship; or:

Six hours of credit for any combination of directed research courses and internships and three hours of approved credit for graduate work taken outside SLIS.

Thesis

Six hours of thesis credit and three hours of credit for directed research course or internship; or:

Six hours of thesis credit and three hours of approved credit for graduate work taken outside SLIS.

More information about transfer requirements can be found from the Graduate School (p. 15). Note: Book Arts (BA) courses are considered appropriate electives within SLIS for the MLIS and do not count towards the nine-hour rule.

Comprehensive Examination/Capstone Requirements

All MLIS students are required to complete a comprehensive portfolio reflecting their learning in relation to the MLIS program learning outcomes. This portfolio is a representation of student growth during their coursework.

Final portfolios include work samples from courses taken throughout the program, and are due during the final semester of coursework. Specific submission deadlines are communicated to students each semester.

Programmatic Learning Outcomes (PLOs) for the MLIS Degree

The programmatic learning outcomes (PLOs) for students enrolled in the MLIS degree are aligned with the American Library Association's Standards for Accreditation. The PLOs are:

- (1) Students will apply foundational concepts, theories, and principles to solve information-related problems in a rapidly changing society;
- (2) Students will use evidence to inform library and information practices;
- (3) Students will evaluate the essential character of the field and apply the philosophy, principles, and ethics of library and information science to professional practice; and
- (4) Students will evaluate the role of the library and information services and the needs of constituencies in a diverse global society, including issues of social and cultural justice.

Plan I: Thesis Option

Candidates for the master's degree under the thesis plan must earn a minimum of 36 credit hours, including nine hours of required courses, and

six hours of thesis credit (LS 599); no more than six hours of thesis credit may be counted toward the degree.

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I: Thesis. The subject chosen must be related to library and information studies and must be approved by the student's thesis director, the student's thesis committee, and the SLIS Director.

The thesis committee must include three individuals, including at least two full-time SLIS faculty members, at least one of whom must be a full member of the graduate faculty; a third committee member may be a faculty member from another department of the University, a faculty member from another institution, or a well-qualified practitioner. All committee members must hold appropriate Graduate Faculty status.

The student must obtain committee approval for a prospectus for the thesis project prior to enrolling in thesis credit; a formal defense of the prospectus will constitute the final examination for the MLIS degree.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting. The thesis defense shall be made orally before the student's thesis committee and will be open to the public.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has posed troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects, the principal investigator – normally the student – is responsible for contacting the college's Human Research Review Committee to obtain approval for the planned research. Both the student and the thesis chair are responsible for completing IRB training.

Students completing the thesis option are required to also complete the comprehensive portfolio reflecting program learning outcomes.

Plan II: Non-Thesis Option

Candidates for MLIS degree under the non-thesis plan must earn a minimum of 36 credit hours, including nine hours of required courses, from the School of Library and Information Studies (SLIS). Courses offered by the College of Communication and Information Sciences, as well as those in other University of Alabama academic units outside SLIS, can be taken on approval by a student's academic advisor. No more

than six hours of courses can be taken outside of SLIS. All work must be completed with a grade average of "B" or better. A comprehensive portfolio comprised of course assignments reflecting program learning outcomes is required of all students.

Time Limits for Degree Completion Requirements

All requirements for the master's degree must be completed during the six years (18 consecutive semesters) immediately preceding the date on which the degree is to be awarded. Additional information about time limits for degree completion for Masters programs is available at the Graduate School (p. 15).

Student Progress Requirement

All graduate students must earn and maintain an overall graduate grade point average (GPA) of 3.0 or better for all graduate courses undertaken at The University of Alabama. Grades below "C" count in computing the GPA but do not carry credit toward a degree. A graduate student with good academic standing whose GPA drops below 3.0 at any time after earning 12 semester hours will have earned Academic Warning.

Students who have earned academic warning or are in non-degree status may not hold graduate assistantships.

A student placed on Academic Warning has the next 12 hours of graduate work to raise the overall graduate GPA to 3.0 or better. The overall graduate GPA after the next 12 hours following academic warning must be at least 3.0 to avoid Academic Suspension (dismissal) from the Graduate School.

Note that academic dismissal from the department or Graduate School differs from dismissal for academic misconduct. Academic misconduct results in dismissal from the University. The Academic Misconduct policy may be found at the Provost's website.

Additional information about student progress and scholastic requirements is available on the Graduate School website (p. 28).

Permission to Continue Admission

Under exceptional circumstances, a student may be admitted to the MLIS program if they do not meet the GPA requirement for regular admission (GPA of 3.0). If such an applicant is admitted, they will need to obtain permission to continue in the program after the first 12 semester hours of graduate-level work have been completed. Permission to continue is earned by achieving a GPA of "B" or better (3.0) in the first 12 semester hours. If the 12 hours are completed in a term in which the total credits exceed 12, the evaluation is made on the basis of all graduate-level work completed at the end of that term of enrollment. Once a student has been given the permission to continue they will be evaluated by the same student progress guidelines as regular admission students.

Students admitted under permission to continue designation who do not meet the 3.0 requirement after their first 12 hours of graduate-level work will not receive permission to continue in their graduate program and will be dropped from the program.

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University Academic Misconduct Policy will be followed. More information is available here (p. 7).

Withdrawal or Leave of Absence Information

Students who need to withdraw from a course, the university or take a leave of absence should contact their academic advisor and the SLIS director. Additional information is available on the Graduate School website (p. 244) related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlined in the University of Alabama Faculty Handbook.

Grades and Academic Standing

See here for Graduate School Policy information. (p. 28)

Graduate School Deadlines Information

The University of Alabama Graduate School keeps a calendar of specific student deadlines available on the Graduate School website.

Application for Graduation Information

Once requirements for the degree are completed, each candidate for a master's degree must apply for graduation through the Office of the Graduate School prior to the deadline posted each semester on the University of Alabama's Registrar Academic Calendar. The form "Application for Degree" is required for this purpose, and must be completed online via mybama.

Acquisition of Financial Support:

All admitted and currently enrolled graduate students in good standing in the College of Communication & Information Sciences, both main campus and online, are eligible to apply for a graduate teaching assistantship (GTA), graduate research assistantship (GRA), and/or graduate administrative assistantship (GAA) position funded by the college by submitting the C&IS Graduate Assistantship Interest Application.

Positions range from 10 hour a week (.25 FTE) positions with half tuition and benefits to 20 hour a week (.5 FTE) positions with full tuition and benefits, although online students are not eligible for university sponsored health insurance. Positions and funding offers vary from one semester in duration to multiple years. Funding levels and lengths are communicated via an offer letter or memorandum of appointment, which will indicate an end date of financial support.

Funding decisions for incoming students are generally made between January and May, and decisions for currently enrolled students without funding are generally made between May and July. Currently enrolled students in good standing whose funding is expiring may petition the Associate Dean of Graduate Studies in writing for continued support, and those decisions are also generally made between May and July.

In addition to college assistantships, excellent students may be nominated by the college for University of Alabama fellowships. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits without work expectations for a defined period set by the Graduate School.

Beyond college-funded assistantships, additional funding opportunities may arise from individual faculty or departments in support of grant work, research projects, teaching specific courses, assisting with administrative projects, etc. Additionally, the School of Library & Information Studies offers scholarships to help graduate students

finance their education. Information regarding SLIS scholarships is available on the school's website.

All students funded on assistantships must meet the Performance Expectations for Continuing Financial Support (see below) and funding may be removed prior to the end date of financial support in accordance with the Conditions for Termination of Financial Support (see below).

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in a degree program in the College of Communication & Information Sciences and be making satisfactory academic progress to the completion of the degree.
- The student must complete all mandatory trainings and abide by all rules and policies held by The University of Alabama, College of Communication & Information Sciences, and the department of their work assignment.
- The student must adequately perform all duties assigned to them in a timely manner as defined by the supervisors of their work assignments, including logging work hours if assigned for the position and submitting a semesterly evaluation of their work assignment.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria may be subject to termination of financial support pending C&IS Office for Graduate Studies administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Academic Unit Head and Associate Dean of Graduate Studies may recommend immediate termination of financial support, termination of financial support at the end of the current semester or termination of financial support at the end of the following semester. Students will be notified in writing of any decision to terminate financial support prior to the original end date of funding.

- *Dereliction of Duty.* Dereliction of duty includes, but is not limited to, failure to comply with UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the supervisor; failure to satisfactorily complete all activities associated with the funded position as defined by the supervisor; failure to submit required performance evaluations, etc.
- *Academic Misconduct.* Penalties for resolved academic misconduct cases, including potential loss of financial support, will be determined with guidance from the UA Graduate School and the Office for Graduate Studies.
- *Insufficient Academic Progress.* Insufficient academic progress, as determined by the student's advisor and the Office for Graduate Studies, includes, but is not limited to, students taking courses that do not align with the program requirements; students admitted to candidacy who do not make adequate research progress on their dissertation, failure to pass comprehensive exam, failure to pass proposal defense, etc.
- *Academic Warning & Academic Suspension.* Students on academic warning from the UA Graduate School are not eligible to hold assistantships. In addition to the loss of the assistantship for the semester of Academic Warning, a review of the student will determine if future committed funding will be revoked regardless of successfully earning good standing within the completion of the next 12 credit

hours. In all cases, if a student is suspended, all future funding commitments are revoked.

Youth Literature and Services Certificate

Youth (Children's and Young Adult) Services is an area of professional practice centered on serving the informational, recreational, educational, and cultural needs of children, young adults, and their caregivers within a public library setting. This diverse area includes library services to youth ages birth up to nineteen. The Graduate Certificate in Youth Literature & Services trains dedicated professionals with specialized knowledge and skills to support the informational and literacy needs of children, tweens, teens, and young adults. This certificate is advantageous to an information or education professional interested in fostering the literacy needs of youth in library and literacy environments.

The Graduate Certificate in Youth Literature & Services is a 15 credit hour program with courses that focus on drawing a connection between youth's educational and personal interests and a wide range of creative activities such as puppetry, traditional and digital storytelling, dramatic play, poetry slams, and spoken word performances. The certificate provides the expertise to enhance youth's literacy skills and learning explorations to celebrate book joy and forge pathways to school, college, career, and civic readiness.

Certificate coursework may be combined with an MLIS or taken as a stand-alone certificate to complement other graduate work and degree in library and information studies and allied disciplines.

Admissions

Completed Bachelor's degree with a 3.0 minimum GPA.

Applications are accepted from students currently holding a Bachelor's degree, those pursuing graduate work in library and information studies and allied disciplines, or those already possessing graduate degrees in related disciplines.

Application Deadlines:

For Spring admissions, the priority deadline for all certificate applications is October 1 and the final completed application deadline is November 16. For Fall admissions, the priority deadline for all certificate applications is February 1 and the final completed application deadline is May 15.

Curricular Requirements

Students complete a total of 15 hours for the Graduate Certificate in Youth Literature & Services. Nine credit hours are selected from required youth services courses and six credit hours are from an approved list of youth services electives.

Double counting of courses in the required and elective areas is not permitted. If a course is selected as a required course, it cannot be used as an approved elective.

All 15 hours in the certificate can be applied as electives to the 36 hour MLIS degree program, if the student is accepted into the degree program.

This allows students in other degree programs to apply their certificate coursework towards an MLIS degree, and offers the opportunity for MLIS students interested in youth services to have the youth services designation on their transcript, which is not accomplished by the youth services pathway in the MLIS. A description of the certificate can be found on UA Online's Graduate Certificate in Youth Literature & Services page.

Graduate Certificate in Youth Literature & Services**Hours**

Required

LS 520 or LS 521	Early Child Lit & Story Prog Matl & Serv Children	3
LS 522 or LS 621	Matl & Serv YA Intercultural Youth Lit	3
LS 541	Youth Programming	3

Credit Hours Subtotal: 9

Approved Youth Services Electives (Choose 2) 6

LS 521 or LS 520	Matl & Serv Children Early Child Lit & Story Prog
LS 522 or LS 621	Matl & Serv YA Intercultural Youth Lit
LS 543	Trad. & Digital Storytelling
LS 544	Cultural Div Prog Youth & Fam
LS 620	Graphic Novels - Youth

Total Hours 15

Transfer Credit

Transfer credits are not allowed for the Graduate Certificate in Youth Literature & Services.

Time Limits for Degree Completion

Students completing only the Graduate Certificate in Youth Literature & Services have six years to complete the certificate.

Students completing the certificate along with the MLIS must meet all requirements for the master's degree with coursework completed in the six years (18 consecutive semesters) immediately preceding the date on which the degree is to be awarded. Additional information about time limits for degree completion for master's programs is available at the Graduate School.

Intended certificate duration in semesters for full-time students (9hrs): 3 semesters maximum; 2 semesters if additional courses are offered per semester based on student demand. Note: Full-time enrollment would be atypical based on historical data for students enrolled in the MLIS courses.

Intended program duration in semesters for part-time students (3 and 6 hrs): 5 semesters for students taking 3 hours per semester; 3 semesters for students taking 6 hours per semester.

Awarding the Certificate

Students are awarded the Graduate Certificate in Youth Literature & Services upon completion of the 15 required hours of coursework.

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University's Academic Misconduct Policy will be followed. More information is available here.

Withdrawal or Leave of Absence Information

Students, who need to withdraw from a course at the university or take a leave of absence, should contact their academic advisor and the SLIS director. Additional information is available on the Graduate School website related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlined in the University of Alabama Faculty Handbook.

Grades and Academic Standing

See here for Graduate School Policy information

Communication & Information Sciences (CIS), PhD

The collegewide doctor of philosophy degree in the College of Communication & Information Sciences is designed to:

- prepare communication scholars for positions of leadership in education, public service, the media, libraries, information-management positions, and other communication-related fields
- add to a student's usable body of knowledge in a chosen area of specialization within the field of communication and information sciences
- develop each student's research, teaching, and professional capabilities
- promote scholarly achievement and advancement of knowledge in the communication and information science disciplines, through basic and applied research

Representing four academic units of Advertising & Public Relations, Communication Studies, Journalism & Creative Media, and Library & Information Studies, C&IS offers a multidisciplinary doctoral program in communication and information sciences that enables students to either build an interdisciplinary plan of study or specialize in one of seven concentrations, in Advertising & Public Relations, Book & Publishing Studies, Health Communication, Interpersonal Communication, Media Processes & Effects, Rhetoric & Political Discourse, or Social Justice & Inclusion Advocacy. The interdisciplinary plan of study allows students to craft a curricular plan unique to their skills and interests while the concentrations provide students an opportunity to earn distinction through a prescribed suite of courses preparing them to contribute to the academe as distinguished scholars and teachers at a variety of institutions across the globe.

Students who take the interdisciplinary approach or select a concentration are encouraged to pursue their own research agendas in tandem with their coursework.

Admissions

Applicants to the doctoral program in communication and information sciences must meet the admission criteria of the Graduate School of The University of Alabama and those stated below.

Applicants may be considered for regular admission if they have an undergraduate GPA of 3.0 overall, 3.0 for the last 60 semester hours in a degree program, or 3.0 for a completed graduate degree program. International applicants who are required to submit a English language test score (please see the admission section of this catalog) must score at least 90 on the TOEFL iBT language proficiency exam and also score at least 24 on the speaking and writing sections of the iBT exam. International applicants who prefer to submit IELTS test scores must score at least 7.0 and also score at least 7.5 on the speaking section and 6.5 on the writing section. International applicants who meet these

criteria may also be invited to participate in a videoconference with the college application review committee.

Applicants may be considered for admission on a permission-to-continue basis if they do not meet the GPA criterion for regular admission.

In addition to the Graduate School requirements, applicants must:

- Provide a Statement of Purpose. Please consult our program guidelines for the Statement of Purpose, available on the program website.
- Provide a resume/CV
- Provide a Writing Sample. Please consult our program guidelines for the Writing Sample, available on the program website.
- Provide names and contact information, including an email address and phone number, for three academic references in the "Other Documents" section of the application. Actual letters of recommendation are required only if you would want to be considered for University-wide fellowship opportunities. Please note that if you put names in the "Letters of Recommendation" section of the application, those references will receive an automatic request to provide a letter in your behalf.

Admission without a Master's Degree: The Expedited Admission Track

The Expedited Admission Track into the C&IS doctoral program allows highly qualified students to be admitted into the doctoral program after they complete an undergraduate degree. Such students must:

- Submit a statement of purpose (for the master's and doctoral program) indicating interest and commitment to graduate work through the doctoral level
- Hold regular admission status for a specific College of Communication and Information Sciences master's program.

Students admitted on the expedited track are encouraged to apply to be awarded the master's degree when they have completed the requirements for the master's degree. Students admitted on the expedited track must complete the requirements for master's degree to be awarded the Ph.D. degree. Students supported in graduate assistant positions must complete the requirements for the master's degree in four contiguous regular semesters of enrollment to be eligible to hold a graduate assistant position in the fifth and subsequent semesters in the program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The student's program advisory committee determines, in consultation with the student, the specific courses the student must take to satisfy program requirements. Students must complete 48 coursework hours and 18 hours of dissertation research.

C&IS PhD Curriculum	Hours
Core Foundation Requirement	3
CIS 610 Foundations Doctoral Study CIS	
Core Theory Requirement	6
CIS 604 Mass Communication Theory	
CIS 605 Cultural and Critical Theory	
CIS 606 Knowledge & Information Theory	
CIS 607 Theory Constructn Epistemology	
Advisor Approved Alternative Elective (up to 6 hours)	
Core Resesarch Methods Requirement	6

CIS 603	Quantitative Research Methods
CIS 608	Qualitative Research Methods
CIS 609	Humanistic Research Methods
Advisor Approved Alternative Elective (up to 6 hours)	
Concentration or Focused Area of Study ¹	
12-18	
Advertising and Public Relations Concentration

0-12	
Dissertation	
18	
CIS 699	Dissertation Research

Footnotes

- ¹ Students must select either a formal concentration or a focused area of study.
- ² Students must reach a minimum of 48 course hours independent of dissertation research.

Additional Academic Requirements

In addition to the credit hour and coursework requirements specified above, the following policies apply:

- A minimum of 36 hours of coursework, exclusive of dissertation research hours, must be completed after enrollment in the CIS doctoral program.
- If approved by the student's program advisory committee, up to 12 of the 48 hours exclusive of dissertation research hours required in the program may be hours of graduate coursework completed prior to enrollment in the program. Credits so approved must have been earned within a period of no more than six years prior to the semester of admission to the program. Please see the Transfer Credit section below for additional information.
- A minimum of 24 hours of coursework exclusive of dissertation research hours must be at the 600 level. The remainder of hours of approved graduate course credit must be at the 500 or 600 level. A maximum of six hours of 400- or 400/500-level credit may be transferred if completed as part of a master's degree program.
- Each student must complete a minimum of nine hours in 600 level courses in the College of Communication & Information Sciences exclusive of dissertation research hours, and exclusive of credit hours that satisfy the student's core program requirements. In other words, any course counted toward meeting the student's core program requirements cannot also be counted toward meeting the requirement that students complete a minimum of nine hours in 600 level courses in the College of Communication & Information Sciences exclusive of dissertation research hours.
- Students in one of the seven approved concentrations in the program cannot count a course required in their concentration as an alternate theory or alternate research methods course in satisfying their core theory or research methods requirements. In other words, a course that is to serve as an alternate theory or alternate research methods

course cannot also be counted toward satisfying the requirements for the concentration.

- It is not permissible to complete more than one doctoral concentration. That is, the degree awarded to students who complete a concentration will list one and only one concentration. However, students are permitted and encouraged to consider electing additional courses for their programs of study from across all seven concentrations in the program.

Advertising and Public Relations Concentration

Students must select CIS 604 Mass Communication Theory in their program core and complete the following list of courses:

Advertising & Public Relations		Hours
CIS 682	Sem: Advertising + PR	3
Electives		6
CIS 664	Health Communication Campaigns	
CIS 684	Advanced Topics: Ad + PR	
APR 522	Media Strategy and Analytics	
APR 523	Media Relations	
APR 524	Reputation Comm Strategy	
APR 525	Brand Communication Strategy	
APR 582	APR Management	
APR 590	Special Topics	
APR 593	Global Comm Management	
Advisor-approved course in Advertising & Public Relations		
Total Hours		9

Book and Publishing Studies Concentration

Students in the concentration must select CIS 605 Cultural and Critical Theory and CIS 609 Humanistic Research Methods in their program core and then select **15 hours** of coursework from the following courses, with **at least one course from each category** (Physical Book, Theoretical Book, and Future Directions), and with at least 9 hours at the 600 level:

The Physical Book		Hours
BA 520	Elements of Letterpress	3
BA 530	Elements of Bookbinding	3
BA 541	Techniques of Hand Papermaking	3
The Theoretical Book		Hours
LS 555	Intro Archival Studies	3
LS 557	Archival Appraisal	3
LS 653	Descriptive Bibliography	3
LS 654	Print Culture and Society	3
LS 655	Book Artifact Materiality Text	3
Future Directions of the Book		Hours
CIS 656	Electronic/Contemporary Pub.	3
CIS 672	Media History	3

Health Communication Concentration

Students must complete the following list of courses:

Health Communication		Hours
CIS 650	ST: C&IS (Health Communication)	3
Electives		6
CIS 651	Interpersonal Health Comm	
CIS 659	Health Information Seeking	
CIS 660	Interpersonal Comm Theory	
CIS 664	Health Communication Campaigns	
CIS 670	Health and Mass Media	
LS 500	Info Sci & Tech	
LS 501	Information in Communities	
Advisor-approved course in Health Communication		
Total Hours		9

Interpersonal Communication Concentration

Students in this concentration select CIS 603 Quantitative Research Methods in their program core and complete the following course list:

Interpersonal Communication		Hours
CIS 660	Interpersonal Comm Theory	3
COM 513 or	Communication & Diversity	3
COM 565	Intercultural Communication	
Elective		3
CIS 651	Interpersonal Health Comm	
CIS 662	Mediated Interpersonal Comm	
CIS 663	Deception	
CIS 667	Persuasive Communication	
COM 563	Relational Communication	
Advisor-approved course in Interpersonal Communication		
Total Hours		9

Media Processes and Effects Concentration

Students in this concentration must select CIS 603 Quantitative Research Methods and CIS 604 Mass Communication Theory and complete the following course list:

Media Processes & Effects		Hours
CIS 680	Sem. Media Processes/Effects	3
Electives		6
CIS 670	Health and Mass Media	
CIS 673	Political Communication	
CIS 674	Sports Media	
CIS 681	Advanced Quantitative Methods	
CIS 683	Advanced Topics - Media P&E	
Advisor-approved course in Media Processes and Effects		
Total Hours		9

Rhetoric and Political Discourse Concentration

Students in this concentration must select CIS 605 Cultural and Critical Theory and CIS 609 Humanistic Research Methods in their program core and complete the following list of courses:

Rhetoric & Political Communication		Hours
CIS 673	Political Communication	3
COM 541	Contemporary Rhetorical Theory	3
Electives		3
CIS 652	Sem Culture Criti Rhetor Std	
CIS 666	Information Policy	
CIS 669	ST: Visual Communication	
COM 525	Gender & Pol Com	
COM 548	Sem Rhetorical Criticism	
COM 567	Seminar in Public Address	
Advisor-approved course in Rhetoric or Political Communication		
Total Hours		9

Social Justice and Inclusion Advocacy Concentration

Students in this concentration must select CIS 605 Cultural and Critical Theory and CIS 609 Humanistic Research Methods in their program core and complete the following list of courses:

Social Justice & Inclusion Advocacy		Hours
CIS 668	Social Justice & Inclusion	3
Elective		3
CIS 652	Sem Culture Criti Rhetor Std	
CIS 675	Community-Engaged Scholarship	
COM 513	Communication & Diversity	
LS 583	Social Aspects of Information	
LS 630	Div Leadership in Info Orgs	
Advisor-approved course in Social Justice & Inclusion Advocacy		
Elective		3
CIS 666	Information Policy	
CIS 667	Persuasive Communication	
COM 565	Intercultural Communication	
LS 544	Cultural Div Prog Youth & Fam	
LS 580	Outreach to Diverse Population	
LS 581	Universal Design for Info Tech	
LS 582	Race Gender & Sexuality in LIS	
LS 621	Intercultural Youth Lit	
Advisor-approved course in Social Justice & Inclusion Advocacy		
Total Hours		9

Transfer Credit

The university Graduate School-wide policies related to transfer credit are applicable to the doctoral program in communication and information science, with a notable exception that students in the program are eligible to have no more than 12 hours of graduate coursework completed prior to enrollment in the program count toward the requirement that students complete 48 hours of coursework exclusive of dissertation hours.

Doctoral Plan of Study Requirement

It is recommended that students in the doctoral program in communication and information sciences file an advisor-approved Plan of Study in their first semester in the program. It is strongly recommended

students do this no later than the semester during which they will complete 12 hours of university course credit that they plan to count toward their degree requirements. It is required that students do this no later than the semester during which they will complete 30 hours of university and/or transfer course credit. By the time each doctoral student has completed 30 graduate semester hours of university and/or transfer credit, the student must have a doctoral Plan of Study approved by the Office for Graduate Studies. Failure to obtain approval of the Plan of Study by the completion of 30 hours may result in the student's having a hold placed on future registrations.

Students admitted to the doctoral program may be required to complete additional coursework to be prepared for doctoral-level (600-level) study and research in communication and information sciences, at the discretion of the student's program advisory committee or the Office for Graduate Studies.

Doctoral students who begin the program with incomplete master's theses must complete the master's thesis during the first year of doctoral study. Students must provide official transcripts of their master's degree work as evidence that their master's degree has been awarded. If a student fails to provide the transcript, the College may refuse to administer the PhD preliminary examination and/or may withdraw financial support. The Graduate School may nullify the doctoral program admission.

Preliminary Exam

A preliminary examination is required of all doctoral students. This examination is given after

- any foreign language/research skill requirements are met;
- two full years of graduate study are completed; and
- the Dissertation Committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is overseen by the student's Dissertation Committee Chair, who has discretion on the individuals involved in the examination committee to include no fewer than 2 other members of the student's Dissertation Committee. The chair may call on other faculty members associated with the student's coursework for assistance in preparing the examination questions.

Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

The student must demonstrate, through written and oral components, a capacity to understand, synthesize, and apply theory and research techniques in communication and information sciences, as well as demonstrate knowledge of the pertinent literature, issues, and recent advances in the student's concentration or focused area of study and cognate area of study. In other words, the examination must cover the student's (1) theory core, (2) research methodology core, (3) concentration or focused area of study, and (4) cognate area.

Comprehensive exam questions may be answered exclusively in a controlled "in-house" format in the College, exclusively as a "take-home" format, or some combination of both "in-house" and "take-home" formats depending on the examination committee's decision about the best way to examine a particular student. The rigor of the comprehensive exam questions and the expected quality of answers are to be commensurate with the time and access to materials allowed

by the question modality. The oral component of the exam must be scheduled as quickly as possible following the written component. Oral components are determined by the examination committee, and examples include, but are not limited to, a formal defense by the student of each examination question, an academic discussion about theory and methods between the student and examination committee, or an academic conference-style presentation which includes a question and answer session.

Comprehensive examination questions that are assigned as “in-house” are closed book—meaning students must answer those questions on campus without reference material or internet access. No individual “in-house” examination question can exceed 4 hours, and the total time assigned for “in-house” examination questions cannot exceed 16 hours.

Comprehensive examination questions that are assigned as “take-home” are open book—meaning students may answer those questions from any location and may use any available reference materials. No individual “take-home” examination question can exceed 5 days, and the total time for all examination questions cannot exceed 21 calendar days from the beginning date of the first question.

Upon completion of the comprehensive exam, the examination committee will convene to determine whether the student has passed or has failed the examination. No revisions of questions following the oral defense are permitted.

A student may take the examination only twice. Any question(s) failed may be retaken after three months from the initial fail decision and before six months have elapsed. Questions passed on the first attempt need not be retaken. Failing any question twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy Requirements

A student is certified by the dean of the UA Graduate School for admission to candidacy for the PhD in Communication & Information Sciences after the student has completed all required coursework, exclusive of dissertation hours, as listed on the student’s approved program of study.

Continuous Enrollment Policy

Students should be aware of university policy related to continuous enrollment (p. 21) in Dissertation Research, as specified in the university Graduate Catalog. Students in the C&IS doctoral program are required to complete 18 hours in dissertation research through enrollment in CIS 699 Dissertation Research.

Students are able to initiate enrollment in CIS 699 no earlier than the semester following admission to candidacy. In other words, students must be admitted to candidacy before they are permitted to initiate enrollment in CIS 699. Students cannot initiate enrollment in CIS 699 in the same semester in they will have completed all coursework listed on the approved program of study; students must be admitted to candidacy *prior to* initiating enrollment in CIS 699.

Students register for CIS 699 with their dissertation advisor as the instructor. If a student does not yet have an approved dissertation committee, the student may enroll in CIS 699 with an intended dissertation advisor if the intended advisor approves of this arrangement, so long as the intended advisor is a member of the C&IS faculty who is eligible to chair or co-chair dissertation committees under university and program guidelines for the dissertation committee. If the student has not yet identified an intended dissertation advisor, the student may

initiate CIS 699 enrollment with the chair of the student’s approved program advisory committee serving as instructor in CIS 699 if the program committee chair approves of this arrangement.

Students who plan to initiate enrollment in CIS 699 but who do not yet have an approved dissertation committee should contact the associate dean for graduate studies to report that an intended dissertation advisor or their approved program committee chair has agreed to serve as instructor of CIS 699 in the initial semester of registration. The associate dean for graduate studies will verify the intended dissertation advisor or approved program committee chair has agreed to serve as the instructor of CIS 699 in the initial semester of registration. Having verified this, the associate dean for graduate studies will issue a permit for the student to register for CIS 699 with this instructor.

Students unable to secure an instructor for CIS 699 should contact the associate dean for graduate studies to develop a plan to secure an instructor.

Students who initiate enrollment in CIS 699 with an instructor who is the student’s intended but not yet approved dissertation advisor or the student’s program committee chair must in the next semester register for CIS 699 with the approved dissertation advisor as the instructor. In other words, students who initiate 699 enrollment with an instructor who is not the approved dissertation advisor must have a dissertation committee approved before they will be permitted to register for second semester in CIS 699. Only students with approved dissertation committees will be permitted to register for a second semester in CIS 699.

Students who may be uncertain that a dissertation committee can be approved before a second semester in CIS 699 begins should not initiate 699 enrollment. Such students should consider registering for coursework other than CIS 699, coursework that can help prepare the student for pursuing dissertation research continuously, under the direction of an approved dissertation advisor, when CIS 699 enrollment is initiated.

Dissertation Requirements

Students in the doctoral program in Communication & Information Sciences must form a dissertation committee. It is important to note that program policy regarding the committee includes stipulations in addition to the stipulations specified in university Graduate School-wide policy regarding the dissertation committee (p. 21).

The dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members. The Graduate Faculty of the College of Communication & Information Sciences must be represented by at least three members. Other members may be from the College of Communication & Information Sciences or from a college or school outside the College of Communication and Information Sciences. One member *must* be from a college or school outside the College of Communication & Information Sciences.

All members of the committee must be members of the university Graduate Faculty. The chair of committee must be a full member of the Graduate Faculty. At least one committee member in addition to the chair must also be a full member of the Graduate Faculty. All other members may be associate members of the Graduate Faculty. No more than one affiliate member of the Graduate Faculty may serve on the committee. A majority of the committee members must be regular UA faculty.

The UA graduate dean’s approval of the proposed dissertation committee must be obtained before significant progress is made on the

dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

Dissertation proposal

After successful completion of the preliminary examination, degree candidates must submit a written proposal to their dissertation committee.

The proposal describes the importance of the proposed topic, outlines the hypotheses to be evaluated, provides an overview of relevant literature, specifies the methodology to be used, and lays out a timetable for completion of the project. The dissertation must make a significant original contribution to the field of communication and information sciences and must demonstrate the candidate's ability to report that research in writing in a clear, comprehensive, and scholarly manner.

The student must submit the proposal, and later the dissertation, to the committee at least 14 days prior to the defense. After the proposal has been circulated among the members, the student's dissertation committee meets for the student's oral defense of the proposal.

Dissertation final examination

The candidate must present a copy of the final draft of the dissertation to each committee member at least two weeks before the scheduled date of the final examination. After the dissertation has been completed and accepted by the candidate's dissertation committee for purposes of the examination, the candidate will be given a final oral examination by the dissertation committee.

The final examination is concerned primarily with the research embodied in the dissertation and with the field in which the dissertation lies, but it may extend over the student's entire primary field of study. The final oral examination is governed by the rules of the Graduate School of The University of Alabama.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester's dissertation deadline, are available at the Graduate School's homepage.

Electronic submission of theses and dissertations (ETD) is required. Consult the ETD website for details of ETD submission.

Time Limits for Degree Completion

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding the time limits for degree completion (p. 21).

Academic Misconduct Information

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding academic misconduct. (p. 7)

Withdrawals and Leave of Absence Information

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding withdrawals and leaves of absence (p. 244).

Academic Grievances Information

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding academic grievances (p. 255).

Grades and Academic Standing

A student must maintain cumulative grade point average of at least 3.0 on a 4.0 scale for graduate courses undertaken following admission to the doctoral program. A doctoral student whose grade point average falls below 3.0 at any time after 12 semester hours have been completed will be placed on academic warning by the Graduate School and the College of Communication & Information Sciences. A student on academic warning will not be permitted to apply for admission to candidacy and may not hold an assistantship. Students who are suspended from the program for failure to raise their GPA to 3.0 under academic warning status may petition the college for readmission. The college may in turn make a request to the dean of the university Graduate School for approval of the student's readmission.

University Graduate School-wide policies related to grades and academic standing (p. 28).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

Acquisition of Financial Support:

All admitted and currently enrolled graduate students in good standing in the College of Communication & Information Sciences, both main campus and online, are eligible to apply for a graduate teaching assistantship (GTA), graduate research assistantship (GRA), and/or graduate administrative assistantship (GAA) position funded by the college by submitting the C&IS Graduate Assistantship Interest Application.

Positions range from 10 hour a week (.25 FTE) positions with half tuition and benefits to 20 hour a week (.5 FTE) positions with full tuition and benefits, although online students are not eligible for university sponsored health insurance. Positions and funding offers vary from one semester in duration to multiple years. Funding levels and lengths are communicated via an offer letter or memorandum of appointment, which will indicate an end date of financial support.

Funding decisions for incoming students are generally made between January and May, and decisions for currently enrolled students without funding are generally made between May and July. Currently enrolled students in good standing whose funding is expiring may petition the Associate Dean of Graduate Studies in writing for continued support, and those decisions are also generally made between May and July.

In addition to college assistantships, excellent students may be nominated by the college for University of Alabama fellowships. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits without work expectations for a defined period set by the Graduate School.

Beyond college-funded assistantships, additional funding opportunities may arise from individual faculty or departments in support of grant work, research projects, teaching specific courses, assisting with administrative projects, etc.

All students funded on assistantships must meet the Performance Expectations for Continuing Financial Support (see below) and funding may be removed prior to the end date of financial support in accordance with the Conditions for Termination of Financial Support (see below).

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in a degree program in the College of Communication & Information Sciences and be making satisfactory academic progress to the completion of the degree.
- The student must complete all mandatory trainings and abide by all rules and policies held by The University of Alabama, College of Communication & Information Sciences, and the department of their work assignment.
- The student must adequately perform all duties assigned to them in a timely manner as defined by the supervisors of their work assignments, including logging work hours if assigned for the position and submitting a semesterly evaluation of their work assignment.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria may be subject to termination of financial support pending C&IS Office for Graduate Studies administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Academic Unit Head and Associate Dean of Graduate Studies may recommend immediate termination of financial support, termination of financial support at the end of the current semester or termination of financial support at the end of the following semester. Students will be notified in writing of any decision to terminate financial support prior to the original end date of funding.

- *Dereliction of Duty.* Dereliction of duty includes, but is not limited to, failure to comply with UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the supervisor; failure to satisfactorily complete all activities associated with the funded position as defined by the supervisor; failure to submit required performance evaluations, etc.
- *Academic Misconduct.* Penalties for resolved academic misconduct cases, including potential loss of financial support, will be determined with guidance from the UA Graduate School and the Office for Graduate Studies.
- *Insufficient Academic Progress.* Insufficient academic progress, as determined by the student's advisor and the Office for Graduate Studies, includes, but is not limited to, students taking courses that do not align with the program requirements; students admitted to candidacy who do not make adequate research progress on their dissertation, failure to pass comprehensive exam, failure to pass proposal defense, etc.
- *Academic Warning & Academic Suspension.* Students on academic warning from the UA Graduate School are not eligible to hold assistantships. In addition to the loss of the assistantship for the semester of Academic Warning, a review of the student will determine if future committed funding will be revoked regardless of successfully earning good standing within the completion of the next 12 credit hours. In all cases, if a student is suspended, all future funding commitments are revoked.

College of Community Health Sciences

Department of Community Medicine and Population Health (p. 519)

Department of Family, Internal and Rural Medicine (p. 522)

Department of Translational Science and Medicine (p. 524)

The courses listed below are open to qualified graduate students. Medical school and family practice residency curricula are published separately from this catalog.

CHS540 Rural Community Interaction I

Hours 3

The purpose of this course is to introduce participants to real life and practical application and topics related to rural medicine, with an emphasis on minority populations. The course is divided into two parts: a shadowing experience with a primary care provider working in a rural or underserved setting, and a seminar series. Additionally the course will include a special service learning project in order to further expose students to practical application of issues and topics in rural or underserved communities.

CHS541 Rural Community Interaction II

Hours 3

The purpose of this course is a continuation of Rural Community Interaction I and introduces participants to additional real life and practical applications and topics related to rural medicine, with an emphasis on minority populations. The course is composed of two class projects of planning, implementation, and evaluation of a community screening event to be selected by the class. Each student will also complete a final paper (5 double-spaced typed pages) describing their cumulative experiences including lessons learned.

Prerequisite(s): CHS 540

CHS550 Introduction to Fundamentals of Medicine I

Hours 6

Introduction to Fundamentals of Medicine I is an interdisciplinary course that provides a foundation for understanding the molecular and biochemical basis of cellular processes and whole body physiology, and initiates an appreciation for their impairment during various human diseases. The course will include an overview of the functional roles of various cellular constituents (e.g., protein, carbohydrate, lipid, nucleic acids) and the processes involved in their synthesis and degradation (e.g., thermodynamics, metabolic pathways, transcription/translation). This will involve not only an understanding of the mechanisms and pathways involved, but will also include an appreciation of their regulation/dysregulation during numerous perturbations of physiologic status (e.g., fed versus fasted, sedentary versus exercise) and disease states. IFM-I consists of a variety of instructional strategies (e.g., lectures, labs, small groups, team-based learning, self-study) to help develop critical thinking and problem solving skills, as well as build a knowledge base that is scientifically and clinically relevant to medical research and practice.

Prerequisite(s): Admission to Rural Community Health Program and Approval by the Instructor

CHS551 Introduction to Fundamentals of Medicine II

Hours 6

Introduction to Fundamentals of Medicine II is an interdisciplinary course that provides a foundation basic pharmacology and cellular physiology. The basic principles of pharmacodynamics and pharmacokinetics will be followed by an introduction to autonomic nervous system pharmacology that will serve as a basis for understanding the pharmacologic treatment of diseases. This course will also cover mechanisms of cellular homeostasis, transport, electrophysiology and communication, and will provide examples of disease states that result from abnormal functioning of these processes. This course consists of a variety of instructional strategies (e.g., lectures, labs, small groups, team-based learning, self-study) to help develop critical thinking and problem solving skills, as well as build a knowledge base that is scientifically and clinically relevant to medical research and practice.

Prerequisite(s): Admission to Rural Community Health Program and Approval by the Instructor

CHS595 Special Topics

SP

Hours 1-3

Selected topics in Community Health Sciences offered by CCHS faculty members.

Special Topics Course

CHS599 Thesis Research

Hours 1-6

A candidate for the Master of Science in Population Health Sciences pursuing the thesis option is required to complete six credit hours dedicated to original research under the direction of a faculty advisory committee. A written thesis is required to be presented, defended orally, and submitted to the faculty advisory committee for approval. Material covered will be of an advanced nature aimed at providing master's students with an understanding of the latest research and current developments within the field. Discussion and advisor guidance will be directed towards readings of research articles and development of research methodology, with the aim of producing an original research contribution that represents a novel development in the field, or a novel perspective on a pre-existing topic in the field.

CHS620 Ind Study In Prev Med

SP

Hours 1-5

Research or directed reading in community medicine topics, including health care delivery, preventive medicine, and health policy aspects of other related topics.

Special Topics Course

CHS622 Directed Research in Community Health

SP

Hours 3

An advanced applied-research course designed to develop skills in the analysis and evaluation of health problems of community interest.

Prerequisite(s): POPH 523 AND 522

Special Topics Course

CHS699 Dissertation Research

Hours 1-12

This independent research course partially fulfills required doctoral level research dissertation hours toward the Ph.D. in the student's field. A minimum of 18 dissertation hours are required, at 1-12 hours per semester. The course is conducted under the guidance of the Ph.D. advisor. The student must register for a minimum of 3 hours per semester in this course until reaching the required minimum of 18 credit hours. Thereafter, students must register for a minimum of 1 hour each semester in this course, maintaining continuous enrollment until degree completion.

Prerequisite(s): Admission to Candidacy

CHS700 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS701 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS702 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS710 Medical Student Pre-clinical Studies

Hours 9

This course is designed to allow University of Alabama at Birmingham Heersink School of Medicine (UABHSOM) students to complete their Primary Care Track or Rural Medical Scholars Track pre-clinical curriculum on the Tuscaloosa Regional Medical Campus of the UABHSOM. This is a 12-month curriculum, and these courses define learners' status as University of Alabama students. The student learning outcomes, course objectives, and material covered are defined by the UABHSOM, the UABHSOM Primary Care Track curriculum or Rural Medical Scholars Track curriculum, and the Liaison Committee on Medical Education (LCME) – the accrediting agency of the UABHSOM.

Prerequisite(s): First and second year University of Alabama at Birmingham Heersink School of Medicine (UABHSOM) medical students enrolled in the Primary Care Track or Rural Medical Scholars Track who are assigned to the UABHSOM Tuscaloosa Regional Campus.

CHS800 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS801 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS802 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS900 Residency

POPH520 Essentials of Population Health

Hours 3

An introductory graduate level course designed to teach learners to examine health issues from a population health perspective.

POPH521 Health Policy & Planning

Hours 3

Designed to assist the student in understanding the planning process and factors that influence and determine policy decisions.

View All Courses

Population Health Sciences, MS

Population health is an interdisciplinary field that integrates clinical care and public health practices to prevent, reduce and manage human disease. Population health is particularly interested in the social determinants of health outcomes, and why the distribution of social health determinants is different between population groups. The changing nature of health care due to population shifts and policy reform has created a rising demand for a graduate degree in Population Health. Graduates of the MS program are trained to address the health needs of diverse communities and are equipped with data-driven strategies to help transform health care.

Both in-person and online program options are offered. Our in-person program attracts a small cohort of students desiring an intensive 1-year experience to prepare them for additional graduate educational opportunities, such as medical school or PhD programs. The online program allows individuals across the country to pursue a degree while working full time. Both the in-person and online programs allow us to train future and current health care practitioners in data analytics, research methods, and evidence-based approaches to combating health disparities. Population health is an interdisciplinary field, and our degree is beneficial for future and current health professionals, health systems administrators, and others interested in health outcomes research, evidence-based care, and health system redesign.

Admission Requirements

The GRE or MCAT is not required for admission. Please note that for applicants with a GPA below a 3.0, an admission test score is strongly recommended to be considered for admission. International applicants will need to meet other requirements established by the Graduate School.

Application Requirements: Academic transcripts from all institutions attended where 15 or more credit hours were earned, three letters of recommendation, curriculum vitae, and statement of purpose

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

This program has a thesis and a non-thesis option. Candidates under the thesis option will complete 18 semester hours of core coursework, 6 hours of elective coursework, and 6 hours of thesis research hours (POPH 599 Thesis Research). Candidates under the non-thesis option will complete 18 semester hours of core coursework, 9 hours of elective coursework, and 3 hours of a "capstone" experience (POPH 595 Population Health Applications).

Transfer Credit

Students may transfer in a maximum of 6 credit hours. Students are recommended to submit graduate coursework for transfer credit evaluation before the end of their first semester in the program.

Graduate School-wide transfer policies.

Comprehensive Exam/Capstone

There is no comprehensive exam. Students will complete a thesis (Plan I) or a non-thesis experience (Plan II).

Plan I - Thesis Process Requirements

The thesis degree completion option requires at least 6 credit hours of POPH 599. The purpose of the thesis is to investigate an original population health question and to contribute new knowledge back to the field of population health. The investigation should be grounded in proper research design and a solid understanding of the healthcare system. Students should complete all core courses before starting their thesis work. In rare circumstances, the student's advisor and Graduate Program Director can approve registration for CHS 599 before all core courses are completed. The thesis involves preparation of a research paper that is of publishable quality and a formal presentation defending the work. Information about the thesis proposal approval process can be found in the program handbook.

A thesis committee must consist of at least three Graduate Faculty appointed by the dean of the Graduate School. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the

specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are required to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members. Students enrolled in the main campus program are expected to participate in graduate oral examinations in person and on campus. In the event that requiring the student to be in person and on campus for the presentation would cause hardship to the student, the committee chair and the graduate program director may approve virtual participation. The student should clearly outline the extenuating circumstances leading to this need. The student and all committee members must adhere to the Graduate School's requirements for virtual participation. Students in the online program may defend their thesis virtually and are not required to travel to Tuscaloosa. The thesis defense is conducted publicly and is open to all students and faculty in the Department of Community Medicine and Population Health.

For formatting guidance, follow the UA Graduate School electronic thesis instructions. A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations. All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details. Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website.

Plan II - Non-Thesis Process Requirements

Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit of which 3 semester hours is a practicum experience (POPH 595). The practicum is a planned, supervised, and evaluated work experience that compliments the student's classroom education, and allows them the opportunity to apply the lessons learned in their course work. The practicum experience is designed to enhance student's professional experience in the field of population health and is key to a comprehensive understanding of population health in clinical settings. Students are required to complete 24 credit hours, including all core courses, before enrolling in POPH 595. Students must have an approved practicum proposal before they will be allowed to register for this course. Information about the practicum proposal approval process can be found in the program handbook. In the case of practicum projects that involves the use of human subjects in any way, the student must consult with the Practicum Director about the potential for IRB approval before beginning their coursework.

During the practicum experience, students will work under the supervision of their Practicum Director and Site Preceptor, who agree to supervise the practicum experience. Decisions on the nature, site, specific objectives, and activities of the practicum are arrived at following

discussions and agreements amongst the student, the Practicum Director, and the Site Preceptor. The student and Practicum Director will also identify two additional Community Medicine and Population Health faculty that will serve on the practicum committee. These faculty will provide additional content expertise to the student.

The practicum experience should demonstrate mastery of at least three of the course competencies in the Population Health program. The student is responsible for completing 120 hours under the guidance of their preceptor and is required to document their completed hours on a regular basis. The practicum experience culminates in a final presentation and creation of an artifact that is agreed upon by the student and the practicum committee (eg, publication, grant submission, quality improvement activity, etc). The practicum presentation is conducted publicly and is open to all students and faculty in the Department of Community Medicine and Population Health. All members of the practicum committee are required to attend and participate in real time. Students enrolled in the main campus program are expected to participate in graduate oral examinations in person and on campus. In the event that requiring the student to be in person and on campus for the presentation would cause hardship to the student, the committee chair and the graduate program director may approve virtual participation. The student should clearly outline the extenuating circumstances leading to this need. The student and all committee members must adhere to the Graduate School's requirements for virtual participation. Students in the online program may present virtually and are not required to travel to Tuscaloosa.

Time Limits for Degree Completion Requirements

Graduate School-wide time limit policy.

Student Progress Requirement

The Population Health program requirements for maintaining good academic standing supplement the Graduate School requirements. Students who are not in good academic standing may lose fellowships, assistantships, other funding support, or may be dismissed from the program. Students must be in good academic standing, which means having a GPA of at least a 3.0 in all graduate work, before progressing to their thesis or practicum project. Students not in good academic standing at the conclusion of their required and elective coursework for the program will have one semester to remove their Academic Warning or they may be dismissed from the program due to insufficient progress towards completing their degree. When warranted by course scheduling restrictions, such as when a course that needs to be repeated is only offered once a year, students can be given a longer time frame to remove their Academic Warning. Students that are dismissed from the program will not be eligible for readmission to the program. In addition to the relevant academic thresholds, a student's standing with the program is also contingent on compliance with the Code of Student Conduct and adherence to the Capstone Creed.

Graduate School-wide policies.

Academic Misconduct Information

All acts of dishonesty in any work constitute academic misconduct. This includes, but is not limited to, cheating, plagiarism, fabrication of information, misrepresentation and abetting any of the above. The Academic Misconduct Disciplinary Policy will be followed in the event that academic misconduct occurs. Students should refer to the Office of

Academic Affairs' page on Academic Misconduct: Graduate School-wide academic misconduct information.

Withdrawals and Leave of Absence Information

Students should notify the program director to discuss withdrawals and leave of absences. Please refer to the UA Graduate Catalog for further instructions on how to submit for withdrawal and leave of absences.

Graduate School-wide withdrawals and leave of absence information.

Academic Grievances Information

Graduate School academic grievances information.

Grades and Academic Standing

Graduate School grades and academic standing requirements (p. 28).

Graduate School Deadlines Information

Graduate School Deadlines.

Application for Graduation Information

Master's Application for Graduation

Graduate Assistantships: A limited number of assistantships may be available each academic year. All students admitted to the main campus program are considered for assistantships and are matched to open positions based on the student's academic history, research skills, and other relevant experience and expertise demonstrated in the application materials to the program. A student with a "conditional" admission status is not eligible for an assistantship appointment. To retain an assistantship, a student must demonstrate satisfactory progress in the academic program and satisfactory work as a research assistant. Unsatisfactory academic progress may be defined as the failure to maintain a B average in graduate courses attempted after being admitted to the program, a grade of F in any course in the program, an unsatisfactory thesis or practicum project defense, or any other failure of a required component of the program of study. Students with assistantships will receive a performance evaluation of their research assistant work each semester. Additional information about minimum graduate school qualifications for graduate assistantships can be found here on the Graduate School website.

Fellowships: The University of Alabama's Graduate School offers several competitive fellowships that cover tuition, health insurance, and stipends. A list of available fellowships can be found on the Graduate School website. All students admitted to the main campus program are considered for fellowships. The program admissions committee selects exceptional applicants to the program that may be competitive for Graduate Council Fellowships. Applicants interested in a fellowship position should highlight their research interests and skills in their Statement of Purpose. Applicants should also describe specific areas of population health research they wish to pursue if awarded a fellowship. Please note that it is not necessary to contact a prospective faculty mentor for your fellowship during the application process as students are connected to mentors after admittance to the program. Recommendation letters should also speak to the applicant's potential to contribute to population health research.

RCH500 Rural Envir/Occup Health

Hours 3

The goal of the course is to help the student recognize environmental and occupational health hazards in the rural setting, the effects of exposure to these hazards and preventative measures that should be taken to avoid environmental risks. This course introduces students in the Rural Medicine Program to the basics of environmental and occupational health in the rural setting. The course is designed to help these students recognize biological, chemical, physical, safety, and ergonomic health hazards common to the rural South; the effects of human exposure to these hazards are presented; and preventive measures that should be taken to avoid such exposures are discussed. Applicable environmental and workplace regulations are reviewed.

RCH522 Community Clinical Process I

Hours 3

A combination of scheduled sessions and fieldwork activities. The fieldwork will consist of visiting with an assigned rural advisor, completing a rural community assessment, and assisting with community health screenings and education programs.

[View All Courses](#)

Rural Community Health, MS

This 30 hour degree program is designed to provide some of the tools necessary for future rural Alabama physicians to become community health leaders. The program teaches principles of rural public health as a basis for community health leadership, characteristics of rural health concerns and approaches to biomedical science study. The curriculum is combination of Basic Science Courses, Rural Primary Care discussions, activities, visits and an introduction to basic clinical medicine through didactic sessions, clinical simulations and shadowing with physicians. It will help prepare them to lead in the development and maintenance of

community health center practices and other health care practices. There are two concentrations: Rural Medical Scholars and Rural Community Health Scholars.

Concentration 1: Rural Medical Scholars (RMS) was established in 1996 by The UAB Heersink School of Medicine (UABSOM) to recruit students who grew up in rural Alabama who desire to practice primary care medicine in rural Alabama. RMS apply to UABSOM, go through a special interview/selection process and enter a RMS 5-year track of study leading to the MD degree. For the first year, RMS spend a year on the Tuscaloosa campus in the MS in Rural Community Health program with a set of courses related to rural community health and basic sciences. Following this year, RMS then complete two years of pre-clinical study at UABSOM in Birmingham. RMS then return to Tuscaloosa for two years of clinical medicine training in the College of Community Health Sciences (CCHS) (UABSOM – Tuscaloosa Campus). After completing the MD degree, RMS enter residency training in the specialty of their choice.

Concentration 2: Rural Community Health Scholars (RCHS) are students who exhibit a desire to be rural primary care physicians, but are not yet eligible for the RMS program. The RCHS have the same rural Alabama residency requirements (8 or more years growing up in a rural Alabama community or have graduated from a rural Alabama high school) as RMS. Most of these students use the Master of Science degree as a bridge to the RMS program by demonstrating their ability to handle graduate-level studies and improving admission test scores. If they do not become eligible for the RMS program, they may choose to complete the degree and/or pursue admission to other programs.

Students will complete degree requirements following Plan II (without thesis). Each student must have a cumulative GPA of 3.2 or better for all graduate courses undertaken at UA, although UABSOM may require a higher science GPA for RMS. At least 75 percent of the graduate hours taken must have been completed with grades of "A" or "B" at UA. All requirements for graduation must be completed within six semesters.

Goal / Purpose

The purpose of the RCH MS - RMSP is to identify, recruit and retain rural students who have the desire to return to the rural setting as physicians. Ten to Twelve rural Alabama students from a competitive applicant pool are selected each year to enter the Rural Community Health Master's Degree Program at the University of Alabama. Upon successful completion of the Master's Degree, these students will matriculate to the UAB Heersink School of Medicine (UABSOM) and complete the first two years of medical education in Birmingham. Students then return to Tuscaloosa to complete the third and fourth years of medical education at the University of Alabama, College of Community Health Sciences. The RCH MS - RMSP provides:

- Creation of a peer support network among rural students
- Interaction with an advisor/mentor who is a practicing physician
- Study of rural health issues
- Community fieldwork/experiences
- Introduction to health care policy and current trends in medicine

Benefits of Being a Rural Scholar:

- Peer relationship development through shared experiences
- Interaction with rural health care professionals through shadowing and community projects
- Interaction with Medical Students, Residents and Medical School Faculty and Preceptors
- Review and evaluation of student progress and guidance as indicated

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission as a Rural Medical Scholar (RMS) student, an applicant must:

- Have an MCAT score of 495 or above
- Have An undergraduate GPA of 3.2 or higher.
- Have been a resident of a rural Alabama county for at least eight years or have attended a rural high school
- Intend to practice medicine in rural Alabama
- Meet Heersink School of Medicine admission requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission as a Rural Community Health Scholar (RCHS) student, an application must include:

- An MCAT score of 490 or higher.

Who Should Apply?

Applicants who spent their formative years in rural Alabama who are interested in practicing primary care medicine in rural Alabama Applicants must meet the <https://cchs.ua.edu/rural-programs/medical-scholars/> admission requirements for Rural Medical Scholars and Rural Community Health Scholars

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Each track within the program - the Rural Medical Scholar (RMS) and Rural Community Health Scholar (RCHS) tracks - require a minimum of 30 credit hours to complete. The RMS track is a one-year program, and the RCHS track is a two-year program. All students will complete a set of common core courses, plus the additional core courses and approved electives within their respective tracks. Students who complete the first year of RCHS track and are accepted into the RMS track in spring of year one will complete the RMS track core curriculum and approved electives in year two. Students who complete the first year of RCHS and are NOT accepted or choose not to apply or enroll into the RMS track will complete the remaining RCHS core curriculum in year two.

Of note, though listed as additional core courses in each track, RCH 522 Community Clinical Process I and RCH 532 Community Clinical Process II and CHS 540 Rural Community Interaction I and CHS 541 Rural Community Interaction II, all meet the same student learning outcomes related to rural community health. Clinical Community Processes I & II are separate courses because they also provide preparation for medical school success and careers as rural family physicians.

Transfer Credit

Graduate School Information on Transfer Credit. (p. 15)

Comprehensive Examination/Capstone Project

There is no comprehensive examination. Instead, students will complete a Rural Community Health Assessment as a capstone project.

The Rural Community Health Assessment will be of their hometown or other rural community. It will entail a review of the history and current health status of the community, and interviews with rural community members. Using this data, students will develop a review of community systems (e.g., health, education, government, spiritual, recreational, economic), and identify a comprehensive problem list with one or more priority concerns about the health status of the community.

Students will develop and be evaluated on a written description and oral presentation of their Rural Community Health Assessment. Written work will be evaluated by faculty in the Rural Community Health program using a rubric provided to the students. Oral presentations will be evaluated by a panel of faculty from the Rural Community Health program and additional faculty members from across the College of Community Health Sciences with expertise in rural community health and medicine using a rubric provided to the students. Students must receive a grade of at least a 'B' on the written description and oral presentation components of their capstone project to graduate.

For students enrolled in the Rural Community Health Scholars concentration, the capstone project will be completed as a part of CHS 540 Rural Community Interaction I, and CHS 541 Rural Community Interaction II.

For students enrolled in the Rural Medical Scholars concentration, the capstone project will be completed as part of RCH 522 Community Clinical Processes I and RCH 532 Community Clinical Processes II.

Program Requirements

Candidates for the master's degree must earn a minimum of 30 semester hours of coursework credit and complete a culminating or "capstone experience" as described under the Comprehensive Examinations. Candidate working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function or original investigation in the field.

Time Limits for Degree Completion Requirements

All students will complete degree requirement following Plan II (without thesis). Each student must have a cumulative GPA of 3.2 or better for all graduate courses undertaken at UA, although UABSOM may require a higher science GPA for RMS. All requirement for graduation must be completed within six semester.

Graduate School information on Time Limits (p. 15).

TSM660 Drug Delivery Beyond the Biological Barriers
Hours 4

This course provides an overview of drug discovery, formulation, and delivery with efforts to reflect on the past and peek into the future drug development. This course requires substantial knowledge of chemistry, mathematics, and physics, and basic courses in biological sciences.

TSM661 Imaginary Logic of Advanced Drug Delivery Program
Hours 1

This course presents topics designed to bring together divergent thinking (imaginary) with convergent thinkers (logical) to provide a platform to train the next generation of students to think horizontally to overcome the valley of death in drug discovery and bring new therapies to clinic. As a career preparation course, it aims to provide students the depth and breadth of understanding in drug discovery and development that will be applicable throughout their careers, regardless of their research focus.

TSM662 Formulations Science Lab Hours 3

This research-based laboratory course provides training in the of drug delivery systems through a broad spectrum of techniques including synthesis of polyesters and their bioconjugation, characterization of polyesters using the state-of-the-art analytical tools, processing the polyesters into nanoparticulate drug carrier systems encapsulating diverse model drugs, and characterization of the nanoparticles for size, loading, encapsulation, release, and stability. This course will provide basic training and experience for a smooth start for future laboratory work. This course requires substantial knowledge of chemistry, mathematics, and physics, and basic courses in biological sciences.

Prerequisite(s) with concurrency: TSM 660

College of Education

Department of Curriculum Instruction (p. 526)

Department of Educational Leadership, Policy, and Technology Studies (p. 567)

Department of Educational Studies in Psychology, Research Methodology, and Counseling (p. 594)

Department of Kinesiology (p. 637)

Department of Music Education (p. 646)

Department of Special Education (p. 648)

Professional Licensure (Certification)

The curricula offered by the College of Education are designed to prepare teachers and school administrative and supervisory officials for the appropriate certificates. Certification programs are available for the Alabama Class A and Class AA professional certificates. The College of Education, in accordance with the regulations of the Alabama State Board of Education, also provides assistance to individuals who need courses for the renewal of a certificate.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Alabama Educator Code of Ethics

The Alabama Educator Code of Ethics defines the professional behavior of educators in Alabama and serves as a guide to ethical conduct. The code protects the health, safety and general welfare of students and educators; outlines objective standards of conduct for professional educators; and clearly defines actions of an unethical nature for which disciplinary sanctions are justified.

Fingerprinting/Background Clearance

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students (traditional, alternative, out-of-state, and distance learners) enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in

a clinical setting. [Alabama Administrative Code] A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Application for Certification

All students must complete the proper application form for Alabama certification. Forms are available through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall. A student who does not apply for professional licensure within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to teach in other states must secure the proper professional licensure application forms from those states' departments of education.

Alabama Class A Professional Certificate

Class A teacher education programs are designed to help teachers more effectively serve the purposes defined for the same teaching field at the Class B level, provided such programs exist. The intent of the fifth-year program is to help the teacher develop higher levels of competence than is possible in the Class B program.

Effective for candidates admitted July 1, 2017, and thereafter, a cumulative GPA of not less than 3.25 is required for all courses used to meet the requirements on the approved program checklist for a Class A teaching field or area of instructional support, and a final comprehensive examination is required.

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Following a review by the Alabama State Department of Education, the Class A Professional Certificate is granted to the student who (a) has applied for and has been recommended for certification by the College of Education, and (b) has completed a pre-planned graduate program, approved by the state board of education, that includes a master's degree. It is important to remember that the awarding of a master's or higher degree does not necessarily imply that the student is eligible for Class A certification.

Applicants for *initial* certification in a teaching field or area of instructional support must meet the requirements of the Alabama Educator Certification Assessment Program (AECAP). Information about Praxis assessments is available at <https://www.ets.org/praxis/al/test-takers/plan-your-test/certification.html>, and information about Foundations of Reading 190 is available at <https://www.al.nesinc.com/>. Information is also available in the Office of Student Services & Certification (104 Carmichael Hall).

An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. The Class A certificate is valid for five years and may be renewed according to regulations of the Alabama State Department of Education. Individuals are responsible

for meeting renewal requirements and submitting the application for renewal.

Alabama Class AA Professional Certificate

The essential objective of the sixth-year program is to extend upward the level of competence of the teacher. Following a review by the Alabama State Board of Education, the Class AA Professional Certificate is granted to students who (a) have applied for and are recommended for certification by the College of Education, and (b) have completed a pre-planned graduate program, approved by the state board of education. Students seeking Class AA professional certification must enroll in and complete the EdS (or doctoral) degree program in the desired certification area in order to obtain the University's recommendation for Class AA professional certification. Courses used to qualify for a lower-level supporting certificate may not be used again as part of a higher-level certification program.

Effective for candidates admitted July 1, 2017, and thereafter, a cumulative GPA of not less than 3.50 is required for all courses used to meet the requirements on the approved program checklist for a Class AA teaching field or area of instructional support; and a final comprehensive examination is required.

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class AA program on July 1, 2017, and thereafter, must take a course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Applicants for *initial* certification in a teaching field or area of instructional support must meet the requirements of the Alabama Educator Certification Assessment Program (AECAP). Information about Praxis assessments is available at <https://www.ets.org/praxis/al/test-takers/plan-your-test/certification.html>, and information about Foundations of Reading 190 is available at <https://www.al.nesinc.com/>. Information is also available in the Office of Student Services & Certification (104 Carmichael Hall).

A maximum of 15 semester hours of appropriate post-master's-degree credit earned through an institution approved to offer graduate programs beyond the master's level in the field of study in which the credits were earned may, with approval by the department head or his or her designee, be applied toward the Class AA Professional Certificate. It is important to remember that the awarding of a graduate degree does not necessarily imply that the student is eligible for Alabama certification.

An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. The Class AA certificate is valid for five years and may be renewed according to regulations of the Alabama State Department of Education. Individuals are responsible for meeting renewal requirements and submitting the application for renewal.

Alternative Approaches to Certification

In addition to "regular" certification programs, the Alabama State Board of Education offers alternative approaches to certification. Some of these include: (a) Alternative Class A approach (see information in this catalog); (b) provisional certificate in a teaching field; (c) provisional

certificate in Library Media or School Counseling; (d) CACREP-accredited School Counseling Program approach; (e) Nationally Certified School Psychologist approach; and (f) National Board for Professional Teaching Standards approach. Information regarding these approaches is available via the **Alabama State Department of Education**.

Policies for Out-of-State Students at Master's Level (Class A) and Educational Specialist Level (Class AA) for Any Area *Except* Educational Administration

Students planning to teach outside the state of Alabama are held personally responsible for knowledge of professional licensure requirements in those states.

Admission requirements for master's level (Class A) programs for teachers include "eligibility for Class B certification in the teaching field(s) in which Class A certification is sought," except in a few specified fields.

Admission requirements for educational specialist level (Class AA) programs for teachers include "eligibility for Class A certification in the teaching field(s) in which Class A certification is sought," except in a few specified fields.

Out-of-state students who do not meet the above admission requirements to enroll in courses at the respective levels may be recommended to other state departments of education based only on completion of coursework, not completion of approved programs. Thus, these students will not be eligible for Alabama certification and, if and when the students wish to receive Alabama certification and teach in Alabama, they must present verification of eligibility for an appropriate prerequisite Alabama certificate before being recommended for Alabama certification.

Foreign Credentials

Coursework and/or a degree accepted from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials from a state, federal, or private foreign credential evaluation service recognized by the Teacher Education and Certification Office. Contact the College's Office of Student Services and Certification for more information.

Changes in Certification Requirements

The programs listed in this catalog that lead to Alabama Class A and Class AA professional certificates for service in the public schools may be altered to meet certification standards adopted by the Alabama State Board of Education. Check with the appropriate department for information about current requirements.

Elementary Education Courses

CEE515 Science in Early Childhood and Elementary School

Hours 3

Designed to expand knowledge and competencies of early childhood and elementary teachers of science with specific focus on current standards, research, and inquiry models of instruction.

CEE516 Social Science in Early Childhood and Elementary School

Hours 3

The focus is on current trends in early childhood and elementary social studies, with particular attention to innovative instructional modes and to relating learning to the learners' social environment.

Curriculum and Instruction Courses

Reading Education Courses

CRD510 Expanding Reading

Hours 3

A comprehensive study of the major factors involved in teaching reading at the intermediate grade levels. Techniques for teaching word recognition and comprehension skills are studied extensively.

CRD511 Beginning Reading in Pre-K and Primary Grades

Hours 3

Attends to the theory and practice of beginning reading; key areas of study include diagnostic and evaluative procedures and the organization and implementation of appropriate instruction for P-6. A field component is required.

Secondary Education Courses

CSE530 Mod Sec School Program

Hours 3

The evolving secondary school and its program, with emphasis on analysis of current trends that directly affect modern school practices in a societal context.

CSE532 Secondary Sch Curric

Hours 3

The evolving secondary school curriculum, from historical, current trends, and projective perspectives.

View All Courses

Curriculum and Instruction, Ed.D.

The Ed.D program in the Department of Curriculum and Instruction is designed to develop educational leaders with research skills to conduct place-based, applied research in support of communities, schools, teachers, and students. Ed.D. program graduates take teaching faculty positions in higher education, leadership positions in pre-K-12 schools and education non-profit organizations, and various administrative positions in governmental agencies, such as the Alabama State Department of Education. The program is delivered online. Please contact Dr. Alison Hooper (alhooper2@ua.edu) for all inquiries.

Admissions

The Ed.D. program accepts applications for fall semester entry only. The Curriculum & Instruction Online EdD program accepts new cohorts of students every two years. The next application portal will open in fall 2026, with an application deadline of February 5, 2027.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Curriculum Vitae
- Statement of Purpose with the following parts:
 - A) Identify a research question or problem within curriculum and instruction that you're passionate about investigating.
 - B) Briefly outline your academic and professional experiences that have led you to pursue a doctoral degree and this research interest specifically.
 - C) Describe your long-term career aspirations and how our EdD program will help you achieve these goals.
- Three (3) letters of recommendation

Preferred qualifications are a master’s degree and at least two years of experience in related professions, curriculum design, or instructing learners at any level. Not everyone who meets minimal and preferred qualifications will be admitted to the program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

- 1. Students will take a minimum of 33 credit hours in departmental coursework as follows, as approved by advisor:
 - a. 18 credit hours of departmental doctoral core classes (e.g., CIE 610, CIE 621, CIE 630, CIE 645, CIE 670, CIE 693, CEE 690, CSE 690)
 - b. 15 credit hours of other coursework related to the student’s professional area of interest (e.g., CIE 605, CIE 606, CIE 609, CIE 656, CIE 686, CRD 690, CEE 616, CSE 663)
- 2. Students will take 6 credit hours of humanistic/behavioral support coursework from a wide range of applicable coursework within the College of Education and the university (e.g., courses beginning with AEL, BEP, or BEF), as approved by advisor.
- 3. Students will take a minimum of 9 credit hours in educational research (e.g., BER 631, BER 632, BER 633, BER 640), as approved by advisor.
- 4. Students will take a minimum of 12 hours of dissertation research. Dissertation hours can exceed 12 hours as some students carry out research investigations that may take more time to complete than do others.

Total coursework will be 48 hours plus a minimum of 12 hours additional dissertation credit equaling a minimum of 60 hours.

Transfer Credit

At the discretion of the Major Professor, it may be possible to transfer up to 24 credit hours from a relevant master’s or Ed.S. degree program.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study

Graduate School information on the Doctoral Plan of Study c (p. 21)an be found here (p. 21).

Comprehensive Exams

The Ed.D. program will require a comprehensive examination when coursework is within 6-9 hours or less of completion. Students must be registered for at least one hour in order to take comprehensive examinations per Graduate School policy.

The comprehensive examination will be developed and scored by the doctoral program committee, which includes the Major Professor. If a student fails the comprehensive examination, they must wait until the next semester before taking it again. A student may only retake their comprehensive examinations once. If a student fails the comprehensive examination twice, they will be terminated from the program.

The goals of the comprehensive examination are (a) to give students an opportunity to reflect on and integrate the knowledge and skills they have developed in their doctoral studies, and (b) to give faculty members the opportunity to evaluate whether students show sufficient breadth and depth of knowledge and skills in their particular fields.

More details about the comprehensive examination format and content are available from the Ed.D. Program Coordinator.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

Upon successful completion of the comprehensive examination, and completion of coursework, the student will be admitted to candidacy and can begin taking dissertation hours in the following semester.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

Once admitted to candidacy, the student will complete and defend a dissertation proposal and then complete the dissertation research proposed under the supervision of the Major Advisor and dissertation committee. Upon completion of the dissertation research, which includes the submission of a draft of the written dissertation to the doctoral dissertation committee, the student must successfully defend the work via an oral presentation to the committee, which is also open to the public. A successful defense may still entail some revision to the written dissertation.

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 21).

Funding for Students with a Professional Area of Interest in Music Education

Acquisition of Financial Support

Students in good standing in the Music Education Graduate Program may be supported by a graduate teaching assistantship (GTA) funded by the Department or School of Music at the .25 or .5 level. Both assistantship levels provide a stipend and benefits along with paid (partial or full) tuition and fees. Students awarded assistantships receive financial

support through the first two years in the program for traditional master's degree students and the first three years for doctoral and EdS students who meet performance expectations and who do not meet any **Conditions for Termination of Financial Support** (see below).

Students will be informed of impending financial support termination at least one semester prior to the support termination date, except in special cases noted under **Conditions for Termination of Financial Support**. Doctoral students in good standing may petition the Music Education Department Chair for continued GTA support beyond the third year on a semesterly basis. Petitions for continuing support must be submitted at least three months prior to the start of the final semester of guaranteed support.

Performance Expectations for Continuing Financial Support

To remain eligible for financial support, students must:

- Maintain good academic standing in the Music Education MA, EdS, EdD or PhD program.
- Adhere to all university, college, and department policies, including those related to ethical conduct and professional behavior.
- Complete all mandatory annual training and abide by all policies held by The University of Alabama, the College of Education, the Department of Music Education, and the School of Music.
- Perform all duties assigned as a graduate teaching assistant in a timely and professional manner, as defined by the Music Education Department Chair.
- For doctoral students, engage in research under the direction of a department-approved advisor beginning in the first semester of the third year, with continuous progress expected as guided by the advisor and dissertation committee.

Conditions for Termination of Financial Support

Students may face termination of financial support under the following conditions, pending administrative review by the Department. Depending on the severity of the infraction, the Department Chair —along with input from the Graduate Committee—may recommend *immediate termination*, *termination at the end of the current semester*, or *termination at the end of the following semester*.

1. **Dereliction of Duty** – Includes, but is not limited to:
 - Failure to comply with all university conduct policies.
 - Unexcused absences from assigned responsibilities.
 - Failure to satisfactorily complete GTA responsibilities as defined by the Music Education Department Chair.
2. **Academic Misconduct** – A resolved finding of academic misconduct may result in loss of financial support, with penalties determined in consultation with the Graduate School and/or College of Education and/or School of Music.
3. **Failure to Secure a Dissertation Advisor** – Students must secure a department-approved dissertation advisor at the beginning of the first semester of their third year in the program. Students who fail to do so may lose financial support, at the discretion of department.
4. **Loss of Good Academic Standing** – Students placed on academic probation have one semester to return to good standing. Financial support will be terminated if good standing is not restored. Additionally, students who receive more than two grades of 'C' or at least one grade of 'D' or 'F' will undergo a faculty review, which may result in termination of financial support or dismissal from the program.
5. **Failure to Complete Annual Self Reviews** – Doctoral students must complete all required annual progress reviews in a timely manner.

Failure to meet deadlines may result in probation and, if unresolved, termination of financial support.

6. **Insufficient Research Progress** – A student’s dissertation committee evaluates research progress annually. If the committee determines that progress is inadequate, the student will have one probationary semester (fall, spring, or summer) to address deficiencies while maintaining financial support. Failure to meet expectations by the end of the probationary semester will result in immediate termination of financial support.

Curriculum and Instruction, Ph.D.

The PhD program in the Department of Curriculum & Instruction was designed to develop the epistemological, ontological, axiological, and methodological expertise required of burgeoning scholars to independently conduct educational research related to teaching, learning, and curriculum in a wide range of settings.

Please contact Dr. Karen Spector (kspector@ua.edu), Director of Curriculum & Instruction Ph.D. Programs, with all questions (except those related to the Music Education focal area). All questions related to the Music Education focal area should be directed to the Graduate Coordinator and Chair of Music Education, Dr. Carl Hancock (chancock@ua.edu).

Admissions

The Ph.D. program accepts applications for fall semester entry *only*. In the fall, admitted students will begin a 4-course sequenced core curriculum with their cohort.

Application Deadline

Priority application deadline for Fall 2026 entry: November 7, 2025. Applicants who submit their materials by this deadline will receive priority consideration for graduate assistantships and other forms of funding. Submission by the priority deadline enables us to inform the most qualified applicants of our decision to accept them into the program in January 2026, thereby allowing newly admitted PhD students more time to plan for moving to Tuscaloosa, Alabama. This extra time is often needed for international students seeking student visas.

Regular application deadline for Fall 2026 entry: January 6, 2026.

Regardless of which application deadline you choose, all applicants will receive an admission decision with funding offers, if applicable, before or by March 1, 2026.

Music Education students should contact the Music Education Graduate Coordinator for deadline information.

Application Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- 1. **Curriculum Vitae (CV)/Resume**
- 2. **Statement of Purpose** with the following parts:
 - A) Describe the specific focused area within our program that aligns with your research interests.
 - B) Identify a research question or problem within this area that you're passionate about investigating. Explain its importance and relevance to current issues in the field.
 - C) Briefly outline your academic and professional experiences that have led you to pursue this research interest.

D) Describe your long-term career aspirations and how our PhD program will help you achieve these goals. Discuss how you hope your research will contribute to the advancement of knowledge in your chosen area.

Remember, while your research interests may evolve during the program, demonstrating a clear, focused, and well-informed research direction at this stage is crucial for a strong application.

- 3. **Three (3) letters of recommendation**, including at least one from a professor who can write about the applicant’s potential as a scholar.
- 4. **Scholarly Paper**: Submit **one** piece of your academic writing, such as a course paper, thesis, or published article. If the paper has multiple authors, please indicate your approximate percentage of contribution on the title page or in the header of the document.
- 5. **Video Introduction**: Create a video **up to 3 minutes long** answering the following prompts: a) Introduce yourself; b) State which **one** of the nine focal areas you would like to pursue; c) Why do you want to be part of this PhD program?; d) What are your career goals after completing your PhD?; e) Share one thing about yourself that is not covered in your other application materials. The video can be recorded with a cell phone. We would like to be able to see you and hear you, but beyond that, we are evaluating the content of the video and not the production quality.

Preferred qualifications are a master’s degree and at least two years of experience in related professions, curriculum design, or instructing learners at any level, in the U.S. or abroad. Not everyone who meets minimal and preferred qualifications will be admitted to the program. For example, Music Education prefers a minimum of three years of successful contractual teaching as a certified teacher and at least one degree in music education (master’s or bachelor’s).

See the Admission Criteria section of this catalog for more information.

Curriculum Requirements

NOTE: No student shall register for classes before meeting with their Major Professor for guidance. Music Education students should meet with the MUE Graduate Program Coordinator.

Code and Title		Hours
Sequenced core doctoral courses in Curriculum and Instruction (minimum of 12 credit hours)		12
CIE 601	Concept Frameworks in C&I Res	
CIE 602	Research in Learning in C&I	
CIE 603	Research on Teaching in C&I	
CIE 604	Critical Research in C&I	
Note: These courses shall not be used to meet Research Methods requirements.		
Focal Area of Study within Curriculum and Instruction		18
Students will choose from 9 focal areas:		
1) Early Elementary and Social Emotional Learning		
2) Elementary Education		
3) Literacies and Languages (prek-16 and adult)		
4) Social Studies Education (prek-16 and adult)		
5) Mathematics Education (prek-16 and adult)		
6) Science Education (prek-16 and adult)		
7) STEM Education (prek-16 and adult)		
8) Transformative Education (prek-16 and adult)		
9) Music Education		

Research Methods	12
(e.g., courses with BER prefix as approved by your Major Professor or MUE Graduate Coordinator for music education students)	
Foundations of Education	6
(e.g., courses with AEL, BEF, and BEP prefixes, as approved by your Major Professor or MUE Graduate Coordinator for music education students)	
Dissertation Hours	18
CEE 699, CIE 699, CSE 699, or MUE 699 for Music Education students	
Total Hours	66

Transfer Credit

At the discretion of the Major Professor or MUE Graduate Coordinator, it may be possible to transfer up to 24 credit hours from a relevant master's or EdS program.

Graduate School information on Transfer Credit (p. 15).

Doctoral Plan of Study

Within 20 hours or less, students will submit a Plan of Study, which will be agreed upon with a program of study committee (and, for those with a focal area of study in Music Education, based on results of the MUE Diagnostic Exam*).

The Plan of Study committee includes the Major Professor and a minimum of four additional faculty, one of whom must be external to the department and at least three of whom must hold faculty lines within Curriculum & Instruction. At least three of the committee members must have Full Graduate Faculty status. For music education students, the committee includes all MUE graduate faculty with the Graduate Coordinator serving as chair.

**For those with a focused area of study in Music Education, the MUE Diagnostic Examination will be taken no later than the second semester in residence. The student must register for MUE 631 Doctor of Philosophy Diagnostic/Admission Exam, a zero credit-hour course, to show successful completion of the examination.*

Yearly Plan and Review

Each year PhD students will participate in a Yearly Plan and Review (YP&R), except for Year 1, for which students shall complete only the Yearly Plan. The YP&R is due at the beginning of each academic year to create a plan for the new year and to review the prior year.

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Comprehensive Exam

The goals of the comprehensive examination are (a) to give students an opportunity to reflect on and integrate the knowledge and skills they have developed in their doctoral studies, and (b) to give faculty members the opportunity to evaluate whether students show sufficient breadth and depth of knowledge and skills in their particular fields.

Students are eligible to take the examination when they have 6-9 credit hours of coursework remaining in their program. There are now three options (A-C) for comprehensive exams, as noted below.

Option A: Traditional Comps

The student's program of study must be on file in the program office, and a Doctoral Committee Advisory form must be completed and on file

in the program office. It is the student's responsibility to complete the Application for Comprehensive Exams (available from the Curriculum & Instruction Department office—Atherine Lucy Hall 204). The student must submit the request to take the comprehensive examination at least 3 weeks in advance of the time in which the exam will be taken. This request form must be signed by the program planning committee chair.

Option A Procedures

Students will be provided with three (3) questions relative to their expertise and research interests that are to be completed independently. The Plan of Study Committee Chair contacts the program committee members who will write questions for the examination. The date will be determined by the student in conjunction with the Chair of the student's Doctoral Program Advisory Committee. The questions will be delivered electronically to the student with receipt required by the C&I program assistant. The completed exam must be returned electronically to the C&I program assistant within 10 calendar days.

Each question will include appropriate subsections to ensure that all areas identified are assessed. Faculty members from the student's advisory committee will write the questions and may assist students by clarifying any details about the questions. No additional assistance may be obtained from the faculty members or any other individuals. Students are required to give numerous and appropriate references to the sources they use and to include a reference section in their examinations. Plagiarism on the exam will be considered academic misconduct, resulting in automatic failure of the examination and possible termination from the program. Students who are unclear on what constitutes plagiarism or the improper paraphrasing of others' work are advised to ask for guidelines from department faculty members. Students wishing additional clarification on a question can approach the faculty member who wrote the question.

The electronically submitted responses for each question should be comprehensive. Each response should be approximately 20 double-spaced pages with one-inch margins. The written comprehensive exam is considered *passed* when all questions are passed. (2 of 3 assessors must pass the student on each question.) The committee has the option of requiring an oral defense of the comprehensive exam, in which case a student passes the exam only when they pass both the written and oral portions. The Option A comprehensive exam will be assessed using rubrics available on the C&I PhD website.

Students are allowed two attempts to pass comprehensive exams, as stated in The University of Alabama Graduate Catalog.

1. If a student fails the first attempt at comprehensive exams, a remediation plan will be established with the student and Program of Study chair. Additional faculty members may be included in the remediation plan as deemed appropriate by the Program of Study chair. The remediation plan will be submitted in writing to the department chair for approval.
2. Students are not allowed to attempt the comprehensive exams twice within the same semester.
3. Upon successful completion of remediation, as determined by the Program of Study chair, the student will be allowed a second attempt to pass comprehensive exams.
 - Questions for the second attempt at comprehensive exams are to be written by the same faculty members who wrote questions for the first attempt, if possible. Program of Study faculty members may use the same questions for both attempts, as deemed appropriate by the Program of Study Chair.

- Faculty members who grade responses from the first attempt at comprehensive exams are to grade the responses from second attempt, when appropriate and/or feasible.

A student who fails the second attempt at comprehensive exams, Option A, will be dismissed from the degree program and from the Graduate School (Graduate Catalog Policies 4.11.1, 4.11.2, 4.11.3)

Option B: Publishable Paper

Overview

The outcome of this option will be one high-quality research manuscript written by the student and evaluated by committee members. The manuscript does not have to be accepted for publication to be deemed acceptable by committee members. IRB approval for research involving human subjects is required.

Committee Structure

The student's Major Professor (hereafter *chair*) and two other Plan of Study Committee Members will comprise the Option B Comps committee. This committee will review the concept paper and final manuscript. The three committee members will be referred to as *the committee* throughout the remainder of this document.

The recommended steps in the process are outlined below.

Concept Paper Packet

Students will complete a Concept Paper Packet describing the proposed study as early as possible in their program. For full-time students this packet would typically be completed in the second semester of the first year or first semester of the second year, or the summer between these two semesters (see suggested timeline below).

The Concept Paper Packet will include:

1. A Cover Sheet that declares this option as the student's requested choice.
2. An identified chair, with their signature on the cover sheet;
3. A 5-10 page literature review (reviewing substantive, peer-reviewed literature including landmark research; may be a systematic literature review or other approved option);
4. A specific research question or hypothesis that follows from the literature reviewed;
5. An identified dataset or original data collection plan that will be utilized for analyses to answer the research question;
6. A brief description of the dataset's sampling approach, data collection procedures, dates of data collection, primary variables, etc.;
7. A data analysis plan with sufficient level of detail for the committee to give input;
8. A list of at least 3 target journals that will be potentially used for the submission, including their impact factor and author guidelines;
9. Status of an IRB protocol approving the use of human subjects.

The chair will actively advise the student choosing this option. Early steps may include providing materials such as sample IRB protocols, journal articles, journal requirements, sample journal feedback, journal review criteria, and other materials deemed appropriate by the chair.

The chair will work closely with the student on all aspects of Option B. As one of the first steps, the chair will work with the student to develop the concept paper which describes the research idea and plan in enough detail for the additional two committee members to provide meaningful input.

Once the chair approves the concept paper packet (outlined above), they will pass on the packet to the committee for input and approval. The Committee Review Form will be used by the committee to provide feedback to the student, via the chair. Once all approvals are obtained, the student may proceed with the research.

The committee will give feedback to the student (via the chair) regarding the concept and approach, and the chair will take primary responsibility to work with the student to incorporate any needed changes.

Suggested Timeline

The following are general guidelines and a timeline based on three years of full-time coursework, but the student and chair should discuss a realistic and specific timeline.

Fall, 1st Year: Students will be introduced to the Research Publication Option in the student orientation and in the first course in the sequenced curriculum.

Spring, 1st Year: Students will take the second course in sequenced curriculum and work with the chair in developing a concept paper.

Summer After 1st Year: Students will begin working closely with the chair and put together their Concept Paper Packet. Once the chair is satisfied with the Concept Paper Packet, they will submit the packet to the committee.

Fall, 2nd Year: Students will enroll in the third course in sequenced curriculum and will use this semester to conduct their research, analyze data, and begin writing.

Spring, 2nd Year: Complete a full draft of the manuscript. The chair will review the manuscript and approve/disapprove it. If it is deemed insufficiently developed, the student will continue working on the draft until sufficient progress is made. Once it is approved by the chair, the paper will be submitted to the committee who will have **at least two weeks** to review the manuscript, make suggestions, and approve/disapprove it.

Committee Review of Submitted Publishable Paper

Once the Publishable Paper is approved by the chair, it will be submitted to the committee who will have **at least two weeks** to review the submission, make suggestions, and approve/disapprove it.

Links to the comprehensive exam rubrics can be found on the C&I PhD website page.

Should revisions be necessary before approval, the student will have 30 days to make revisions and resubmit the manuscript to the chair or to the committee, depending upon initial outcome.

A student must receive a rating of "acceptable as is" by at least 2 of 3 committee members to pass this option and move on to an oral defense. Once the written portion is passed, the oral defense will be scheduled. The oral defense will be a 20-minute conference style presentation followed by committee questions. Students must pass both the written and oral portions to pass, if the oral portion is required.

A student may change to the Traditional Comprehensive Exam (Option A) at any time, even after submitting the second draft of the Research Publication Option.

After Approval of the Publishable Paper

To be advanced to candidacy, the student must pass one of the comprehensive exam options and complete all but 6 credit hours of coursework.

Authorship

The student is expected to produce the Publishable Paper with input and direction from faculty, but **without** co-authoring. If the paper is subsequently submitted for publication, the student will be first author. The committee and potentially others (other graduate students, other faculty, and so forth), *may* be co-authors of the paper when it is submitted for publication, depending upon the amount of input each gives to the final submission. An authorship agreement should be created by the student and signed by all authors in advance of authorship collaboration.

There is no limitation on a student authoring or co-authoring other papers before, during, or after participating in the Publishable Paper Option for comprehensive exams.

Option C: Creative and Scholarly Activity Projects (Music Education students only)

Overview

This option is an alternative specifically for Music Education students. Minimally, the goal of this option are three (3) music education projects. The projects may comprise work completed in MUE/MUA/MUS graduate courses and may be completed as a combination with or in addition to such courses according to the following stipulations. The projects will be approved by the graduate program coordinator; be deemed by the advisory committee to be exemplary of sufficient quality, substance, and breadth for presentation/publication/performance in a professional forum; and afford the doctoral student an opportunity to develop potential foci for future work of a scholarly, curricular, or creative nature. Documentation for such projects will be decided in advance and must be approved by a majority of the committee. An oral presentation will be given as a 60-minute presentation with committee questions. Students must receive a rating of “acceptable as is” by at least a majority of committee members in order to pass this option.

Committee Structure

The Graduate Program Coordinator and all members of the music education graduate faculty will comprise the committee. This committee will review the three projects and attend the oral presentation of these by the student. A majority of committee members must deem the three projects of sufficient merit to qualify the candidate for candidacy.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy

Upon successful completion of the comprehensive examination, the student will be admitted to candidacy and can begin taking dissertation hours in the semester following completion of comps Option A, B, or C. Students may sit for the comprehensive examination in their final semester of coursework.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Requirement

Graduate School information on Continuous Doctoral Research Hours Requirement (p. 21).

Dissertation Requirements

Dissertation Research, Writing, and Defense

The student will identify the doctoral dissertation committee membership, which will follow the same guidelines as did the Plan of Study committee formation. The student will develop the dissertation proposal with input from the committee, present it in writing and orally to

the committee for approval, and revise as needed until it is acceptable to the committee.

Once admitted to candidacy, the student will complete and defend the dissertation proposal and the proposed dissertation research under the supervision of their Major Advisor and dissertation committee. Upon completion of the dissertation research, the student will work with their Major Professor in drafting/revising all chapters. When the Major Professor deems the research ready to move forward, the student will schedule a dissertation defense date and share the dissertation with the committee, typically 2 weeks before the scheduled defense date. The student must successfully defend the work via an oral presentation to the committee, which is also open to the public, and therefore must be advertised via the Slate portal. A successful defense may still entail some revision to the written dissertation.

Application for Graduation

Information on the Application for Graduation (p. 21).

Acquisition of Financial Support:

There are a limited number of Curriculum & Instruction (C&I) PhD program Graduate Assistantships (GAs) funded by the Department. In addition, there are a limited number of highly competitive Graduate School Fellowships available. Furthermore, individual faculty members with grants may choose to use their grant money to support a PhD student they select for admission into the program, but in this case, continued GA funding is dependent upon the faculty member’s continuing external grant support.

All GAs earn a monthly stipend, health benefits, and paid tuition and fees. Once granted, financial support is generally guaranteed through the first five years in the program for all C&I program PhD students who meet performance expectations and who do not meet any Conditions for Termination of Financial Support (see below). Students will be informed of impending financial support termination at least one semester prior to the support termination date except in the special cases noted under Conditions for Termination of Financial Support. Students in good standing may petition the Director of the C&I PhD Program for continuing GA support beyond the fifth year on a semesterly basis. Petitions for continuing support must be submitted to the Director of the C&I PhD

Program at least three months prior to the start of the final semester of guaranteed support. Students in good standing with GA support beyond the fifth year may continue at their advisor's discretion until GA support is either exhausted or terminated by their advisor.

Fellowship Nominations:

Eligible students who excel in the program may be nominated by the Department for UA fellowships. Nominees are selected by departmental faculty vote based upon prospective nominee research productivity, academic performance, and contributions to the Department. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits at least commensurate with those provided through departmental GA support.

Performance Expectations for Continuing Financial Support:

The student must be in good academic standing in the C&I PhD program. The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support. The student must complete all mandatory annual training and abide by all rules and policies held by The University of Alabama and The College of Education. Graduate teaching assistants must adequately perform all duties assigned to them in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.

Students who meet one or more of the following criteria will be subject to termination of financial support pending C&I Department administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Department Chair and PhD Program Director—with input from the PhD Committee—will recommend immediate termination of financial support, termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

Dereliction of duty. Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee (for teaching assistants) or the research advisor (for research assistants); or failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee (for teaching assistants) or by the research advisor (for research assistants) and the student's departmental memorandum of appointment.

Resolved finding of Academic Misconduct. Penalties, including potential loss of financial support, will be determined with guidance from the UA Graduate School and/or the UA College of Education.

Loss of good academic standing. Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing—with the non-passing grade exception noted below. Financial support will be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the C&I PhD Committee. This review will determine whether the student should continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered prior to the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.

Delinquent Yearly Plan & Review. Students who neglect to complete the required Yearly Plan & Review by the deadline (September of each year) may lose funding, as determined by the C&I PhD Committee.

Insufficient continuous research progress. The dissertation committee determines by majority vote if a student is making adequate research progress commensurate with their time in the program during required annual reviews. If the committee determines the student is not making adequate research progress, the student will be granted one probationary semester (i.e., academic semester or full summer term) with financial support to remedy productivity deficiencies, as assessed by the dissertation committee. Failure to meet minimum research expectations by the end of the probationary semester will result in immediate termination of financial support.

Funding for Students with a Focal Area of Study of Music Education

Acquisition of Financial Support

Students in good standing in the Music Education Graduate Program may be supported by a graduate teaching assistantship (GTA) funded by the Department or School of Music at the .25 or .5 level. Both assistantship levels provide a stipend and benefits along with paid (partial or full) tuition and fees. Students awarded assistantships receive financial support through the first two years in the program for traditional master's degree students and the first three years for doctoral and EdS students who meet performance expectations and who do not meet any **Conditions for Termination of Financial Support** (see below).

Students will be informed of impending financial support termination at least one semester prior to the support termination date, except in special cases noted under **Conditions for Termination of Financial Support**. Doctoral students in good standing may petition the Music Education Department Chair for continued GTA support beyond the third year on a semesterly basis. Petitions for continuing support must be submitted at least three months prior to the start of the final semester of guaranteed support.

Performance Expectations for Continuing Financial Support

To remain eligible for financial support, students must:

- Maintain good academic standing in the Music Education MA, EdS, EdD or PhD program.
- Adhere to all university, college, and department policies, including those related to ethical conduct and professional behavior.
- Complete all mandatory annual training and abide by all policies held by The University of Alabama, the College of Education, the Department of Music Education, and the School of Music.
- Perform all duties assigned as a graduate teaching assistant in a timely and professional manner, as defined by the Music Education Department Chair.
- For doctoral students, engage in research under the direction of a department-approved advisor beginning in the first semester of the third year, with continuous progress expected as guided by the advisor and dissertation committee.

Conditions for Termination of Financial Support

Students may face termination of financial support under the following conditions, pending administrative review by the Department. Depending on the severity of the infraction, the Department Chair—along with input from the Graduate Committee—may recommend *immediate termination*, *termination at the end of the current semester*, or *termination at the end of the following semester*.

1. **Dereliction of Duty** – Includes, but is not limited to:
 - Failure to comply with all university conduct policies.
 - Unexcused absences from assigned responsibilities.
 - Failure to satisfactorily complete GTA responsibilities as defined by the Music Education Department Chair.
2. **Academic Misconduct** – A resolved finding of academic misconduct may result in loss of financial support, with penalties determined in consultation with the Graduate School and/or College of Education and/or School of Music.
3. **Failure to Secure a Dissertation Advisor** – Students must secure a department-approved dissertation advisor at the beginning the first semester of their third year in the program. Students who fail to do so may lose financial support, at the discretion of department.
4. **Loss of Good Academic Standing** – Students placed on academic probation have one semester to return to good standing. Financial support will be terminated if good standing is not restored. Additionally, students who receive more than two grades of 'C' or at least one grade of 'D' or 'F' will undergo a faculty review, which may result in termination of financial support or dismissal from the program.
5. **Failure to Complete Annual Self Reviews** – Doctoral students must complete all required annual progress reviews in a timely manner. Failure to meet deadlines may result in probation and, if unresolved, termination of financial support.
6. **Insufficient Research Progress** – A student's dissertation committee evaluates research progress annually. If the committee determines that progress is inadequate, the student will have one probationary semester (fall, spring, or summer) to address deficiencies while maintaining financial support. Failure to meet expectations by the end of the probationary semester will result in immediate termination of financial support.

Graduate School information on Financial Assistance (p. 254).

Elementary Education, Ed.S.

The Educational Specialist program in Elementary Education leads to Class AA Elementary certification.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. Students should consult their advisors each semester before registering.

Admissions

The Ed.S. program accepts applications on a rolling basis.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- a master's degree from an accredited institution
- a valid master's level professional educator certificate in Elementary Education. An applicant who holds both Class B Elementary certification AND Class A Reading is also eligible.
- a GPA of 3.0 or higher in a completed graduate degree program
- three letters of recommendation (an applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.)

Applicants must also meet the requirement for fingerprinting/background clearance. (p. 525)

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

This course listing applies to those who begin this program June 13, 2024, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of appropriate work beyond the MA degree and the completion and passing of an electronic portfolio as a final comprehensive assessment are required for the educational specialist degree. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Advisor-approved elective	3
SPE 500 is only required if a special education survey course was not part of the undergraduate program or another graduate program.	0-3

Total Hours **30-36**

¹BER 500 Intro Educatn Research or the equivalent is required before beginning the research courses.

²The research courses must be taken before CEE 687 Topical Research Review.

Transfer Credit

A maximum of six hours of approved transfer credit may be applied toward the degree. Credits over 6 years old may not be used for degree purposes, and credits used for the previous Class A support certificate may not be used for this program.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam

In lieu of a comprehensive exam, EdS candidates are assessed against the completion of a professional portfolio. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C, to qualify to submit their final checkpoint #3 for graduation in their final semester. The electronic portfolio is assessed for required components using the Electronic Portfolio Rubric and Dispositions Rubric at three checkpoints by students' advisors. Passing at the target level at Checkpoint #3 is required for graduation. Students are required to complete an application for comprehensive exams the semester of graduation with advisor approval.

Graduate School information on Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship Requirements

Clinical Placements

All Class AA programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of these shall be in the candidate's teaching field. All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences.

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer

or is available to students who are members of the Student Alabama Education Association (SAEA).

30 advanced clinical hours are required in an elementary school placement which is most often the classroom in which the graduate student is employed teaching elementary students. This placement is attached to the required course, CEE 687 Topical Research Review, on the required program of study course checklist. In this experience students will demonstrate, analyze, and assess how they make an impact on P-12 student learning. In this experience, candidates should apply coursework in the classroom/school settings, analyze student learning, and reflect on their practice in the context of theories on teaching and learning. Specifically, candidates should:

- Research, design, and implement an assessment of the P-12 students' knowledge and capabilities based on appropriate research-based practices in the certification/disciplinary area *Application of data literacy (CAEP Standard A.1.1)*;
- Research, implement, and evaluate appropriate research-based disciplinary and technology practices to advance P-12 student learning that addresses the differing background knowledge and learning needs of all students *Supporting appropriate applications of technology for their field of specialization (CAEP Standard A.1.1)*;
- Conduct an assessment and that measures student success *Use of research and understanding of qualitative, quantitative, and/or mixed methods research methodologies specialization (CAEP Standard A.1.1)*;
- Reflect on instructional changes appropriate to the certification/disciplinary area that should be implemented in the future based on the assessment results *Employment of data analysis and evidence to develop supportive school environment; specialization (CAEP Standard A.1.1)*;
Application of professional dispositions, laws, and policies, codes of ethics and professional standards appropriate to their field of specialization (CAEP Standard A.1.1);
Leading and/or participating in collaborative activities with others such as peers, colleagues, teachers, administrators, community organizations, and parents (CAEP Standard A.1.1).

The Office of Clinical Experiences requires documentation of the 30 hours in the student documentation online portal with approval of the minimum of 30 hours from the student's supervisor (cooperating teacher/administrator). Students are expected to complete a project in relation to the above standards connected to the 30 hours of placement. Students are required to complete that project focused on Student Learning Outcomes. The Action Research Prospectus project in CEE 687 Topical Research Review serves as this key assessment and passing that project at the Developing Level or higher on the College-wide Rubric is necessary for a passing grade in the course and for graduation with the AA certificate. Students cannot pass the course without scoring at the developing level or higher on the College-wide Advanced Clinical Rubric.

Plan II - Non-Thesis Process Requirements

All EdS students are Plan II and are required to complete an action research project in the last two semesters of their coursework with support in classes CEE 687 Topical Research Review (Fall) and CEE 697 Specialist Degree Res (Spring).

In CEE 687, students complete the planning of an action research project through required course assignments resulting in an Action Research Prospectus. Students are required to pass the course with a B or higher to move forward to CEE 697.

In CEE 697, students are required to conduct action research following their prospectus and finish the Action Research Project, completing the course with a formal written document combining the planning from the Action Research Prospectus and the full written description of the action research as carried out and with results and discussion. The Action Research Assignment must be submitted as an artifact for Checkpoint #3 in the requisite electronic portfolio required for graduation. Students must pass their Action Research Project and score at the Developing level or higher on portfolio rubrics to be approved for graduation.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 18).

Student Progress Requirements

As required for certification at the AA level, EdS Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a "C."

Additionally, students are monitored for progress at Checkpoints #1, #2, and #3 based on the requisite assessment(s) identified for each checkpoint. Passing at the Developing Level on the Assessment Rubric(s) for the identified assessment(s) for that checkpoint is required for moving forward in the program at Checkpoints #1 and #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.5 required graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete the 30 hours of advanced clinical practicum with supervisor approval and/or
- pass their Action Research Prospectus Advanced Clinical Placement Assignment at a level of B or higher and/or
- pass their Advanced Clinical Placement Collegewide Rubric at a developing level or higher and/or
- complete their Action Research Project at a level of B or higher and/or
- complete their requisite assessment(s) at Checkpoints #1, #2, and #3 at the developing level or higher

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students who have been inactive in their progress toward degree requirements for more than an academic year must submit the following items to gain readmittance to the graduate program:

- a written request to reenter the program
- an explanation (if possible) of why the student left
- a plan for success if allowed to reenter

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

As required for certification at the AA level, EdS Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a "C." Credits over 6 years old may not be used for degree purposes, and credits used for the previous Class A support certificate may not be used for this program.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 18).

Certification

The Alabama State Department of Education grants Class AA professional educator certification in Elementary (K-6). To be eligible, candidates must hold appropriate, prerequisite Class A certification and must complete all requirements for the EDS degree as described in this catalog, including a comprehensive assessment. According to Alabama regulations, individuals admitted to a Class AA program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist level) certification.

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall during the student's last semester. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program.

According to Alabama regulations, individuals admitted to a Class AA program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist level) certification.

Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education. Students planning to teach outside the state of Alabama are responsible for knowledge about professional licensure requirements in those states.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

Elementary Education, MA

Traditional Class A Program

The department offers a traditional Class A program for those with an appropriate prerequisite certification in Elementary Education (or an approved equivalent). This program leads to Alabama Class A certification in Elementary Education (K-6).

Alternative Class A Program (Nontraditional, Initial Teacher Certification)

The department offers an Alternative Class A program that does not require prior certification in a teaching field. This program leads to Alabama Class A certification in Elementary Education (K-6) and Early Childhood (P-3) and is designed to allow individuals with undergraduate degrees in non-teaching fields to enter the field of education.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. Students should consult their advisors each semester before registering.

Overseas Program

Through the Office of International Programs, the department offers an Overseas MA program at the Westhill Institute in Mexico City for eligible overseas students only. The Overseas program is a non-certification program, and completion of the program does not lead to professional educator licensure or certification.

Admissions

Admission requirements for the Graduate School (Admission Criteria (p. 10)) and the College of Education (General Admission (p.)) are detailed in this catalog. Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Traditional Class A Elementary (K-6) Certification

The traditional Class A certification program accepts applications on a rolling basis.

In addition to meeting admission requirements for the Graduate School and the College of Education, applicants must hold appropriate prerequisite certification in Elementary Education (or an approved equivalent).

Also, applicants to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities. (Three recommendations are required.)

Applicants must complete the requirement for fingerprinting/background clearance (p. 525).

Admission Requirements for Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Nontraditional, Initial Teacher Certification Program)

Applications are accepted on a rolling basis.

To be considered for admission to the Alternative Class A (non-traditional) program in elementary education, applicants must meet the following requirements:

- Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses. [NOTE: Coursework and/or a degree from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials through a foreign credential evaluation service recognized by the Alabama State Department of Education. Contact the College's Office of Student Services and Certification for more information.]

- Degree requirement:** An appropriate bachelor's degree from a regionally accredited institution with a minimum overall GPA of 2.50 OR a master's degree with a GPA of at least 3.0 is required.
- General Studies and Teaching Field:** For Alternative Class A in Elementary, applicants must have completed 12 credit hours of English Language Arts and earn passing scores on **all** subtests of Praxis 5901--Elementary Education: Three Subject Bundle.
- Three recommendations:** An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission Requirements for the Non-Certification Overseas Program for Elementary Education, MA

Applications are accepted on a rolling basis.

The following are required for the Non-Certification Overseas Program for Elementary Education, MA

- An undergraduate grade point average (GPA) of 3.0 on a 4.0 scale, a 3.0 GPA for the last 60 semester hours in a degree program, or a 3.0 or higher GPA in a completed graduate degree program.

Application Requirements:

- Submit a degree-seeking application online at <https://graduate.ua.edu/prospective-students/apply-now/>;
- Submit official, certified transcripts and degree certificates/diplomas in the native language with official, literal, word-for-word English translations directly from the issuing institution to the Graduate School. Documents must bear original signatures and seals of the issuing institution. Notarized documents are not accepted.
- Submit a statement of purpose and three letters of recommendation in the application system.

Curricular Requirements

Curriculum Requirements for Traditional Class A Elementary Education (K-6)

This course listing applies to those who begin this program June 13, 2024, or thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of course credit must be earned, and a comprehensive assessment must be successfully completed. An extensive professional portfolio, to be completed by candidates, will be used as a comprehensive assessment in lieu of a comprehensive exam. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Additional Requirements

SPE 500 is required if a special education survey course was not part of the undergraduate program or another graduate program. 0-3

Total Hours 30-36

Students admitted to the Traditional Class A Elementary program who also hold Alabama Class B Early Childhood (P-3) certification may also earn Class A Early Childhood certification by completing Teaching Field courses that include CRD 511 and 9 hours from CEE 580, CEE 581, CEE 515, CEE 525, CEE 516, CEE 526, and/or CEE 565, in addition to selecting CEE 544 as the advisor-approved elective. Students pursuing both Class A Elementary certification and Class A Early Childhood certification should consult with their advisor for guidance with meeting all requirements.

Curriculum Requirements for Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

This course listing applies to those who begin this program June 13, 2024, or thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 40 semester hours of specific graduate credit plus some undergraduate prerequisites are required for certification. The program of study must be planned with an advisor. Candidates must present a GPA of at least 3.25 on all

courses in the program, with no grade below a C, and a passing score on a comprehensive assessment is required. The extensive professional portfolio completed by candidates will be used as a comprehensive assessment in lieu of a comprehensive exam.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. Students should consult their advisors each semester before registering.

30

Footnotes

* *Courses must have a graduate-level equivalent at The University of Alabama, be part of the curriculum in a graduate degree program, and be from a regionally accredited institution. Students must secure permission to enroll in transfer courses prior to enrolling in those courses.*

Transfer Credit

Students may not count more than six hours in certain seminar/workshop/problems courses toward the completion of the degree. A maximum of 12 hours of transfer credit, if approved by the student's advisor, may be applied toward the degree. Transferred courses over six years old from semester of admission may not be used for degree purposes. Students should see their advisors regarding which courses are appropriate for transfer credit.

For the traditional Class A Elementary program, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

Graduate School information on Transfer Credit (p. 15).

Comprehensive Exam

In lieu of a comprehensive exam, MA, Alt MA and Non-Certification Overseas Program for ELE candidates will be assessed against the completion of a professional portfolio. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C to qualify to submit their final checkpoint #3 for graduation in their final semester. The electronic portfolio is assessed for required components using the Electronic Portfolio Rubric and Dispositions Rubric at three checkpoints by students' advisors. Passing at the developing or above level at Checkpoint #3 is required for graduation. Students are required to complete an application for their comprehensive assessment the semester of graduation with advisor approval.

<https://graduate/about/academic-policies/degree-requirements/#mastersdegreestext> (p. 15)

Fieldwork/Practicum/Internship Requirements

CLINICAL PLACEMENTS

All Class A and Alternative Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of the field experiences shall be in the candidate's teaching field. These placements are in the greater Tuscaloosa area (with the exception of distance learning) in order to facilitate supervision of students. For Early Childhood programs, field experiences shall include placements in at least two of the three main types of early education settings: P-3 classrooms, child care centers and homes, and Office of School Readiness programs. On-campus practicum experiences may include the Children's Program, the Rural Infant Stimulation Environment (RISE) Program, and Early Intervention at The University of Alabama (EI@UA). These programs provide opportunities for students to work with infants, toddlers, pre-K children, and their families. With approval, individuals who are employed in positions appropriate to the area of their current program may complete field experiences on the job, but those experiences must be planned with specific purposes and assessment.

All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences.

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Traditional Class A Elementary Education (K-6)

Fifteen (15) advanced clinical placement hours are required in an elementary school placement, which is most often the classroom in which the graduate student is employed teaching elementary students. This placement is attached to the required course, CEE 532 Early Child/Elem Sch Curric, on the required program of study course checklist. In this experience students will demonstrate, analyze, and assess how they make an impact on P-12 student learning. In this experience, candidates should apply coursework in the classroom/school settings, analyze student learning, and reflect on their practice in the context of theories on teaching and learning. Specifically, candidates should demonstrate the impact on student learning that occurs through curricular changes and must address the following components:

- Undertaking a diagnosis of P-6 curriculum in connection with student learning
- Planning an appropriate sequence of instruction to advance P-6 student learning with graduate students and early childhood/elementary students using technology collaboratively and appropriately
- Conducting authentic assessments and documenting what student learning occurred/did not occur from these curricular changes impacting instructional practices
- Reflecting on required curricular components through research-supported arguments and ideas

The Office of Clinical Experiences requires documentation of the 15 hours in the student documentation online portal with approval of the minimum of 15 hours from the student's supervisor (cooperating teacher/administrator). Students are expected to complete a project in relation to the above standards connected to the 15 hours of placement. Students are required to complete that project focused on Student Learning Outcomes. The Technological Curriculum Project in CEE 532 Early Child/Elem Sch Curric serves as this key assessment and passing that project at the Developing Level or higher on the Collegewide Rubric is necessary for a passing grade in the course and for graduation with the A certificate. Students cannot pass the course without scoring at the developing level or higher on the Collegewide Advanced Clinical Rubric

Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

Alternative Class A students are required to complete the practicum hours associated with the Block 1, Block 2, Block 3, and Block 4 courses: CEE 491, CEE 595, CEE 596, and CEE 597, including the EC pre-internship placement at the beginning of Block 3. CEE 597 serves as the culminating internship in two field placements.

Non-Certification Overseas Program for Elementary Education, MA

OIP students are not required to complete practicum hours as this degree is not associated with certification; however, many course assignments are assigned in connection with experiences of the graduate students when working in the field with elementary ages.

TEACHING INTERNSHIP REQUIREMENTS (Alternative Class A program)

The teaching internship is one of the most important experiences College of Education students have. It is generally regarded as the culminating activity of one's preparation to become a teacher. At The University of Alabama, the internship is a full-semester, full-time assignment and must be taken in residence.

Students must file internship applications with the Office of Clinical Experiences during the semester preceding the semester of the planned internship. The application process begins by attending a mandatory application session. The time, date, and place of the application session are announced at the beginning of each semester.

Students may apply to enroll for an internship if they meet the following criteria:

- The student must have completed all courses in the major or majors, or must secure written permission to enroll for an internship from the appropriate department head.
- The student must have achieved a minimum grade point average of 3.0 overall.
- The student must have achieved a minimum grade point average of 2.75 in each major, both for University of Alabama courses in each major and for combined University of Alabama courses and transfer courses in each major.
- The student must have achieved a minimum grade point average of 2.75 for professional education coursework.
- The student must have completed all methods courses and appropriate professional studies coursework with grades of "C" or better.
- The student must have removed from the transcript any grade of incomplete ("I") recorded in required courses; grades of incomplete are treated as grades of "F"
- The student must have earned passing scores on the appropriate Praxis subject assessments for the teaching field and Foundations of Reading 190 (and other assessments, if applicable).

Alternative master's students are required to register for the number of internship credit hours specified by their program. In some programs, students may be allowed to choose a 6-hour registration or a 9-hour registration; course requirements are the same whether 6 hours or 9 hours are taken. Graduate students whose program requires two internship placements should register for two sections of internship (3 hours per section or 4.5 hours per section). Students enrolled for internship must not expect to be enrolled in other courses while interning.

All internship placements are coordinated by the College of Education Office of Clinical Experiences. Placement sites are selected to ensure the quality of the internship experience and of the supervision provided by the cooperating teacher. All internship placements are in the greater Tuscaloosa area or surrounding counties, within a 50-70 mile radius, in order to facilitate supervision of students by University of Alabama faculty or other designees of the department heads.

With approval, a candidate admitted to an Alternative Class A program who is employed in an Alabama school may complete the internship in the candidate's classroom if the candidate holds a valid Interim Employment Certificate (IEC) for the appropriate teaching field and assignment.

Students may apply for overseas internships if they meet certain criteria and if appropriate placements can be coordinated by the Consortium for Overseas Student Teaching (COST) and/or The University of Alabama. Applications for overseas internships are taken during January for

placements for the next fall semester, and in May for placements the succeeding spring semester. Contact the Office of Clinical Experiences for additional information.

- Early Childhood (P-3rd grade) interns will receive two internship placements in two of the following age ranges: birth-3 years of age, 3-5 years of age, 5-8 years of age.
- Elementary education (K-6) interns will receive a placement in lower elementary (grades K-3) and upper elementary (grades 4-6) unless substantial field experiences are required and completed at both levels.

Plan II - Non-Thesis Process Requirements

MA, Alt MA, and OIP MA students are required to complete an electronic portfolio at three checkpoints in their master's program. Students are assessed for progress at Checkpoints #1, #2, and #3 in their requisite Electronic Portfolio. Passing at the Developing Level or higher on the Electronic Portfolio and Dispositions Rubrics is required for moving forward in the program at Checkpoints #1 and 2 and for graduation at Checkpoint #3. Checkpoint #3 in the Electronic Portfolio must be completed with assessor approval for graduation.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 15).

Student Progress Requirements

Traditional Class A Elementary Education (K-6)

Students are monitored for progress at Checkpoints #1, #2, and #3 based on the requisite assessment(s) identified for each checkpoint. Passing at the Developing Level on the Assessment Rubric(s) for the identified assessment(s) for that checkpoint is required for moving forward in the program at Checkpoints #1 and #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.25 graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete the 15 hours of advanced clinical practicum with supervisor approval and/or
- pass their Technological Curriculum Project (CEE 532) Advanced Clinical Placement Assignment at a level of C or higher and/or
- pass their Advanced Clinical Placement Collegewide Rubric at a developing level or higher and/or
- complete their requisite assessment(s) at Checkpoints #1, #2, and #3 at the developing level or higher

Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

Students are monitored for progress at Checkpoints #1, #2, and #3 based on the requisite assessment(s) identified for each checkpoint. Passing at the Developing Level on the Assessment Rubric(s) for the identified assessment(s) for that checkpoint is required for moving forward in the program at Checkpoints #1 and #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.25 graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete the clinical placement requirements of practicum hours and internship with supervisor approval and at a level of B or higher and/or
- complete their requisite assessment(s) at Checkpoints #1, #2, and #3 at the developing level or higher

Non-Certification Overseas Program for Elementary Education, MA

Students are monitored for progress at Checkpoints #1, #2, and #3 based on the requisite assessment(s) identified for each checkpoint. Passing at the Developing Level on the Assessment Rubric(s) for the identified assessment(s) for that checkpoint is required for moving forward in the program at Checkpoints #1 and #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.25 graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete their requisite assessment(s) at Checkpoints #1, #2, and #3 at the developing level or higher

Additional Academic Requirements

For the Alternative Class A program, passing scores on the appropriate Praxis subject assessments and Foundations of Reading 190 are required.

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students who have been inactive in their progress toward degree requirements for more than an academic year must submit the following items to gain readmittance to the graduate program:

- a written request to re-enter the program
- an explanation (if possible) of why the student left
- a plan for meeting success if allowed to re-enter

Faculty permission is required for reentry upon evaluation of these requirements.

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Traditional Class A Elementary Education (K-6)

As required for Class A certification, candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a "C." Credits

over 6 years old may not be used for degree purposes, and credits used for the previous Class B certificate may not be used for this program.

Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

As required for Alternative Class A certification, candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a "C." Credits over 6 years old may not be used for degree purposes.

Non-Certification Overseas Program for Elementary Education, MA

Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a "C." Credits over 6 years old may not be used for degree purposes.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 15).

Certification

The Alabama State Department of Education issues Class A professional educator certification in Elementary Education (K-6). The Associate Dean for Student Services in the College of Education has been designated as the teacher certification officer for The University. Students who need information about or assistance with certification should consult the associate dean for student services.

To be eligible for Class A certification, candidates must hold appropriate prerequisite certification OR complete an Alternative Class A program and must successfully complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s). It is important to note that the awarding of a master's or higher degree does not necessarily imply that the student is eligible for Class A certification.

To be awarded Alabama Class A Elementary (K-6) certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C
- earn a passing score on a comprehensive assessment
- hold valid, prerequisite Alabama Class B Elementary certification OR complete an Alternative Class A program
- earn a passing score on the required Praxis subject assessment(s) (Alternative Class A)
- complete an application for certification through the Alabama State Department of Education

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall during the student's last semester. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program.

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state

must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education. Students planning to teach outside the state of Alabama are responsible for knowledge about professional licensure requirements in those states.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The Overseas program does not lead to professional certification.

Literacy Research, Theory, and Pedagogy Certificate

The Certificate in Literacy Research, Theory, and Pedagogy provides educators with the expertise to address issues related to the teaching and learning of literacy at local, state and national levels.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for admission an applicant must have a Master's degree in education (or a related field) or be enrolled in a doctoral program at The University of Alabama. The application must also include:

- A Statement of Purpose focusing on the student's goals in pursuing a Literacy Education Certificate.
- A writing sample submitted directly to the department for faculty consideration when the faculty review the Graduate School certificate program application.

This certificate is not a credential for teacher certification/licensure.

See the Admission Criteria section of this catalog for more information.

- Mathematics
- Mathematics Specialist (grades 4-8 and/or grades 6-12 options only)
- Music Education
- Physics
- Social Studies (comprehensive)

Changes to Certification Programs

The Graduate Catalog is published annually; however, requirements for State-approved educator certification programs are subject to change between publications. Current students, as well as prospective students, should check with the specific program for the most up-to-date information. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- hold appropriate, prerequisite master's level certification
- have a master's program GPA of 3.0 on a 4.0 scale
- provide a Statement of Purpose explaining their interest in the program, which will serve as a writing sample
- submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities. Three recommendations are required.
- For **Music Education**, applicants must successfully complete a formal screening interview with the music education faculty prior to an admission decision. Applicants are required to demonstrate professional competence in music theory and music history; to submit a recording of an ensemble performance or teaching sample; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study. It is highly recommended that applicants have a minimum of three years of full-time contractual teaching experience prior to beginning a post-master's degree program. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances.
- For **Mathematics Specialist**, cohorts begin in the summer, and applicants should plan for a February 5th application deadline each year. Please contact program faculty for questions in the fall semester prior to applying. Applicants must meet the following requirements:
 - a. Alabama Class A (or equivalent) teaching field or area of instructional leadership or instructional support certificate.
 - b. Alabama Class B (or equivalent) mathematics certification for grades 4-8 and/or grades 6-12
 - c. If the Class A certificate is in a field *other than* Math (4-8) for Math Specialist grades 4-8 and/or Math (6-12) for Math Specialist grades 6-12, a passing score on the current Praxis subject area test is required prior to admission.
 - d. A minimum of 3 years of mathematics teaching experience in a P-12 setting prior to admission
 - e. admission portfolio including letters of recommendation, evidence of positive impact on student learning, and evidence of collaborative leadership potential

Applicants must also meet the requirement for fingerprinting/background clearance. (p. 525)

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Admission with Permission to Continue

In exceptional circumstances, Admission with Permission to Continue may be granted if the GPA is below the required 3.0/4.0. In such a case, the student must earn a 3.5 overall GPA for the first nine semester hours of the program. If the student does not meet this requirement, then they will not be permitted to continue in the program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 30 hours of appropriate work beyond the MA degree, including either the completion of classroom inquiry projects (CSE 693) or a thesis (CSE 697), is required for the educational specialist degree.

Note: Specific courses in the Mathematics Specialist program are required and noted below rather than CSE 693 and CSE 697.

Candidates moving from the comprehensive fields of general science or general social science to a single teaching field must earn passing scores on the appropriate *Praxis* subject assessment for certification in the single teaching field. For example, a student admitted with Class A general science certification who completes teaching field coursework only in physics must earn a passing score on the Praxis for physics to earn Class AA physics certification.

These course listings apply to candidates having appropriate prior certification. Candidates must present a GPA of at least 3.50 on all courses in the program below, with no grade below a C. Requirements for State-approved educator preparation programs are subject to change between publications, so students should check with their advisor for the most up-to-date information.

Mathematics Specialist

Students may pursue both grade bands of certification. Major projects within CIE 693 and CEE/CSE 695 provide students the opportunity to seek both 4-8 and 6-12 if they so desire and if they are qualified. Fifty percent of the total coursework or more must be at the Ed.S. level, and successful completion of the exit portfolio components is required.

Transfer Credit

Courses taken for Class A certification may not be used toward Class AA certification.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exams

In lieu of a Comprehensive Exam, candidates will submit a Comprehensive Assessment. Due in the last semester of the program, the final comprehensive assessment must be passed in all areas with scores of 2/4 (Developing) or better. A score of 1 in any area will require resubmission and graduation will be delayed until the comprehensive assessment is passed.

For Music Education, a passing score on a comprehensive written exam covering the content of the curriculum is required. The written exam is scheduled during the last semester of enrollment. Students contact the Graduate Program Coordinator in the Music Education Office to arrange to take the exam.

Graduate School information on Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship Requirements

One 15-hour Advanced Clinical Placement is required for this degree. This placement is typically carried out in the student's own classroom as they engage in action research or inquiry projects, but it need not be.

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 18).

Student Progress Requirements

Students submit requisite assessment(s) upon entrance, at midway point, and in the final semester. Feedback will be provided at each phase. Students must pass the final submission of the comprehensive assessment with 2/4 (Developing) or better on all items in order to graduate.

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Candidates must present a GPA of at least 3.50 on all courses in a Class AA program, with no grade below a C.

For Music Education, at least 1/2 of the coursework must be in music and at least 15 semester hours of the 30 semester hour total must be at the 600-level.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Admission to Candidacy

Students should contact their academic advisor/graduate director to initiate the form for Admission to Candidacy for the Ed.S. degree and submit a program of study. The Graduate School must approve the student's EdS plan of study prior to admission to candidacy for the degree.

Application for Graduation

Information on the Application for Graduation (p. 18).

Class AA Certification

The Alabama State Board of Education grants Class AA professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must hold appropriate

prerequisite certification and must complete all requirements of the State-approved program, including a comprehensive assessment.

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

According to Alabama regulations, individuals admitted to a Class AA program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist level) certification.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Postsecondary Instruction

Graduate students in the EdS program who have an interest in teaching in postsecondary institutions may take advantage of the program's flexibility to acquire a maximum of 18 hours in cognate field courses. Students who have this option in mind should coordinate the program of study carefully with their advisors.

Accepted graduate students are encouraged to apply for College of Education scholarships and scholarships offered through UA Online (for distance learning students).

Funding for Music Education

Acquisition of Financial Support

Students in good standing in the Music Education Graduate Program may be supported by a graduate teaching assistantship (GTA) funded by the Department or School of Music at the .25 or .5 level. Both assistantship levels provide a stipend and benefits along with paid (partial or full) tuition and fees. Students awarded assistantships receive financial support through the first two years in the program for traditional master's degree students and the first three years for doctoral and EdS students who meet performance expectations and who do not meet any **Conditions for Termination of Financial Support** (see below).

Students will be informed of impending financial support termination at least one semester prior to the support termination date, except in special cases noted under **Conditions for Termination of Financial Support**. Doctoral students in good standing may petition the Music Education Department Chair for continued GTA support beyond the third year on a semesterly basis. Petitions for continuing support must be submitted at least three months prior to the start of the final semester of guaranteed support.

Performance Expectations for Continuing Financial Support

To remain eligible for financial support, students must:

- Maintain good academic standing in the Music Education MA, EdS, EdD or PhD program.

- Adhere to all university, college, and department policies, including those related to ethical conduct and professional behavior.
- Complete all mandatory annual training and abide by all policies held by The University of Alabama, the College of Education, the Department of Music Education, and the School of Music.
- Perform all duties assigned as a graduate teaching assistant in a timely and professional manner, as defined by the Music Education Department Chair.
- For doctoral students, engage in research under the direction of a department-approved advisor beginning in the first semester of the third year, with continuous progress expected as guided by the advisor and dissertation committee.

Conditions for Termination of Financial Support

Students may face termination of financial support under the following conditions, pending administrative review by the Department. Depending on the severity of the infraction, the Department Chair —along with input from the Graduate Committee—may recommend *immediate termination*, *termination at the end of the current semester*, or *termination at the end of the following semester*.

1. **Dereliction of Duty** – Includes, but is not limited to:
 - Failure to comply with all university conduct policies.
 - Unexcused absences from assigned responsibilities.
 - Failure to satisfactorily complete GTA responsibilities as defined by the Music Education Department Chair.
2. **Academic Misconduct** – A resolved finding of academic misconduct may result in loss of financial support, with penalties determined in consultation with the Graduate School and/or College of Education and/or School of Music.
3. **Failure to Secure a Dissertation Advisor** – Students must secure a department-approved dissertation advisor at the beginning of the first semester of their third year in the program. Students who fail to do so may lose financial support, at the discretion of department.
4. **Loss of Good Academic Standing** – Students placed on academic probation have one semester to return to good standing. Financial support will be terminated if good standing is not restored. Additionally, students who receive more than two grades of 'C' or at least one grade of 'D' or 'F' will undergo a faculty review, which may result in termination of financial support or dismissal from the program.
5. **Failure to Complete Annual Self Reviews** – Doctoral students must complete all required annual progress reviews in a timely manner. Failure to meet deadlines may result in probation and, if unresolved, termination of financial support.
6. **Insufficient Research Progress** – A student's dissertation committee evaluates research progress annually. If the committee determines that progress is inadequate, the student will have one probationary semester (fall, spring, or summer) to address deficiencies while maintaining financial support. Failure to meet expectations by the end of the probationary semester will result in immediate termination of financial support.

Secondary Education, MA

Class A Certification Programs

Traditional Class A and Alternative Class A certification programs in Secondary Education (6-12) are available in

- Biology (traditional Class A only)
- Chemistry (traditional Class A only)

- English for Speakers of Other Languages
- English Language Arts
- Foreign Language* (French, German, or Spanish)
- General Science
- General Social Studies
- Geography
- History
- Mathematics
- Music Education (P-12)
- Physics (traditional Class A only)

*For foreign languages, the Alternative Class A is available for Spanish only.

Changes to Certification Programs

The Graduate Catalog is published annually; however, requirements for State-approved educator certification programs are subject to change between publications. Current students, as well as prospective students, should check with the specific program for the most up-to-date information. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Overseas Program

Through the Office of International Programs, the department offers an Overseas MA program at the Westhill Institute in Mexico City for eligible overseas students only. The Overseas program is a non-certification program, and completion of the program does not lead to professional educator licensure or certification.

Admission Requirements

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Traditional Class A Programs

Applications are accepted on a rolling basis.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- hold appropriate prerequisite certification.
- submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities. Three recommendations are required.
- For Music Education, applicants may be required, at the discretion of the department, to demonstrate professional competence in music theory and music history; to submit a recording of an ensemble performance or teaching sample; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study. If requested, applicants will interview with the music education faculty prior to an admission decision.

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Admission Requirements for Alternative Class A (Master's-Level), Nontraditional, Initial Teacher Certification Program

The Department of Curriculum & Instruction offers Alternative Class A programs that do not require prior certification in a teaching field. These programs lead to Alabama Class A certification in Secondary Education (6-12) and are designed to allow individuals with undergraduate degrees in non-teaching fields to enter the field of education. Applications are accepted on a rolling basis.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission to an Alternative Class A program, the application must include:

- Completion of specified undergraduate prerequisite courses.
- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses and other requirements. [NOTE: Coursework and/or a degree from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials through a foreign credential evaluation service recognized by the Alabama State Department of Education. Contact the College's Office of Student Services and Certification for more information.]
- **Degree requirement:** An appropriate bachelor's degree from a regionally accredited institution with a minimum overall GPA of 2.50 OR a master's degree with a GPA of at least 3.0 is required.
- **Teaching Field:** For single teaching fields at the secondary level (6-12), applicants must have an academic content major (or the equivalent) in the teaching field OR passing scores on the appropriate Praxis subject assessment. For comprehensive teaching fields of English Language Arts and General Social Studies at the secondary level, applicants must have an academic content major (or the equivalent) in the teaching field plus one course in each of the four areas of the teaching field OR passing scores on the appropriate Praxis subject assessment. For Music Education and the comprehensive field of General Science, applicants must have passing scores on the appropriate Praxis subject assessments. For English for Speakers of Other Languages (P-12), applicants must have an academic content major (or the equivalent) in English or a foreign language OR passing scores on the appropriate Praxis subject assessment. The transcript evaluation will determine if an applicant meets the teaching field requirement.
- **Three recommendations:** An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Changes to Certification Requirements

The programs listed in this catalog that lead to Alabama Class A professional educator certification for service in the public schools may be altered to meet certification standards adopted by the Alabama State Board of Education. The Graduate Catalog is published annually; however, requirements for State-approved programs are subject to change between publications. Current students, as well as prospective

students, should check with the specific program for the most up-to-date information.

Admissions Requirements for Accelerated Master's Program (AMP)

Fall semester admissions are made April through July 31st each year. The GRE general test is not required but can strengthen an applicant's application packet if desired. Test scores must be received by August 1st. Interested students with questions should contact program faculty. More information can be found at our program recruitment website: <https://becomeamathteacher.ua.edu/>

Admissions Requirements for Overseas Program

Applications are accepted on a rolling basis.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A CV/resume
- 3 letters of recommendation

Curricular Requirements

Curricular Requirements for Traditional Class A Programs

A minimum of 30 hours of course credit must be earned; see specific program checklists. The program of study must be planned with an advisor.

NOTE: The comprehensive fields of General Science, General Social Studies, and English Language Arts require at least one course in two areas within the broader field as follows:

- English Language Arts must include courses from at least two of the following areas: EN, JCM, COM, and TH
- General Science must include courses from at least two of the following areas: BSC, CH, PH, and GEO.
- General Social Studies must include courses from at least two of the following areas: HY, SOC, PY, PSC, GY, and EC

Candidates moving from the comprehensive field of general social studies to a single teaching field must earn passing scores on the appropriate *Praxis* subject assessment for certification in the single teaching field. For example, a student admitted with Class B General Social Science certification who completes teaching field coursework only in history must earn a passing score on the *Praxis* for history to earn Class A History certification. Individuals who intend to earn Class AA certification in a secondary education field must hold valid Class A certification in the same teaching field as the Class AA program.

Unless otherwise specified, these course listings apply to candidates having appropriate prior certification who begin this program at UA on June 13, 2024, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Curricular Requirements for Alternative Class A Programs

A minimum of 37 semester hours of specific graduate credit plus some undergraduate prerequisites are required for certification. The program of study must be planned with an advisor.

The Alternative Class A course listings apply to candidates having completed a baccalaureate degree at a regionally accredited college or university who begin the program June 13, 2024, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize

this program. Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Non-Certification Overseas Program for Secondary Education, MA

This is a non-certification program offered only to overseas students. Completion of this program does not lead to professional educator licensure or certification.

A minimum of 30 hours of course credit must be earned, and a comprehensive assessment must be successfully completed. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Overseas Program Course Requirements	Hours
Group I: Secondary Education Courses

Footnotes

- * *Courses must have a graduate-level equivalent at The University of Alabama, be part of the curriculum in a graduate degree program, and be from a regionally accredited institution. Students must secure permission to enroll in transfer courses prior to enrolling in those courses.*

Transfer Credit

In compliance with regulations established by the Alabama State Department of Education and the Alabama Administrative Code, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

Graduate School information for Transfer Credit (p. 15).

Accelerated Master's Program

The Accelerated Master's Program (AMP) in Secondary Education (Mathematics) allows students earning a bachelor's degree in mathematics with a Math Education minor to take courses that dual count toward the MA in Secondary Education (Mathematics) degree as well as toward the Alternative Class A certification program.

Undergraduate mathematics majors seeking AMP admission are required to complete the GRE general test with a score of 300 or higher. Fall semester admissions are made April through July 31st each year. Test scores must be received by August 1st. Interested students should contact program faculty for questions. More information can be found at our program recruitment website: <https://becomeamathteacher.ua.edu/>.

Information on the Accelerated Master's Program (p. 7).

Comprehensive Exam

In lieu of a comprehensive exam, students complete a Final Comprehensive Assessment.

For Music Education, a passing score on a comprehensive written exam covering the content of the curriculum is required. The written exam is scheduled during the last semester of enrollment. Students contact the Graduate Program Coordinator in the Music Education Office to arrange to take the exam.

Graduate School information on Comprehensive Exams (p. 15).

Plan I - Thesis Process Requirements

For Music Education, information about the thesis process including committee formation, scheduling of proposal and defense, IRB procedures, and formatting and submission are arranged with the Graduate Program Coordinator in Music Education. Students in Plan I present and defend a thesis in lieu of taking a comprehensive exam.

Plan II - Non-Thesis Process Requirements

For Music Education, a passing score on a comprehensive written exam covering the content of the curriculum is required. The written exam is scheduled during the last semester of enrollment. Students contact the Graduate Program Coordinator in the Music Education Office to arrange to take the exam.

Fieldwork/Practicum/Internship Requirements

CLINICAL PLACEMENTS

All Class A and Alternative Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of the field experiences shall be in the candidate's teaching field or area of instructional support. These placements are in the greater Tuscaloosa area or surrounding counties, within a 50-70 mile radius (with the exception of music education and distance learning), in order to facilitate supervision of students. With approval, individuals who are employed in positions appropriate to the area of their current program may complete field experiences on the job, but those experiences must be planned with specific purposes and assessment.

All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences.

Advanced clinical placement assignments are required. The placement may occur in the student's classroom provided there is support from school administration.

For the Alternative Class A Music Education, an internship placement in elementary and secondary education is required during the final semester of enrollment. The placements are arranged through the Music Education Office and the Office of Clinical Experiences.

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

TEACHING INTERNSHIP REQUIREMENTS

(Alternative Class A Program and Accelerated Master's Program)

The teaching internship is one of the most important experiences College of Education students have. It is generally regarded as the culminating activity of one's preparation to become a teacher. At The University of Alabama, the internship is a full-semester, full-time assignment.

Students must file internship applications with the Office of Clinical Experiences during the semester preceding the semester of the planned internship. The application process begins by attending a mandatory application session. The time, date, and place of the application session are announced at the beginning of each semester.

Students may apply to enroll for an internship if they meet the following criteria:

- The student must have completed all courses in the major or have approval from the faculty advisor and/or Department Chair to intern.
- The student must have achieved a minimum grade point average of 3.0 overall.
- The student must have achieved a minimum grade point average of 2.75 in each major, both for University of Alabama courses in each major and for combined University of Alabama courses and transfer courses in each major.
- The student must have achieved a minimum grade point average of 2.75 for professional education coursework.
- The student must have completed all methods courses and appropriate professional coursework with grades of "C" or higher.

- The student must have removed from the transcript any grade of incomplete ("I") recorded in required courses; grades of incomplete are treated as grades of "F."
- The student must show mastery of required standards in all courses completed prior to internship.
- The student must have earned passing scores on the appropriate Praxis subject assessment(s) for the teaching field.
- Portfolio requirements must be met.

Registration for Internship Credit Hours

Graduate students are required to register for the number of internship credit hours specified by their program. In some programs, graduate students may be allowed to choose a 6-hour registration or a 9-hour registration; course requirements are the same whether 6 hours or 9 hours are taken. Graduate students whose program requires two internship placements should register for two sections of internship (3 hours per section or 4.5 hours per section). Students enrolled for internship must not expect to be enrolled in other courses while interning.

Policy on Internship Placements

All internship placements are coordinated by the College of Education Office of Clinical Experiences. Placement sites are selected to ensure the quality of the internship experience and of the supervision provided by the cooperating teacher. All internship placements are in the greater Tuscaloosa area or surrounding counties, within a 50-70 mile radius (with the exception of music education and distance learning), in order to facilitate supervision of students by University of Alabama faculty or other designees of the department heads.

With approval, a candidate admitted to a traditional Class A or an Alternative Class A program who is employed in an Alabama school may complete the internship in the candidate's classroom if the candidate holds a valid Interim Employment Certificate (IEC) for the appropriate teaching field and assignment.

Students may apply for overseas internships if they meet certain criteria and if appropriate placements can be coordinated by the Consortium for Overseas Student Teaching (COST) and/or The University of Alabama. Applications for overseas internships are taken during January for placements for the next fall semester, and in May for placements the succeeding spring semester. Contact the Office of Clinical Experiences for additional information.

Internship Assignments

- Secondary education (6–12) interns with a comprehensive major may receive one or two internship assignments. If a candidate is seeking certification in two or more distinct teaching fields, an additional internship(s) will be required (unless the internship is defined according to the State-approved program.) If a candidate is seeking certification in two or more related fields, the internship may be divided between the two teaching fields.
- P–12 programs in foreign language or music education interns should expect to have a split internship assignment with an elementary and a secondary school.
- English for Speakers of Other Languages (ESOL) interns should expect to have a split internship assignment between an elementary and a secondary school or if ESOL interns are employed full-time as an ESOL teacher in a public school setting, they may complete one semester of internship in their own classroom under the supervision of their building principal and a first-term summer semester of internship in an ESOL summer program coordinated by the Office of

Clinical Experiences under the supervision of a University of Alabama ESOL faculty member.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 15).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Graduate School Information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 18).

Postsecondary Instruction

Graduate students in the MA program who have an interest in teaching in postsecondary institutions may take advantage of the program's flexibility to acquire a maximum of 18 hours in cognate field courses. Students who have this option in mind should coordinate the program of study carefully with their advisors.

Certification

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the State-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Traditional Class A Certification

The Alabama State Department of Education grants Class A professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must hold appropriate prerequisite certification and must complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s). The extensive professional portfolio completed by candidates will be used as a comprehensive assessment in lieu of a comprehensive exam. Candidates must present a GPA of at least 3.25 in all courses in the program, with no grade below a C.

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

Alternative Class A Certification

The Alabama State Department of Education grants Class A professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must complete all requirements of the Alternative Class A program, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s). The extensive professional portfolio completed by candidates will be used as a comprehensive assessment in lieu of a comprehensive exam.

Accepted graduate students are encouraged to apply for College of Education scholarships and scholarships offered through UA Online (for distance learning students).

Funding for Math or Science (Traditional or Alternative Class A Programs)

Students completing Traditional or Alternative Class A programs in Math or Science who subsequently teach in Alabama public schools and reside in Alabama are eligible for tuition reimbursement up to a total of \$30,000. See the AMSTEP webpage of the Alabama Commission of Higher Education for specific requirements: <https://amstep.ache.edu/>.

Students who enroll in the Alternative Class A program in science are eligible to be considered for employment as teachers in the Tuscaloosa/Birmingham area with full pay and responsibilities under the Interim Employment Certificate. More information about the Interim Employment Certificate is available through the Alabama State Department of Education.

Funding for Music Education

Acquisition of Financial Support

Students in good standing in the Music Education Graduate Program may be supported by a graduate teaching assistantship (GTA) funded by the Department or School of Music at the .25 or .5 level. Both assistantship levels provide a stipend and benefits along with paid (partial or full) tuition and fees. Students awarded assistantships receive financial support through the first two years in the program for traditional master's degree students and the first three years for doctoral and EdS students who meet performance expectations and who do not meet any **Conditions for Termination of Financial Support** (see below).

Students will be informed of impending financial support termination at least one semester prior to the support termination date, except in special cases noted under **Conditions for Termination of Financial Support**. Doctoral students in good standing may petition the Music Education Department Chair for continued GTA support beyond the third

year on a semesterly basis. Petitions for continuing support must be submitted at least three months prior to the start of the final semester of guaranteed support.

Performance Expectations for Continuing Financial Support

To remain eligible for financial support, students must:

- Maintain good academic standing in the Music Education MA, EdS, EdD or PhD program.
- Adhere to all university, college, and department policies, including those related to ethical conduct and professional behavior.
- Complete all mandatory annual training and abide by all policies held by The University of Alabama, the College of Education, the Department of Music Education, and the School of Music.
- Perform all duties assigned as a graduate teaching assistant in a timely and professional manner, as defined by the Music Education Department Chair.
- For doctoral students, engage in research under the direction of a department-approved advisor beginning in the first semester of the third year, with continuous progress expected as guided by the advisor and dissertation committee.

Conditions for Termination of Financial Support

Students may face termination of financial support under the following conditions, pending administrative review by the Department. Depending on the severity of the infraction, the Department Chair —along with input from the Graduate Committee—may recommend *immediate termination*, *termination at the end of the current semester*, or *termination at the end of the following semester*.

1. **Dereliction of Duty** – Includes, but is not limited to:
 - Failure to comply with all university conduct policies.
 - Unexcused absences from assigned responsibilities.
 - Failure to satisfactorily complete GTA responsibilities as defined by the Music Education Department Chair.
2. **Academic Misconduct** – A resolved finding of academic misconduct may result in loss of financial support, with penalties determined in consultation with the Graduate School and/or College of Education and/or School of Music.
3. **Failure to Secure a Dissertation Advisor** – Students must secure a department-approved dissertation advisor at the beginning the first semester of their third year in the program. Students who fail to do so may lose financial support, at the discretion of department.
4. **Loss of Good Academic Standing** – Students placed on academic probation have one semester to return to good standing. Financial support will be terminated if good standing is not restored. Additionally, students who receive more than two grades of 'C' or at least one grade of 'D' or 'F' will undergo a faculty review, which may result in termination of financial support or dismissal from the program.
5. **Failure to Complete Annual Self Reviews** – Doctoral students must complete all required annual progress reviews in a timely manner. Failure to meet deadlines may result in probation and, if unresolved, termination of financial support.
6. **Insufficient Research Progress** – A student's dissertation committee evaluates research progress annually. If the committee determines that progress is inadequate, the student will have one probationary semester (fall, spring, or summer) to address deficiencies while maintaining financial support. Failure to meet expectations by the end of the probationary semester will result in immediate termination of financial support.

Educational Leadership

AEL520 Leadership for Communities

Hours 3

A study of the individual and group leadership skills needed to address issues affecting student learning, family engagement, and community support for school improvement efforts.

AEL521 Leadership for Improvement

Hours 3

Prepares prospective educational administrators working in the grade P-12 setting with instructional leadership skills. The course focuses on learning methods and strategies for program planning, design, implementation, and evaluation.

Higher Education

AHE500 Perspect High Educ Admin

Hours 3

How higher education has been shaped by the major trends in American society, how it has contributed to the development of this country, and what may be expected of higher education in the future. Higher education is also viewed in institutional and conceptual forms from the perspective of students, faculty, and administrators.

AHE503 Learning with Technology in Higher Education
Hours 3

This course provides students with an overview of the main issues surrounding the use of technology for the advancement of teaching in higher education settings. It includes some hands-on experiences designed to enhance the productivity and creativity of learning in both classroom and online environments.

Instructional Leadership

AIL600 Integr Tech Educ & Train
Hours 3

An examination of advanced applications of current and emerging instructional technological applications in a variety of settings and in the context of various fields of study and job environments. Technologies and applications addressed in current course include computers, the Internet, presentation media, and multimedia. Cognitive, product, and skill competencies are included. Cognitive competencies are integrated into product and skills evaluations. Products are required to reflect some competencies, while skills competencies are either observed directly or inferred from the products.

AIL601 Prin Instruct Technology
Hours 3

The doctoral level course provides an introduction to the historical , theoretical and philosophical foundations of the field of Instructional Technology (IT). The course allows students to explore current and emerging instructional technology tools and processes in the context of their domain of interest.

Educational Foundations

BEF503 History Of Amer Educn
Hours 3

An interpretive history of the educational and social movements and conflicts leading to understanding contemporary issues of educational aims, curriculum, teaching methodology, administrative policy, and the professionalization of teaching. Offered in alternate semesters and in summer school.

BEF504 Philosophy Of Educ
Hours 3

An examination into the meaning and purpose of education in light of major philosophical problems of knowledge, value, and reality. Offered in alternate semesters and in summer school.

Computers and Applied Technology

CAT531 Computer Based Instruction
Hours 3

This is an introductory course in the fundamentals of computer applications for educational use. The course explores current and emerging tools and trends for online learning strategies, communication, productivity, presentation, research, and classroom administration.

Instructional Technology

INTE532 Instructional Technology Design
Hours 3

This course provides an introduction to the elements of instructional design and their application to the design of technology-mediated instruction, with a primary focus on blended and online learning.

INTE533 Online Teaching and Learning
Hours 3

This course provides students with knowledge and skills in the methods of online teaching and learning, including the creation of effective online learning environments.

College Teaching Certificate

The Graduate Certificate in College Teaching is a 12-credit (4-course) sequence designed to help graduate students advance their understanding of teaching and learning in a variety of higher education settings. Students enrolled in the certificate program will be immersed in the theory, research, and practice related to college teaching. The intent of the Graduate Certificate in College Teaching is to help professionals better understand the increasingly complex and diversifying features of college teaching while focusing on key instructional and assessment concerns. It also aims to examine many of the issues unique to the professoriate in the United States. Students who complete the Certificate will have it listed on their transcripts.

Interested students should apply through the Graduate School's online application. The time limit to complete the certificate requirements is four years.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Graduate Certificate in College Teaching involves a short list of required courses and an elective related to a specific area of interest. Students also participate in a mentored teaching experience. The coursework includes:

Code and Title		Hours
AHE 503	Learning w/ Tech in Higher Ed	3
AHE 602	Problems In Higher Education	3
AHE 603	College & University Teaching	3
Please select from the following electives:		3
AHE 507	Student Development Theory I	
AHE 610	Academic Culture & Learn	
AHE 644	Sem Acad Progrm Dev Eval	
AIL 602	Electrnc Instruct Design	
AIL 604	Distance Technologies	
BEP 672	Teaching Ed Psych Coll	
BSC 695	Spec Topics Biolog Sci	
COM 501	Intro Tchng Public Speaking (may repeat 3 times)	
COM 505	Intro to Teaching Comm Studies (may repeat 3 times)	
COM 524	Forensics Pedagogy	
COM 551	Instructional Communication	
DNCA 503	Graduate Teaching Methods	
DNCA 565	Science of Dance Training	
FR 512	Practicum Appl Linguist	
GN 514	Teaching Methodology	
HY 600	Teaching History (1 credit hour)	

JCM 536	Teaching Multimedia News
MATH 591	Teaching College Math
NUR 531	Nsg Fac Roles and Resp
NUR 532	Instr Media Nursing Education (prerequisite: NUR 531)
NUR 620	Curriculum Theory & Practice
PY 695	Teaching Of Psychology
SP 502	Pract Appl Linguistics
TH 642	Teaching Acting
TH 643	Teaching Practicum
WS 503	Teaching Gender & Race
or another advisor-approved elective

Educational Leadership, Ed.D.

The EdD is a professional degree designed to meet the needs of individuals seeking to improve their knowledge and skills as educational leaders. The EdD is intended to meet the growing demands that educational leaders must face as they address concerns related to instructional leadership, public accountability, increased globalization, diversity concerns, the emergence of new digital technologies and more. The EdD program is guided by a model of professional inquiry and reflection that emphasizes the development of key decision-making skills. Students examine the core content domains related to organizational theory, data-driven decision-making, law, supervision and evaluation, curriculum design, professional development, school economics, budget planning, and other relevant content areas. Knowledge taken from these domains facilitates the process of framing and critically addressing the problems of practice. The primary purpose of the EdD degree is to advance students' research-informed leadership and practice.

Admissions

Application and Entrance Requirements

The Educational Leadership Ed.D. program is offered online only. Doctoral students are admitted annually. Each applicant should submit a complete application for admission before the deadline of March 1 for fall admission. Applications past the deadline will be considered if space allows or due to exceptional circumstances.

Potential applicants should be aware that admission to the UA doctoral programs is a competitive process and that submitting an application does not guarantee admission. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. A master's degree – A master's degree, earned prior to initial enrollment, from an accredited institution.
2. Reference Letters – The application must include three letters of professional and academic reference letters, including one from a current supervisor, as described in the Graduate School Application Process.
3. Purpose, Rationale and Career Statement – A statement of purpose which addresses the following: (1) the student's rationale for applying for the Ed.D.; (2) a statement regarding career/professional goals; and (3) a statement of how the student's rationale and career goals are consistent with the purpose of the Ed.D. degree as articulated by the Department and Program.
4. Writing Sample – An academic or professional writing sample written by the applicant within the last year that provides evidence of the student's writing ability.
5. Professional Experience – It should be noted that for the Ed.D. degree, experience in teaching and/or leadership are key factors considered in the admission process.
6. An updated résumé.
7. Prior to admission, applicants must provide evidence that they have completed courses in the following areas with the following parameters:
 - Special Education Course. Applicants must have taken a special education course with a grade of 'B' or better.
 - Graduate Level Statistics Research Course. In addition, if applicants have not taken BER 540 Statistical Methods In Educ or an acceptable/pre- approved masters-level equivalent within the last four years with a grade of 'B' or better, then if accepted into the doctoral program, students must complete this course before beginning the 12 hour research requirement.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 69 semester credit hours beyond the Masters degree is required for completion of the Ed.D. program. These 69 hours must consist of the following courses: Educational Leadership Courses (AEL) = 36 hours; Educational Foundations Courses (BEF) = 9 hours; Educational Research (BER) = 12 hours; Dissertation Hours = 12 hours. It should be noted that depending on coursework prior to admission to the Ed.D. program, that prerequisites for more advanced study in educational leadership may be required.

Educational Leadership (AEL) Course Requirements: *36 hours*: Ed.D. students must successfully complete a total of 36 semester hours to qualify for the degree. These requirements must be distributed as follows:

Core Educational Leadership (AEL) Requirements: *15 hours* – All doctoral students in Educational Leadership are required to take the core AEL course requirements at the University of Alabama. The AEL core consists of following 600-level courses:

Code and Title	Hours
Educational Leadership (AEL) Courses (Required Ed.D. Core Courses)	15
AEL 619 Politics Of Education	
AEL 650 Organizational Theory	
AEL 671 Survey Instructnl Superv	
AEL 675 Leadership/Organization Improv	
AEL 682 Lead & Org/Theory & Appl	
AEL Electives ¹	21
AEL 608 Educ Fin Theory/Pract	
AEL 611 Superintendency	
AEL 618 Adv Educational Law	
AEL 630 School Partnerships	
AEL 661 Major Issues and Trends	
AEL 664 Ed Policy/Dynamics of Change	
AEL 697 Seminar in Ed Leadership	
Foundations Courses ²	9
BEF 681 Ethics And Education	
BEF 642 Studies Philosophy Education	
BEF 695 Sem Curriculum Leadership	
Research Courses ³	12
BER 630 Qual Case Study Research	
BER 631 Inqry As Interp: Qual I	
BER 660 Eval I:Theory & Practice	
BER 661 Evaluation 2	
Dissertation	12
AEL 699 Dissertation Research	
Total Hours	69

Footnotes

- ¹ Beyond the AEL 15-hour core requirements, Ed.D. students are required to take 21 hours of AEL electives. All electives must be at the 600 or doctoral level. While the electives available have been identified and scheduled in advance for the Ed.D. cohort, other AEL 600-level courses may be approved by AEL program faculty. Note, this is the exception rather than the rule.
- ² While foundation course requirements for the Ed.D. have been identified and scheduled in advance for each Ed.D. cohort, other BEF 600-level courses may be approved by AEL program faculty. Note, this is the exception rather than the rule.
- ³ Prerequisite Statistics Requirement: BER 540 Statistical Methods In Educ – If students have not taken BER 540 or an acceptable/pre-approved masters-level equivalent within the last four years with a grade of 'B' or better, then students must complete this course before beginning the 12-hour research requirement. This prerequisite *cannot* be used to fulfill the 12-hour Research Requirement. While research course requirements for the Ed.D. have been identified and scheduled in advance for each Ed.D. cohort, other BER 600-level courses may be approved by AEL program faculty. This is the exception rather than the rule.

Transfer Credit

Transfer Parameters on AEL courses – Please note that as of April 2019, the following policies guide the transference of courses into the Ed.D. program:

- Applicants with an Ed.S. in leadership from The University of Alabama – For students with an Ed.S. from The University of Alabama *and* at the discretion of a student's program of study committee, up to 27 hours of the AEL Ed.S. may be counted toward the Ed.D. degree *if* the following parameters are met: (1) the course was completed no more than 5 years from the date of the student's admittance, (2) a grade 'B' or better (note, not a 'B-') was earned in the course, and (3) the course is not an independent study nor a "practicum" type course.¹
- Applicants with an Ed.S. in leadership not from University of Alabama – (*Effective April 1, 2017*) For students who have completed an Ed.S. at institutions other than the University of Alabama *and* at the discretion of a student's Program of Study committee, up to 27 hours of their Ed.S. program may be counted to the Ed.D. degree *if* the following parameters are met: (1) the institution from which the student took these courses is accredited; (2) the course(s) addresses a major curricular component of the Ed.D. program at the University of Alabama as captured in the Program's current array of doctoral AEL courses; (3) the course(s) was completed no more than 5 years from the date of the student's admittance, (4) a grade 'B' or better (note, not a 'B-') was earned in the course(s), and (5) the course is not an independent study nor a practicum course.
- Applicants with an Ed.S. in a specific curricular area of education, or in Teacher Leadership rather than in educational leadership, can also transfer up to 27 Ed.S. credit hours upon advisor approval if the above-mentioned requirements are met.
- All students must take the five core courses regardless of whether or the number of Ed.S. courses transferred into the Ph.D. program.
- Course transfer must be approved and signed by the advisor and submitted prior to or no later than the student's Program of Study is approved.

Transfer Parameters for Research Courses (*Effective April 1, 2012*) – Given the importance of research methods to doctoral study and the propensity of human knowledge to recede if not used on a consistent basis, faculty and students are strongly encouraged to minimize the number of research courses transferred into the doctoral program. Graduate level statistics courses taught by research faculty at other universities may be accepted for transfer only if the following conditions are met: (a) the institution from which the student took these courses is accredited; (b) the course taken was a doctoral level course; (c) the course was completed no more than 5 years from the date of the student's admittance to the UA doctoral program, and (d) the student received a grade of 'B' or better (note, not a 'B-') in the course.

Graduate Information on Transfer Credit (p. 21).

Doctoral Plan of Study

Graduate School information on the Doctoral Plan of Study can be found here (p. 21).

Comprehensive Exam

A comprehensive exam designed to assess the breadth and depth of a student's knowledge and skills is administered twice each academic year. It should be noted that the Doctoral Comprehensive Qualifying Exam is not offered in the Summer. Policies governing this exam are as follows:

1. Purpose of Comp Exam: The comprehensive exam is designed to assess the breadth and depth of a student's knowledge and skills based on the entire range of his/her doctoral course work and consistent with the purpose of the Ed.D. degree, as well as the ability to apply what they have learned to investigate and solve problems, and inform leadership.
2. Logistics of Exam: The exam committee chair selects questions and prepares the exam instruction based on the suggestions from the committee. The chair disseminates the exam instruction to the examination proctor, who coordinates the evaluation, and reports the results. Students may choose either to type or handwrite their examination. While it is appropriate for students to seek information from professors on the general domains to be examined, students should not solicit nor be given specific information regarding about the exam. Unless specified otherwise, the exam often takes place in October and March each year. Students are required to take and successfully pass this exam before they can formally begin the dissertation process and register for dissertation research hours (AEL 699 Dissertation Research).
3. Requirements for Taking Exam: Before sitting for the Comprehensive Exam, the following parameters must be met by the student:
 - Approved Program of Study – Students cannot sit for the Comprehensive exam unless his/her Program of Study has been both completed and officially approved.
 - Completed all AEL course requirements – Students cannot sit for the Comprehensive Exam unless they have completed all AEL course requirements (AEL core + electives) or are in the last semester of doing so.
 - Removal of all Incompletes from Academic Record – Students cannot sit for the Comprehensive Exam unless they have removed all Incompletes ('I') from their academic record.
 - Completion of Comprehensive Exam Application Form – Students cannot sit for the Comprehensive Exam unless they have completed and submitted the *Request To Take Comprehensive Exam Form*.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

Students are admitted to candidacy after they pass the comprehensive exam.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Enrollment Policy

Graduate information on Continuous Enrollment (p. 21).

Dissertation Requirements

Dissertation Research Requirements: *12 hours*: Ed.D. students are required to complete a minimum of 12 hours of AEL 699 Dissertation Research.

- Passing of Comprehensive Exam required – Students cannot register for AEL 699 Dissertation Research until after they have passed the Doctoral Comprehensive Exam.

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

A minimum of two academic years of graduate study beyond the master's degree is required for completion of Ed.D. degree.

Graduate School information on Time Limits (p. 21).

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence information.

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

The doctoral program faculty will consider, select, and nominate students for the program's Graduate Research Assistantships and for the fellowships offered by the Graduate School. Students do not need to apply for this funding. Performance expectations for students who receive these assistantships and scholarships are consistent with those specified in the Graduate Catalog.

Accepted graduate students are encouraged to apply for College of Education scholarships and scholarships offered through UA Online.

Graduate School information on Financial Assistance (p. 254).

Educational Leadership, Ed.S.

The EdS degree in educational leadership requires a minimum of 30 hours and provides coursework for those seeking **Class AA Instructional Leader** certification or **Class AA Teacher Leader** certification. Additionally, a concentration in School Library Media Specialist, leading to **Class AA Library Media Specialist** certification, is also offered.

Admission and degree requirements for the Graduate School and for the College of Education are detailed in the relevant sections of this catalog. Admission and degree requirements are subject to change and may be under revision at the time of publication. Please check with the Office of Student Services and Certification or the Department of Educational Leadership, Policy, and Technology Studies for the most current information.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Admissions

See the Admission Criteria section of this catalog for more information.

Class AA Instructional Leader (P-12) Certification

To be considered, applicants must qualify for regular admission to the program.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, applicants must:

- 1. hold a valid Alabama Class A Professional Educator certificate in Instructional Leadership or a valid Class A Professional Leadership certificate.
- 2. meet one of the following criteria:
 - currently serving as a superintendent, assistant or associate superintendent, principal, assistant principal, supervisor (any subject and/or grade level), administrator of career and technical education, coordinator or evaluator;
 - three years of experience in an instructional leadership position; OR
 - demonstrate each of the abilities in the Class A Instructional Leadership standards.

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Class AA Teacher Leader (P-12) Certification

To be considered, applicants must:

- 1. hold a valid master's level professional educator certificate in any teaching field or area of instructional support,
- 2. have a minimum of three full years of full-time teaching experience in a P-12 setting, and
- 3. submit a portfolio containing:
 - a. three (3) letters of recommendation, including one from the applicant's current principal
 - b. a copy of the applicant's professional development transcript from PowerSchool
 - c. evidence of the ability to positively affect student achievement [This should include things that the applicant has done to help improve student learning.]
 - d. evidence of collaborative leadership potential [This should include any formal and informal leadership role(s) the applicant has held.]
 - e. a current resume

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. Admission forms and requirements, specific program parameters, departmental policies and contact information can be found at the departmental website. Students should consult with their advisors before registering each semester.

Curricular Requirements

Class AA Instructional Leader (P-12) Certification

Individuals must meet ALSDE requirements for "unconditional admission" to the Class AA Instructional Leadership program or the institution's Class AA Teacher Leader program before enrolling in ANY instructional leadership courses in the program.

This course listing applies to those who begin this program June 13, 2024, and thereafter. A comprehensive exam is required, and candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. Students should consult with their advisors before registering each semester.

Transfer Credit

Courses taken for Class A certification and credits over six years old cannot be counted toward this degree.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam

Students must complete a comprehensive assessment during their last semester of coursework. Assessment dates are announced in the first week of each semester. Assessment structure is based on each student's course of study. Students will have a minimum of 14 calendar days to complete the assessment. Submissions are assessed by members of the program committee.

Graduate School information on Comprehensive Exams (p. 18).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 18).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 18).

Certification

To be awarded Alabama Class AA Instructional Leader certification, students must:

- earn a passing score on a comprehensive assessment covering the content of the program,
- maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C,
- hold a valid, appropriate, prerequisite Alabama certificate, and
- complete the State Department of Education certification application forms

To be awarded Alabama Class AA Teacher Leader certification, students must:

- earn a passing score on a comprehensive assessment covering the content of the program,
- maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C, and
- complete the State Department of Education certification application forms

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. Admission forms and requirements, specific program parameters, departmental policies and contact information can be found at the departmental website.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Class AA School Library Media Specialist (Concentration in School Library Media Specialist)

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application requires valid, master's level certification as a School Library Media Specialist and at least two full years of full-time acceptable P-12 professional educational work experience. Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Changes to Certification Programs

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. For the most current information, please check with the Office of Student Services and Certification or the Program in School Library Media.

Curricular Requirements

A minimum of 30 hours of appropriate work beyond the MA degree and a passing score on a comprehensive assessment are required for the educational specialist degree.

This course listing applies to candidates having appropriate prior certification. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. At least 15 semester hours of the 30 semester hour total must be at the 600-level. All requirements must be completed during the 6 years preceding the date on which the degree is to be awarded. Students should consult with their advisors before registering each semester.

Transfer Credit

Classes taken for Class A certification and credits over six years old cannot be counted toward this degree.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam

Students must complete a comprehensive assessment during their last semester of coursework. Assessment dates are announced in the first week of each semester. Assessment structure is based on each student's course of study. Students will have a minimum of 14 calendar days to complete the assessment. Submissions are assessed by members of the program committee.

Graduate School information on Comprehensive Exams (p. 18).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 18).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 18).

Certification

To be awarded Alabama Class AA School Library Media Specialist certification, students must:

- earn a passing score on a comprehensive assessment documenting mastery of the curriculum
- maintain a GPA of at least 3.5 on all courses with no grade below a C
- hold valid, prerequisite Alabama Class A School Library Media Specialist certification
- complete an application for certification through the Alabama State Department of Education

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Accepted graduate students are encouraged to apply for College of Education scholarships and scholarships offered through UA Online.

Graduate School information on Financial Assistance (p. 254).

Educational Leadership, MA

A Master of Arts degree (30 semester hours) in educational leadership leading to Alabama Class A Instructional Leader certification provides students with initial certification in Alabama for Instructional Leadership in P-12 schools. The coursework provides students with a thorough knowledge and understanding of the central concepts, tools of inquiry, and structures in the field of instructional leadership. Candidates learn to work with students, families, and communities in ways that reflect the professionalism and expertise expected of educational leaders. The program content is consistent with state and national standards. A *reduced-hour* option to earn Class A Instructional Leader certification is available for applicants who qualify.

An Overseas master's degree program in Educational Leadership is available to overseas students. The Overseas program does not lead to professional licensure or certification.

The Graduate Catalog is published annually. For certification programs, State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Admissions

See the Admission Criteria section of this catalog for more information.

Admission requirements for the MA in Educational Leadership with Class A Instructional Leader certification

Applicants must earn regular admission to the Instructional Leadership program. In addition to meeting admission requirements of the Graduate School and the College of Education, applicants must meet the following additional requirements for admission to the Educational Leadership/MA program leading to Class A Instructional Leader certification:

- a valid Alabama Class B professional educator certificate in a teaching field or a valid Alabama Class A professional educator certificate in a teaching field or instructional support area,
- Experience Option One: a minimum of three full years (or six full semesters) of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,

OR

Experience Option Two: Alabama Class A certification as a library media specialist or school counselor, seven full years of full-time employment, in the same school system, as a library media specialist or school counselor in a P-12 setting if admitted Spring 2022 or thereafter,

- the submission of a portfolio before the interview,
- an application to the educational leadership department,
- passing an interview conducted by the program committee, and
- submission of a writing sample

The application portfolio must include:

- a. three letters of recommendation, one of which must be from the applicant's principal or direct supervisor; applicants applying under Experience Option Two must provide a written recommendation from the current employing superintendent

- b. a completed copy (all forms) of the most recent performance evaluation including the professional development component, if available
- c. a copy of the candidate's professional development transcript from PowerSchool
- d. evidence of ability to improve student achievement
- e. evidence of collaborative leadership potential [This should include any formal and informal leadership role(s) held.]
- f. a summary of the candidate's reasons for pursuing the certification in instructional leadership
- g. a summary of what the candidate expects from the certification program
- h. a current resume

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Admission Requirements for the Reduced-Hour Option leading to Class A Instructional Leader (certification only)

Applicants must earn regular admission to the Instructional Leadership program. Individuals holding a valid, Alabama Class A professional educator certificate may apply for admission to the reduced-hour option to pursue certification only.

Minimum requirements include:

- a valid Alabama Class A professional educator certificate in a teaching field or instructional support area,
 - a minimum of three full years (or six full semesters) of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,
 - Experience Option One: a minimum of three full years of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,
- OR
- Experience Option Two: Alabama Class A certification as a library media specialist or school counselor, seven full years of full-time employment, in the same school system, as a library media specialist or school counselor in a P-12 setting if admitted Spring 2022 or thereafter,
- a graduate GPA of 3.0 or above on a 4.0 scale,
 - submission of a portfolio before participation in the assessment process, which will include an interview, and
 - submission of a writing sample.

The application portfolio must include:

- a. three letters of recommendation, one of which must be from the applicant's principal or direct supervisor; applicants applying under Experience Option Two must provide a written recommendation from the current employing superintendent

- b. a completed copy (all forms) of the most recent performance evaluation including the professional development component, if available
- c. a copy of the candidate's professional development transcript from PowerSchool
- d. evidence of ability to improve student achievement
- e. evidence of collaborative leadership potential [This should include any formal and informal leadership role(s) held.]
- f. a summary of the candidate's reasons for pursuing the certification in instructional leadership
- g. a summary of what the candidate expects from the certification program
- h. a current resume

Applicants to the reduced-hour option must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Admission Requirements for the Non-Certification Overseas Program for Educational Leadership, MA

To be considered for regular admission to an International Programs graduate program in the College of Education, a student must meet the minimum Graduate School admission requirements

**Curricular Requirements
MA in Educational Leadership with Class A Instructional Leader certification**

Individuals must meet ALSDE requirements for "unconditional admission" before enrolling in ANY instructional leadership courses in the program.

This course listing applies to those who begin this program June 13, 2024, and thereafter. A minimum of 30 hrs of appropriate graduate work, successful completion of a comprehensive exam, and passing scores on the appropriate Praxis subject assessment are required. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Transfer Credit

In compliance with regulations established by the Alabama State Department of Education and the Alabama Administrative Code, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

Graduate School information on Transfer Credit (p.).

Comprehensive Exam

Students must complete a comprehensive assessment during their last semester of coursework. Assessment dates are announced in the first week of each semester. Assessment structure is based on each student's course of study. Students will have a minimum of 14 calendar days to complete the assessment. Submissions are assessed by members of the program committee.

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

For certification programs, field experience objectives, including progression from observation through participation to leadership behaviors are embedded in each course and assessed by the faculty member of record for each course. This collaborative model requires that LEAs provide release time for candidates and for universities to work with LEAs so that the candidate's experiences are comprehensive and valuable. The internship experiences are the total sum of practical experiences, either field or clinical, as part of every course taken for preparation, plus a residency. The residency is uninterrupted service in an active P-12 school with students present for the equivalent of ten full days. For students in the Class A Instructional Leader program, internships are coordinated through the Department of Educational Leadership, Policy, and Technology Studies.

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Time Limits for Degree Completion

Graduate School information on Time Limits (p.).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Praxis Requirement

For the Class A Instructional Leader program (MA and reduced-hour option), a passing score on the appropriate Praxis subject assessment is required for certification. This requirement does not apply to the Overseas program.

Certification

To be awarded Alabama Class A Instructional Leader certification, students must:

- maintain a GPA of at least 3.25 (effective July 1, 2017) on all courses with no grade below a C,

- receive a passing score on a comprehensive assessment documenting mastery of the curriculum,
- successfully complete the internship and residency,
- receive a passing score on the required Praxis subject assessment,
- complete a survey of special education course (SPE 300 Survey Spec Accomd Stratg or SPE 500 Intro Exc Childr/Youth) or its equivalent.

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

The Overseas program does not lead to professional certification.

Accepted graduate students are encouraged to apply for College of Education scholarships and scholarships offered through UA Online.

Graduate School information on Financial Assistance (p. 254).

Educational Leadership, Ph.D.

The purpose of the Doctor of Philosophy (Ph.D.) degree programs is to prepare students for a career in the professoriate as well as for work as a policy analyst, researcher, consultant, or school practitioner. The Ph.D. degree in Educational Leadership requires extensive contact with and immersion in the university research and teaching culture.

The Ph.D. program emphasizes the development of theoretical thinking and knowledge applications in the field of educational leadership.

Two delivery formats of Ph.D. programs in Educational Leadership are offered: online and on-campus.

Admissions

Doctoral students are admitted annually. Each applicant should submit a complete application for admission before the deadline of **March 1** for fall admission. (Applications past the deadline will be considered if space allows or due to exceptional circumstances).

Potential applicants should be aware that admission to the UA doctoral programs is a competitive process and that submitting an application does not guarantee admission. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A master's degree – A master's degree, earned prior to initial enrollment, from an accredited institution.
- Reference Letters – The application must include three letters of professional and academic reference, including one from a current supervisor.

- Purpose, Rationale, and Career Statement – Students who apply to the Ph.D. degree must provide a convincing written rationale as to why they wish to pursue this degree, and how its focus/purposes are consistent with their career goals. Applicants whose interests are deemed inconsistent with this focus/purposes of Ph.D. degree—yet who are otherwise qualified for doctoral study—will be encouraged to apply to the Department's Ed.D. program. This purpose statement must address the following: (1) the student's rationale for applying for the Ph.D.; (2) a statement regarding career and professional goals; and (3) a statement of how the student's rationale and career goals are consistent with the purpose of the Ph.D. degree as articulated by the Department and Program.
- Professional Experience – While for the Ed.D. degree, experience in teaching and or leadership are key factors considered in the admission process, these factors are desirable yet less important for the Ph.D. degree.
- Writing Sample – Applicants are required to include a recent sample (within the last year) of their academic or professional writing.
- An updated resume.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 66 semester credit hours beyond the master's degree is required for completion of the Ph.D. program. These hours are distributed as follows:

- Students must successfully complete the 15-hour AEL Core plus 9 additional hours of AEL electives or the advisor-approved equivalent of AEL leadership electives.
- A 9-hour set of Education Foundation courses is also required. Students may take any graduate-level BEF or BEP course and/or any non-research methods courses outside of the AEL Program to fulfill this requirement.
- Students must also complete 15 semester hours of Educational Research (BER) and enroll in a minimum of 18 hours of dissertation AEL 699 Dissertation Research.

Prerequisites

Prior to admission, applicants must provide evidence that they have completed a course in the following areas with the following parameters:

- Special Education Course – Applicants must have taken a special education with a grade of 'B' or better.
- Graduate Level Statistics Research Course – In addition, if applicants have not taken BER 540 – Quantitative Methods I (Intro to Statistical Methods) or an acceptable pre-approved masters-level equivalent within the last four years with a grade of 'B' or better, then if accepted into the doctoral program, students are required to complete this course before beginning the 12-hour research requirement.

Transfer Credit

Transfer Parameters on AEL courses – Please note that as of Fall 2019, the following policies guide the transference of courses into the Ph.D. program:

- Applicants with an Ed.S. Degree from The University of Alabama – For students with an Ed.S. from the University of Alabama and at the discretion of a student's advisor and program of study committee, up to 21 hours (including Foundation and Research courses) of the AEL Ed.S. may be counted toward the Ph.D. degree upon advisor approval if the following parameters are met: (1) the course was completed no more than 5 years from the date of the student's admittance, (2) a grade 'B' or better (note, not a 'B-') was earned in the course, and (3) the course is not a "practicum" type course.¹
- Applicants with an Ed.S. Degree not from University of Alabama – (Effective April 1, 2017) For students who have completed an Ed.S. at institutions other than the University of Alabama and at the discretion of a student's Advisor and Program of Study committee, up to 21 hours (including Foundation and Research courses) of their Ed.S. program may be counted toward the Ph.D. degree upon advisor approval if the following parameters are met: (1) the institution from which the student took these courses is accredited; (2) the course(s) addresses a major curricular component of the Ph.D. program at the University of Alabama as captured in the Program's current array of doctoral AEL courses; (3) the course(s) was completed no more than 5 years from the date of the student's admittance, (4) a grade 'B' or better (note, not a 'B-') was earned in the course(s), and (5) the course is not a practicum course.
- Applicants with an Ed.S. in a specific curricular area of education, or in Teacher Leadership rather than in educational leadership, can also transfer up to 21 Ed.S. credit hours upon advisor approval if the above-mentioned requirements are met.
- All students must take the five core courses regardless of whether or the number of Ed.S. courses transferred into the Ph.D. program.
- Course transfer must be approved and signed by the student's advisor and submitted prior to or no later than the student's Program of Study is approved.

Footnotes

- ¹ Nine hours of AEL coursework may be applied to the PhD AEL electives requirement; 3 hours of Foundations coursework may be applied to the PhD Foundations requirement; 3 hours of Research coursework may be applied to the PhD Research requirement; and an additional 6 hours of AEL or other coursework may be applied to the PhD Foundations requirement.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study

Graduate School information on the Doctoral Plan of Study can be found here (p. 21).

Comprehensive Exams

A comprehensive exam designed to assess the breadth and depth of a student's knowledge and skills is administered twice each academic year. The Doctoral Comprehensive Qualifying Exam is not offered in the summer.

Purpose of Comp Exam: The comprehensive exam is designed to assess the breadth and depth of a student's knowledge and skills based on his/her doctoral course work and consistent with the purpose of the Ph.D.

degree, as well as the ability to apply what they have learned from their coursework to investigate and solve problems, and inform leadership.

Logistics of Exam: The exam committee chair selects questions and prepares the exam instruction based on the suggestions from the committee. The chair disseminates the exam instruction to the examination proctor, who coordinates the evaluation and reports the results. Students may choose either to type or handwrite their examination. While it is appropriate for students to seek information from professors on the general domains to be examined, students should not solicit nor be given specific information regarding about the exam. Unless specified otherwise, the exam often takes place in October and March each year. Students are required to take and successfully pass this exam before they can formally begin the dissertation process and register for dissertation research hours (AEL 699 Dissertation Research).

Requirements for Taking Exam: Before sitting for the Comprehensive Exam, the following parameters must be met by the student:

- Approved Program of Study – Students cannot sit for the Comprehensive exam unless a Program of Study has been both completed and officially approved.
- Completed all AEL course requirements – Students cannot sit for the Comprehensive Exam unless they have completed all AEL course requirements (AEL core + electives) or are in the last semester of doing so.
- Removal of all Incompletes from Academic Record – Students cannot sit for the Comprehensive Exam unless they have removed all Incompletes ('I') from their academic record.
- Completion of Comprehensive Exam Application Form – Students cannot sit for the Comprehensive Exam unless they have completed and submitted the Request to Take Comprehensive Exam Form.

Application for Graduation

Information on the Application for Graduation (p. 21).

The doctoral program faculty will consider, select, and nominate students for the program's Graduate Research Assistantships and for the fellowships offered by the Graduate School. Students do not need to apply for this funding. Performance expectations for students who receive these assistantships and scholarships are consistent with those specified in the Graduate Catalog.

Students who are interested in or need other assistantships or funding are encouraged to apply for College of Education scholarships and explore opportunities available through the student employment websites (Careers at University of Alabama (ua.edu); Job Search (ua.edu)).

In most cases, only on-campus Ph.D. students are eligible for funding.

Graduate School information on Financial Assistance (p. 254).

Higher Education Administration, Ed.D.

The Higher Education Administration Program offers the EdD program via two options. One option is an EdD on our main campus offered in Tuscaloosa. This EdD degree program provides students both in-person and online courses and opportunities to take advantage of all of the University's excellent resources, with flexible schedule options. The EdD degree provides academic preparation and professional development for those individuals who have or will assume upper-level administrative and executive roles in two- and four-year colleges and universities, state and federal post-secondary education agencies and other post-secondary education-related organizations. The curriculum is designed around the key competencies necessary to assume a leadership role, with courses in program assessment and evaluation, policy, finance, organizational change and student affairs administration.

The second option for an EdD within HEA is via an executive format. The Executive EdD program is designed to meet the unique needs of experienced professionals seeking a doctorate in higher education. The program helps students develop the knowledge, skills, and abilities necessary to advance in leadership positions by combining theoretically-rich studies with an applied research approach. The Executive EdD is a cohort program that allows students to build an immediate network of colleagues. Intensive coursework and a carefully-structured dissertation process allow students to complete the degree in nine semesters while maintaining their professional positions. The Executive EdD program's alternative format meets all the expectations of a rigorous higher education program, including the credit hour and degree requirements stipulated by the College of Education and the Graduate School.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- A one-page statement of purpose for pursuing the degree
- Vita or resume
- Writing Sample: A five-page writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should

demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education, but it should be single-authored to demonstrate the student's own work.

Deadlines

- The application deadline for the Main Campus program is January 15th.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The EdD requires 66 semester hours beyond the master's degree. These 66 semester hours include at least 54 hours of coursework and 12 hours of dissertation research. The plan of study also includes 12 semester hours in theoretical foundations and a minimum of 12 semester hours in research methods.

The Executive Ed.D. program is an accelerated program designed to be completed in 3 academic years (9 semesters). Students enroll in 9 hours of coursework per semester for 6 semesters during the first two years of study and 12 dissertation hours during the final year.

Total Hours		66

Transfer Credit

The HEA program accepts a maximum of 12 credit hours of transfer from other post-graduate study, with approval of advisor on your plan of study and acceptance from the Graduate School after all forms are completed and approved.

Given its specialized cohort nature, no transfer of credit is allowed with the Executive Ed.D.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Comprehensive Exams

Students take the comprehensive exam in the last semester in which they are completing their required coursework for the Ed.D. program, unless otherwise approved by the program coordinator. Applying for the comprehensive exam requires you indicate your dissertation chair who must both agree to chair your study and agree in principle on the nature of that study. Doctoral students complete a take-home exam question which is followed by an oral defense at the end with their dissertation chair and one other faculty member.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

Once students pass the comprehensive exam, they will be considered a candidate and can enroll in dissertation hours, based on the approval of faculty.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Continuous enrollment in dissertation hours after successful completion of the comprehensive exam is required, but not immediately after the comprehensive exam.

Once doctoral dissertation (AHE 699) hours have begun, however, the following policy applies. Once a student has begun dissertation hours, if a student fails to register in either the fall or spring, it constitutes lack of continuous enrollment. Failure to register for any two aggregate terms after initial AHE 699 enrollment will result in the withdrawal of their chair from their role. The chair's role will cease, the student will not be allowed to enroll in further AHE 699 hours with that chair, and the student will need to identify a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed that another faculty member will agree to take the student on, which could mean discontinuation in the program. Failure to enroll in any four aggregate terms once beginning AHE 699 will result in the immediate withdrawal of the student from the program and will require a readmission to the program with a detailed timeline appended to the request. Please note that it is highly unlikely the program would consider this request favorably, and requests after the 6th year will not be considered.

Graduate School information on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Ed.D. students complete a dissertation, with the guidance of a faculty chair, after all course work and comprehensive examinations have successfully been completed. A student should invite a faculty member to chair and secure her/his/their agreement to do so prior to signing up for that faculty member's section of AHE 699 Dissertation Research. Once a student begins taking dissertation hours, continuous enrollment must be maintained until the dissertation project is completed and approved by the Graduate School. Students should not enroll for hours during the summer without having gained prior approval from the dissertation chair.

The dissertation committee consists of at least four faculty: a dissertation chair and four members. While the dissertation chair may be a member of another program in the College of Education, students are encouraged to work with a Higher Education faculty member when possible. At least three members of the committee (may include chair) must be Higher Education Faculty members. At least one member must be from outside of the Department of Educational Leadership, Technology, and Policy Studies.

The dissertation proposal generally comprises the first three chapters of the dissertation. The student works carefully with a dissertation chair and submits work to a committee for review. The committee must have 10 working days prior to the proposal defense to review the document. An oral defense follows, with all committee members present to review and critique the proposal.

The dissertation defense comprises all chapters of a dissertation. The committee must have 10 working days prior to the dissertation defense to review the document. An oral defense follows, with all committee members present to review and critique the proposal.

AHE faculty are not available to work on dissertations during the summer terms. This means students should not enroll in AHE 699 hours during the summer. The only exception to this is students in the Executive Ed.D. cohort program, which requires Summer enrollment. Note that for Executive Ed.D. students, faculty have a "quiet" period of June 1 - August 15, during which time they do not respond to dissertation issues and requests.

Similarly, faculty do not work on University holidays or breaks; for documents requiring two weeks for review before defense, for example, the two required weeks do not include official university breaks as part of that time. Requests for meetings or submissions requesting reading or review of written work submitted over university holidays will not be honored. Doctoral students need to keep this in mind in planning their timeline and schedule to allow for successful completion of their dissertation.

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

To ensure adequate progress and allow for a defensible document to be completed with the edits needed post-defense, the Higher Education Administration faculty require the following progress checkpoints for doctoral degree completion.

No later than the end of year 7:

- Doctoral Committee formation formally completed with Graduate School

- Successful dissertation proposal defense and IRB approved

- Admission to Candidacy successfully completed with the Graduate School

No later than the end of year 8:

- Data collection complete and complete draft in chair's hands

Before the end of the penultimate term of the student's Graduate School approved timeline:

- Successful final dissertation defense

Failure to meet any of these deadlines will mean the student has been unsuccessful in making substantial and adequate progress in the program toward degree completion, and the student will be unable to continue in the program. Please note, there will be no extension requests

supported for failure to meet any of these deadlines. If the student has medical, family, or other issues causing difficulty, they should discuss official leave / stopping their clock with the Graduate School registrar's office (see **Withdrawals and Leave of Absence Information**).

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Adequate Progress

Adequate progress includes but is not limited to the following: completion of Graduate School requirements in a timely fashion, completion of dissertation work in a timely fashion, and completion of key advancement checkpoints in a timely fashion.

It is the student's responsibility to ensure all documents, forms, proof of progress, admission to candidacy, formation of committee, application to graduation, etc., are appropriately filed, received, and accepted by the Graduate School. Students are advised to check with the Graduate School registrar's office to ensure they comply with all requirements, including completing all necessary coursework is correctly and appropriately noted and accepted for completion of degree requirements. Failure to complete any of the Graduate School requirements in a timely fashion is deemed inadequate progress, and the student must complete them before being allowed to enroll in further dissertation hours. As noted above, if a student fails to register for dissertation hours in two terms (not including summer, excepting Executive EdD students), the chair's role will cease, and the student will need to seek a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed a second chair will agree to take the student on, and the student's program options may be over.

At any point in the dissertation process after successful completion of comps and beginning AHE 699 enrollment, if there are two consecutive semesters in which doctoral students fail to submit substantive written progress on their dissertation, their chair will have one of two options:

1. Require the student to complete and sign an agreed upon completion schedule. If at any future point the student fails to meet checkpoints on the schedule, the chair's role will cease, and the student will need to seek a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed another faculty member will agree to take the student on, and the student's program options may be over.
2. The chair may decide to end their role as chair. As such, the chair's role will cease, and the student will need to seek a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed another faculty member will agree to take the student on, and the student's program options may be over.

To ensure adequate progress and allow for a defensible document to be completed with the edits needed post-defense, the Higher Education Administration faculty require the following progress checkpoints for doctoral degree completion.

No later than the end of year 7:

Doctoral Committee formation formally completed with Graduate School

Successful dissertation proposal defense and IRB approved

Admission to Candidacy successfully completed with the Graduate School

No later than the end of year 8:

Data collection complete and complete draft in chair's hands

Before the end of the **penultimate** term of the student's Graduate School approved timeline:

Successful final dissertation defense

Failure to meet any of these deadlines will mean the student has been unsuccessful in making substantial and adequate progress in the program toward degree completion, and the student will be unable to continue in the program. Please note, there will be no extension requests granted for failure to meet any of these deadlines. The provision of nine years for doctoral completion constitutes a two-year extension over time previously allowed. As such, no further extensions or allowances will be sought.

Higher Education Administration, MA

The Master of Arts degree in higher education is offered on the Tuscaloosa campus and online. The Master of Arts is a 36-hour degree program designed for students seeking to enter into a range of professional careers in postsecondary education. The program follows standards and guidelines taken from the Council for the Advancement of Standards in Higher Education, and provides courses in foundational studies, professional studies, supervised practice, research methodology and elective study.

The campus program partners with staff in Student Life and Academic Affairs to provide professional development opportunities inside and outside of the classroom experience. An internship is required for students in the campus program. The online program offers courses in grant writing, technology, and higher education assessment.

Admissions

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Higher Education Administration, MA (Main Campus)

Application deadline: January 15

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- three letters of recommendation
- a one-page statement of purpose for pursuing the degree
- updated vita or résumé
- a five-page writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education.

Admission Requirements for Higher Education Administration, MA (Distance Learning - Online)

Application Deadlines:

- July 15 - fall admission
- April 15 - summer admission
- November 1 - spring admission

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- three letters of recommendation
- a one-page statement of purpose for pursuing the degree
- updated vita or résumé
- a five-page writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education.

Curriculum Requirements

Higher Education Administration, MA (Main Campus)

One plan is offered for the master's degree. Candidates for the master's degree must earn a minimum of 36 total semester hours of credit.

The Capstone Seminar in Higher Education (AHE 593 Student Affairs Capstone Sem) is the required culminating experience for the program.

The 36-hour degree program is designed for students seeking to enter a range of professional careers in postsecondary education. The program includes courses in foundational studies, professional studies, supervised practice, and research methods. As a rule, all master's students are required to complete a capstone seminar.

Unless substitutions are approved by the student's faculty advisor, all of the following courses are required for the award of the MA in Higher Education Administration.

All candidates will be required to participate successfully in a seminar or problem course that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Higher Education Administration, Ph.D.

The Higher Education Administration Program offers a PhD program in Tuscaloosa only.

The PhD degree prepares students to assume scholarly roles in higher education. The PhD program emphasizes working with faculty in one-on-one settings with students participating in a mentored teaching and research sequence. Students investigate and contribute to a body of knowledge that informs higher education policy and practice at institutional, statewide, national, and international levels.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- A one-page statement of purpose for pursuing the degree
- Vita or resume
- Writing Sample: A five-page (minimum) writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education, but it should be single-authored to demonstrate the student's own work.

Application Deadline

- Doctor of Philosophy (PhD) in Higher Education: January 15.
Qualified students interested in graduate assistantships should have all application materials by this date.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The PhD requires 72 semester hours beyond the master's degree. These 72 semester hours include at least 54 hours of coursework and 18 hours of dissertation research. The program of study also includes 12 semester hours in theoretical foundations and a minimum of 12 semester hours in research methods. Students have a core of courses that are required, and then both breadth and depth options to build the rest of their degree requirements as noted below.

Code and Title		Hours
Program Core (24 hours)		
AHE 601	Professional Sem High Ed	3
AHE 603	College & University Teaching	3
AHE 610	Academic Culture & Learn	3
AHE 640	Organizational Change	3
AHE 645	Higher Ed/SA Assessment	3
AHE 670	Higher Education Policy	3
AHE 685	Higher Ed in the US	3
BEF 653	Studies in Higher Ed History *	3
AHE Elective Track (12 hours)		12
Students are required to take an additional 9 semester hours in ONE of the below AHE elective tracks, and have another 3 hours of their own choosing in AHE.		
Teaching/Academic Affairs Track:		
AHE 503	Learning w/ Tech in Higher Ed	
AHE 602	Problems In Higher Education	
AHE 644	Sem Acad Progm Dev Eval	
AHE 688	Mentored Teaching	
Orgs/Contexts Track:		
AHE 510	The Community College	
AHE 530	Law & Higher Education	
AHE 540	Org and Governance	
AHE 560	Comparatv Higher Eductn	
AHE 602	Problems In Higher Education	
AHE 621	Power Politics Change	
Admin/Leadership Track:		
AHE 505	Grant/Project/Res in HigherED	
AHE 521	Student Affairs	
AHE 550	Financing Higher Eductn	
AHE 625	Community College Leadership	
Identities/Equity Track:		
AHE 507	Student Development Theory I	
AHE 520	Student In Higher Eductn	
AHE 602	Problems In Higher Education (Impact of College on Students)	
AHE 602	Problems In Higher Education (HBCUs and HSIs)	
Integrative Track:		
AHE 500	Perspect High Educ Admin	
AHE 592	Internship in Higher Education	
AHE 593	Student Affairs Capstone Sem	
AHE 689	Mentored Research	
Research Courses		12
AHE 680 is a required research course offered within the program; this should be taken as students prepare to use literature to build their dissertation research design, and thus be taken later in the program. Students should discuss a course sequence with the advisor and select 9 further hours from BER courses. Suggested courses include an introduction to quantitative and qualitative design, plus and advanced courses in either quantitative or qualitative research depending on your best fit, after discussion with your advisor on your plan of study.		
AHE 680	Readings in HE	
BER 540	Statistical Methods In Educ	

BER 631 Inqny As Interp: Qual I	
Theoretical Foundations	3
BEF 653 Studies in Higher Ed History is required and counts toward the 6-hour Foundations requirement as well as fulfillment of the programmatic core; it is already applied toward total degree credit hour requirements above. Students should discuss additional course options with the advisor prior to registration. A theoretical foundations course may be selected from BEF courses, or any courses outside the department, excepting research method courses, with approval of advisor on your plan of study.	
Integrative Capstone	
PhD students are required to take AHE 690 in their final term/the term in which they are taking their comprehensive exam. This ensures a more seamless flow from coursework to dissertation processes.	
AHE 690 Direct Doctoral Study	3
Dissertation Research	18
AHE 699 Dissertation Research	
Total Hours	72

Transfer Credit

The HEA program accepts a maximum of 12 credit hours of transfer from other post-graduate study, with approval of advisor on your plan of study and acceptance from the Graduate School after all forms are completed and approved.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study

Graduate School information on the Doctoral Plan of Study c (p. 21)an be found here (p. 21).

Comprehensive Exam

Students take the comprehensive exam in the last semester in which they are completing their required coursework for the PHD program, unless otherwise approved by the program coordinator. Applying for the comprehensive exam requires you indicate your dissertation chair who must both agree to chair your study and agree in principle on the nature of that study. Doctoral students complete a take-home exam question which is followed by an oral defense at the end with their dissertation chair and one other faculty member.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy

Once students pass the comprehensive exam, they will be considered a candidate and can enroll in dissertation hours, based on the approval of faculty.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Continuous enrollment in dissertation hours after successful completion of the comprehensive exam is required, but not immediately after the comprehensive exam. See Graduate School policy for doctoral hours.

Once doctoral dissertation (AHE 699) hours are begun, however, the following policy applies. Once a student has begun dissertation hours, if

a student fails to register in either the fall or spring, it constitutes lack of continuous enrollment. Failure to register for any two aggregate terms after initial AHE 699 enrollment will result in the withdrawal of their chair from their role. The chair's role will cease, the student will not be allowed to enroll in further AHE 699 hours with that chair, and the student will need to identify a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed that another faculty member will agree to take the student on, which could mean discontinuation in the program. Failure to enroll in any four aggregate terms once beginning AHE 699 will result in the immediate withdrawal of the student from the program and will require a readmission to the program with a detailed timeline appended to the request. Please note that it is highly unlikely the program would consider this request favorably, and requests after the 6th year will not be considered.

Graduate School information on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Ph.D. students complete a dissertation, with the guidance of a faculty chair, after all course work and comprehensive examinations have successfully been completed. A student should invite a faculty member to chair and secure her/his/their agreement to do so prior to signing up for that faculty member's section of AHE 699 Dissertation Research. Once a student begins taking dissertation hours, continuous enrollment must be maintained until the dissertation project is completed and approved by the Graduate School. Students should not enroll for hours during the summer without having gained prior approval from the dissertation chair.

The dissertation committee consists of at least four faculty: a dissertation chair and four members. At least three members of the committee (may include chair) must be Higher Education Faculty members. At least one member must be from outside of the Department of Educational Leadership, Technology, and Policy Studies.

There are two options for dissertation, the traditional five-chapter dissertation, and the three article dissertation (see Graduate School webpage for more details on requirements for each). The dissertation proposal generally comprises the first three chapters of the dissertation (or an introductory chapter and then the introduction through proposed methods for each of the three articles in the case of the three-article format). The student works carefully with a dissertation chair and submits work to a committee for review. The committee must have 10 working days prior to the proposal defense to review the document. An oral defense follows, with all committee members present to review and critique the proposal.

The final dissertation defense comprises all chapters of a dissertation. The committee must have 10 working days prior to the dissertation defense to review the document. An oral defense follows, with all committee members present to review and critique the proposal.

AHE faculty are not on available to work on dissertations during the summer terms. This means students should not enroll inAHE 699 hours during the summer. Faculty have a "quiet" period of June 1 - August 15, during which time they do not respond to dissertation issues and requests.

Similarly, faculty do not work on University holidays or breaks; for documents requiring two weeks for review before defense, for example, the two required weeks do not include official university breaks as part of that time. Requests for meetings or submissions requesting reading or review of written work submitted over university holidays will not be honored. Doctoral students need to keep this in mind in planning

their timeline and schedule to allow for successful completion of their dissertation.

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

To ensure adequate progress and allow for a defensible document to be completed with the edits needed post-defense, the Higher Education Administration faculty require the following progress checkpoints for doctoral degree completion.

No later than the end of year 7:

Doctoral Committee formation formally completed with Graduate School

Successful dissertation proposal defense and IRB approved

Admission to Candidacy successfully completed with the Graduate School

No later than the end of year 8:

Data collection complete and complete draft in chair's hands

Before the end of the **penultimate** term of the student's Graduate School approved timeline:

Successful final dissertation defense

Failure to meet any of these deadlines will mean the student has been unsuccessful in making substantial and adequate progress in the program toward degree completion, and the student will be unable to continue in the program. Please note, there will be no extension requests supported for failure to meet any of these deadlines. If the student has medical, family, or other issues causing difficulty, they should discuss official leave / stopping their clock with the Graduate School registrar's office (see **Withdrawals and Leave of Absence Information**).

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Adequate progress includes but is not limited to the following: completion of Graduate School requirements in a timely fashion, completion of dissertation work in a timely fashion, and completion of key advancement checkpoints in a timely fashion.

It is the student's responsibility to ensure all documents, forms, proof of progress, admission to candidacy, formation of committee, application to graduation, etc., are appropriately filed, received, and accepted by the Graduate School. Students are advised to check with the Graduate School registrar's office to ensure they comply with all requirements, including completing all necessary coursework is correctly and appropriately noted and accepted for completion of degree requirements. Failure to complete any of the Graduate School requirements in a timely fashion is deemed inadequate progress, and the student must complete them before being allowed to enroll in further dissertation hours. As noted above, if a student fails to register for dissertation hours in two terms (not including summer, excepting Executive EdD students), the chair's role will cease, and the student will need to seek a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed a second chair will agree to take the student on, and the student's program options may be over.

At any point in the dissertation process after successful completion of comps and beginning AHE 699 enrollment, if there are two consecutive semesters in which doctoral students fail to submit substantive written progress on their dissertation, their chair will have one of two options:

1. Require the student to complete and sign an agreed upon completion schedule. If at any future point the student fails to meet checkpoints on the schedule, the chair's role will cease, and the student will need to seek a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed another faculty member will agree to take the student on, and the student's program options may be over.
2. The chair may decide to end their role as chair. As such, the chair's role will cease, and the student will need to seek a new chair. Note that inability to find a chair constitutes lack of progress; it is not guaranteed another faculty member will agree to take the student on, and the student's program options may be over.

To ensure adequate progress and allow for a defensible document to be completed with the edits needed post-defense, the Higher Education Administration faculty require the following progress checkpoints for doctoral degree completion.

No later than the end of year 7:

Doctoral Committee formation formally completed with Graduate School

Successful dissertation proposal defense and IRB approved

Admission to Candidacy successfully completed with the Graduate School

No later than the end of year 8:

Data collection complete and complete draft in chair's hands

Before the end of the **penultimate** term of the student's Graduate School approved timeline:

Successful final dissertation defense

Failure to meet any of these deadlines will mean the student has been unsuccessful in making substantial and adequate progress in the program toward degree completion, and the student will be unable to continue in the program. Please note, there will be no extension requests granted for failure to meet any of these deadlines. The provision of nine years for doctoral completion constitutes a two-year extension over time previously allowed. As such, no further extensions or allowances will be sought.

Instructional Leadership, Ed.D.

Instructional Leadership, EdD–Nurse Education

The UA College of Education and the Capstone College of Nursing have combined to offer a Doctor of Education in Instructional Leadership with a concentration in nurse education. This low-residency program is designed to prepare future faculty with the teaching and research skills necessary for positions in community colleges, four-year colleges, and universities.

Working within annual cohorts and employing distance-based and on-campus instruction, students typically complete coursework requirements and the dissertation study in 5 years.

The curriculum supports the competencies for nurse educators specified by the National League for Nursing (NLN) and the Southern Regional Education Board Council on Collegiate Education in Nursing (SCCEN).

Admissions

See the Admission Criteria section of this catalog for more information.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- An unencumbered RN license in the state in which the student will practice
- A BSN degree from an accredited institution
- An M.S.N. degree or equivalent degree from an accredited institution
- A resume
- Three letters of recommendation
- A sample of academic writing (e.g., a scholarly paper presented in a previous graduate course that demonstrates knowledge of an area, powers of organization, command of language, and communication skills.)
- Statement of purpose (an essay detailing your desire to complete this program and how this degree will influence your career goals.)

The application cycle will open September 1 and close May 1 each academic year. An admissions committee comprised of nursing and education faculty selects the most qualified applicants.

Curricular Requirements

The Doctorate of Education degree requires a minimum of 60 credit hours beyond the master’s degree (48 hours of coursework and 12 hours of dissertation study). Students must also meet all Graduate School degree and dissertation requirements.

The 48 hours of required coursework is normally completed in three years of full-time study through a blended format of online courses and spring-fall campus meetings (scheduled once a semester on a Friday evening and Saturday). Summer classes are delivered online. A comprehensive

examination must be passed, and the dissertation completed no later than nine years after first enrollment.

Transfer Credit

Due to the cohort-based model and the unique nature of specific MSN degrees, transfer credits are reviewed on a student-by-student basis.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study c (p. 21)an be found here (p. 21).

Comprehensive Exams

A comprehensive exam is used to measure command of the content presented in the coursework portion of the degree. Students will complete the comprehensive exam during their final summer of coursework. Students will have one month to complete the exam, which consists of a written research paper followed by an oral defense. Upon successful completion, the student commences dissertation study.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

Students will be admitted to candidacy once they pass their comprehensive exam. Students will work with the Coordinator of Student Recruitment to complete the Admission to Candidacy paperwork.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Graduate School information on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Purpose. A dissertation—demonstrating the ability to conduct independent research, analyze, and present findings—must be prepared on a topic in the area of Nursing Education. The subject of the dissertation must be approved by the student's dissertation committee and should constitute an original contribution to the field of study. A dissertation committee will be comprised of four (4) total members, of which one must be an external member, and *there should be* at least one education and one nursing faculty member.

The dissertation progresses through the following benchmarks:

(i) *Prospectus.* The dissertation committee meets to review a brief outline (typically around 20 pages) of the student's proposed research project.

(ii) *Proposal.* The dissertation committee meets to review the first three chapters of the student's dissertation manuscript. Where appropriate, this should include the justification and design of any proposed field research.

The student can then seek the IRB approval necessary to conduct their research.

(iii) *Defense.* The dissertation committee meets to review the student's final manuscript, including analysis of the study's findings and discussion of their significance in light of current research and policy. Upon approval, the **Committee Acceptance** form is signed and submitted to the Graduate School. The completed and edited dissertation is then uploaded to the ETD website (Proquest).

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Students are expected to complete their coursework in conjunction with their cohort within three years. An alternate plan of study can be created under extenuating circumstances. Lack of satisfactory progress during dissertation hours will result in a failing grade. Students are required to pass 12 hours of dissertation research for graduation.

Instructional Leadership, Ph.D.

Instructional Leadership – Instructional Technology Concentration (PhD)

The Instructional Leadership PhD with a concentration in Instructional Technology is dedicated to the improvement of professional practice and to the work of school engagement. The PhD prepares individuals to conduct original research and to use current and emerging technologies and instructional strategies to help develop effective learning environments. The degree prepares individuals to assume positions tied to the preparation of researchers in the area of educational technology and to the design of instructional work in school and college environments, as well as to positions in business and industry settings. The PhD with a concentration in Instructional Technology is offered in two formats: on-campus and online.

Instructional Leadership – Social and Cultural Studies Concentration (PhD)

The Instructional Leadership PhD with a concentration in Social and Cultural Studies is dedicated to the improvement of professional practice and to the work of school engagement. The program aims to develop scholars, researchers, and instructional leaders for schools, colleges, and other educational institutions. The work of the program is guided by the principles of reflective practice, professional growth, democratic action, and individual responsibility. The overarching goal is to prepare theoretically informed leaders with a critical understanding of social and cultural issues necessary to enact insightful organizational, curricular, and pedagogic decisions within their respective institutional settings.

Doctoral Degrees

The PhD in instructional leadership prepares educational leaders, scholar practitioners, policy makers, professors, and researchers who can use—and contribute to—knowledge of learning processes, pedagogy, and the social foundations of schooling. Courses focus on curriculum, professional development, supervision, learning, pedagogy, and the complexities of culture in education. Throughout, the overarching aim is to develop the skills of inquiry and reflective decision making needed to construct ethical and informed judgments that advance education while valuing individual perspectives, honoring differences, and fostering a respectful educational environment. The PhD offers two concentrations: instructional technology (preparing future researchers, teachers, and corporate trainers in the field of instructional design and e-learning) and social and cultural foundations of education (preparing students for academic positions in higher education or public policy and advocacy groups). Students enrolled in the PhD must select one of the concentrations.

Instructional Leadership, PhD (Instructional Technology) Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission for on campus or online degrees, an application must include:

- An earned master's degree in any field at the time of initial enrollment.
- A curriculum vita or resume
- A writing sample.

During the application process, applicants should select the Instructional Technology concentration.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

When admitted to the program, applicants are assigned a temporary advisor—they may continue to work with this person or select another advisor when they get to know the faculty. Advisors work with students to complete a Plan of Study. This is your degree plan; it specifies the courses you must complete to graduate.

The Instructional Leadership PhD with an Instructional Technology concentration is comprised of 48 hours of coursework and 18 hours of dissertation credit.

Code and Title		Hours

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study c (p. 21)an be found here (p. 21).

Comprehensive Exams

The comprehensive examination consists of the development of an electronic portfolio. The portfolio is due at the end of coursework and must be successfully passed before enrolling in dissertation hours (AIL 699). A student does not have to be enrolled in courses when completing the comprehensive examination (i.e., a student might finish courses in the spring, planning to start dissertation hours in the fall and complete the comprehensive examination during the summer).

Graduate School information on the Comprehensive Exam (p. 21).

Admission to Candidacy Requirements

A student is admitted to candidacy after successfully passing the comprehensive examination electronic portfolio requirement and having an official plan of study approved by the Graduate School.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

When a student has completed coursework, they will select a dissertation committee chair and send a request to that professor, who must be in the ELPTS department and a full member of the graduate faculty. If that professor accepts, they will help the student select the additional committee members. It is the student's responsibility to contact the committee members and request that they serve on the student's committee. If the professor requested as the chair does not accept, then the student will make the request of another professor. The student will enroll for dissertation hours under their dissertation committee chair's section following the Graduate School's requirements for continuous enrollment.

Some dissertation chairs in the Instructional Technology program require a prospectus while others do not; it is at the discretion of the dissertation committee chair. The student will work with their committee chair to develop their prospectus and/or proposal and final dissertation document and send it to the other committee members once the chair has approved it. Committee members must have the document two weeks before a meeting. It is the student's responsibility to contact the dissertation committee members to set up a meeting once the chair has approved a meeting and provided times they are available.

Once a student has had their proposal approved by the dissertation committee, they will submit their protocol to IRB. Once a student has successfully defended their final dissertation, they will hire an editor recommended by their chair to check the final document for APA, grammar and UA requirements. When the dissertation chair approves the final document, a student will then submit the document to ProQuest.

Instructional Leadership, PhD (Social and Cultural Studies)

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A Curriculum Vitae
- Three (3) letters of recommendation
- A writing sample

An entrance exam is not required for the application to the Instructional Leadership PhD with concentration in Social and Cultural Studies. However, students who have already taken the GRE or MAT and scored at or above the 50th percentile are encouraged to submit their results to supplement their application.

Applicants with grade point averages below 3.0, but not below 2.5, may be considered for Admission with Permission to Continue.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The doctoral program requires a minimum of 66 credit hours beyond the master's degree or 84 hours beyond the bachelor's degree. A typical 66-credit hour PhD is comprised of 48 hours of coursework (including a minimum of 18 hours of BEF classes), a comprehensive examination, 18 hours of dissertation credit, and the University residency requirement.

In consultation with their advisors, students are encouraged to seek relevant courses outside the program and College to fulfill both disciplinary and elective needs according to their academic interests and professional goals.

A majority of courses in the program of study must be at the 600 level or higher.

Code and Title	Hours
Required Foundations Courses (12 credit hours)	
BEF 644 Phil Science Rel Ed Res	3
BEF 667 Multicult Soc Ed Leadershp	3
BEF 681 Ethics And Education	3
BEF 690 Social Theory Analysis	3

Additional Foundations Courses 6

Students are encouraged to complete at least one course in each of the constituent program disciplines. Pre-approved courses include the following:

Sociology: BEF 507/BEF 607, BEF 641, BEF 650

History: BEF 503, BEF 640, BEF 653

Philosophy: BEF 504, BEF 642, BEF 654

Remaining hours of coursework may come from any disciplinary course not taken from above and/or the following elective courses:

BEF 534	Multicultural Education (Remaining hours of BEF coursework may come from the courses above and/or any of the following courses:)
BEF 575	Found Educn Through Film
BEF 585	Language Politics & Education
BEF 607	Readings In Soc Of Ed
BEF 639	Educ Theory And Policy
AEL 619	Politics Of Education
AEL 664	Ed Policy/Dynamics of Change
BEF 669	Curriculum Study Schooling
BEF 695	Sem Curriculum Leadership

Elective Courses 15

Research Courses (quantitative and/or qualitative research methods) 15

Elective hours may be taken from BEF courses not taken. Additionally, students are encouraged to take courses outside the program that inform issues in SCS, as approved by their advisor.

Dissertation 18

AEL 699 Dissertation Research (Continuous enrollment is required until the dissertation is complete. The number of hours will vary depending on the workload of the student and professor.)

Total Hours 66

Transfer Credit

Up to 21 hours of required course work may be transferred if credit meets conditions stated in the Doctoral Degrees section of the Graduate Catalog. Use the Transfer Graduate Credit Form.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Comprehensive Exams

Upon completion of coursework or during their last semester of coursework, students may complete a traditional, on-site exam or pursue a publication option to fulfill the exam requirement. Students completing the on-site exam must also complete an oral defense. This requirement will be waived if the student has presented their work at two approved conferences.

Graduate School information on the Comprehensive Exam (p. 21).

Admission to Candidacy Requirements

Students will be admitted to doctoral candidacy upon successful completion of the comprehensive exam.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Graduate School information on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Students will choose their dissertation chair and, in consultation with their chair, form a 5 member committee. The committee must include one member outside the student's home department.

Proposal. The dissertation proposal normally constitutes the first three chapters of the dissertation study. Typically, this comes after the student has met to discuss a 12-15 page prospectus.

Graduate School information on Financial Assistance (p. 254).

Instructional Technology Certificate

The Graduate Certificate in Instructional Technology provides students with the knowledge, skills, and dispositions needed to effectively integrate technology into their teaching, to design and deliver distance and online courses, and to lead organizational instructional technology

initiatives. The program takes a research-to-practice approach by grounding instructional technology practice in research-based evidence. The certificate is available both on campus and online.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

Applicants to the on campus or online IT Certificate Program (Instructional Technology certificate) must be students in good standing in a master's, education specialist, or doctoral degree program. Alternatively, students may hold a bachelor's degree and have completed 18 graduate credit hours in a teaching discipline or professional field.

See the Admission Criteria section of this catalog for more information.

Instructional Technology, MA

The Master of Arts in instructional technology is an online degree program for individuals who wish to increase their understanding of technology's role in the work of teaching and learning. This online degree is designed to prepare individuals to use current and emerging technologies to create instructionally-sound learning environments. The degree prepares individuals for positions in instructional technology, educational technology, and instructional design as they exist in a variety of settings, including business and industry.

Admission Requirements

Applicants must meet the following admission requirements:

- Bachelor's degree from an accredited institution
- A completed application includes transcripts (as required by Graduate School), three letters of recommendation, a statement of purpose, and a Graduate School application.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

- Candidates for the master's degree must earn a minimum of 30 semester hours of credit.
- There are 15 required credit hours (5 courses) and 15 elective credit hours (5 courses) of CAT/INTE hours; one elective course (3 credits) may be taken outside the INTE program from other programs/colleges at The University of Alabama, or transferred from another university, with advisor approval.

Counselor Education

BCE301 Introduction To Counseling

Hours 3

A survey course featuring a comprehensive examination of the history, functions, and related issues for the practice of counseling in school, agency, and rehabilitation settings.

BCE511 Principles Of Guidance

Hours 3

Explores the rationale for guidance by examining human development and sociological, psychological, and philosophical bases for guidance. Provides awareness of services by surveying components of guidance programs. Offered fall semester.

Educational Psychology

BEP500 Adv Educational Psych

Hours 3

Principles of educational psychology for teaching and for educational services in schools and colleges.

BEP501 Proseminar in Educational Psychology

Hours 3

This course presents an introduction to doctoral studies in Educational Psychology at The University of Alabama.

Educational Research

BER500 Intro Educatn Research

Hours 3

An overview of research methodology, primarily for master's students.

BER540 Statistical Methods In Educ

Hours 3

This course covers basic descriptive and inferential statistics, including measures of central tendency and dispersion. Hypothesis testing related to one-sample z-and t-tests; independent and dependent sample t-tests; correlations; and chi-square and simple regressions are included.

School Psychology

BSP501 Professional Issues and Ethics in School Psychology

Hours 3

This course deals with pertinent issues in school psychology, such as ethics, theory, history and foundations of school psychology, legal issues, professional issues and standards, alternative models for delivery of school psychological services, as well as, roles and foundations of the school psychologist.

[View All Courses](#)

Counselor Education, Ed.S.

The Educational Specialist degree in counselor education leads to advanced certification for school counselors. Successful completion of the program results in eligibility to be recommended for Class AA (specialist-level) certification as a school counselor.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an applicant requires:

- A master's degree in school counseling from an accredited institution
- Valid master's level certification in School Counseling
- At least two full years of full-time acceptable professional educational work experience in a P-12 school system.
- Three recommendations - An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.

The admission deadlines for each academic semester are as follows:

- Fall – February 15th
- Spring – October 15th
- Summer – February 15th

Applicants can expect a response on their application materials within one month after the deadline.

Faculty reserve the right to revisit the application pool after final decisions in the event spots remain available, although applicants who submit their materials after the deadline should expect their applications to be denied admission or requested to be reviewed in the subsequent review period.

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 30 hours of appropriate work beyond the MA degree in Counselor Education (School Counseling) and the completion of a comprehensive portfolio are required for the educational specialist degree.

This course listing applies to candidates having appropriate prior certification who begin this program on June 13, 2024, and thereafter. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. At least 15 semester hours of the 30 semester hour total must be at the 600-level. All requirements must be completed during the 6 years preceding the date on which the degree is to be awarded.

Please note: Courses taken for the prerequisite Class A certification and credits over six years old cannot be counted toward this degree.

Transfer Credit

Graduate School information about Transfer Credit (p. 15).

Comprehensive Exams

EDS students are required to the create a comprehensive portfolio to serve as a final exam of the school counselor’s ability to apply knowledge, design a comprehensive school counseling program and be a reflective practitioner.

Graduate School information on Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship Requirements

Students in the EDS program are required to complete 100-hour fieldwork experience. This may be done in an existing placement or school counselors may look for a placement in their local school system.

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Time Limit for Degree Completion

All requirements must be completed during the 6 years preceding the date on which the degree is to be awarded.

Graduate School information on Time Limits (p. 15).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students inactive for one calendar year without communication between the student and department will be considered withdrawn. Leave of absence can be requested through the student’s advisor.

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Student Complaint Procedures

Step 1. (optional) Student raises the issue of concern with the faculty member involved and tries to resolve the concern to the satisfaction of both parties. If the student is not comfortable with taking this first step, the student may proceed to Step 2.

Step 2. If the first Step is taken, and no resolution is found, the student may file a formal complaint or grievance with the Department Head and offer any documentation in support of the grievance. As indicated above, the student may also start the grievance process with a formal complaint to the Department Head. Once in receipt of the complaint, the Department Head is expected to work with the two parties to find a resolution to the mutual satisfaction of the parties. The Department Head is also expected to keep a documented record of the effort and to forward all documentation, as it pertains to the complaint, to the Senior Associate Dean if the complaint remains unresolved. Step 2 should take no longer than two weeks.

Step 3. Should the problem remain unresolved, the complaint (and all the accumulated documentation) is forwarded to the Senior Associate Dean to come under University grievance policies as outlined in the University’s Faculty Handbook. The Senior Associate Dean then investigates the grievance, surveys the documentation pertaining to the case and provides a summary and a recommendation to the Dean. The Dean then

renders a final decision. This final Step should not take any longer than two weeks.

Step 4. If the student is not satisfied with the decision offered by the Dean, the student may appeal to the Office of Academic Affairs.

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 15).

Certification

To be awarded Alabama Class AA School Counselor certification, students must:

- maintain a GPA of at least 3.5 on all courses with no grade below a C
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum
- hold valid, prerequisite Alabama Class A School Counselor certification
- complete an application for certification through the Alabama State Department of Education

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall during the last semester of the program. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

According to Alabama regulations, individuals admitted to a Class AA program based on a master's level professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist-level) certification.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Counselor Education, Ph.D.

The Doctor of Philosophy (Ph.D.) is a terminal degree in Counselor Education. The program features a variety of preparation options for students, including preparation for professional positions as counseling educators and counseling supervisors in colleges and universities, administrative work in schools and various agencies, and appointments as advanced practitioners working in governmental agencies, non-profit settings, or private practice. A common core of preparation in the doctoral study includes advanced theoretical foundations, counselor pedagogy, counselor supervision training, and research. The doctoral

program meets the accreditation criteria of the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Admissions

Cohort admission decision for Fall of each academic year are made at the follow deadlines:

Priority Deadline* - December 15th

Final Deadline - March 15th

**Applicants who apply to the priority deadline will be able to compete for graduate assistantships.*

Applicants can expect a response on their application materials within one month after the deadline.

Faculty reserve the right to revisit the application pool after final decisions in the event spots remain available, although applicants who submit their materials after the deadline should expect their applications to be denied admission or requested to be reviewed in the subsequent review period.

In addition to the minimum Graduate School admission requirements, the information below is needed for the application to be considered complete:

- CV/Resume
- A Statement of Purpose containing (a) applicant's reasons for seeking a Ph.D. in Counselor Education and Supervision; (b) the applicant's aptitude (e.g., skills, traits, and/or previous experiences) for graduate-level study in a digitally delivered program (see Statement on Digital Delivery); and (c) the applicants' approach to working with diverse populations and respect for cultural differences.
- At least two letters of recommendation (three preferred) from individuals (e.g., former professors, clinical supervisors) who can attest to the applicant's potential for success as a Counselor Education doctoral student.

Finally, an applicant for doctoral study must:

1. Possess a master's degree in school counseling from an accredited institution at the time of initial enrollment in the PhD program
2. When necessary, complete supplemental master's-equivalency courses to comply with the CACREP-accredited course of study for the master's degree in Counselor Education
3. Successfully complete a pre-admission doctoral interview for formal pursuit of the doctoral degree in Counselor Education

Admission decisions are made based on submitted application materials and an applicant interview with the admissions committee. After reviewing application packets, the Admissions Committee, which is comprised of program faculty members, will schedule applicant interviews. Dates and times of interviews will be determined and communicated to potential candidates by program faculty.

See the Admission Criteria section of this catalog for more information.

Doctoral Plan of Study

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Doctoral Preliminary and Comprehensive Exam

The policy of the UA Graduate School is comprehensive examination must be completed by all students seeking to graduate from any UA graduate program. The content and scheduling of the PhD comprehensive examination in Counselor Education are consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department.

Eligibility for the initial attempt to secure a passing score on the PhD comprehensive examination in Counselor Education is granted in the semester in which students are completing their final semester of coursework (see below), excluding foundational course. The second attempt can be scheduled to occur no earlier than the subsequent semester of a failure on the student's initial attempt. Otherwise, the Graduate School policy limiting students to two (2) opportunities for successful performance on the comprehensive examination will lead to the student's dismissal from the program.

The Comprehensive Examination in the Counselor Education & Supervision consists of a Portfolio, which serves to help evaluate doctoral student learning experiences across five key training domains (i.e., counseling, research, supervision, teaching, and leadership/advocacy).

In the final semester of minimum required coursework (defined below), excluding Foundational courses, student forms the Dissertation Committee and will begin and defend Doctoral Comprehensive Examination (i.e., Doctoral Portfolio). Minimum required coursework that must be completed by or during the final semester of coursework, includes all BCE core content and BER core content courses (defined as four courses listed below), specifically including:

BCE Courses:

- BCE 619 Supervision in Counselor Ed
- BCE 618 Adv Theory Counseling
- BCE 636 Leadership & Advocacy in Couns

- BCE 635 Teaching & Scholarship in Coun
- BCE 633 Advanced Seminar: Counselor Education Research
- BCE 625 Advanced Internship

BER Core Research Courses (12 Hours Total):

- BER 631 Inquiry As Interp: Qual I
- BER 640 Adv Statistical Methods in Ed
- BER Core Research Course 3
- BER Core Research Course 4
 - For Students starting in Fall 2022 or Prior, BER 540 Statistical Methods In Educ (or its equivalent), will count as a one of the core BER courses
 - For Students starting in Fall 2023 or Later, BER 540 Statistical Methods In Educ or equivalent will be considered as a pre-requisite for BER 640 Adv Statistical Methods in Ed, and will not be included as one of the core research courses

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Internship Requirements

While the skills necessary for performing classroom, settings are fundamental to the educational process, a significant element of the training program or any degree sought in the Program in Counselor Education is the applied experiences. In many ways, the activities associated in typical classroom work such as examinations, presentations, research papers, and special projects are the building blocks for the work a counselor serving their clients. The curriculum in the program features a variety of practical, applied requirements. These are typically noted as practicum or internship on the student's Program Planning Record. In general, the sequence of the student's applied experiences is practicum proceeds internship and deviation from that sequence is not allowed according to CACREP.

A. Internship

In accordance with the 2024 CACREP Standards (<https://www.cacrep.org/for-programs/2024-cacrep-standards/>), doctoral students are required to complete internships that total a minimum of 600 hours. The minimum 600 hours must include supervised experiences in counseling and at least two more of the four remaining doctoral curricular areas (supervision, teaching, research and scholarship, and leadership and advocacy).

Admission to Candidacy Requirements

After successful completion of your comprehensive examinations, as well as all other academic requirements, you are eligible for admission to candidacy for the doctoral degree. The Application for Admission to Candidacy for Degree must be completed according to the guidelines noted in the Graduate Catalog. You are also required to stay in continuous enrollment for Dissertation Research until the final oral defense of your completed dissertation.

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive examination. Students should contact the departmental advisor for submission of the Admission to Candidacy form. Candidacy takes place after passing the Dissertation Proposal.

Graduation School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Graduate School Policy on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Dissertation Process

The culmination of work in receiving a doctoral degree comes with the successful completion of the doctoral dissertation. Many students find this obstacle to be insurmountable; it is not! Essentially, the dissertation should allow students to demonstrate their ability to:

1. Analyze, interpret, and synthesize information,
2. Express ideas clearly and succinctly,
3. Demonstrate knowledge of literature, research skills, and methodologies relating to the project,
4. Describe and use methods of data collection and analysis appropriate to the project
5. Present results in a clear and logical manner, and
6. Discuss the meaning and implications of the results

The dissertation should be a project that is original, significant, substantial, and independently produced.

a. Dissertation Committee

The dissertation committee is formed in the semester during which the student completes their comprehensive examinations.

The committee can be formed prior to taking comprehensive examinations but no later than registration for BCE 699 Dissertation Research. The dissertation committee will be the committee that will assist in work throughout the completion of the dissertation. Selection decisions are critical in terms of selecting a chair with whom the student can be comfortable and committee members in whom the student has faith. In addition, the members of the committee will need to be able to work together. Students also need to have members who will be candid about their work in order to encounter as much scrutiny as possible before the defense.

- **Composition:** The committee typically consists of a minimum of five (5) members. The committee chair will typically come from Counselor Education, although this is not required. Along with the chair, students will need to choose the other members of their committee, one of whom must be outside the Department of Educational Studies in Psychology, Research Methodology, and Counseling. The selection of members of the committee should be based on their expertise and scholarly interest in the student's dissertation topic.
- **Responsibilities:** The chair of the dissertation committee is responsible for providing intense counsel in selecting the student's dissertation topic and developing their written documents (i.e., Prospectus, Proposal, and Dissertation). Close cooperation and involvement of all committee members is expected at all stages of the dissertation process. However, the student assumes the primary responsibility for pursuing the tasks, completing the documents, and meeting the deadlines associated with the completion of the dissertation.
- **Changes:** The student or any member of the committee may initiate a change of committee chairperson or member of the committee. Changes must be agreeable to the committee member being removed, the new committee member, the student, and the Program Coordinator. In the event agreement is not unanimous, the request

shall be submitted to the entire Counselor Education faculty for resolution. Changes in the composition of a Doctoral Dissertation Committee must be recorded on the Doctoral Program Committee Form and approved by the Dean of the College of Education.

b. Dissertation Prospectus

The dissertation prospectus is an informal initial overview of the student's dissertation idea. The submission and approval of a prospectus is extremely advantageous in that the student can identify areas of concern as well as potential difficulties far in advance of pursuing the actual dissertation proposal. Then, as students proceed through the remainder of the dissertation, they can confidently pursue their ideas knowing they have already secured the support of the committee.

Suggested Format

The suggested format for the prospectus should be a document of 10 - 15 pages that addresses the following elements:

- Introduction/Rationale
- Statement of Problem Purpose
- Research Questions
- Hypotheses
- Brief Overview of Literature Methodology
- Subjects
- Instrumentation
- Research Design
- Analysis of Data
- Results of Pilot or Preliminary Studies
- Possible Results - Implications/Significance of Study References

Some departure from this suggested format may be necessary based upon the student's specific plan. The prospectus must be received by all members of the committee at least ten (10) working days prior to the prospectus proposal meeting. Upon approval of the prospectus, the student may begin working on the formal proposal. Students may want to include a tentative timeline of their research agenda.

Request for Approval of Research Involving Human Subjects

The actual work of data collection for a pilot study and/or a dissertation involving human subjects must be preceded with permission for conducting such inquiries via formal approval by the Institutional Review Board for Human Subjects research. The dissertation chair will assist in efforts to secure this initial approval by The University of Alabama.

c. Dissertation Proposal

The second stage of the dissertation process is developing and presenting a formal proposal of the dissertation project for approval by the committee. It is necessary to have acceptance of the complete dissertation proposal before the student receives approval to pursue the dissertation and is admitted to candidacy for the doctoral degree.

The dissertation proposal should include:

- Introduction to the problem Statement of the problem Research questions or hypotheses
- A comprehensive review of the literature and related research
- A description of the methods of inquiry to be employed in the investigation A description of appropriate subjects, if any, and evidence of their availability Plan for data analyses
- Result of pilot studies (where appropriate)

The above information presented in the proposal is expected to be comprehensive and will include a discussion of the areas outlined as they will appear in the final dissertation.

Prior to the formal proposal meeting of the dissertation committee, the student should confer with all committee members as to a convenient day and time for the meeting. (Students are responsible for informing the committee members of the date, time, and location of the proposal meeting.) Whenever possible, public presentation of the proposal before peers and/or faculty is encouraged. The written dissertation proposal must be provided to all committee members at least 10 working days prior to your proposal meeting.

Upon acceptance of the dissertation proposal and completion of necessary changes recommended by the committee, each committee member will sign an acceptance page on the dissertation proposal. One copy of the signed proposal will be filed with the chair of the dissertation committee, and one copy will be forwarded to the Department Head of Educational Studies in Psychology, Research Methodology, and Counseling to be placed in the student's permanent file.

After successful completion of the comprehensive examinations, as well as all other academic requirements, and acceptance of the formal proposal, the student is eligible for admission to candidacy for the doctoral degree. The Application for Admission to Candidacy for Degree must be completed according to the guidelines noted in the Graduate Catalog. Students are also required to stay in continuous enrollment for Dissertation Research until the final oral defense of your completed dissertation.

d. Oral Defense of the Completed Dissertation

The format for the dissertation must comply with the guidelines noted on the Graduate School website. Deadlines for defending the dissertation and its completed, approved acceptance by the Graduate School become particularly important at this time in order to graduate at the desired time.

After completion of the dissertation project as well as development of the final dissertation document in consultation with the Chair and committee, the student will participate in a formal oral defense of the project and findings. This activity represents the cumulative efforts of the student's work and the conclusions from his/her findings. The oral defense meeting is quite similar to the dissertation proposal meeting. All members of the committee are to receive their documents no less than 10 working days prior to the defense meeting. Students are responsible for making all arrangements for the meeting date, site, and time. Coincidental with the plan for the oral defense meeting, the dissertation candidate is required to offer a formal announcement to all faculty in the College of Education about the pending defense meeting. This announcement is typically rather brief and is often communicated via e-mail. Again, the candidate is responsible for providing the announcement to all faculty.

The defense will include a presentation of all aspects of the research study. The majority of the defense should focus on the data collection, analysis, results, and implications for both the focus of the student's study and extensions of the study. Many other details regarding the dissertation document and other requirements are available for review in the Graduate Catalog. Strict adherence to these policies, expectations, and deadlines are typically enacted; exceptions are rare.

The dissertation defense is the culminating experience in the doctoral program. The student and committee chair are responsible for setting a defense date that allows all committee members to participate and to have adequate time to read the dissertation, determine its suitability for a defense, and engage in scholarly dialogue about how to best improve the document.

To promote these priorities, the scheduling of the defense follows a series of steps. The first step is to schedule a tentative defense date. Guided by the dissertation chair, students may schedule a defense date before they submit their final document to their dissertation committee. The second step is for students to submit their dissertation to the dissertation committee so that the committee may read the document and determine its readiness for a defense. Students must submit their completed dissertation to the dissertation committee at least 30 days prior to their scheduled defense date. Students may proceed with this second step after they receive expressed written consent from their dissertation chair(s).

The third step is for dissertation committee members to read the completed document. Dissertation committee members have 10 working days from the date of receipt to determine the dissertation's readiness for a defense, with readiness defined as general consensus (i.e., at least 4 of 5 committee members) that the dissertation can be filed with the Graduate School with only minimal revisions (e.g., minor editorial changes, minor substantive enhancements, and formatting). When readiness is agreed upon by the committee (i.e., 4 out of 5 committee members consent to a defense), the fourth step is for the Dissertation Chair to notify the student of the committee's disposition that a defense may occur. Once notified by their Chair(s), student may proceed with filing a public announcement of the defense. At this point, the dissertation defense date is formally confirmed.

Committee members who believe that a dissertation is not suitable for a defense should inform the Dissertation Chair within 10 working days of receiving the dissertation. The detail of their concerns should be submitted to the committee chair within the next 5 working days (if not sooner) so that the student is aware of those concerns and can address them before or during the defense. In cases where disagreements persist about student readiness to defend the dissertation, students and their dissertation chairs should consult with the Department Head as soon as possible. The Department Head will then work with the COE Dean's office and the Graduate School to determine an appropriate course of action.

All faculty members in the College of Education are to receive the announcement of the pending dissertation defense and may observe the dissertation defense. Following the student's presentation and committee examination, persons other than the committee members will be asked to leave the room before the committee conducts any discussion and subsequent voting. Positive votes by Committee members indicate that the dissertation can be filed with the Graduate School with minimal or no revisions.

Graduation School information on Dis (p. 21)sertation Requirements (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Each student enrolled in a degree-seeking status in every degree level of study in Counselor Education is involved in a Student Performance Review near the end of the Fall and Spring semesters. The rubric used is the Faculty Review of Student Performance and Review of Student Dispositions. The faculty review professional and personal strengths and concerns, while monitoring progress. This form entails five sections: academic skills, clinical skills, ethical and professional behaviors, personal characteristics, and the four professional dispositions, endorsed by the College of Education are also included.

Within each section, faculty members will discuss their observed student performance or individual characteristics/dispositions over various indicators and rate a student on a four-point scale: advanced, target, developing, and unacceptable. If dispositions do not meet the minimum standard of "Target," a concern for remediation plan is raised. Student data on their dispositions are also aggregated to help faculty members annually evaluate program objectives for the purpose of program improvement.

Based on this evaluation, students will receive one of the following based on rubric scores: (1) A letter stating exemplary progress in the program, (2) Communication that there were no concerns related to progress in the program, (3) Communication to meet advisor because of a provisional recommendation, and (4) An action plan is required (Remediation). Such reviews are regular components of the training program. Student reviews are conducted with the participation of all Program faculty. Results of student evaluations are entered into each student's record and discussed with the student and their advisor.

In instances of concern about a student, pertinent materials and observations about the student are examined and discussed among the faculty and remedial decisions are determined according to the Selection, Review, Retention, and Dismissal Policy noted in the appendices of the Student Handbook. Due process issues affecting student evaluations are followed in accordance with all published guidelines in materials from the Graduate Catalog and University of Alabama Faculty Handbook.

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence information (p. 244)

Academic Grievances Information

Student Complaint Procedures

Step 1. (optional) Student raises the issue of concern with the faculty member involved and tries to resolve the concern to the satisfaction of both parties. If the student is not comfortable with taking this first step, the student may proceed to Step 2.

Step 2. If the first step is taken, and no resolution is found, the student may file a formal complaint or grievance with the Department Head and offer any documentation in support of the grievance. As indicated above, the student may also start the grievance process with a formal complaint to the Department Head. Once in receipt of the complaint, the Department Head is expected to work with the two parties to find a resolution to the mutual satisfaction of the parties. The Department Head is also expected to keep a documented record of the effort and to forward all documentation, as it pertains to the complaint, to the Senior Associate Dean if the complaint remains unresolved. Step 2 should take no longer than two weeks.

Step 3. Should the problem remain unresolved, the complaint (and all the accumulated documentation) is forwarded to the Senior Associate Dean to come under University grievance policies as outlined in the University's Faculty Handbook. The Senior Associate Dean then investigates the grievance, surveys the documentation pertaining to the case, and provides a summary and a recommendation to the Dean. The Dean then renders a final decision. This final step should not take any longer than two weeks.

Step 4. If the student is not satisfied with the decision offered by the Dean, the student may appeal to the Office of Academic Affairs.

Counselor Education: Clinical Mental Health Counseling, MA

The Masters of Arts Degree in Clinical Mental Health Counseling is designed to prepare students for employment in public and private mental-health settings. The curriculum offers course work and applied experiences in specialty areas, including couple/family counseling, addictions counseling, play therapy, and work with unique populations. The clinical mental health counseling program is 60 credit hours and meets accreditation criteria put forward by Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Admissions

In addition to the minimum Graduate School admission requirements, admission decisions are made based on submitted application materials. The following materials are required for the application to be considered complete:

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- CV/Resume
- A Statement of Purpose. In the Statement of Purpose, applicants should discuss:
 - Your interest in pursuing a MA degree in Clinical Mental Health Counseling and related career goals.
 - Your aptitude (e.g., skills, traits, and/or previous experiences) for graduate-level study in a digitally delivered program (see Statement on Digital Delivery).
 - Your approach to working with diverse populations and respect for cultural differences.
- At least two letters of recommendation (three preferred) from persons who can attest to the applicant's potential for success as a counseling graduate student.
- Official transcripts from all college-level coursework and degree programs.

The admission deadlines for each academic semester are as follows:

- Fall – February 15th
- Spring – October 15th
- Summer – February 15th

Applicants can expect a response to their application materials within a month after the deadline.

Faculty reserve the right to revisit the application pool after final decisions in the event spots remain available, although applicants who submit their materials after the deadline should expect their applications to be denied admission or requested to be reviewed in the subsequent review period.

While GRE or MAT is not required for admission, an applicant with a GPA below 3.0 but with a score of 300 or higher (verbal and quantitative combined) on the Graduate Record Examination (GRE) or a score of 50th percentile or higher on the Miller Analogies Test (MAT), may be considered for Admission with Permission to Continue.

Applicants may be eligible to be considered for Admission with Permission to Continue if they do not fully meet the requirements for regular admission. Applicants who do not meet at least one criterion for Admission with Permission to Continue will not be considered. A decision to admit an applicant with Permission to Continue will be based upon several factors including the combination of the GPA and admission test scores (if provided), the applicant's goals, and previous work experience.

Please be reminded that delays in processing applications are both necessary and inevitable. In this way, we can ensure adequate provision of faculty and Program resources for students admitted to the Program in Counselor Education.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

All Counselor Education Master's degree programs have a planned program of study. The plan follows the appropriate requirements for accreditation in that area. Once an academic advisor has been assigned, students should make an appointment to discuss their preferences and career aspirations. The program of study that a student accepts when they enter the program will be the one they will follow until they graduate. If there are any changes, they need to be approved by the advisor.

While most courses will be offered through the Program in Counselor Education (designated as BCE), many required courses will be offered by affiliated programs. Students will likely enroll in courses in Educational Psychology (designated as BEP), Educational Research (designated as BER), School Psychology (designated as BSP), and other areas. These courses afford the opportunity to take advantage of the expertise of faculty in other programs in the College of Education.

Transfer Credit

Graduate School information about Transfer Credit (p. 15).

Comprehensive Exam

The policy of the UA Graduate School is that a comprehensive examination or summary project must be completed by all students seeking to graduate from any UA graduate program. The content and scheduling of the master's comprehensive examination in Counselor Education is consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department.

Eligibility for the initial attempt to secure a passing score on the master's comprehensive examination in Counselor Education is granted in the last semester in which students are completing their master's degree. The examination must be given at least two weeks before the date of graduation and reported promptly to the dean of the Graduate School on appropriate forms. The second attempt can be scheduled as early as in the following semester or a semester other than the first administration. Students need to register for at least 1 credit-hour for taking the second attempt. The Graduate School policy limits students to two (2) attempts for successful performance on the comprehensive examination. Failure on both attempts will lead to the student's dismissal from the program.

Comprehensive Project

Your Comprehensive Project is to be submitted in an electronic form to the Coordinator of Examinations for the program. The use of electronic format is designed for ease of submission, ease of review, and further demonstration of students' technological skills per accreditation requirements. The Program Comprehensive Project is a collection of training-based materials and reflective information that demonstrate various dimensions of master level students' philosophy, abilities, and attitudes. The goal is to demonstrate how diverse activities and insights have contributed to the development of a master's student in Counselor Education.

The Comprehensive Project also serves as the Comprehensive Examination to help evaluate master's levels students learning experiences across the core areas of the CACREP standards and the second-measure point of the KPIs.

Submission Point: The Comprehensive Project will be submitted on due dates indicated in the program calendar and in students' final semester of the program. The Comprehensive Project submission will be evaluated by track faculty. The Comprehensive Project includes the following elements (related rubric included below):

A. Resume

Your resume must include previous educational experiences, work experience, professional activities/memberships, and honors. Remember your resume is your professional summary and it is a vital element of your image to both peers and the public (it is also the most essential item to provide as you pursue employment opportunities).

Your resume should be 2-pages or less and include the following headings:

1. Header (name, full address, phone number, email)
2. Professional Objective Statement (one sentence)
3. Educational Experience
4. Work Experience
5. Professional Memberships/Activities, Honors, and Relevant Skills (students may choose to break this section into two or more sections in their own resume, but they will be graded as a collective).

Based on the resume, students need to complete a reflection on the following aspects:

1. Review your resume and provide a detailed description and discussion of your career development history with current position and future career plans.
2. Give a detailed description of your career theory/model of choice and provide a rationale for your theory/model that supports your career development history, progress and projection.

B. Personal Theory Paper

The personal theory paper allows a student to demonstrate their understanding of various theoretical perspectives on the helping process with their applied experiences. This document is intended to be declarative (i.e., portraying your personal perspective) rather than comparative (i.e., selecting various theoretical models and comparing them against one another). In essence, this activity is an opportunity for you to articulate what you have learned and what you attempt to accomplish in your counseling efforts. Your personal theory paper will present your integration of training and experience through a description of the following:

1. A Brief Description of Your Theory
2. Key concepts to include:
 - a. View of human nature
 - b. Structure/development of personality
 - c. Philosophical orientation
 - d. Client's experience in therapy
 - e. Relationship between client and therapist
 - f. The therapeutic process

C. Counselor Intervention Project

During internship, students completed a counselor intervention project. Students will submit *one* of their choosing that they feel best reflects their comprehensive interviewing and case conceptualization skills, ability to use research to inform counseling practice, and knowledge of legal and ethical considerations in counseling.

D. Student Selection of Best Work

Your selection may be a paper, project, or presentation that you believe represents your best work in your area of study and preparation. You should remember that this is your opportunity to be creative with your representation of your professional skills and knowledge.

E. Summary Statement of Reflection on Counselor Identity Development at This Point in Professional Career

Students will submit a brief statement reflecting on their counselor identity development at this point in their professional career. Reflections should address their identity development.

Graduate School information on Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship Requirements

While the skills necessary to performing classroom, settings are fundamental to the educational process, a significant element of the training program or any degree sought in the Program in Counselor Education is the applied experiences. In many ways, the activities associated in typical classroom work such as examinations, presentations, research papers, and special projects are the building blocks for the work a counselor does in the field: serving their clients! The curriculum in the program features a variety of practical, applied requirements. These are typically noted as "practicum" or "internship" on the student's Program Planning Records. As was noted previously, the academic advising process is critical in the sequence of the student's applied experiences in that the general rule is "practicum precedes internships" and deviation from that sequence is not allowed. Again, the academic advisor is quite aware of this principle and will assist in course selection from the annual academic schedule to ensure both efficient and effective progress in your preparatory program.

A. Practicum

As an initial experience in applied work, students typically engage in closely supervised work with clients in courses noted as "practicum." For clinical mental health students. BCE 516 Practicum Counseling II typically involves 2 hours of weekly group supervision and one hour of weekly individual supervision with client contact throughout. University supervision for clinical mental health students is provided on campus. Students enrolled in BCE 516 may wish to secure a practicum placement at distant sites, but the expectation for on-campus supervision is not compromised. Some practicum courses are noted as "Pass/Fail" courses, meaning that performance expectations for students in these courses are NOT tied to the completion of an academic semester.

Since practicum is a prerequisite to internship and features expectations for certain skills levels, students may not be allowed to proceed to the next course in their applied experiences. Such a decision reflects the fundamental commitment of our program to quality service to clients, a position we advocate, and we expect all affiliated with our program to advocate. Practicum placements are typically arranged prior to the semester in which the student anticipates enrolling for course credit. Pre-placement arrangements should be discussed and approved by the faculty listed in the University Schedule for the section of the practicum in which the student is enrolled

Documentation. Students are responsible for retaining cumulative documentation of all practicum activities. The program requires completion of a supervised practicum in the student's designated program area of 100 clock hours. Each student's practicum includes all of the following:

Required CACREP 2024 Standards for Practicum Students:

- Students complete supervised counseling practicum experiences that total a minimum of 100 clock hours over a full academic term that is a minimum of 10 weeks.
- Practicum students complete at least 40 clock hours of direct service with actual clients that contributes to the development of counseling skills.
- Practicum students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the practicum by (1) a counselor education program core or affiliate faculty member, or (2) a doctoral student supervisor who is under the supervision of a qualified core or

affiliate counselor education program faculty member, or (3) a fieldwork site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.

- Practicum students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the practicum. Group supervision must be provided by (a) a counselor education program faculty member or (b) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member.

B. Internship

The internship is considered to be the culminating academic experience and, consequently, occurs at the end of a student's training program. Expectations for internships are rather demanding in terms of placement duties and hours of commitment. Essentially, students completing the internship have the option of either one full-time placement (40 hours per week for 6 hours of credit for SC and 12 hours for CMHC) or two (2) consecutive half-time placements (20 hours per week for 3 hours of credit per semester for SC or 6 hours credit for CMHC). Student interns perform the duties of a counselor in a setting in which the student aspires to work upon graduation. Students employed in full-time work should anticipate meeting this challenge. The culminating internship experience must feature at least 600 hours of internship-related activity in the placement, of which at least 240 hours are in direct contact with clients. As with practicum, internship placements are prearranged during the semester prior to enrollments. For school and clinical mental health students, on-campus supervision is provided weekly.

Prearranged Placement. Internship placements are to be arranged and approved by the University Supervisor of Internships prior to the beginning of the semester/term for which the intern is enrolled for internship credit. To assist in making the internship experience as meaningful as possible, students are responsible for making preliminary contacts with prospective internship site placements. (This activity is very much like a job interview, a procedure we ALL hope you will undertake in the future.) Prospective interns are encouraged to develop their vita and arrange to interview with a prospective site supervisor. (A copy of the Program Planning Record may be helpful for students to discuss their academic experiences.)

Internship responsibilities and duties. The internship is an academic course and, therefore, is subject to the same scrutiny and the same rights of due process for faculty and students as with any other academic course. For this reason, the syllabus features the same language and accompanying documentation as with any other course. However, because of the uniqueness of each student's internship placement, determination of an academic grade must be based on evaluations of each student's work in that setting. No syllabus could possibly be developed to address each aspect of each intern's placement. Therefore, to clarify the expectations of the intern, the site supervisor, and the university supervisor, each intern is responsible for developing an internship agreement specifying the nature of their duties. This document serves two (2) critical purposes: (a) it becomes the basis for clarifying the agreements among all parties involved in the internship, and (b) it serves as a reference for assigning a final internship grade.

At the point of pre-approval for the internship placement, all parties will have a verbal understanding of the expectations for the internship placement. Interns should develop an initial draft of the internship agreement for discussion with their site supervisor during the first week of the placement to ensure that all desired aspects of the internship experience are addressed (copies and guidelines are provided in

supplemental handouts). Once approved by both the site supervisor and the intern, draft documents are printed on University of Alabama letterhead and signed by all parties (original document retained in University files; copies provided to intern and site supervisor). Supervision contracts are developed by each student to define roles and responsibilities of the counseling supervisor, site supervisor, and the student during practicum and internship. Departures from the stated contents of the internship agreement are to be discussed by and agreed upon by all parties. Grade determination for interns is based upon successful completion of the elements of the internship agreement.

Orientation, assistance, consultation, and professional development opportunities are provided by the counseling program faculty to site supervisors. All internship forms and supervision training are electronically provided to site supervisors.

Documentation. Interns are responsible for retaining cumulative documentation of all internship activities. The program requires completion of a supervised internship in the student's designated program area of 600 clock hours, begun after successful completion of the practicum. The internship is intended to reflect the comprehensive work experience of a professional counselor appropriate to the designated program area. Each student's internship includes all of the following:

Required CACREP 2024 Standards for Interns:

- After successful completion of the practicum, students complete 600 hours of supervised counseling internship in roles and settings with actual clients relevant to their CACREP specialized practice area.
- Internship students complete a minimum of 240 hours of direct service with actual clients.
- Throughout the duration of the internship, each student receives individual and/or triadic supervision on a regular schedule that averages one hour a week and is provided by at least one of the following: (1) a counselor education program faculty member, or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member, or (3) a fieldwork site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.
- Throughout the duration of the internship, each student receives group supervision on a regular schedule that averages 1½ hours per week and is provided by at least one of the following: (1) a counselor education program faculty member or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member.

Internship Evaluation. Evaluations of internships are secured from two (2) sources at the conclusion of the internship placement. The first source of evaluation is derived from the site supervisor using the Internship Performance Evaluation rubric. The second source of evaluation is derived from the student. These evaluations, along with the Summary of Internship Activities, are due to the university supervisor as noted on the schedule for internship. Site supervisor evaluations offer formal ratings of performance and a recommended grade based on the Internship Performance Evaluation rubric.

Site Supervisors Requirements for Practicum and Internship:

Prospective site supervisors must meet the following CACREP and program criteria:

- a minimum of a master's degree, preferably in counseling or a related profession;
- active certifications and/or licenses in the geographic location where the student is placed, preferably in counseling or a related profession;
- a minimum of two years post-master's professional experience relevant to the CACREP specialized practice area in which the student is enrolled;
- relevant training for in-person and/or distance counseling supervision;
- relevant training in the technology utilized for supervision; and
- knowledge of the program's expectations, requirements, and evaluation procedures for students.

The Procedure for completing a prearranged practicum or internship is:

1. Prospective intern interviews with prospective site supervisor.
2. Prospective intern discusses placement opportunity with university supervisor.
3. Prospective intern discusses placement opportunity with prospective site supervisor.
4. If an unapproved site, university supervisor visits site to determine placement suitability based on prospective intern's training and aspirations as well as the program
5. If approved, UA supervisor informs both site supervisor and intern of approval.

Student Insurance. All students who plan to start practicum or internship for counseling/supervision practices are responsible to purchase individual liability insurance for professional counseling at their own expense and submit a copy of insurance verification to the Practicum/ Internship Coordinator prior to their practice.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 15).

Student Progress Requirements

Each student enrolled in a degree-seeking status in every degree level of study in Counselor Education is involved in a Student Performance review near the end of the Fall and Spring semesters. The rubric used is the Faculty Review of Student Performance and Review of Student Dispositions. The faculty review professional and personal strengths and concerns, while monitoring progress. This form entails five sections: academic skills, clinical skills, ethical and professional behaviors, personal characteristics, and the four professional dispositions, endorsed by the College of Education are also included.

Within each section, faculty members will discuss their observed student performance or individual characteristics/dispositions over various indicators and rate a student on a four-point scale: advanced, target, developing, and unacceptable. If dispositions do not meet the minimum standard of "Target," a concern for remediation plan is raised. Student data on their dispositions are also aggregated to help faculty members annually evaluate program objectives for the purpose of program improvement.

Based on this evaluation, students will receive one of the following based on rubric scores: (1) A letter stating exemplary progress in the program, (2) Communication that there were no concerns related to progress in the program, (3) Communication to meet advisor because of a provisional recommendation, and (4) An action plan is required (Remediation). Such reviews are regular components of the training program. Student reviews are conducted with the participation of all Program faculty. Results of

student evaluations are entered into each student's record and discussed with the student and their advisor.

In instances of concern about a student, pertinent materials and observations about the student are examined and discussed among the faculty and remedial decisions are determined according to the Selection, Review, Retention, and Dismissal Policy noted in the appendices of the Student Handbook. Due process issues affecting student evaluations are followed in accordance with all published guidelines in materials from the Graduate Catalog and University of Alabama Faculty Handbook.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Student Complaint Procedures

Step 1. (optional) Student raises the issue of concern with the faculty member involved and tries to resolve the concern to the satisfaction of both parties. If the student is not comfortable with taking this first step, the student may proceed to Step 2.

Step 2. If the first Step is taken, and no resolution is found, the student may file a formal complaint or grievance with the Department Head and offer any documentation in support of the grievance. As indicated above, the student may also start the grievance process with a formal complaint to the Department Head. Once in receipt of the complaint, the Department Head is expected to work with the two parties to find a resolution to the mutual satisfaction of the parties. The Department Head is also expected to keep a documented record of the effort and to forward all documentation, as it pertains to the complaint, to the Senior Associate Dean if the complaint remains unresolved. Step 2 should take no longer than two weeks.

Step 3. Should the problem remain unresolved, the complaint (and all the accumulated documentation) is forwarded to the Senior Associate Dean to come under University grievance policies as outlined in the University's Faculty Handbook. The Senior Associate Dean then investigates the grievance, surveys the documentation pertaining to the case and provides a summary and a recommendation to the Dean. The Dean then renders a final decision. This final Step should not take any longer than two weeks.

Step 4. If the student is not satisfied with the decision offered by the Dean, the student may appeal to the Office of Academic Affairs

Counselor Education: Rehabilitation Counseling, MA

The Masters of Arts Degree in Rehabilitation Counseling is designed to prepare rehabilitation counselors to serve persons with disabilities in a variety of work settings. The rehabilitation counseling program is a 60 hour credit program and is fully accredited by the Council for the Accreditation of Counseling & Related Educational Programs (CACREP). The curriculum provides both didactic and experiential learning opportunities and culminates in a 600 hour internship.

Professional rehabilitation counselors encourage and provide support to persons with disabilities and their families by helping them meet their personal, social, vocational, psychological and wider quality of life goals. The program focuses on the provision of individual and group counseling, vocational assessment, case management, advocacy, assistive technology, and consultation services. The mission of the Rehabilitation Counselor Education (RCE) distance-based program is to produce professional rehabilitation counselors who will provide quality rehabilitation counseling services for persons with disabilities and their families.

Admissions

In addition to the minimum Graduate School admission requirements, admission decisions are made based on submitted application materials. The following materials are required for the application to be considered complete:

- CV/Resume
- A Statement of Purpose. In the Statement of Purpose, applicants should discuss:
 - Your interest in pursuing an MA degree in Rehabilitation Counseling and your related career goals.
 - Your aptitude (e.g., skills, traits, and/or previous experiences) for graduate-level study in a digitally delivered program (see Statement on Digital Delivery).
 - Your approach to working with diverse populations and respect for cultural differences.
- Three letters of recommendation consistent with goals of the program from individuals who can attest to your potential for success in graduate school (e.g., former professors, supervisors).
- Official transcripts from all college-level coursework and degree programs.

The application deadlines for admission to each academic semester are as follows:

- Fall admission – February 15th
- Spring admission – October 15th
- Summer admission – February 15th

Applicants can expect a response to their application materials within one month after the deadline.

Faculty reserve the right to revisit the application pool after final decisions in the event spots remain available, although applicants who submit their materials after the deadline should expect their applications to be denied admission or requested to be reviewed in the subsequent review period.

Admission decisions are made based on application materials submitted, cumulative grade point average (GPA) of at least 3.0, and applicant interview with the admission committee. After reviewing application

packets, interviews between selected applicants and the admission committee may be scheduled. The Admission Committee is comprised of corresponding program faculty members. Dates and times of interviews will be determined and communicated to potential candidates by program faculty. Interviews are typically group-based in which multiple applicants will be interviewed at the same time.

While Graduate Record Exam (GRE) or Miller Analogies Test (MAT) scores are not required for admission, an applicant with a GPA below 3.0 but with a score of 300 or higher (verbal and quantitative combined) on the GRE or a score in the 50th percentile or higher on the MAT may submit their scores to be considered for Admission with Permission to Continue.

Applicants may be eligible to be considered for Admission with Permission to Continue if they do not fully meet the requirements for regular admission. Applicants who do not meet at least one criterion for Admission will not be considered. A decision to admit an applicant with Permission to Continue will be based upon several factors including the combination of the GPA and admission test scores (if provided), the applicant's goals, and previous work experience.

Please understand that delays in processing applications are both necessary and inevitable. In this way, we can ensure adequate provision of faculty and program resources for students admitted to the Rehabilitation Counseling program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Rehabilitation Counselor Education program is an online program. Similar to all Counselor Education Master's degree programs, RCE students have a planned program of study. Once an academic advisor has been assigned for your program of study, you should make an appointment to discuss your preferences and career aspirations. Some rehabilitation courses are offered as synchronous courses and will require weekly participation via live virtual classroom. The Rehabilitation Counseling program is 60 credit hours and meets accreditation criteria put forward by Council for Accreditation of Counseling and Related Educational Programs (CACREP). All students in the Rehabilitation Counseling program are required to purchase/register a Watermark™ Student Learning & Licensure account for student assessment purposes.

While the majority of your courses will be offered through the Counselor Education programs (designated as BCE), many required courses will be offered by affiliated programs. During your academic career, you will likely enroll for courses in Educational Psychology (designated as BEP), Educational Research (designated as BER), School Psychology (designated as BSP), and other areas. These courses afford the opportunity to take advantage of the expertise of faculty in other programs in the College of Education.

Code and Title		Hours
Required Courses		
BCE 512	Counseling Theory Proc *	3
BCE 513	Career Development	3
BCE 514	Counseling Skills *	3
BCE 517	Professional Counseling	3
BCE 521	Group Proced Coun Educ	3
BCE 522	Indiv & Group Appraisal	3

BCE 547	Intern Rehab Counseling	6
Total Hours		60

Footnotes

- * Students must earn a B or higher in prerequisite courses to advance to higher level coursework.

Transfer Credit

Graduate School information on Transfer Credit. (p. 15)

Comprehensive Exam

The policy of the Graduate School is that a comprehensive examination or summary project must be completed by all students seeking to graduate from any University of Alabama graduate program. The content and scheduling of the master's comprehensive examination in Counselor Education is consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department.

Eligibility for the initial attempt to secure a passing score on the master's comprehensive examination in Counselor Education is granted in the last semester in which students are completing their master's degree. The examination must be given at least two weeks before the date of graduation and reported promptly to the dean of the Graduate School on appropriate forms. The second attempt can be scheduled as early as in the following semester or a semester other than the first administration. Students need to register for at least 1 credit-hour for taking the second attempt. The Graduate School policy limits students to two (2) attempts for successful performance on the comprehensive examination. Failure on both attempts will lead to the student's dismissal from the program.

Objective Section

The objective portion of the comprehensive examination consists of 200 multiple-choice items. Questions are taken from courses required for the degree. This includes questions from the research and the Life Span Development courses. Students must achieve a score of 70% (140) or higher on the objective section in order to pass this section.

Typically, students are provided three hours to complete the objective section of the master's comprehensive examination. Dates and times for the objective examination are posted on the Rehabilitation Counseling webpage at the beginning of each academic year. In the event that a student requires an accommodation beyond the typical examination conditions, the student should contact the Office of Disability Services and request approval for exam accommodations (no less than two [2] working weeks before the examination). Once approved, an ODS staff member will inform the designated faculty about the required test accommodation. Students are encouraged to be familiar with regulations affecting comprehensive examinations published in the University of Alabama Graduate Catalog on their website or contact the Graduate School for further information.

Content areas for objective portion of comprehensive exam:

Foundations (Content Areas)

- Counseling Theorists and their Theories
- Counseling Skills and the Helping Relationship
- Group Work
- Career Theorists and their Theories
- Career Development Process and Career
- Counseling Research Designs and Methods
- Individual and Group Appraisal
- Life Span Development

Program Emphasis-Rehabilitation Counseling (Content Areas)

- Societal Attitudes and Disability
- Models of Disability
- Legislative History of Rehabilitation
- Counseling Policies and Laws Affecting Persons with Disabilities
- Roles and Functions of Rehabilitation Counselors
- The Vocational Rehabilitation Process
- Principles of Case Management
- Assessment in Vocational Rehabilitation
- Medical and Psychological Evaluations
- Job Development and Placement
- Resources for Occupational and Labor Market Information
- Job Analysis, Job Modification and Reasonable Accommodations
- Federal Employment Incentives
- Supported Employment
- Work Adjustment
- Assistive Technology
- Independent Living Advocacy
- Rehabilitation Ethics and Ethical Decision Making
- Medical Aspects and Psychological Aspects of Disability
- Health and Wellness
- Adjustment to Disability
- Multicultural Issues and Disability
- Disability Management
- Private-for-Profit Rehabilitation

Graduate School information Comprehensive Exams (p. 15).

Fieldwork/Practicum/Internship Requirements

While the skills necessary to performing classroom, settings are fundamental to the educational process, a significant element of the training program or any degree sought in the Program in Counselor Education is the applied experiences. In many ways, the activities associated in typical classroom work such as examinations, presentations, research papers, and special projects are the building blocks for the work a counselor does in the field: serving their clients. The curriculum in your program features a variety of practical, applied requirements. These are typically noted as "practicum" or "internship" on your Program Planning Records. As was noted previously, the academic advising process is critical in the sequence of your applied experiences in that the general rule is "practicum precedes internships" and deviation from that sequence is not allowed. Again, your academic advisor is quite

aware of this principle and will assist in your course selection from the annual academic schedule to insure both efficient and effective progress in your preparatory program.

A. Practicum

As an initial experience in applied work, students typically engage in closely supervised work with clients in courses noted as "practicum." For rehabilitation counseling students, BCE 546 typically involves 2 hours of weekly group supervision and one hour of weekly individual supervision with client contact throughout. University supervision for rehabilitation counseling students is provided via Zoom online video conference.

Since practicum is a prerequisite to internship and features expectations for certain skills levels, students may not be allowed to proceed to the next course in their applied experiences. Such a decision reflects the fundamental commitment of our program to quality service to clients, a position we advocate and we expect all affiliated with our program to advocate. Practicum placements are typically arranged prior to the semester in which the student anticipates enrolling for course credit. Pre-placement arrangements should be discussed and approved by the faculty listed in the University Schedule for the section of the practicum in which the student is enrolled.

Documentation. Students are responsible for retaining cumulative documentation of all practicum activities. The program requires completion of a supervised practicum in the student's designated program area of 100 clock hours. Each student's practicum includes all of the following:

Required CACREP 2024 Standards for Practicum Students:

- Students complete supervised counseling practicum experiences that total a minimum of 100 clock hours over a full academic term that is a minimum of 10 weeks.
- Practicum students complete at least 40 clock hours of direct service with actual clients that contributes to the development of counseling skills.
- Practicum students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the practicum by (1) a counselor education program core or affiliate faculty member, or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member, or (3) a fieldwork site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.
- Practicum students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the practicum. Group supervision must be provided by (a) a counselor education program faculty member or (b) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member.

B. Internship

The internship is considered to be the culminating academic experience and, consequently, occurs at the end of a student's training program. Expectations for internships are rather demanding in terms of placement duties and hours of commitment. Essentially, students completing the internship have the option of either one full-time placement (40 hours per week for 6 hours of credit for Rehabilitation Counseling) or two (2) consecutive half-time placements (20 hours per week for 3 hours of credit per semester for Rehabilitation Counseling). Student interns perform the duties of a counselor in a setting in which the student aspires to work upon graduation. Students employed in full-time work should anticipate

meeting this challenge. The culminating internship experience must feature at least 600 hours of internship-related activity in the placement, of which at least 240 hours are in direct contact with clients. As with practicum, internship placements are prearranged during the semester prior to enrollments. For rehabilitation counseling students, Zoom online video conference is provided weekly for the supervision purpose.

Prearranged Placement. Internship placements are to be approved by the University Supervisor of Internships prior to the beginning of the semester/term for which the intern is enrolled for internship credit. To assist in making the internship experience as meaningful as possible, students are responsible for making preliminary contacts with prospective internship site placements (this activity is very much like a job interview, a procedure we ALL hope you will undertake in the future). Prospective interns are encouraged to develop their vita and arrange to interview with a prospective site supervisor (a copy of your Program Planning Record may be helpful for students to discuss their academic experiences).

Internship responsibilities and duties. Basic Student Responsibilities: (a) Complete work at internship site as specified in Internship Agreement, (b) Participate in weekly individual site supervision, (c) Participate in weekly university group supervision, and (d) Complete and submit all required forms including weekly progress reviews/summaries/time log, mid-internship self-evaluation, and final self-evaluation. **Basic Agency Responsibilities:** (a) Assign a site supervisor who meets minimum education and experience requirements, (b) Provide intern with an orientation to the agency, (c) Provide an average of one hour of weekly individual supervision, (d) Expose intern to the range of services provided by the agency, (e) Provide intern with opportunities to perform multiple functions in the agency, depending on the focus of the agency, (f) Communicate at least three times with the university supervisor for progress review, (g) Complete a mid-internship evaluation of the student and (h) Complete a final evaluation of the student. **Basic University Supervisor Responsibilities:** (a) Maintain direct and periodic communication (at least 3 times a semester) with the site supervisor, (b) Provide one hour of weekly individual supervision or 1½ hours of group supervision, (c) Be available for consultation with both site supervisor and intern, and (d) Assign a final grade for the internship.

Orientation, assistance, consultation, and professional development opportunities are provided by the counseling program faculty to site supervisors. All internship forms and supervision training are electronically provided to site supervisors.

Documentation. Interns are responsible for retaining cumulative documentation of all internship activities. The program requires completion of a supervised internship in the student's designated program area of 600 clock hours, begun after successful completion of the practicum. The internship is intended to reflect the comprehensive work experience of a professional counselor appropriate to the designated program area. Each student's internship includes all of the following:

Required CACREP 2024 Standards for Interns:

- After successful completion of the practicum, students complete 600 hours of supervised counseling internship in roles and settings with actual clients relevant to their CACREP specialized practice area.
- Internship students complete a minimum of 240 hours of direct service with actual clients.
- Throughout the duration of the internship, each student receives individual and/or triadic supervision on a regular schedule that averages one hour a week and is provided by at least one of the following: (1) a counselor education program faculty

member, or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member, or (3) a fieldwork site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.

- Throughout the duration of the internship, each student receives group supervision on a regular schedule that averages 1½ hours per week and is provided by at least one of the following: (1) a counselor education program faculty member or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member.

Internship Evaluation. Evaluations of internships are secured from two (2) sources at the conclusion of the internship placement. The first source of evaluation is derived from the site supervisor using the Internship Performance Evaluation rubric. The second source of evaluation is derived from the student. These evaluations, along with the Summary of Internship Activities, are due to the university supervisor as noted on the schedule for internship. Site supervisor evaluations offer formal ratings of performance and a recommended grade based on the Internship Performance Evaluation rubric.

Site Supervisors Requirements for Practicum and Internship:

Prospective site supervisors must meet the following CACREP and program criteria:

- a minimum of a master's degree, preferably in counseling or a related profession;
- active certifications and/or licenses in the geographic location where the student is placed, preferably in counseling or a related profession;
- a minimum of two years post-master's professional experience relevant to the CACREP specialized practice area in which the student is enrolled;
- relevant training for in-person and/or distance counseling supervision;
- relevant training in the technology utilized for supervision; and
- knowledge of the program's expectations, requirements, and evaluation procedures for students

The Procedure for completing a prearranged practicum or internship is:

1. Prospective intern interviews with prospective site supervisor.
2. Prospective intern discusses placement opportunity with university supervisor.
3. Prospective intern discusses placement opportunity with prospective site supervisor.
4. If an unapproved site, university supervisor visits site to determine placement suitability based on prospective intern's training and aspirations as well as the program
5. If approved, UA supervisor informs both site supervisor and intern of approval.

Student Insurance. Prior to 8/18/20, students are enrolled for UA liability insurance through registration for any practicum or internship in Counselor Education per policy of the Office of Risk Management. Students must complete the liability form each term and return the form to BCE instructor for course. Beginning from 8/19/2020, all students who plan to start practicum or internship for counseling/supervision practices are responsible to purchase individual liability insurance for professional counseling at their own expense and submit a copy of

insurance verification to the Practicum/Internship Coordinator prior to their practice.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 15).

Student Progress Requirements

Each student enrolled in a degree-seeking status in every degree level of study in Counselor Education is involved in a Student Performance review near the end of Fall and Spring semesters. The rubric used is the Faculty Review of Student Performance and Review of Student Dispositions. The faculty review professional and personal strengths and concerns, while monitoring progress. This form entails five sections: academic skills, clinical skills, ethical and professional behaviors, personal characteristics, and the four professional dispositions, endorsed by the College of Education are also included.

Within each section, faculty members will discuss their observed student performance or individual characteristics/dispositions over various indicators and rate a student on a four-point scale: advanced, target, developing, and unacceptable. If dispositions do not meet the minimum standard of "Target," a concern for remediation plan is raised. Student data on their dispositions are also aggregated to help faculty members annually evaluate program objectives for the purpose of program improvement.

Based on this evaluation, students will receive one of the following based on rubric scores: (1) A letter stating exemplary progress in the program, (2) Communication that there were no concerns related to progress in the program, (3) Communication to meet advisor because of a provisional recommendation, and (4) An action plan is required (Remediation). Such reviews are regular components of the training program. Student reviews are conducted with the participation of all Program faculty. Results of student evaluations are entered into each student's record and discussed with the student and their advisor.

In instances of concern about a student, pertinent materials and observations about the student are examined and discussed among the faculty and remedial decisions are determined according to the Selection, Review, Retention, and Dismissal Policy noted in the appendices of the Student Handbook. Due process issues affecting student evaluations are followed in accordance with all published guidelines in materials from the Graduate Catalog and University of Alabama Faculty Handbook.

Counselor Education: School Counseling, MA

The Master of Arts degree in Counselor Education: School Counseling is designed to provide prospective school counselors with the skills necessary to establish and conduct effective developmental guidance and counseling programs in the pre-k-12 school setting. Students are trained through a comprehensive curriculum and internship program that qualifies them for work at all levels of school counseling. The program meets accreditation criteria of The Council for the Accreditation of Educator Preparation (CAEP) and Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Admissions

In addition to the minimum Graduate School admission requirements, admission decisions are made based on submitted application materials. The following materials are required for the application to be considered complete:

- CV/Resume
- A Statement of Purpose. In the Statement of Purpose, applicants should discuss:
 - Your interest in pursuing a MA degree in Counselor Education and your related career goals.
 - Your aptitude (e.g., skills, traits, and/or previous experiences) for graduate-level study in a digitally delivered program (see Statement on Digital Delivery).
 - Your approach to working with diverse populations and respect for cultural differences.
- Three letters of recommendation consistent with goals of the program from persons who can attest to your potential for success in graduate school.
- Official transcripts from all college-level coursework and degree programs.

Applicants without prior certification and/or professional educational experience may be considered for admission to this CACREP-accredited program. However, applicants pursuing Alabama Class A School Counselor certification through the traditional approach must hold at least bachelor's level professional educator certification in a teaching field or master's level professional educator certification in an instructional support area. Additionally, two full years of full-time professional educational experience in a P-12 setting is required for the traditional approach.

The admission deadlines for each academic semester are as follows:

- Fall – February 15th
- Spring – October 15th
- Summer – February 15th

Applicants can expect a response to their application materials within one month after the deadline.

Faculty reserve the right to revisit the application pool after final decisions in the event spots remain available, although applicants who submit their materials after the deadline should expect their applications to be denied admission or requested to be reviewed in the subsequent review period.

Admission decisions are made based on application materials submitted. After reviewing application packets, interviews may take place between applicants and faculty.

While GRE or MAT is not required for regular admission, an applicant with a GPA below 3.0 but with a score of 300 or higher (verbal and quantitative combined) on the Graduate Record Examination (GRE) or a score of 50th percentile or higher on the Miller Analogies Test (MAT), may be considered for Admission with Permission to Continue.

Applicants who do not fully meet the GPA or admission test score requirements may be eligible to be considered for Admission with Permission to Continue. Applicants who do not meet at least one criterion for Admission with Permission to Continue are not considered for admission. A decision to admit an applicant with Permission to Continue into the program will be based upon several factors including the combination of GPA and admission test scores (if provided), goals, and previous work experience.

Please be reminded that delays in processing applications are both necessary and inevitable. In this way, we can ensure adequate provision of faculty and Program resources for students admitted to the Program in Counselor Education.

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

All Counselor Education master's degree programs consist of a planned program of study. The plan follows the appropriate requirements for accreditation in that area. Once an academic advisor has been assigned, students should make an appointment to discuss their preferences and career aspirations. The program of study that a student accepts when entering the program will be the one followed until graduation. If there are any changes to a student's coursework, they need to be approved by the advisor. All students in the School Counseling program are required to purchase/register a WatermarkTM Student Learning & Licensure account for student assessment purpose.

While the majority of courses will be offered through the Program in Counselor Education (designated as BCE), many required courses will be offered by affiliated programs, including courses in Educational Psychology (designated as BEP), Educational Research (designated as BER), School Psychology (designated as BSP), and other areas. These courses will afford students the opportunity to take advantage of the expertise of faculty in other program areas.

Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C. Passing scores on a comprehensive exam and the appropriate Praxis assessment(s) are required.

Code and Title		Hours
Required Courses:		
BCE 511	Principles Of Guidance	3
BCE 512	Counseling Theory Proc ⁺	3
BCE 513	Career Development	3
BCE 514	Counseling Skills ⁺	3

Total Hours		60

Footnotes

- * ALSDE-approved course
- ** Passing the Praxis is required prior to enrollment in BCE 525 Intern Sch Clint Ment Hea Cou.
- *** If the student completed an Introduction to Exceptional Children course as an undergraduate, substitute another 500-level course with advisor approval. SPE 500 Intro Exc Childr/Youth is an ALSDE requirement for certification.
- + Prerequisites: Students must earn a B or higher in prerequisite courses to advance to higher-level coursework.

Transfer Credit

In compliance with regulations established by the Alabama Department of Education and outlined in the Alabama Administrative Code, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

Graduate School information on Transfer Credit (p.).

Comprehensive Exam

The policy of the UA Graduate School is that a comprehensive examination or summary project must be completed by all students seeking to graduate from any UA graduate program. The content and scheduling of the master's comprehensive examination in Counselor Education is consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department.

Eligibility for the initial attempt to secure a passing score on the master's comprehensive examination in Counselor Education is granted in the last semester in which students are completing their master's degree. The examination must be given at least two weeks before the date of graduation and reported promptly to the dean of the Graduate School on appropriate forms. The second attempt can be scheduled as early as in the following semester or a semester other than the first administration. Students need to register for at least 1 credit-hour for taking the second attempt. The Graduate School policy limits students to two (2) attempts for successful performance on the comprehensive examination. Failure on both attempts will lead to the student's dismissal from the program.

Comprehensive Project

Your Comprehensive Project is to be submitted in an electronic form to the Coordinator of Examinations for the program. The use of electronic

format is designed for ease of submission, ease of review, and further demonstration of students' technological skills per accreditation requirements. The Program Comprehensive Project is a collection of training-based materials and reflective information that demonstrate various dimensions of master level students' philosophy, abilities, and attitudes. The goal is to demonstrate how diverse activities and insights have contributed to the development of a master's student in Counselor Education.

The Comprehensive Project also serves as the Comprehensive Examination to help evaluate master's levels students learning experiences across the core areas of the CACREP standards and the second-measure point of the KPIs.

Submission Point: The Comprehensive Project will be submitted on due dates indicated in the program calendar and in students' final semester of the program. The Comprehensive Project submission will be evaluated by track faculty. The Comprehensive Project includes the following elements (related rubric included below):

A. Resume

Your resume must include previous educational experiences, work experience, professional activities/memberships, and honors. Remember your resume is your professional summary and it is a vital element of your image to both peers and the public (it is also the most essential item to provide as you pursue employment opportunities).

Your resume should be 2-pages or less and include the following headings:

1. Header (name, full address, phone number, email)
2. Professional Objective Statement (one sentence)
3. Educational Experience
4. Work Experience
5. Professional Memberships/Activities, Honors, and Relevant Skills (students may choose to break this section into two or more sections in their own resume, but they will be graded as a collective).

Based on the resume, students need to complete are a reflection on the following aspects:

1. Review your resume and provide a detailed description and discussion of your career development history with current position and future career plans
2. Give a detailed description of your career theory/model of choice and provide a rationale for your theory/model that supports your career development history, progress and projection

B. Personal Theory Paper

The personal theory paper allows a student to demonstrate their understanding of various theoretical perspectives on the helping process with their applied experiences. This document is intended to be declarative (i.e., portraying your personal perspective) rather than comparative (i.e., selecting various theoretical models and comparing them against one another). In essence, this activity is an opportunity for you to articulate what you have learned and what you attempt to accomplish in your counseling efforts. Your personal theory paper will present your integration of training and experience through a description of the following:

1. A Brief Description of Your Theory
2. Key concepts to include:
 - a. View of human nature
 - b. Structure/development of personality

- c. Philosophical orientation
- d. Client's experience in therapy
- e. Relationship between client and therapist
- f. The therapeutic process

C. Counselor Intervention Project

During internship, students completed a counselor intervention project. Students will submit *one* of their choosing that they feel best reflects their comprehensive interviewing and case conceptualization skills, ability to use research to inform counseling practice, and knowledge of legal and ethical considerations in counseling.

D. Student Selection of Best Work

Your selection may be a paper, project, or presentation that you believe represents your best work in your area of study and preparation. You should remember that this is your opportunity to be creative with your representation of your professional skills and knowledge

E. Summary Statement of Reflection on Counselor Identity Development at This Point in Professional Career

Students will submit a brief statement reflecting on their counselor identity development at this point in their professional career. Reflections should address their identity development.

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

While the skills necessary to performing in the classroom settings are fundamental to the educational process, a significant element of the training program or any degree sought in the Program in Counselor Education is the applied experiences. In many ways, the activities associated in typical classroom work such as examinations, presentations, research papers, and special projects are the building blocks for the work a counselor does in the field: serving their clients! The curriculum in your program features a variety of practical, applied requirements. These are typically noted as "practicum" or "internship" on your Program Planning Records.

Note: Practicum must be completed at a Middle School and Internship must split between an Elementary and High School.

A. Practicum

As an initial experience in applied work, school counseling students engage in closely supervised work with students in the schools in course noted as "practicum." BCE 516 typically involves at least 2 hours of weekly group supervision and one hour of weekly individual supervision with student contact throughout. University supervision for school counseling students is provided on campus. Students enrolled in BCE 516 may wish to secure a practicum placement at distant sites, but the expectation for on-campus supervision is not compromised.

The Practicum course is noted as "Pass/Fail" courses, meaning that performance expectations for students in these courses are NOT tied to the completion of an academic semester.

Since practicum is a prerequisite to internship and features expectations for certain skills levels, students may not be allowed to proceed to the next course in their applied experiences until they have "passed" the course. Such a decision reflects the fundamental commitment of our program to quality service to students, a position we advocate, and we expect all affiliated with our program to advocate. Practicum placements are typically arranged prior to the semester in which the student

anticipates enrolling for course credit. Pre-placement arrangements should be discussed and approved by the faculty listed in the University Schedule for the section of the practicum in which the student is enrolled.

Documentation. Students are responsible for retaining cumulative documentation of all practicum activities. The program requires completion of a supervised practicum in the student's designated program area of 100 clock hours. Each student's practicum includes all of the following:

Required CACREP 2024 Standards for Practicum Students:

- Students complete supervised counseling practicum experiences that total a minimum of 100 clock hours over a full academic term that is a minimum of 10 weeks.
- Practicum students complete at least 40 clock hours of direct service with actual clients that contributes to the development of counseling skills.
- Practicum students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the practicum by (1) a counselor education program core or affiliate faculty member, or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member, or (3) a fieldwork site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.
- Practicum students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the practicum. Group supervision must be provided by (a) a counselor education program faculty member or (b) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member.

B. Internship

The internship is the culminating academic experience and, consequently, occurs at the end of a student's training program. Expectations for internships are rather demanding in terms of placement duties and hours of commitment. Essentially, students completing the internship have the option of either one full-time placement (40 hours per week for 6 hours of credit for SC) or two (2) consecutive half-time placements (20 hours per week for 3 hours of credit per semester for SC). Student interns perform the duties of a school counselor in a setting in which the student aspires to work upon graduation. Students employed in full-time work should anticipate meeting this challenge. The culminating internship experience must feature at least 600 hours of internship-related activity in the placement, of which at least 240 hours are in direct contact with clients or students. As with practicum, internship placements are prearranged during the semester prior to enrollments. For school counseling students, on-campus supervision is provided weekly.

Prearranged Placement. Internship placements are to be arranged and approved by the University Supervisor of Internships prior to the beginning of the semester/term for which the intern is enrolled for internship credit. To assist in making the internship experience as meaningful as possible, students are responsible for making preliminary contacts with prospective internship site placements (this activity is very much like a job interview, a procedure we ALL hope you will undertake in the future!). Prospective interns are encouraged to develop their vita and arrange to interview with a prospective site supervisor (a copy of your Plan of Study may be helpful for students to discuss their academic experiences).

Internship responsibilities and duties. The internship is an academic course and, therefore, is subject to the same scrutiny and the same rights of due process for faculty and students as with any other academic course. For this reason, your syllabus features the same language and accompanying documentation as with any other course. However, because of the uniqueness of each student's internship placement, determination of an academic grade must be based on evaluations of each student's work in that setting. No syllabus could possibly be developed to address each aspect of each intern's placement. Therefore, to clarify the expectations of the intern, the site supervisor, and the university supervisor, each intern is responsible for developing an internship agreement specifying the nature of their duties. This document serves two (2) critical purposes: (a) it becomes the basis for clarifying the agreements among all parties involved in the internship, and (b) it serves as a reference for assigning a final internship grade.

At the point of pre-approval for the internship placement, all parties will have a verbal understanding of the expectations for the internship placement. Interns should develop an initial draft of the internship agreement for discussion with their site supervisor during the first week of the placement to ensure that all desired aspects of the internship experience are addressed (copies and guidelines are provided in supplemental handouts). Once approved by both the site supervisor and the intern, draft documents are printed on University of Alabama letterhead and signed by all parties (original document retained in University files; copies provided to intern and site supervisor). Supervision contracts are developed by each student to define roles and responsibilities of the counseling supervisor, site supervisor, and the student during practicum and internship. Departures from the stated contents of the internship agreement are to be discussed by and agreed upon by all parties. Grade determination for interns is based upon successful completion of the elements of the internship agreement.

Orientation, assistance, consultation, and professional development opportunities are provided by the counseling program faculty to site supervisors. All internship forms and supervision training are electronically provided to site supervisors.

Documentation. Interns are responsible for retaining cumulative documentation of all internship activities. The program requires completion of a supervised internship in the student's designated program area of 600 clock hours, begun after successful completion of the practicum. The internship is intended to reflect the comprehensive work experience of a professional counselor appropriate to the designated program area. Each student's internship includes all of the following:

Required CACREP 2024 Standards for Interns:

- After successful completion of the practicum, students complete 600 hours of supervised counseling internship in roles and settings with actual clients relevant to their CACREP specialized practice area.
- Internship students complete a minimum of 240 hours of direct service with actual clients.
- Throughout the duration of the internship, each student receives individual and/or triadic supervision on a regular schedule that averages one hour a week and is provided by at least one of the following: (1) a counselor education program faculty member, or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member, or (3) a fieldwork site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.

- Throughout the duration of the internship, each student receives group supervision on a regular schedule that averages 1½ hours per week and is provided by at least one of the following: (1) a counselor education program faculty member or (2) a doctoral student supervisor who is under the supervision of a qualified core or affiliate counselor education program faculty member.

Internship Evaluation. Evaluations of internships are secured from two (2) sources at the conclusion of the internship placement. The first source of evaluation is derived from the site supervisor using the Internship Performance Evaluation rubric. The second source of evaluation is derived from the student. These evaluations, along with the Summary of Internship Activities, are due to the university supervisor as noted on the schedule for internship. Site supervisor evaluations offer formal ratings of performance and a recommended grade based on the Internship Performance Evaluation rubric.

Site Supervisors Requirements for Practicum and Internship:

Prospective site supervisors must meet the following CACREP and program criteria:

- a minimum of a master's degree, preferably in counseling or a related profession;
- active certifications and/or licenses in the geographic location where the student is placed, preferably in counseling or a related profession;
- a minimum of two years post-master's professional experience relevant to the CACREP specialized practice area in which the student is enrolled;
- relevant training for in-person and/or distance counseling supervision;
- relevant training in the technology utilized for supervision; and
- knowledge of the program's expectations, requirements, and evaluation procedures for students.

The Procedure for completing a prearranged practicum or internship is:

1. Prospective intern interviews with prospective site supervisor.
2. Prospective intern discusses placement opportunity with university supervisor.
3. Prospective intern discusses placement opportunity with prospective site supervisor.
4. If an unapproved site, university supervisor visits site to determine placement suitability based on prospective intern's training and aspirations as well as the program
5. If approved, UA supervisor informs both site supervisor and intern of approval.

Student Insurance. Prior to 8/18/20, students are enrolled for UA liability insurance through registration for any practicum or internship in Counselor Education per policy of the Office of Risk Management. Students must complete the liability form each term and return the form to BCE instructor for course. Beginning from 8/19/2020, all students who plan to start practicum or internship for counseling/supervision practices are responsible to purchase individual liability insurance for professional counseling at their own expense and submit a copy of insurance verification to the Practicum/Internship Coordinator prior to their practice.

Time Limit for Degree Completion

Graduate School information on Time Limits (p.).

Student Progress Requirements

Each student enrolled in a degree-seeking status in every degree level of study in Counselor Education is involved in a Student Performance review near the end of Fall and Spring semesters. The rubric used is the Faculty Review of Student Performance and Review of Student Dispositions. The faculty review professional and personal strengths and concerns, while monitoring progress. This form entails five sections: academic skills, clinical skills, ethical and professional behaviors, personal characteristics, and the four professional dispositions, endorsed by the College of Education are also included.

Within each section, faculty members will discuss their observed student performance or individual characteristics/dispositions over various indicators and rate a student on a four-point scale: advanced, target, developing, and unacceptable. If dispositions do not meet the minimum standard of "Target," a concern for remediation plan is raised. Student data on their dispositions are also aggregated to help faculty members annually evaluate program objectives for the purpose of program improvement.

Based on this evaluation, students will receive one of the following based on rubric scores: (1) A letter stating exemplary progress in the program, (2) Communication that there were no concerns related to progress in the program, (3) Communication to meet advisor because of a provisional recommendation, and (4) An action plan is required (Remediation). Such reviews are regular components of the training program. Student reviews are conducted with the participation of all Program faculty. Results of student evaluations are entered into each student's record and discussed with the student and their advisor.

In instances of concern about a student, pertinent materials and observations about the student are examined and discussed among the faculty and remedial decisions are determined according to the Selection, Review, Retention, and Dismissal Policy noted in the appendices of the Student Handbook. Due process issues affecting student evaluations are followed in accordance with all published guidelines in materials from the Graduate Catalog and University of Alabama Faculty Handbook.

Additional Academic Requirements

All students are required to complete fingerprinting for background clearance before going into the schools. A passing score on the Professional School Counselor Praxis subject assessment is required.

Students who do not have valid professional educator certification (valid teaching certificate in AL) and two years of full-time acceptable professional educational work experience prior to admission to the MA program will be required to take and pass the National Counselor Examination (NCE) before applying for certification in Alabama.

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Students are required to maintain a VIA/Watermark account. Students are required to submit (1) Showcase of Resources for Advanced Certification Students (i.e., School Counseling Portfolio), at three checkpoints, throughout their program of study and (2) assignments for CACREP-affiliated course.

Certification

To be eligible for Alabama Class A School Counselor certification based on a State-approved program, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C
- earn a passing score on the appropriate, Alabama approved Praxis for School Counseling
- hold at least a valid Alabama Class B professional educator certificate in a teaching field, a valid Class A professional leadership certificate, or a valid Class A professional educator certificate in another area of instructional support

Students must complete the proper application form for Alabama certification. A student who does not apply for professional certification within 60 months after completing a State-approved program will be required to meet the current program.

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

Alternatively, individuals who have completed at least the master's degree level CACREP-accredited school counseling program may apply for Alabama certification in school counseling through the CACREP-Accredited School Counseling Program Approach.

Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education and are responsible for knowledge about professional licensure requirements in those states.

Project PROMISE is a collaborative partnership between The University of Alabama's College of Education, the School of Social Work, and the Tuscaloosa City School (TCS) system. This five-year federally-funded initiative will train and place 40 master's-trained school-based mental health practitioners, specifically school counselors and social workers, to serve K-12 students in high-needs school districts. Please review the program website for more information <https://promise.ua.edu>.

Graduate School information on Financial Assistance.

Educational Psychology, Ed.S.

The University of Alabama School Psychology Program is designed to provide exemplary graduate training in research and in the application of practice related to the learning, development, and mental health of children and youth, and their families. The EdS program includes an integrated and sequential program of study with comprehensive coursework and supervised field experiences. Candidates participate in courses and seminars in assessment and data collection, interventions and decision making, prevention and consultation, professional school psychology, sociocultural and educational foundations, psychological foundations, human development, statistics and research, and other areas. Candidates are required to participate in extensive practicum, internship, and research experiences. All graduates are eligible to apply for EdS-level certification through state education agencies.

NOTE: The Educational Psychology, EdS program has two available options:

1. **Option 1:** Students complete the program by attending classes in person on the main UA campus in Tuscaloosa, AL. Students in this option typically take between 9 and 15 credits per semester. This option is designed to be completed over two-years of coursework and a year-long internship (1200 hours). Option 1 is recognized and approved by the National Association of School Psychologists (NASP), and graduates are eligible to apply for the NCSP. For Class AA certification in Alabama, graduates may apply via the National School Psychologist Approach. Please see the Requirements page for admissions, coursework, and additional information for this option.
2. **Option 2:** Students complete the program by attending distance learning/hybrid classes. This option is designed for working professionals, and most students take 6 credits per semester. Typically, students complete 1-3 years of coursework, followed by a year-long internship (1200 hours). Master's level certification in either School Psychometry or Special Education is required for admission into this program. Option 2 is recognized and approved by the Alabama State Department of Education (ALSDE), and graduates are eligible to apply for Class AA certification in School Psychology. Graduates may independently apply for the NCSP through the portfolio submission process with NASP.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include a vita/resume and three letters of recommendation consistent with goals of the program. An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities. All admitted applicants must also meet the fingerprinting requirement for background clearance.

For Option 1: Prospective students are encouraged to complete their applications by January 1 for priority admission the following Fall. Please note that a prior graduate degree or educator certification is not required for admission to the Option 1 (on-campus).

For Option 2: Applicants are encouraged to complete their applications by either January 1 (priority admission) or March 1 for admission. In addition, Option 2 (*distance learning/hybrid*) applicants must meet

admission requirements established by the Alabama State Department of Education:

1. Valid master's level certification in school psychometry, school psychology, or special education
2. Two years of acceptable, professional educational experience in a P-12 setting

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Changes to Certification Programs

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. For the most current information, please check with the Office of Student Services and Certification or the program advisor.

See the Admission Criteria section of this catalog for more information.

Course Requirements (Distance Learning/Hybrid Program, Option 2)

This course listing applies to those who begin this program June 13, 2024, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. Students should consult their advisors each semester before registering.

** *Minimum 300 field hours for BSP 588 or BSP 586*

Transfer Credit

The School Psychology Program has more stringent requirements than the Graduate School maximums for transfer credit for students who have completed previous graduate coursework. Generally, fewer courses will be approved for transfer credit than the Graduate School maximums. In some circumstances, a student with a previous graduate degree may be allowed to count some coursework from the previous degree. After a student begins enrollment in our program, transfer credit or use of previous graduate coursework must first be evaluated and approved by program faculty to determine equivalency to a required course in our program. Equivalency is determined by consistency between the proposed transfer course and required program course in terms of objectives, content, projects, and other activities. Only in very unusual circumstances will a student be approved to transfer previous graduate coursework for required courses with the "BSP" (school psychology core) designation in our program of study. However, it may be possible for students to transfer educational psychology, educational foundations, special education, etc., courses that are equivalent to those in our required program of study.

Please note that for students enrolling in Option 2 (*distance learning/hybrid*), courses taken for prior Class A certification cannot be counted toward this degree.

Graduate School information on Transfer Credit (p. 18).

EdS Plan of Study

School psychology coursework, clinical experiences, internship, and other requirements are designed to address the domains of knowledge and expertise specified by the National Association of School Psychologists (2020), as well as the Alabama Department of Education. These domains are as follows:

1. Data-Based Decision Making
2. Consultation and Collaboration
3. Academic Interventions and Instructional Supports
4. Mental and Behavioral Health Services and Interventions
5. School-Wide Practices to Promote Learning
6. Services to Promote Safe and Supportive Schools
7. Family, School, and Community Collaboration
8. Equitable Practices for Diverse Student Populations
9. Research and Evidence-Based Practice
10. Legal, Ethical, and Professional Practice

All students must complete an internship at or near the end of formal training. Students must be approved by the program to begin planning for internship and before an internship placement begins.

For Option 1: Option 1 (*on-campus*) requires a minimum of three years of full-time study or the equivalent beyond the baccalaureate degree. Fall, spring, and summer semester enrollment is necessary to achieve these timelines. Option 1 (*on-campus*) requires a total of 72 graduate credit hours, with a MA awarded in route to graduation from the EdS. Required coursework hours include credits obtained from courses, practica, and internship.

For Option 2: Option 2 (*distance learning/hybrid*) is a State-approved program, and students complete requirements as outlined on the State-

approved program checklist. Option 2 (*distance learning/hybrid*) requires at least 36 graduate credit hours beyond masters-level study. Required coursework hours include credits obtained from courses, practica, and internship.

Comprehensive Exam

All students in the School Psychology Program are required to successfully complete written examinations before any degrees will be granted. The examinations are completed independently on a “take-home” basis and require students to integrate knowledge and skills obtained during coursework and other graduate education activities. Successful completion of the program requires that a student passes the exams. Further, no student will be allowed to enroll in internship until all portions of the exam are passed. Students must obtain an average of 80% of higher across faculty ratings of all portions of the comprehensive exam to pass.

Graduate School information on Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship

Fieldwork and Practicum

Most of the required school psychology courses with the BSP prefix include some type of clinical or field-based experiences.

For Option 1: In the first year of Option 1 (*on-campus*), BSP 501 Ethics and Professional Issues in School Psychology, BSP 521 Cognitive and Academic Assessment and Data-Based Decision Making, and BSP 523 Social-Behavioral Assessment and Data-Based Decision Making all require field or clinical experiences, including classroom observations in local schools, assessment and data collection with youth, families, or other carefully supervised experiences. Several other required courses (prefixes SPE, CRD, BCE, etc.) may also require clinical and field experiences on campus and in local public schools.

Formal practicum courses are required in addition to field work experiences. In the second year of Option 1 (*on-campus*), students take BSP 580 School-Based Practicum in Assessment for 200+ hours of on-site field activities in local schools in Fall semester and BSP 683 Advanced School-Based Practicum for 200+ hours of on-site field activities in local schools in Spring semester. Practicum sites are schools and other agencies relevant for school psychology practice. BSP 580 School-Based Practicum in Assessment and BSP 683 Advanced School Practicum are taken by EdS students in local public schools in the immediate Tuscaloosa or surrounding areas, and faculty work closely with students to match them with practicum supervisors in the surrounding area.

For Option 2: In the first year of Option 2 (*distance learning/hybrid*), students complete a formal practicum course, BSP 686 Consultation and Intervention Practicum, and obtain 150+ hours of field-based experience. Students in this option may choose to obtain practicum hours within their home school district.

Internship

All students must complete an internship at or near the end of formal training. Students must be approved by the program to begin planning for internship and before an internship placement begins. With program approval, internships may occur in qualified settings across the country. The EdS internship requires a minimum of 1,200 clock hours and may be completed on a full-time basis in one academic year (600+ clock hours over a continuous 15+ week period in each of a consecutive fall and spring semester) or, with special permission, on a half-time, continuous basis over two consecutive academic years. Students enrolled in Option

2 may complete their EdS internship hours over the summer term if approved by their university instructor and field-based supervisor. At least 600 internship hours must be in a school setting.

Students seeking internship placements must discuss the placement with their advisor and program coordinator at least a year in advance—during the first few weeks of the fall semester preceding an internship placement for the following fall term. By May 10 prior to the internship, potential interns must document that all program requirements for internship have been met and must seek and obtain program approval to begin internship by submitting the Internship Approval form. Once program approval has been provided to the intern, the intern will share the UA School Psychology Program MOA with the internship site for signature. When the internship site has agreed to and signed the MOA, the intern will return it to the program coordinator who will ensure the remaining UA personnel signatures are completed. The intern must provide the MOA to their internship site by June 1. Students may not begin their internship without a completed and signed MOA.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Admission to Candidacy

It is the student's responsibility to ensure that all necessary forms including the program of study form, admission to candidacy form, and application for degree are submitted to the Graduate School and must pay all necessary fees for graduation. Students are reminded to apply for admission to candidacy and graduation in their penultimate semester (preceding the semester in which degree requirements are to be completed.) Thus, EdS students who enter the program under Option 1 and complete coursework on campus must complete the application for degree for the MA - which may be awarded in route to the EdS - and later for the EdS degree, which is awarded at completion of internship.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 18).

Student Progress Requirements

Continuous Review of Student Progress

Each student is required to undergo a formal progress review during an annual progress evaluation at the end of every spring semester after entering the program; thus students entering the program in a fall term will have their first formal progress review at the end of the following spring, after two complete semesters of graduate study in the program. At the end of each spring term in the program, students are required to submit a comprehensive electronic progress evaluation of their work by the due date provided by the program coordinator; faculty members review the progress evaluation and evaluate knowledge, skills, and other relevant characteristics of students as shown in coursework, clinical work, field placements, and other program activities.

Students are expected to receive satisfactory ratings on all progress evaluation components to continue with the planned program of study. In some cases, students may receive ratings of satisfactory that also include program requirements for improvement. Ratings of non-satisfactory on a few components may result in program requirements for additional course or field activities before continuation with the planned program of coursework, practicum, or internship. Thus, failure

to make adequate progress in the program, based on a variety of quantitative and qualitative factors, will result in the student being placed on warning or perhaps being dropped from the program. There are four possible outcomes to the annual progress review evaluation process:

- 1) satisfactory progress in all areas,
- 2) satisfactory progress but with requirements for improvement
- 3) unsatisfactory progress in a few areas with probation for student and requirements for improvement, and
- 4) unsatisfactory progress in several areas, with discontinuation of student.

Please note that students may be given a probationary period before they are discontinued, if deemed appropriate or necessary.

Minimum Grade/GPA Policies in School Psychology Courses

Students enrolled in the School Psychology Program must maintain a grade of B or higher in all core school psychology courses. Students may be able to repeat a course if they earn a grade lower than a B. Failure to receive a grade of a B or higher when taking a core school psychology course a second time results in dismissal from the program.

Students also must continually maintain a GPA of at least 3.0 to continue advancing toward key degree-related milestones. These include taking qualifying exams, comprehensive exams, advancing to candidacy, and accepting/beginning an internship.

Practica and Field Placement Policies

Addressing Concerns about Students in Field Placements, Practica, and Internships Field supervisors are asked to immediately report any concerns, issues, or suggestions to the student and to the university professor. Concerns by the field supervisor and/or university professor may be addressed through improvement plans developed for the student, in collaboration with the student, field supervisor, and university professor. Significant concerns may result in temporary suspension of the field placement, removal of the student from the placement, a grade of F for the course, and/or dismissal from the program.

Improvement Plans

If a student improvement plan for courses, field placement, or other program activities becomes necessary, the program faculty, placement site supervisors, and students will develop an improvement plan that identifies concerns/issues, specific goals, deadlines, evaluation methods, and required outcomes needed for the student to meet all criteria and achieve all objectives and earn a satisfactory grade for the course or field placement. The improvement plan will include frequent meetings between the student, professors, and supervisors to monitor progress. The improvement plan will include frequent submission of materials by the student and frequent submission of a formal evaluation by the professors and supervisors.

Program Dismissal

The student will have the right to meet with the program faculty and department chair. If the decision is to be that the student is dismissed from the program, the student will be informed in writing. If the student disagrees with the program decision, or feedback provided, the student may consult with someone outside the program, and consider submitting an appeal. The University of Alabama College of Education Grievance Procedures (<https://education.ua.edu/students/student-complaint/>) will be followed if a student has a grievance about the decision to dismiss the student or another type of academic concern.

Additional Academic and Program Requirements

Fingerprinting/Background Check

The UA College of Education requires that all students must clear a fingerprinting/background check prior to field experiences. Prior to their first semester of enrollment in the program, school psychology students must meet this requirement for activities in schools under the jurisdiction of the Alabama Department of Education. Students should contact our college's Student Services Office at (205) 348-0193 to obtain instructions or confirm if a background check has been completed. Students also have the responsibility to meet fingerprinting/background check requirements of their specific agency, state, etc. for all field, practica, and internship placements or other field experiences. Students should note that fingerprinting/background checks usually cannot be transferred from one state to another or, within a state, from one type of agency to another. New background checks typically are required by each state or type of agency. NOTE: After your graduation from the program, additional fingerprinting/background checks also typically are required to receive a state credential/certificate/license to practice as a professional in schools and other agencies.

National School Psychology Examination and State Credentialing Exams

According to UA College of Education and Alabama Department of Education policy, all school psychology EdS students are required to take the National School Psychology Examination offered as a Praxis assessment by ETS. The exam must be taken and scores submitted to the program prior to the completion of 1,200 hours of EdS internship. However, students are encouraged to take the exam soon after completing program coursework and either prior to or during the first few months of internship to allow opportunities to retake the exam, if needed to meet the program's criterion score.

Students must obtain a passing score on the Praxis National School Psychology Exam [PRAXIS number (5403)] to receive a grade for internship and graduate from the program. Currently, the program requires a score of 155 to receive a grade for internship and, thus, to graduate from the program. Students must have their scores sent to the UA (recipient code 1858; this same code should be recorded as the student's "attending institution"). The exam also is required for school psychology certification in Alabama; students desiring certification in our state should also have their scores sent to the Alabama Dept. of Education (recipient code 7020). Many other states require the PRAXIS school psychology exam for a state school psychology certificate; students should obtain the recipient code for the state in which they will apply for certification and have scores sent. The exam is required for the National Certificate in School Psychology (NCSP), and students should have their scores sent to the National Association of School Psychologists (recipient code R1549). A passing score of 155 is also currently required for the NCSP.

Students should be aware that additional exams may be required for applications for state credentials and should determine these requirements well in advance of graduation. Students should keep in mind that they may need to apply for Alabama certification to meet certification requirements in another state, even if they do not plan to work in Alabama. Other states also have their own specific requirements for examinations, which should be identified by students well in advance of graduation from the program.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class AA program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Electronic Learning Management System Requirement

For Class AA School Psychology (hybrid, distance learning program), a designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence

The School Psychology Program faculty members and field placement agencies recognize that major emergencies can happen for some students and that they may have a short or long-term impact on a student's participation across program activities during a semester, including coursework, field placements, graduate assistantships, comprehensive exams, portfolio submissions, etc. The program is committed to supporting students in their program activities and providing assistance and guidance when emergencies have an impact on the student's activities. If you experience a major emergency (e.g., personal or family medical issue, etc.) that significantly impacts across your course, program, or field placement activities and prevents your participation for a period of time, notify the program coordinator immediately or as soon as possible after the emergency. The program coordinator will assist you with making immediate requests to course professors, field or assistantship supervisors, or program faculty about making sure that your duties and responsibilities are covered, extending deadlines, rescheduling assignments, withdrawing from activities or field placements, etc. Again, student's requests to faculty for possible solutions must be based on a major medical or similar emergency and requests must be submitted immediately or as soon as feasibly possible following the emergency. Students should be aware that any extensions, rescheduling, or withdrawal from any type of program activity possibly may impact your schedule of courses, field placements, internship dissertation, final graduation, etc. The faculty will assist students in evaluating and making plans if major emergencies affect program activities.

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances

The Department of Educational Studies in Psychology, Research Methods, and Counseling has procedures by which students may resolve any type of issue or concern. For students in the School Psychology Program, all grievances, complaints, and concerns must be filed with the Head for Department of Educational Studies in Psychology, Research Methods, and Counseling.

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Students enrolled in the School Psychology EdS must maintain a GPA of at least 3.5 on all courses in the program, with no grade below a C. This requirement applies to all students, regardless of enrollment option or course modality.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 18).

Certification

Requirements for certification and licensure in school psychology vary from state to state. Students are expected to determine the requirements in the state or states in which they are interested in practicing before beginning the program. The degrees from the School Psychology program may lead to state and national credentials:

For Option 1: Graduates who complete NASP-approved coursework via Option 1 (*on-campus*) are automatically eligible for the National Certification in School Psychology (NCSP), following successful completion of the national school psychologist *Praxis* assessment and internship. The NCSP is used by over 30 states, including Alabama, as one possible route to grant state certification in school psychology.

EdS and PhD degree graduates of the School Psychology program who obtain the NCSP may meet requirements for the Alabama Class AA certificate in School Psychology using the Nationally Certified School Psychologist Approach described at <https://www.alabamaachievers.org/2022/06/national-school-psychologist/>.

For Option 2: Graduates who complete coursework via Option 2 (*distance learning/hybrid*) may be eligible for Alabama Class AA certification in School Psychology if they hold the appropriate prerequisite Alabama Class A certificate and the following prerequisites are met:

1. a passing score on the appropriate *Praxis* assessment, and
2. a minimum GPA of 3.50 on all program courses (effective for candidates unconditionally admitted to a Class AA School Psychology program July 1, 2017, and thereafter.)

Graduates must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The Associate Dean for Student Services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the Associate Dean for Student Services.

Certification for Degree-Seeking Students Only

The School Psychology Program enrolls degree-seeking students and, occasionally with special permission, approves students for non-degree status to take only 1 or 2 courses, as noted earlier. The program typically does not enroll, evaluate, or endorse individuals who are not admitted to our degree programs. Only students admitted and enrolled in the EdS or PhD degree programs in school psychology and who complete our required coursework, field experiences, internships, and degrees are recommended by the program for the National Certificate in School Psychology (NCSP).

Educational Psychology, MA

The MA in Educational Psychology provides an advanced introduction to the field. Students may select a thesis or non-thesis option.

The program offers a concentration in Learning and Assessment, specifically designed for practitioner in an online format. There are two new MA options offered in collaboration with the Educational Research program. These options include a Learning and Evaluation option (thesis and non-thesis options) and a Program Evaluation option (non-thesis only). Educators interested in developing their research skills as they relate to the learning process and to school-based assessment practices are encouraged to apply.

The program also offers a concentration in School Psychometry through a distance learning/hybrid program. Successful completion of all requirements leads to Alabama Class A School Psychometry certification for eligible individuals.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include a vita/resume and three letters of recommendation consistent with goals of the program.

For the School Psychometry concentration (distance learning/hybrid program), applicants are encouraged to complete their applications by either January 1 (priority deadline) or March 1. A statement of purpose, vita/resume, and letters of recommendation consistent with goals of the program, and a GPA of 3.0 on a 4.0 scale, are needed for regular admission. In addition, distance learning applicants must meet the following admission requirements established by the Alabama State Department of Education.

1. valid bachelor's level or master's level professional educator certificate in a teaching field OR valid master's level professional educator certificate in another area of instructional support,
2. two years of acceptable, professional P-12 educational experience, and
3. three recommendations (An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.)

Applicants must also meet the requirement for fingerprinting/background clearance (p. 525).

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A major part of graduate training is successful participation in courses. Coursework requirements for the MA degree options in Educational Psychology are listed below. The MA degree requires 30 graduate credit hours. Main campus students may choose from non-thesis and thesis options.

Each student is appointed a temporary faculty adviser upon initial acceptance into the program. A student may select a permanent adviser after beginning coursework. Advisers assist students with planning coursework, registering for courses, completing program planning records, portfolio evaluations and other activities. Students are expected to maintain Program Planning Records with their advisors in order to monitor completion of coursework requirements.

Program Outcomes

All degree requirements in the Educational Psychology Program are carefully designed and sequenced according to program outcomes. Program outcomes are the areas of knowledge and skill students are expected to demonstrate upon successful completion of the coursework and other training activities.

Transfer Credit

The University of Alabama allows students to transfer equivalent courses from other accredited institutions where the student was enrolled in the graduate school. The greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from another institution. Credits may be transferred only if they were earned during the six-year period prior to admission to the program. Transfer of courses must be approved by the student's advisor. The Dean of the Graduate School must also approve transfer of courses. The Request for Transfer of Graduate Credit form is available from the Graduate School's website.

For the School Psychometry concentration, credits used for previous Class B certification may not be used for Class A certification.

Graduate School information on Transfer Credit (p. 15).

Comprehensive Exam

All degree students in the Educational Psychology Programs are required to successfully complete written comprehensive examinations before the degrees will be granted. The specific procedures for comprehensive examinations for the M.A. degree are designed in collaboration with the student's advisor. For the non-thesis option, the examination is in the form of the Capstone experience. The examination is completed independently on a "take-home" basis and require students to integrate knowledge and skills obtained during coursework and other training activities. Each student is allowed to take comprehensive examinations only twice. If pursuing the thesis option, a public final defense is required and submission of the approved manuscript to ProQuest for review.

Graduate School information on Comprehensive Exams (p. 15).

Fieldwork/Practicum/Internship Requirements

For the School Psychometry concentration, internship hours of at least 300 clock hours at the P-12 level are required.

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 15).

School Psychometry Concentration (Distance Learning/Hybrid Program)

This course listing applies to those who begin this program June 13, 2024, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Student Progress Requirements

All students in the Educational Psychology Program are required to participate in a continuous review process in order to monitor student progress and determine that program outcomes are being achieved.

Additional Academic Requirements

All students in the Educational Psychology Program are expected to obtain skills in research. Each student is expected to join a faculty member's research team during the first semester of graduate study. Master's students take a number of research courses and are encouraged to participate in research projects during courses and field experiences.

Electronic Learning Management System Requirement

For Class A School Psychometry (hybrid, distance learning program), a designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Educational Psychology Program requirements exclude credit for undergraduate study, study which is remedial, or study which is designed to remove deficiencies in meeting requirements for program admission. In addition, the program limits the number of courses not open exclusively to graduate students to no more than one-third of a student's program.

For the School Psychometry concentration, students must earn a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Information on the Application for Graduation (p. 15).

Certification

For the School Psychometry concentration, requirements for certification and licensure in School Psychometry vary from state to state. Students are expected to determine the requirements for the state in which they intend to practice before beginning the program.

Graduates who met admission criteria above and obtain the MA degree in Educational Psychology - School Psychometry in the *hybrid* program may be eligible for Alabama Class A certification in School Psychometry IF the following prerequisites are met:

- a GPA of at least 3.25 on all courses with no grade below a C
- a passing score on a comprehensive assessment documenting mastery of the curriculum, and

- at least a valid Alabama Class B professional educator certificate in a teaching field or a valid Alabama Class A professional educator certificate in another area of instructional support

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Educational Psychology, Ph.D.

The Educational Psychology Program offers a number of graduate programs leading to a master's (MA), Educational Specialist (EdS), and PhD degree. The mission of the program is to provide students with a thorough understanding of the theory and research related to the nature of the learner and to the processes of teaching and learning. All degree programs reflect this mission and prepare students for careers as faculty members, researchers, and school practitioners.

The PhD is an advanced research degree and is designed specifically for students interested in careers within academic and research settings. PhD students may develop areas of study in:

- learning
- motivation
- human development
- educational neuroscience (an established PhD concentration)

The PhD in Educational Psychology with a concentration in Educational Neuroscience is based on an emerging transdisciplinary field that incorporates findings, methods, and theoretical perspectives from various fields, including cognitive neuroscience, learning sciences, cognitive science, and educational psychology. The concentration is currently open only to educational psychology PhD students. However, graduate students from any program can enroll in the courses offered.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A curriculum vita
- Three reference letters
- A Statement of Purpose that indicates a preferred track (i.e., learning, motivation, development, or educational neuroscience)

The Educational Psychology Ph.D. Program does not require GRE scores for admission, and applications without GRE scores will be given a full review. However, applicants are encouraged to submit GRE scores, especially if they are applying without a master's degree, and/or if they do not have previous post-undergraduate research experience.

We will start reviewing all applications on December 15th for fall admission. Please contact the graduate program coordinator if you have any questions.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A total of 66 credit hours (including 18 dissertation hours) is required to complete the coursework requirements for the Educational Psychology PhD Program.

Code and Title	Hours
Doctoral Required Core Courses (18 hours minimum)	
BEP 500 Adv Educational Psych	3
HD 500 Lifespan Human Development	3
BEP 501 Proseminar in Ed. Psychology (in the first year of PhD or MA studies)	3
BEP 541 Learning and Cognition	3
Choose TWO 3-hour Educational Psychology Core courses (typically 500-level BEP and HD courses; e.g., BEP 505, BEP 561, BEP 565, BEP 570).	6
Specialization or Concentration Courses (12 hours minimum)	
Choose courses based on specialization. Educational Neuroscience Concentration students need to choose four of these courses: BEP 570, BEP 645, BEP 651, BEP 660, BEP 670, BEP 671, BEP 674, BEP 675, including but not limited to BEP, HD, PY, and BEF courses.	12
Foundations Courses (6 hours minimum)	
These courses should inform student research at a foundational level, especially covering philosophy, history, or broad epistemological/methodological topics. Such courses may include, but are not limited to BEF offerings.	
Qualitative Analysis	3
Foundations course (500-or 600-level)	3
Research Courses (12 hours minimum)	
These should be courses that will help students conduct research and data analysis for their research, including but not limited to BER courses.	
Quantitative I (BER 540 is suggested.)	3
Quantitative II (BER 640 is suggested.)	3
Research course (600-level course is suggested.)	3
Research course (600-level course is suggested.)	3
Dissertation Research	18
Total Hours	66

Educational Neuroscience Concentration Courses

Students in the Educational Neuroscience concentration are expected to fulfill all requirements of the Educational Psychology PhD Program. In addition, they are expected to complete the concentration courses and/or other relevant courses offered by other departments (e.g., human development, psychology, anthropology, and computer science). For the concentration students, the recommended progression is BEP 570 Found. of Ed. Neuroscience and BEP 670 Methods & Trends in Ed. Neuro..

Students choose a combination of courses to meet the minimum credit requirement (15 credits) to complete the Educational Neuroscience concentration. Students will choose from the course list shown in the

table below. This list is not exhaustive, and students are encouraged to work with their advisors to develop a suitable plan-of-study.

Educational Neuroscience Concentration Courses		Hours
BEP 570	Found. of Ed. Neuroscience	3
BEP 670	Methods & Trends in Ed. Neuro.	3
Select One of the following BEP Courses		3
BEP 641	Learning and Cognition	
BEP 645	Dev Cognitive Neuroscience	
BEP 651	Neuroscience of Morality	
BEP 656	Embod Situated Approaches Edu	
BEP 660	Reading, Language and Brain	
BEP 671	Introduction to fMRI	
BEP 674	Comp. Methods in Cog. Neuro.	
BEP 675	Cognitive Electrophysiology	
Other 600-Level BEP courses with advisor approval		
Select Two of the following courses or consult with your advisor for a course that will best prepare you for the dissertation topic.		6
Other 600-Level BEP courses with advisor approval		
PY 650	Cognition and Learning	
PY 655	Seminar in Cognitive Psych	
Courses selected with advisor consultation		
Total Hours		15

Transfer Credit

Students may transfer up to 24 credit hours of coursework from previous graduate studies, including a completed master's degree, contingent upon the relevance of the coursework and the approval of the advisor and the department chair.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study

All Ph.D. students entering the program will be allocated a major advisor who will represent the student's major area of study.

Doctoral students are required to file official program of study forms with the Graduate School at the beginning of graduate studies. These forms require each student and her or his advisor to list the specific course requirements necessary for the student's completion of the degree. Doctoral programs of study may not be completed until the student successfully completes doctoral screening. Although a master's degree is not required for initial admission into the doctoral program, the completion of a master's degree is required before any student may complete and file the official program of study form. Doctoral programs of study are approved by the program advisory committee, area head, and assistant/associate deans of the College of Education.

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Comprehensive Exam

All degree students in the Educational Psychology program are required to successfully complete written comprehensive examination before the degrees will be granted. To be eligible to take the comprehensive examination for the Doctor of Philosophy degree, a student must have completed the majority of their coursework, especially all required Educational Psychology Core Courses and all areas of specialization courses, and received approval from their advisor. The Educational Psychology program's comprehensive examination is designed to assess

the development of the student's competencies and skills according to the following criteria:

- *Written:* Students review current and historic literature in two of the four major areas of educational psychology (learning, motivation, development, or neuroscience). Responses should highlight seminal papers and people. Each response should include 10-12 pages of text and approximately 40 references.
- *Oral:* Students review the existing literature and propose a novel study in their specialty area. Students should prepare a written document or "prospectus" and give an oral presentation. The document should include 20-25 pages of text and approximately 50 references. **Note that the prospectus is intended to serve as the basis for the dissertation proposal.**

Scoring of the Comprehensive Exam

- *Written:* Written exams are scored by faculty members. There are seven scoring categories: evidence of knowledge, accuracy, adequacy, depth, organization and flow, grammar, and format (e.g., APA style). Each category is scored 1-5, but the first five categories are weighted two points while the other two are weighted one point. A student must average 3.0 or more on each response to pass the written exam.
- *Oral:* Oral exams are scored by prospective dissertation committees (see *Dissertation Proposal* subsection below for further details about the committee composition). Each committee member votes (pass/fail) at the end of the student's presentation. A student must receive a majority "pass" votes to pass the oral exam and be deemed to be capable of conducting independent research.

For further details about the timeline and deadlines, refer to the program website.

Graduate School information for Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

PhD students advance to PhD candidacy when they pass their comprehensive exam.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Graduate School Policy on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Dissertation Proposal

Upon preparation of a dissertation proposal, students should form their dissertation committee and the committee should be approved by the Graduate School. A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. If the committee chair is not a faculty member of the Educational Psychology Program, then the co-chair of the committee should be a program faculty member. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. At least two committee members should be Educational Psychology faculty members. All members of a dissertation committee must hold Graduate Faculty status at UA and must represent at least two academic departments. The chair of the committee must be a full member of the Graduate Faculty. A majority of the Dissertation Committee members must be regular UA faculty.

The proposal involves writing the first three features of the dissertation – introduction, literature review, and methods. The proposal needs to be presented orally to the dissertation committee who will provide feedback and decide whether or not the student can progress to the next stage by becoming a PhD candidate. This is known as the proposal defense. Similar to the prospectus, the student will need to take account of the following:

1. The student will need to send the proposal to their dissertation committee to read 10 working days before they attend an oral presentation of it.
2. The student will need to book a room and check availability of their dissertation committee who all need to attend a presentation by the student of their proposal.
3. The student will need to present their proposal to the committee and receive their signatures from all members of the committee.
4. After successfully passing the proposal defense, the student will need to consult with their advisor about dissertation committee feedback, apply to the IRB if it is necessary, start to conduct their project, and write their dissertation.

Dissertation

The dissertation involves completing 5 features of the dissertation – introduction, literature review, methods, results, and discussion. The dissertation needs to be presented orally to the dissertation committee who will provide feedback and decide whether or not the dissertation of the student is accepted to get a PhD degree. This is known as the dissertation defense. Similar to the proposal, the student will need to take account of the following:

1. The student will need to send the dissertation committee to read 10 working days before they attend an oral presentation of it.
2. The student will need to book a room and check availability of their dissertation committee who all need to attend a presentation by the student of their dissertation.
3. The student will need to present their dissertation to the committee.

The student will need to consult with their advisor about dissertation committee feedback, make necessary corrections on their thesis, get signature from the committee on the presentation form to submit it to the graduate school, and submit their thesis to ProQuest.

The dissertation defense is the culminating experience in the doctoral program. The student and committee chair are responsible for setting a defense date that allows all committee members to participate and to have adequate time to read the dissertation, determine its suitability for a defense, and engage in scholarly dialogue about how to best improve the document.

To promote these priorities, the scheduling of the defense follows a series of steps. The first step is to schedule a tentative defense date. Guided by the dissertation chair, students may schedule a defense date before they submit their final document to their dissertation committee. The second step is for students to submit their dissertation to the dissertation committee so that the committee may read the document and determine its readiness for a defense. Students must submit their completed dissertation to the dissertation committee at least 30 days prior to their scheduled defense date. Students may proceed with this second step after they receive expressed written consent from their dissertation chair(s).

The third step is for dissertation committee members to read the completed document. Dissertation committee members have 10 working days from the date of receipt to determine the dissertation's readiness

for a defense, with readiness defined as general consensus (i.e., at least 4 of 5 committee members) that the dissertation can be filed with the Graduate School with only minimal revisions (e.g., minor editorial changes, minor substantive enhancements, and formatting). When readiness is agreed upon by the committee (i.e., 4 out of 5 committee members consent to a defense), the fourth step is for the Dissertation Chair to notify the student of the committee's disposition that a defense may occur. Once notified by their Chair(s), student may proceed with filing a public announcement of the defense. At this point, the dissertation defense date is formally confirmed.

Committee members who believe that a dissertation is not suitable for a defense should inform the Dissertation Chair within 10 working days of receiving the dissertation. The detail of their concerns should be submitted to the committee chair within the next 5 working days (if not sooner) so that the student is aware of those concerns and can address them before or during the defense. In cases where disagreements persist about student readiness to defend the dissertation, students and their dissertation chairs should consult with the Department Head as soon as possible. The Department Head will then work with the COE Dean's office and the Graduate School to determine an appropriate course of action.

All faculty members in the College of Education are to receive the announcement of the pending dissertation defense and may observe the dissertation defense. Following the student's presentation and committee examination, persons other than the committee members will be asked to leave the room before the committee conducts any discussion and subsequent voting. Positive votes by Committee members indicate that the dissertation can be filed with the Graduate School with minimal or no revisions.

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Annual Review

As a way to provide students with evaluation about their progress and appropriate feedback on the direction of their studies, the program faculty conduct a progress review for each student at the end of each academic year. Review materials, including a summary of achievements in domains of teaching, research, and/or service and an up-to-date CV should be submitted to the Educational Psychology program coordinator at the end of each academic year. A request for these materials and a submission deadline will be provided during the Spring semesters. Once the faculty have reviewed these materials, they will make recommendations regarding the student's continued progress in their Program of Study.

Additional Academic Requirements

1. Obtain a grade of A or B in all coursework
2. Produce one research or evaluation effort (e.g., presentation of a paper to a professional conference or have an article accepted for publication). Note that this is a minimal requirement—consult with your advisor to develop a more optimal plan
3. Pass First Year Review
4. Plan Ph.D. program with Program Chair and Program Committee
5. Pass written and oral comprehensive examinations
6. Pass defense of dissertation proposal to be admitted into Ph.D. candidacy

7. Complete dissertation
8. Successfully defend the dissertation

Doctoral students are required to participate in and conduct research, and faculty members work closely with doctoral students to help them complete their research requirements. Each doctoral student takes a number of research courses and seminars and is required to participate in ongoing research projects prior to dissertation.

Acquisition of Financial Support:

We offer various funding opportunities for students in our graduate programs.

Prospective students are encouraged to reach out to individual faculty members to express interest, determine if faculty are accepting new students, and express the need for funding. Once a student is accepted to the program to work with a specific advisor (or advisors), there are three available funding streams, all of which are selective and competitive:

1. UA Graduate School Fellowships: The University of Alabama's Graduate School designates fellowships for select outstanding new and advanced students. Designated faculty member(s) nominate identified nominees for fellowships and submit nominations on their behalf to the Graduate School. The Graduate School assesses all applications across divisions and awards fellowships directly.
2. ESPRMC Department Allocation: The department head allocates a limited number of funded Graduate Assistantship positions (GAShips) to our program, most teaching-focused and occasionally research-focused. The program faculty assesses all applications and submits select student nominations for these department-funded GAShips.
3. Individual Faculty Grants: Individual program faculty members may have grant funding allocated for GAShips specific to their lab/grant. Students whose research topics or skills fit the faculty grants can apply to work with the faculty in response to a specific call for applications. The program faculty assesses the quality of all applicants for these individual grant-driven assistantships as well.

Matters related to

GAShip allocations and fellowship nominations are subject to consideration by the whole program faculty. Final decisions on the recommendations made by the program faculty are rendered by the department head.

Maintenance of Student Funding:

Department funding is typically available for 4 years subject to satisfactory progression and the number of GAShips allocated from the

department. In rare cases, students in their fifth year and beyond are also considered for funding opportunities. Recommendations for renewal and discontinuance are made at the program faculty meeting.

Graduate fellowships are generally for one year only, except for special cases (e.g., Capstone fellowships). See the graduate school website for further details.

Individual faculty grants are subject to the length of each individual grant-supported research project.

Students will be notified at least one semester in advance if their financial support is scheduled to end, except in the special cases noted under Conditions for Termination of Financial Support.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria will be subject to termination of financial support pending the Educational Psychology Program review. Depending upon the severity of the infraction or the extent of non-compliance, the Department Head and Program Coordinator—with input from the program faculty members—will recommend immediate termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

- *Dereliction of duty.* Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee (for teaching assistants) or the research advisor (for research assistants); or failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee (for teaching assistants) or by the research advisor (for research assistants) and the student's departmental memorandum of appointment.
- *Resolved finding of Academic Misconduct.* Penalties, including potential loss of financial support, will be determined with guidance from the UA Graduate School and/or the UA College of Education.
- *Loss of good academic standing.* Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing—with the non-passing grade exception noted below. Financial support will be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the program faculty members. This review will determine whether the student should continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered prior to the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.

Graduate School information on Financial Assistance (p. 254).

Educational Research, Ph.D.

The Educational Research program focuses on the understanding of research and its varied methodologies. It prepares scholars to conduct sound research studies and to analyze research work from the perspectives of both the social sciences and health sciences. The strength of the program centers around a core of collaborative faculty and prominent scholars who are dedicated to the development and application of dynamic research methodologies situated within

contemporary conceptual frameworks. Areas of specialization within the degree program include qualitative methods, quantitative methods, mixed methods, psychometrics, and evaluation.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, an application must include:

- 1-3 letters of recommendation consistent with goals of the program
- GRE score of 300 (verbal + quantitative) or above
- Exceptions - Applicants who meet one or both of the following criteria are not required to submit a GRE score: The applicant has earned a MA in Educational Research or closely related field and/or the applicant has successfully completed 15+ hours of research coursework at the graduate level.

Prospective students will find resources on the program's website to support writing a statement of purpose and requesting letters of support that are focused on educational research, which students are encouraged to review ahead of submitting the additional application materials.

Prospective students are encouraged to complete their applications by the priority application deadline of December 15th. Applicants who submit their materials prior to December 15th will receive priority consideration for graduate assistantships and other forms of funding. Applications received after the December 15th date will be accepted and reviewed on a rolling basis.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Educational Research program offers a PhD program with a selected focus on research methods within one of the following areas of study: Qualitative Methods, Quantitative Methods, Mixed Methods, Psychometrics, or Evaluation. The PhD program requires a minimum of 72 credit hours, with a required 18 hours of courses within an area of specialization. The student is required to earn a grade of A or B in each of the core courses in Educational Research. To fulfill the face-to-face university accreditation requirements for this PhD program, students will enroll in main campus sections of the following courses:

- BER 540
- BER 610
- BER 631
- BER 632
- 6 hours of Educational Research Area of Specialization Courses
- BER 687 or BER 689
- 18 hours of BER 699 Dissertation Research

Code and Title		Hours
Professional Seminar in Educational Research		
BER 610	Prof Seminar in Ed Research	3
Required Educational Research Core Courses		
BER 540	Statistical Methods In Educ	3
BER 558 or BER 657	Psychometric Theory	3
BER 600	Survey of Educational Research	3
BER 631	Inqry As Interp: Qual I	3
BER 632	Reflect Resist: Qual II	3
BER 660	Eval I:Theory & Practice	3
Educational Research Area of Specialization Courses		18

At least one area of specialization must be selected. Students may select any set of courses related to their area of specialization. Many, but not all of the courses may come from the Educational Research course listing in the following areas: Program Evaluation, Measurement, Classroom Assessment, Qualitative Research, and Statistics. It is expected that students will take all available BER courses in their area of specialization. A minimum of six credit hours in the Area of Specialization must be earned through main campus sections of the courses.

Practica/Fieldwork in Educational Research	
BER 687 or Field Work Educ Research	3
BER 689 Practicum Educ Research	
College of Education Foundations	12
The foundations requirement must consist of any non-research methods course outside of the student's program.	
Dissertation	18
BER 699 Dissertation Research	
Total Hours	72

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Comprehensive Exams

After completing doctoral candidacy coursework, students must successfully complete the doctoral comprehensive examination. To be eligible to take the comprehensive examination for the Doctor of Philosophy degree, a student must have successfully completed the preliminary review and evaluation, all required Educational Research Core Courses, all area of specialization courses, and practicum and/or fieldwork.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Typically, the comprehensive exam committee is comprised of two faculty members from the Educational Research program, and one external to the program. The purpose of the comprehensive examination is to assess the development of the student's competencies and skills according to the following criteria: (1) Receive a passing mark on the written comprehensive examinations; and (2) Receive a passing mark on the oral examination. The comprehensive examination will be evaluated by all Comprehensive Exam Committee members using the program's Educational Research Rubric for Comprehensive Exam Assessment.

Registering to take the Comprehensive Exam must be done in writing (e.g., via email) at the beginning of the semester the student plans to take the examination. The comprehensive examination should be completed at least nine months before the degree is to be awarded. There is no programmatic administration date of the comprehensive examination; instead, each exam will be based on each student's completion of coursework and program of study. Results are due by the end of the semester in which comps are initiated (i.e., December/May). A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Because the comprehensive exam is typically administered in a take-home format, it is expected that students will use course and reference materials in a manner consistent with the UA Academic Code of Conduct. While students are encouraged to utilize resources, both internal and external to the university, resources to improve technical writing (e.g., copyediting by someone other than the student, using university-based writing services including the Writing Center and Research Assistance Services) are prohibited on this exam. Failure to adhere to this policy is a violation of the UA Academic Code of Conduct and will be subject to disciplinary action. Specifically, if a student is found to violate the Academic Code of Conduct during their comprehensive exam, they will fail the exam.

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Practicum/Internship Requirements

Students are required to complete 3 hours in BER 687's fieldwork or BER 689's practicum in educational research. The fieldwork course, BER 687, is a student-initiated research project done with faculty supervision. The practicum course, BER 689, is student participation in faculty-initiated research, with work related to the supervising faculty member's research interests. The student's performance on fieldwork and/or practicum will be evaluated by the supervising faculty member using the Educational Research Program's Rubric for Intermediate Scholarly Writing Assessment.

Admission to Candidacy Requirements

The requirements for advancing to candidacy are:

- a successful preliminary review;
- completion of all coursework as listed on the approved program of study;
- passing the comprehensive examination;
- receiving approval of the dissertation subject from the student's committee.

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive examination.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Enrollment Policy

Graduate School Policy on Continuous Enrollment (p. 21).

Dissertation Requirements

Prospectus

The dissertation prospectus aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written prospectus to their dissertation committee through a prospectus meeting. The student, in communication with their chair and committee, is responsible for scheduling this meeting and managing related logistics. For the dissertation prospectus, students will typically present content related to a proposed research study, which may be an in-process research study, and should include elements such as: 1) an introduction to/significance of the study, 2) draft research question(s), 3) theoretical or conceptual framework(s), 4) a concise review of literature, 5) potential methodology/ies, and 6) potential methods. Students should submit their draft prospectus to their chair and receive approval before sending the document to their dissertation committee. Committees should then have at least two weeks

to review the prospectus before the prospectus meeting. The goal of the prospectus meeting is for the student to receive formative feedback on their proposed study prior to developing their dissertation research proposal.

Proposal

The dissertation research proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The student, in communication with their chair and committee, is responsible for scheduling this meeting and managing related logistics. The dissertation proposal typically includes both an introduction giving an overview of the proposed research and the following: 1) the significance of the proposed research, 2) a review of the literature, 3) the theoretical framework(s), 4) research question(s), 5) the methodology/ies, 6) data generation methods, and 7) data analysis methods. The proposal will be evaluated by all committee members using the Educational Research Program Proposal/Thesis/Dissertation Document Rubric.

Successfully defending the dissertation proposal provides evidence that the student and the committee have arrived at a sound methodology that the student will use to address (a) worthwhile research question(s). The proposal forms a working plan that can be used by the student and the committee to guide the research, to evaluate progress, and to provide ongoing feedback.

Dissertation

Dissertation guidelines are provided on the Graduate School's website. Please note that these are guidelines only; alternative formats are permitted. The dissertation must follow an established scholarly form, but that form may vary at the discretion of the chair and committee with final approval from the Graduate School. These guidelines are designed to assist the student with the development of the dissertation. The dissertation is to be written in U.S. English, unless otherwise necessary to the dissertation topic and approved by the student's committee. It is not unusual for students to need the assistance of the UA Writing Center or a professional editor.

In addition, students are required to use the Publication Manual of the American Psychological Association (current edition) because it is the dominant style for educational research journals. It is the student's responsibility to maintain regular contact with their dissertation chair. The dissertation document and oral defense will be evaluated by all committee members using the Educational Research Program Proposal/Thesis/Dissertation Document Rubric. Even with consistent communication with the Chair and committee, it may take a month or more for the committee member(s) to be able to provide feedback. Please plan accordingly, relative to Graduate School deadlines for the dissertation and graduation.

Students are allowed a maximum of two dissertation oral defenses, in which they have an opportunity to successfully defend their dissertation. On the second attempt, a student must pass both the oral defense and have the dissertation voted acceptable by the committee. If the student fails both oral defenses, the student is automatically removed from the doctoral program, and must appeal to the Post-Master's Appeals Committee for reinstatement if interested in continuing.

The dissertation defense is the culminating experience in the doctoral program. The student and committee chair are responsible for setting a defense date that allows all committee members to participate and to have adequate time to read the dissertation, determine its suitability for a

defense, and engage in scholarly dialogue about how to best improve the document.

To promote these priorities, the scheduling of the defense follows a series of steps. The first step is to schedule a tentative defense date. Guided by the dissertation chair, students may schedule a defense date before they submit their final document to their dissertation committee. The second step is for students to submit their dissertation to the dissertation committee so that the committee may read the document and determine its readiness for a defense. Students must submit their completed dissertation to the dissertation committee at least 30 days prior to their scheduled defense date. Students may proceed with this second step after they receive expressed written consent from their dissertation chair(s).

The third step is for dissertation committee members to read the completed document. Dissertation committee members have 10 working days from the date of receipt to determine the dissertation's readiness for a defense, with readiness defined as general consensus (i.e., at least 4 of 5 committee members) that the dissertation can be filed with the Graduate School with only minimal revisions (e.g., minor editorial changes, minor substantive enhancements, and formatting). When readiness is agreed upon by the committee (i.e., 4 out of 5 committee members consent to a defense), the fourth step is for the Dissertation Chair to notify the student of the committee's disposition that a defense may occur. Once notified by their Chair(s), student may proceed with filing a public announcement of the defense. At this point, the dissertation defense date is formally confirmed.

Committee members who believe that a dissertation is not suitable for a defense should inform the Dissertation Chair within 10 working days of receiving the dissertation. The detail of their concerns should be submitted to the committee chair within the next 5 working days (if not sooner) so that the student is aware of those concerns and can address them before or during the defense. In cases where disagreements persist about student readiness to defend the dissertation, students and their dissertation chairs should consult with the Department Head as soon as possible. The Department Head will then work with the COE Dean's office and the Graduate School to determine an appropriate course of action.

All faculty members in the College of Education are to receive the announcement of the pending dissertation defense and may observe the dissertation defense. Following the student's presentation and committee examination, persons other than the committee members will be asked to leave the room before the committee conducts any discussion and subsequent voting. Positive votes by Committee members indicate that the dissertation can be filed with the Graduate School with minimal or no revisions.

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Preliminary Review

The first programmatic checkpoint, the preliminary review and evaluation, applies after a student has taken 15 hours of coursework in Educational Research. Students must make arrangements with their advisor to initiate the process. Students who remain in good standing with the Graduate School are required to submit a portfolio consisting of an unofficial transcript, a completed draft of the Program of Study, an original sole-authored writing sample focused on educational research, and a declaration of intent (i.e., a statement of professional aspirations).

Materials should be submitted to the student's advisor, at which point the advisor will share the materials with all program faculty for review. The faculty will review the student's materials using the program's Rubric for Intermediate Scholarly Writing Assessment and make written recommendations regarding the continuation of the student's Program of Study. Students will either "pass" or "fail" the examination. A recommendation of "fail" will result in an action plan created by the program faculty and will be supervised by the student's advisor. Adherence to the action plan is required for successful growth and development in the program.

Students who transfer into the PhD in Educational Research program and have already successfully completed 15 hours of coursework in Educational Research prior to admittance may ask their advisor to initiate a review by program faculty to waive their participation in the preliminary examination. Using the writing sample submitted at time of application, the student's advisor will submit a completed rubric to the Program Chair as documentation for request of the waiver.

The student may not advance to the program's practicum and/or fieldwork courses or doctoral comprehensive exam without a passing score on either the preliminary review and evaluation or development plan materials.

Application for Graduation

Information on the Application for Graduation (p. 21).

Measurement and Psychometrics Certificate

The Graduate Certificate in Measurement and Psychometrics emphasizes competencies and skills necessary to perform psychometric analyses that reflect best practices in contemporary psychometric research, theory, and practice. This 18 credit-hour certificate prepares students from various disciplines to conduct research that links latent variables (i.e., concepts that researchers cannot measure directly) to a wide variety of social, economic, educational, and health outcomes.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admission

Application: Students must be formally admitted into the certificate program by program faculty in order to earn the certificate.

1. Applicants will be required to submit a Statement of Purpose focusing on the goals in pursuing a Measurement certificate.
2. Applicants should carry a minimum GPA of 3.0 in all graduate classes, although special circumstances may be considered.
3. Applicants must successfully complete BER 540 (Statistical Methods in Education) or an equivalent with a grade of B or better prior to program application.

These requirements are in addition to the minimum Graduate School requirements and represent minimum standards/competencies that are required for admission consideration. Admission decisions will be determined on a case-by case basis.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

1. Prerequisites: Evidence of prerequisite statistics courses comparable to BER 540 Statistical Methods In Educ, must have achieved a grade of B or better in prerequisite statistics courses.

2. Minimum Required Hours: 18

Code and Title	Hours
Required Courses:	
BER 642 Advanced Regression Methods	3
BER 657 Psychometric Theory	3
BER 658 Psychometric Theory Prac	3
Select two of the following Advanced Measurement Courses:	6
BER 669 Item Response Theory	
BER 670 Rasch Measurement Theory	
BER 671 Cognitive Diagnosis Modeling	
Select one of the following Electives:	3
BER 646 Structural Equation Modl	
BER 648 Advanced SEM	
BER 687 Field Work Educ Research *	
BER 689 Practicum Educ Research *	
BER 695 Spec Top in Ed Research *	
Total Hours	18

Footnotes

* BER 687, BER 689, and BER 695 must be measurement and psychometrics focused and be approved by measurement & psychometrics certificate coordinator.

Transfer Credit

Students may substitute BER 642 Advanced Regression Methods for BER 639 Applied Regression Analysis. Other transfer credits will be approved on a case-by-case basis but will typically not be accepted. The maximum number of credits to be transferred from another institution is 6.

Hours that Might be Used Later if Admitted to a Degree Program

ALL (18 hours and beyond, all courses are advanced doctoral level research courses).

Qualitative Research Certificate

The Graduate Certificate in Qualitative Research is a 15-credit course sequence that integrates theoretical knowledge with practical applications and field-based experiences. Although this certificate is housed in the College of Education, students from all disciplines are welcome to apply.

Coordinator: Dr. Shena Sanchez (shena.sanchez@ua.edu)

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, an application must include:

- 1. Statement of Purpose focusing on the student's goals in pursuing a Qualitative Research certificate;
- 2. Writing sample, involving qualitative research, submitted directly to the department for faculty consideration;
- 3. Student must either be enrolled in a doctoral program or have a master's degree

It is recommended to apply after successful completion of either BER 630 Qualitative Case Study Research or BER 631 Inquiry as Interpretation: Qualitative Research I with a grade of B or better.

Certificate completion will be monitored by the assigned certificate program advisor.

See the Admission Criteria section of this catalog for more information.

Quantitative Research Certificate

The Graduate Certificate in Quantitative Educational Research places an emphasis on acquiring the skills necessary not only to complete statistical calculations but to also know how and when to apply and use appropriate calculations. This 15 credit-hour certificate prepares students from various disciplines to conduct research that documents the effects of educational programs. The courses required for the completion of this certificate are advanced educational research/ statistics courses. Students will gain significant and valuable knowledge and skills beyond what is required for typical degree requirements. Although this certificate is housed in the College of Education, students from all disciplines are welcome to apply.

The primary mission of the Educational Research Program is to offer a quality graduate program that prepares scholars to critically engage with educational research and evaluation, to develop appropriate and innovative research design, and to contribute conceptually sound analyses to the research problems of the field.

Requirements for the Graduate School (Degree Requirements (p. 15)) and the College of Education (Master's (p. 15), Professional Certification, EdS, Doctoral (p. 15)) are detailed in earlier sections of this catalog. For specific program requirements visit the College of

Education Programs website or for a student handbook and additional information, email or call the Educational Studies department office whose staff can direct you to the certificate coordinator(s).

Coordinators: Dr. Stefanie Wind (stefanie.wind@ua.edu) and Dr. Joni Lakin (jlakin@ua.edu)

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Statement of Purpose focusing on the student's goals in pursuing a Quantitative Research certificate;
2. Evidence of prerequisite research/statistics courses comparable to BER 540 Statistical Methods In Educ, must have achieved a grade of B or better in prerequisite research courses

Certificate completion will be monitored by certificate program administrators.

See the Admission Criteria section of this catalog for more information.

School Psychology, Ph.D.

School Psychology

The University of Alabama School Psychology Program is designed to provide exemplary graduate training in research and in the application of practice related to the learning, development, and mental health of children and youth, and their families. The doctoral degree in school psychology prepares students for direct school-based practice and for careers as faculty members, researchers, and practitioners. The doctoral degree program in school psychology focuses on the provision of school psychology services that are based on a strong foundation of research. The school psychology doctoral degree program includes an integrated and sequential program of study with comprehensive coursework and supervised field experiences. Candidates participate in courses and seminars in assessment and data collection, interventions and decision making, prevention and consultation, professional school psychology, sociocultural foundations, psychological foundations, human development, educational foundations, statistics and research, and other areas. Candidates are required to participate in extensive practicum, internship, and research experiences.

The doctoral program is an on-campus option only; there is no distance learning option. The doctoral School Psychology Program holds full approval status from the National Association of School Psychologists (NASP) and national recognition by CAEP.

Admissions

See the Admission Criteria section of this catalog for more information.

Prospective students for the doctoral program are encouraged to complete their applications by December 1 (preferred date) for admission the following fall semester. However, rolling applications will be accepted until all cohort positions are full.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Vita/resume
2. A personal statement
3. Three letters of recommendation consistent with goals of the program

Note that a prior graduate degree or educator certification is NOT required for admission to our on-campus PhD degree program.

Transfer Credit

The School Psychology Program has more stringent requirements than the Graduate School maximums for transfer credit for students who have completed previous graduate coursework. Generally, fewer courses will be approved for transfer credit than the Graduate School maximums. In some circumstances, a student with a previous master's, EdS, or doctoral degree may be allowed to count some coursework from the previous degree. After a student begins enrollment in our program, transfer credit or use of previous graduate coursework must first be evaluated and approved by program faculty to determine equivalency to a required course in our program. Equivalency is determined by consistency between the proposed transfer course and required program course in terms of objectives, content, projects, and other activities. Only in very unusual circumstances will a student be approved to transfer previous graduate coursework for required courses with the "BSP" (school psychology core) designation in our program of study. However, it may be possible for students to transfer educational psychology, educational

foundations, special education, etc., courses that are equivalent to those in our required program of study.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

The doctoral degree provides greater depth and breadth in graduate studies than the program's EdS degree. The greater depth in our doctoral program is demonstrated in our extensive required coursework and field experiences for the 120+ credit doctoral degree. Our doctoral students receive greater depth of school psychology preparation in multiple NASP domains, beyond what is provided in our EdS program, by taking additional required courses in the following areas.

- Data-Based Decision Making
- School-wide Practices to Promote Learning
- Services to Promote Safe and Support Schools
- Research and Evidence-Based Practice
- Legal, Ethical, and Professional Practices

Doctoral students are required to complete comprehensive preparation in research. Research skills and activities include additional coursework in research, pre-dissertation research, and a comprehensive doctoral dissertation study.

Doctoral Elective Focus Areas

In addition to required coursework in the school psychology doctoral program, students should complete coursework and practicum experiences to focus on a specific area of practice and/or research. Each doctoral student is required to complete at least two additional courses in a specific individual focus area in which they wish to receive more preparation in knowledge and skills for practice and/or research. Students and their advisors should plan practicum and internship experiences that complement areas of focus. Focus areas may include reading/literacy, curriculum, special education, statistics, early childhood special education, counseling, and others. Permission must be obtained from programs that offer coursework and experiences in which the student wishes to obtain focused skills.

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Doctoral Qualifying and Comprehensive Exams

Written Examinations

All students in the School Psychology Program are required to successfully complete written examinations before any degrees will be granted. The examinations are completed independently on a "take-home" basis and require students to integrate knowledge and skills obtained during coursework and other graduate education activities. Successful completion of the program requires that a student passes the exams. Further, no student will be allowed to enroll in internship until all exams are passed.

Written Qualifying Examination

Unless entering the doctoral program with a previously earned school psychology related MA degree, all doctoral students take the qualifying examination during the summer session following the end of their first year of study. The exam results are reported to the Graduate School to meet university requirements for the MA degree. Qualifying exams will be offered annually in school psychology unless special circumstances arise. Students who wish to sit for the exam at a different time should

submit a written petition to the program coordinator. Students must obtain an average of 80% or higher across faculty ratings for all questions to pass. Students who earn less than 80% of points on any one question may orally defend that question in front of the school psychology faculty. Earning less than 80% on two or more questions will result in failure of the qualifying examination.

According to UA Graduate School policy, students may only take these examinations twice, a first attempt and one retake if the first attempt is not successful. If the student did not pass, the student can reattempt the relevant questions. Students will have an additional month to complete the new questions. Students who do not pass the qualifying exam following two attempts will be dismissed from the program.

Written EdS Comprehensive Examination

Unless entering the doctoral program with a previously earned EdS degree, all doctoral students take the EdS comprehensive examination during the summer session following the end of their second year of study. The exam results are reported to the Graduate School to meet university requirements for the EdS degree. EdS comprehensive exams will be offered annually in school psychology unless special circumstances arise. Students who wish to sit for the exam at a different time should submit a written petition to the program coordinator. Students must obtain an average of 80% or higher across faculty ratings for all questions to pass. Students who earn less than 80% of points on any one question may orally defend that question in front of the school psychology faculty. Earning less than 80% on two or more questions will result in failure of the EdS comprehensive examination.

According to UA Graduate School policy, students may only take these examinations twice, a first attempt and one retake if the first attempt is not successful. If the student did not pass, the student can reattempt the relevant questions. Students will have an additional month to complete the new questions. Students who do not pass the EdS comprehensive exam following two attempts will be dismissed from the program.

Written PhD Comprehensive Examination

Doctoral students in the School Psychology Program are required to successfully complete the comprehensive examination. Passing the comprehensive exam is required for proceeding with other program requirements (e.g., internship, dissertation) and obtaining the doctoral degree. Thus, no student will be allowed to enroll in a doctoral internship until the comprehensive examination is passed.

All doctoral students are expected to take the comprehensive examination no later than fall of their fourth year in the program. Students are eligible to take the comprehensive examination following:

1. Completion of all master's degree requirements in school psychology at The University of Alabama (or demonstration of earned master's degree)
2. Completion of pre-dissertation research requirement (or demonstration of equivalency)
3. Selection of dissertation chair
4. Permission from dissertation chair and program advisor

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Practicum/Internship Requirements

Clinical and Field-Based Training

All students in the School Psychology Program are required to engage in several supervised, sequential, and organized field-based experiences,

practica, and internships. Students engage in course-based clinical and field experiences during their first year in the program, formal practicum courses after the first year, and a final culminating internship at the conclusion of the program. Thus, students are engaged in clinical or field experiences each fall and spring term in the program.

During all field placements (e.g., practica, internships, course-embedded field experiences), students are evaluated continuously by university and field supervisors. In addition, a formal evaluation is submitted by the field supervisor to the university instructor at the end of each semester. The students must meet all requirements and achieve all objectives to be given a satisfactory grade for the field placement.

Practicum

Most of the required school psychology courses with the BSP prefix include some type of clinical or field-based experiences. In the first year in the program, BSP 501 Prof Issues/ Ethics Sch Psych, BSP 521 Cog Acad Assess, and BSP 523 Social-Behavioral Assessment all require field or clinical experiences, including classroom observations in local schools, assessment and data collection with youth, families, or other carefully supervised experiences. Several other required courses for the program (prefixes SPE, CRD, BCE, etc.) may also require clinical and field experiences on campus and in local public schools.

In addition, several formal practicum courses are required. In the second year in the program, doctoral students take BSP 580 Sch Based Pract Assessment for 200+ hours of on-site field activities in local schools in fall semester and BSP 683 Adv Sch Based Pract for 200+ hours of on-site field activities in local schools in spring semester. In their third and fourth years in the program, doctoral students continue to take BSP 696 Adv Doctoral Practicum most semesters, with 200+ onsite hours for each fall and spring term in local schools or other agencies that provide psychological services. School psychology practicum courses are offered in fall and spring terms, but typically are not offered in summer terms, except in special, pre-approved circumstances for doctoral practicum only.

Practicum sites are schools and other agencies relevant for school psychology practice. BSP 580 Sch Based Pract Assessment and BSP 683 Adv Sch Based Pract are taken by both EdS and doctoral students and occur in local public schools in the immediate Tuscaloosa or surrounding areas. Additional sites for doctoral students during doctoral placements in BSP 696 Adv Doctoral Practicum in the 3rd+ year of the program may include local public schools, university clinics, and other agencies in the immediate Tuscaloosa, Birmingham, or surrounding areas. Doctoral students wishing to complete a portion of their practica in other settings during their 3rd+ years may be given permission if the practicum site meets the needs of doctoral focus areas of the students and the program's requirements for practicum experience. If approved by the program, doctoral students may have two placement sites in the same semester and spread the required field hours between the two sites.

Doctoral students must successfully complete at least 600 hours of practicum prior to internship, generally in school and other agency settings, although 1000+ practicum hours are typically recommended if the student is considering an American Psychological Association (APA), Council of Directors of School Psychology Programs (CDSPP), or Association of Psychology Postdoctoral and Internship Centers (APPIC) internship placement. Doctoral students should begin review and completion of the comprehensive and stringent internship application procedures early in their graduate studies.

Internship

Prior to beginning the doctoral internship, students must successfully complete all courses, practica, a qualifying exam, a comprehensive exam, portfolio evaluations, a pre-dissertation research requirement, a dissertation proposal, and be approved by the program.

All students must complete an internship at or near the end of formal training. Students must be approved by the program to begin planning for internship and before an internship placement begins. With program approval, internships may occur in qualified settings across the country. The doctoral internship requires a minimum of 2,000 hours and may be completed on a full-time basis in one calendar year (600+ clock hours over a continuous 15+ week period in each of a consecutive fall, spring, and summer/fall semester), or, with special permission, based on a half-time week over two consecutive and continuous calendar years. Because they are conducted throughout an entire calendar year, or three semesters, doctoral internships are completed in consecutive fall, spring, and summer (or another fall) terms. At least 600 internship hours must be in a school setting.

Students seeking internship placements must discuss the placement with their advisor and program coordinator at least a year in advance—during the first few weeks of the fall semester preceding an internship placement for the following fall term. By May 10 prior to the internship, potential interns must document that all program requirements for internship have been met and must seek and obtain program approval to begin internship by submitting the Internship Approval form. Once program approval has been provided to the intern, the intern will share the UA School Psychology Program MOA with the internship site for signature. When the internship site has agreed to and signed the MOA, the intern will return it to the program coordinator who will ensure the remaining UA personnel signatures are completed. The intern must provide the MOA to their internship site by June 1. Students may not begin their internship without a completed and signed MOA.

Admission to Candidacy Requirements

Students will advance to candidacy after completing coursework and successfully passing comprehensive exams.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Graduate School Policy on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

All doctoral students are required to complete a research dissertation. University policies for dissertations are outlined in the Graduate Catalog. College of Education and department policies must be followed. According to School Psychology Program policy, the dissertation prospectus (a preliminary description of the dissertation project) and proposal (a more comprehensive description of the planned dissertation project) must be prepared and approved by the committee. The dissertation prospectus and proposal must be completed prior to beginning the doctoral internship.

The dissertation defense is the culminating experience in the doctoral program. The student and committee chair are responsible for setting a defense date that allows all committee members to participate and to have adequate time to read the dissertation, determine its suitability for a

defense, and engage in scholarly dialogue about how to best improve the document.

To promote these priorities, the scheduling of the defense follows a series of steps. The first step is to schedule a tentative defense date. Guided by the dissertation chair, students may schedule a defense date before they submit their final document to their dissertation committee. The second step is for students to submit their dissertation to the dissertation committee so that the committee may read the document and determine its readiness for a defense. Students must submit their completed dissertation to the dissertation committee at least 30 days prior to their scheduled defense date. Students may proceed with this second step after they receive expressed written consent from their dissertation chair(s).

The third step is for dissertation committee members to read the completed document. Dissertation committee members have 10 working days from the date of receipt to determine the dissertation's readiness for a defense, with readiness defined as general consensus (i.e., at least 4 of 5 committee members) that the dissertation can be filed with the Graduate School with only minimal revisions (e.g., minor editorial changes, minor substantive enhancements, and formatting). When readiness is agreed upon by the committee (i.e., 4 out of 5 committee members consent to a defense), the fourth step is for the Dissertation Chair to notify the student of the committee's disposition that a defense may occur. Once notified by their Chair(s), student may proceed with filing a public announcement of the defense. At this point, the dissertation defense date is formally confirmed.

Committee members who believe that a dissertation is not suitable for a defense should inform the Dissertation Chair within 10 working days of receiving the dissertation. The detail of their concerns should be submitted to the committee chair within the next 5 working days (if not sooner) so that the student is aware of those concerns and can address them before or during the defense. In cases where disagreements persist about student readiness to defend the dissertation, students and their dissertation chairs should consult with the Department Head as soon as possible. The Department Head will then work with the COE Dean's office and the Graduate School to determine an appropriate course of action.

All faculty members in the College of Education are to receive the announcement of the pending dissertation defense and may observe the dissertation defense. Following the student's presentation and committee examination, persons other than the committee members will be asked to leave the room before the committee conducts any discussion and subsequent voting. Positive votes by Committee members indicate that the dissertation can be filed with the Graduate School with minimal or no revisions.

The general steps in preparing the dissertation are listed below:

- Identify dissertation committee chair
- Successful completion of comprehensive exam
- Finalize dissertation committee
- Preparation of Complete Dissertation Proposal
- Proposal Meeting and Approval of Proposal by Dissertation Committee; Admission to Doctoral Candidacy
- Approval by UA Internal Review Board for Human Subjects Research and by Data Collection Site
- Collection of Data
- Data Analyses
- Preparation of Final Dissertation

- Final Examination, Defense, and Approval of Dissertation by Dissertation Committee
- Submission and Approval of Dissertation by Graduate School

Institutional Review Board Procedures

All graduate students and faculty who conduct research must be certified as having completed comprehensive training in human participants research regulations. All research conducted by graduate students and faculty in the School Psychology Program in any coursework, field experience, or research project must be reviewed and approved by the University of Alabama's Institutional Review Board (IRB). This includes research for students' class projects, theses, and dissertations. Proposals describing the research, its risks and benefits, and the procedures of obtaining informed consent and protecting confidentiality must be submitted to the IRB. For research conducted in schools or other private or public settings, additional approvals may be needed. Information about research compliance training and IRB approval may be found at <https://research.ua.edu/compliance/irb/>

<https://graduate.ua.edu/students/thesis-and-dissertation/>

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Continuous Review of Student Progress

Each student is required to undergo a formal progress review during an annual progress evaluation at the end of every spring semester after entering the program; thus students entering the program in a fall term will have their first formal progress review at the end of the following spring, after two complete semesters of graduate study in the program. At the end of each spring term in the program, students are required to submit a comprehensive electronic progress evaluation of their work by the due date provided by the program coordinator; faculty members review the progress evaluation and evaluate knowledge, skills, and other relevant characteristics of students as shown in coursework, clinical work, field placements, and other program activities. Doctoral students also must submit an updated progress evaluation and have a progress review during the spring semester in internship. Doctoral students must continue to submit a progress evaluation every spring semester until graduation. Students prepare progress evaluation submission in an electronic format and will be provided information about submitting the annual progress evaluation.

While a portfolio is not required for the annual progress evaluation, students are expected to retain electronic copies of all work in graduate courses and other experiences beginning with their first semester of enrollment in the program. Annual progress evaluation components and professional work characteristics of the student are evaluated by program faculty according to a rating scale, in which student progress is judged to be satisfactory or non-satisfactory.

Students are expected to receive satisfactory ratings on all progress evaluation components to continue with the planned program of study. In some cases, students may receive ratings of satisfactory that also include program requirements for improvement. Ratings of non-satisfactory on a few components may result in program requirements for additional course or field activities before continuation with the planned program of coursework, practicum, or internship. Thus, failure to make adequate progress in the program, based on a variety of quantitative and qualitative factors, will result in the student being placed

on warning or perhaps being dropped from the program. There are four possible outcomes to the annual progress review evaluation process:

1. satisfactory progress in all areas,
2. satisfactory progress but with requirements for improvement
3. unsatisfactory progress in a few areas with probation for student and requirements for improvement, and
4. unsatisfactory progress in several areas, with discontinuation of student.

Please note that students may be given a probationary period before they are discontinued, if deemed appropriate or necessary.

Minimum Grade/GPA Policies in School Psychology Courses

Students enrolled in the School Psychology Program must maintain a grade of B or higher in all core school psychology courses. Students may be able to repeat a course if they earn a grade lower than a B. Failure to receive a grade of a B or higher when taking a core school psychology course a second time results in dismissal from the program.

Students also must continually maintain a GPA of at least 3.25 to continue advancing toward key degree-related milestones. These include taking qualifying exams, comprehensive exams, advancing to candidacy, and accepting/beginning an internship.

Practica and Field Placement Policies

Addressing Concerns about Students in Field Placements, Practica, and Internships Field supervisors are asked to immediately report any concerns, issues, or suggestions to the student and to the university professor. Concerns by the field supervisor and/or university professor may be addressed through improvement plans developed for the student, in collaboration with the student, field supervisor, and university professor. Significant concerns may result in temporary suspension of the field placement, removal of the student from the placement, a grade of F for the course, and/or dismissal from the program.

Improvement Plans

If a student improvement plan for courses, field placement, or other program activities becomes necessary, the program faculty, placement site supervisors, and students will develop an improvement plan that identifies concerns/issues, specific goals, deadlines, evaluation methods, and required outcomes needed for the student to meet all criteria and achieve all objectives and earn a satisfactory grade for the course or field placement. The improvement plan will include frequent meetings between the student, professors, and supervisors to monitor progress. The improvement plan will include frequent submission of materials by the student and frequent submission of a formal evaluation by the professors and supervisors.

Program Dismissal

The student will have the right to meet with the program faculty and department chair. If the decision is to be that the student is dismissed from the program, the student will be informed in writing. If the student disagrees with the program decision, or feedback provided, the student may consult with someone outside the program, and consider submitting an appeal. The University of Alabama College of Education Grievance Procedures (<https://education.ua.edu/students/student-complaint/>) will be followed if a student has a grievance about the decision to dismiss the student or another type of academic concern.

Additional Academic and Program Requirements

Fingerprinting/Background Check

The UA College of Education requires that all students must clear a fingerprinting/background check prior to field experiences. Prior to their first semester of enrollment in the program, school psychology students must meet this requirement for activities in schools under the jurisdiction of the Alabama Department of Education. Students should contact our college's Student Services Office at (205) 348-0193 to obtain instructions or confirm if a background check has been completed. Students also have the responsibility to meet fingerprinting/background check requirements of their specific agency, state, etc. for all field, practica, and internship placements or other field experiences. Students should note that fingerprinting/background checks usually cannot be transferred from one state to another or, within a state, from one type of agency to another. New background checks typically are required by each state or type of agency. NOTE: After your graduation from the program, additional fingerprinting/background checks also typically are required to receive a state credential/certificate/license to practice as a professional in schools and other agencies.

Non-Dissertation Research

Doctoral students are required to participate in and conduct research. Faculty members work closely with doctoral students to help them complete their research requirements. Doctoral students take a number of experiential, research and statistics courses and seminars, are required to complete at least one research project prior to the dissertation, and are required to submit this project for publication or presentation at a national conference. The research project may be in collaboration with a faculty member and must include collecting data, analyzing, and reporting results for a research study. Doctoral students also are required to complete a comprehensive dissertation research study (see Dissertation Requirements above for more information).

National School Psychology Examination and State Credentialing Exams

According to UA College of Education and Alabama Department of Education policy, all doctoral students are required to take the National School Psychology Examination offered as a Praxis subject assessment by ETS. The exam must be taken and scores submitted to the program prior to the completion of at least 1,200 hours of EdS or doctoral internship. However, students are encouraged to take the exam soon after completing program coursework and either prior to or during the first few months of internship to allow opportunities to retake the exam, if needed to meet the program's criterion score.

Students must obtain a passing score on the *Praxis* School Psychologist exam (National School Psychology Exam, *Praxis* test code 5403) to receive a grade for internship and graduate from the program. Currently, the program requires a score of 155 to receive a grade for internship and, thus, to graduate from the program. Students must have their scores sent to the UA (score recipient code 1858; this same code should be recorded as the student's "attending institution"). The exam also is required for school psychology certification in Alabama; students desiring certification in our state should also have their scores sent to the Alabama Dept. of Education (recipient code 7020). Many other states require the *Praxis* School Psychologist exam for a state school psychology certificate; students should obtain the recipient code for the state in which they will apply for certification and have scores sent. The exam is required for the National Certificate in School Psychology (NCSP), and students should have their scores sent to the National

Association of School Psychologists (recipient code R1549). A passing score of 155 also is currently required for the NCSP.

Students should be aware that additional exams may be required for applications for state credentials and should determine these requirements well in advance of graduation. Students should keep in mind that they may need to apply for Alabama certification to meet certification requirements in another state, even if they do not plan to work in Alabama. Other states also have their own specific requirements for examinations, which should be identified by students well in advance of graduation from the program.

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

The School Psychology Program faculty members and field placement agencies recognize that major emergencies can happen for some students and that they may have a short or long-term impact on a student's participation across program activities during a semester, including coursework, field placements, graduate assistantships, comprehensive exams, portfolio submissions, etc. The program is committed to supporting students in their program activities and providing assistance and guidance when emergencies have an impact on the student's activities. If you experience a major emergency (e.g., personal or family medical issue, etc.) that significantly impacts across your course, program, or field placement activities and prevents your participation for a period of time, notify the program coordinator immediately or as soon as possible after the emergency. The program coordinator will assist you with making immediate requests to course professors, field or assistantship supervisors, or program faculty about making sure that your duties and responsibilities are covered, extending deadlines, rescheduling assignments, withdrawing from activities or field placements, etc. Again, student's requests to faculty for possible solutions must be based on a major medical or similar emergency and requests must be submitted immediately or as soon as feasibly possible following the emergency. Students should be aware that any extensions, rescheduling, or withdrawal from any type of program activity possibly may impact your schedule of courses, field placements, internship dissertation, final graduation, etc. The faculty will assist students in evaluating and making plans if major emergencies affect program activities.

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

The Department of Educational Studies in Psychology, Research Methods, and Counseling has procedures by which students may resolve any type of issue or concern. For students in the School Psychology Program, all grievances, complaints, and concerns must be filed with the Head for Department of Educational Studies in Psychology, Research Methods, and Counseling.

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 21).

Certification

Requirements for certification and licensure in school psychology vary from state to state. Students are expected to determine the requirements in the state or states in which they are interested in practicing before beginning the program. The degrees from the School Psychology program may lead to state and national credentials:

- Graduates of the NASP-approved (main campus) program, who obtain the EdS and PhD degrees in School Psychology, are eligible for the National Certification in School Psychology (NCSP), following successful completion of the national school psychologist *Praxis* assessment and internship. The NCSP is used by over 30 states, including Alabama, as one possible route to grant state certification in school psychology.
- EdS and PhD degree graduates of the School Psychology program who obtain the NCSP may meet requirements for the Alabama Class AA certificate in School Psychology using the Nationally Certified School Psychologist Approach.

For a student handbook or additional information, email or call: Program Coordinator, School Psychology, The University of Alabama, College of Education, Box 870231, Tuscaloosa, AL 35487-0231; phone (205) 348-7575; fax (205) 348-0683; program office, 306 Carmichael Hall.

Certification for Degree-Seeking Students Only

The School Psychology Program enrolls degree-seeking students and, occasionally with special permission, approves students for non-degree status to take only 1 or 2 courses, as noted earlier. The program typically does not enroll, evaluate, or endorse individuals who are not admitted to our degree programs. Only students admitted and enrolled in the EdS or PhD degree programs in school psychology and who complete our required coursework, field experiences, internships, and degrees are recommended by the program for the National Certificate in School Psychology (NCSP).

The School Psychology, Ph.D. program is only able to offer a limited number of graduate assistantships, and we are not able to offer a graduate assistantship to every student who applies to and enrolls in our program. Please consult <https://catalog.ua.edu/graduate/about/general-information/financial-assistance/> for information regarding graduate assistantships.

Department of Kinesiology

- Majors
 - Kinesiology, MA (p. 637)
 - Kinesiology, PhD (p. 643)

Department Head

- Jonathan Wingo

Graduate Program Coordinators

- Mark Richardson, Exercise Science
- Jonathan Wingo, General Studies
- Oleg Sinelnikov, Sport Pedagogy (Traditional Class A and Ph.D.)
- Elizabeth Woodruff, Sport Pedagogy (Alternative Class A)

Professors

- Michael Esco
- Mark T. Richardson
- Oleg Sinelnikov
- Jonathan Wingo

Associate Professors

- Michael Fedewa
- Brent L. Hardin
- Hayley MacDonald

Assistant Professors

- Elroy Aguiar
- Kevin Crombie
- Changki Kim
- Lee Winchester

Clinical Associate Professors

- Colleen Geary
- Kimberly Shaw
- Margaret Stran
- Elizabeth Woodruff

Clinical Assistant Professor

- Zachary Rightmire
- Battogtokh "Togy" Zagdsuren

Clinical Instructor

- Alyssa Parten

KIN500 Sociology of Sport

Hours 3

Examines the institution of sport from a sociological perspective. Provides an opportunity to critically analyze the assumptions surrounding the social significance of sport through a process of reflective thought.

KIN506 Techniques of Research

Hours 3

Designed to acquaint the student with the types of research and the methods and materials necessary for scientific inquiry. Includes the development of a research proposal, with emphasis on form and style.

View All Courses

Kinesiology, MA

The Department of Kinesiology offers the Master of Arts degree with coursework in the following:

- exercise science
- general studies in kinesiology
- sport pedagogy (traditional Class A and Alternative Class A certification in physical education)

Admission Requirements

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Physical Education, Traditional Class A Certification

In addition to the minimum Graduate School admission requirements, to be considered for regular admission applicants must hold appropriate

prior certification in physical education (P-12) or the approved equivalent. Also, three recommendations are required. (Applicants to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.) Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Admission Requirements for Physical Education, Alternative Class A Certification

In addition to the minimum Graduate School admission requirements, to be considered for regular admission applicants must complete specified undergraduate prerequisite courses.

For admission to the Alternative Class A (non-traditional) program in physical education (sport pedagogy), applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification (104 Carmichael Hall) for a transcript evaluation to determine prerequisite courses and other requirements. [NOTE: Coursework and/or a degree from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials through a foreign credential evaluation service recognized by the Alabama State Department of Education. Contact the College's Office of Student Services and Certification for more information.]
- **Degree requirement:** An appropriate bachelor's degree from an accredited institution with a minimum overall GPA of 2.50 OR a master's degree with a GPA of at least 3.0 is required.
- **Teaching Field:** Applicants must have an academic content major (or the equivalent) in the teaching field or earn a passing score on the appropriate Praxis subject assessment. The transcript evaluation will determine if an applicant meets the teaching field requirement.
- **Three recommendations:** An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Admission Requirements for General Studies and Exercise Science

In addition to the minimum Graduate School admission requirements, to be considered for regular admission applicants must:

- score at least 300 (combined verbal and quantitative) on the GRE
- have a 3.0 cumulative GPA in an undergraduate program

Prospective students who fail to satisfy one of the criteria above may be considered for Admission with Permission to Continue at the discretion of Kinesiology faculty.

Curricular Requirements

Kinesiology, MA (Class A Physical Education)

This course listing applies to those who begin this program June 13, 2024, and thereafter. Candidates earning graduate credit prior to this

date may elect to utilize this program. A minimum of 30 hrs of course credit must be earned, and a comprehensive exam must be successfully completed. Candidates must earn a cumulative GPA of at least 3.25 on all coursework in the program, with no grade below a C, and earn passing scores on a comprehensive assessment.

Transfer Credit

A maximum of six (6) hours of graduate credit earned in the field of the master's degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied toward the requirements for a master's degree in Kinesiology under the following conditions:

- The credit hours must have been completed prior to the student enrolling in the master's program at The University of Alabama.

The credit hours must not have been taken to satisfy the requirements for degrees the student has earned previously. For the traditional Class A Physical Education program, credits used for the previous Class B certification may not be used for this program.

Graduation School information on Transfer Credit (p.).

Accelerated Master's Program

The Accelerated Master's Program (AMP) allows highly motivated students concentrating in Exercise Science to take courses that dual count toward the BS in Kinesiology degree (Exercise Science Concentration) as well as toward an MA in Kinesiology degree (with coursework focusing on Exercise Science). Upon completion of the undergraduate degree, students take additional coursework during year 5 to complete the 30-hour MA degree. Students are not obligated to complete the master's degree and choosing not to complete it will not adversely affect the ability to earn the BS degree.

Information on the Accelerated Master's Program (p. 7).

Comprehensive Exam

Dates for and Registering to Take Comprehensive Exams

- Master's degree comprehensive examinations for students opting not to write a thesis will be offered twice a year. During the fall semester, they will be offered in the second full week of October. During the spring semester, they will be offered in the second full week of March.
- Only eligible students may take their comprehensive examination, eligibility being dictated by policies provided in the university's Graduate Catalog.
- Students wishing to take comprehensive examinations must inform the departmental representative responsible for scheduling and organizing the comprehensive examination at least four weeks prior to their desired examination date.
- Any retakes of the master's comprehensive examinations will take place in a timely manner to meet Graduate School deadlines. Students can also delay retaking the comprehensive examination to the first opportunity during the following fall or spring semester.

Master's Degree Comprehensive Examination Format and Content

- The master's degree comprehensive examination for students opting not to write a thesis will consist of a morning and afternoon session during one day. Each session is 3 hours in duration.
 - *Exercise Science only:* Within 1 month after the written session, an oral examination will follow. At the discretion of each faculty member, the student may receive feedback regarding the written answers during the 1-month period before the oral follow-up. A single comprehensive examination attempt will comprise a written and oral component. The oral component will be administered by the faculty members who provided questions.
- During each session, students answer questions on relatively narrow topics drawn from specific courses taught within the Department of Kinesiology.
 - *Exercise Science only:* Questions are provided by at least 3 exercise science faculty.
- The departmental representative responsible for scheduling and organizing the master's degree comprehensive examinations will solicit questions from those Kinesiology faculty who have taught graduate courses to each student.
- Students will be asked questions based on coursework from a minimum of 4 courses.
- The departmental representative responsible for scheduling and organizing the master's degree comprehensive examination may provide examples of past questions for students studying for the examination.
- Students will complete the examination by typing within a word processing program on a computer.

- Personal technology including phones, tablets, personal laptop computers, and portable drives will not be permitted in the examination room.
- Each examination session will be monitored by the departmental representative overseeing the examination process.
- On completion of the examination, the departmental representative responsible for its scheduling and organization will distribute students' answers to the faculty who composed individual questions for evaluation, collect all evaluated answers, and inform each student of his or her result (pass or fail) and average score (based on a rubric).
- Students failing the comprehensive examination will be required to rewrite individual questions on which they received a score of 1. They will be permitted only one further attempt to pass and may be required to take additional coursework.
 - *Exercise Science only:* The faculty administering questions will consider both the written and oral components in determining a score on a given attempt. Students failing the first attempt of the examination may be required to wait until the following semester to retake the exam. Additional coursework may be required. Retakes of written portions will only involve question(s) failed, but the oral portion of a retake will be administered by the full committee of faculty who administered questions. The committee will decide the pass/fail outcome of the retake attempt.

The departmental representative responsible for coordinating the master's degree comprehensive examinations will keep a record of and report results to the Graduate School.

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

Clinical Placements

All Class A and Alternative Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and may require students to observe, assist in the classroom, and teach under the supervision and mentorship of the classroom teacher and university supervisor. These placements are typically in the greater Tuscaloosa area or surrounding counties, within a 50-70 mile radius, or in the Birmingham area, in order to facilitate supervision of students. With approval, individuals who are employed in positions appropriate to the area of their current program may complete field experiences on the job, but those experiences must be planned with specific purposes and assessment. All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should have professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Internship - Alternative Class A

The teaching internship is one of the most important experiences College of Education students have. It is generally regarded as the culminating activity of one's preparation to become a teacher. At The University of

Alabama, the internship is a full-semester, full-time assignment and must be taken in residence.

Alternative Class A students must file internship applications with the Office of Clinical Experiences during the semester preceding the semester of the planned internship. The application process begins by submitting an application for internship.

Alternative Class A students may apply to enroll for an internship if they meet the following criteria:

- The student must have completed all courses in the major or majors, or must secure written permission to enroll for an internship from the appropriate department head.
- The student must show proof of a passing score on the appropriate Praxis assessment.
- The student must have achieved a minimum grade point average of 3.0 overall.
- The student must have achieved a minimum grade point average of 2.75 in each major, both for University of Alabama courses in each major and for combined University of Alabama courses and transfer courses in each major.
- The student must have achieved a minimum grade point average of 2.75 for professional education coursework.
- The student must have completed all methods courses and appropriate professional coursework with grades of "C" or better.
- The student must have removed from the transcript any grade of incomplete ("I") recorded in required courses; grades of incomplete are treated as grades of "F."

Registration for Internship Credit Hours

Students are required to register for the number of internship credit hours specified by their program. Students enrolled for internship must not expect to be enrolled in other courses while interning. Interns in P-12 programs such as physical education should expect to have a split internship assignment with an elementary and a secondary school.

Summer internships are rarely available and then only to persons who hold an undergraduate degree and certification and have one or two years of successful teaching experience at the level and in the subject for which they are seeking certification (with approval from the department head). In addition, summer internship assignments are allowed only if an appropriate placement can be secured in the Tuscaloosa area and appropriate supervision can be provided. These conditions also apply to those seeking to update or renew their certification or add an additional endorsement to a current certificate. To apply for a summer internship, students should file an appropriate application with the Office of Clinical Experiences by March 31 of that year.

Plan I - Thesis Process Requirements

Dates for and Registering to Complete the Thesis

- Students wishing to complete a thesis will register for at least 6 credit hours of KIN 599 Thesis Research.
- The student will work with the research advisor to formulate a committee of 3 faculty members, one of whom must be from outside the Department of Kinesiology.
- The thesis proposal meeting will be scheduled by the student at any time of the academic year in conjunction with the thesis chair and committee and following the policies provided in the university's graduate catalog.

- Students can opt to write a “traditional” five-chapter thesis consisting of an introductory chapter, a literature review chapter, a methods chapter, a results chapter, and a conclusions chapter. In this case, the formal proposal will consist of the first three chapters with the methods section being written in the future tense.
- Alternatively, students can opt to write an “article-style” thesis which describes one study to be conducted by the student and written in a format consistent with a reputable journal in the student’s subdiscipline of Kinesiology. In this case, the proposal will consist of all sections of the study article prior to the reporting of results and any discussion of or conclusions about the results (e.g., introduction, literature review, theoretical framework, purpose statement, and methods) with the methods written in the future tense.

Thesis Proposal

- The student will provide a copy of his/her final thesis proposal to his/her thesis chair and committee prior to the proposal meeting in conjunction with the policies provided in the university’s graduate catalog.
- The student will then make a formal presentation of the proposed thesis research.
- Faculty will then question the student and provide feedback about the presentation and/or written document and content related to the proposed research.
- Once the thesis chair and committee have completed their questioning of the student, the student and all other parties, except for the chair and the committee, will retire from the room in which the proposal is being held. Faculty will then deliberate as to the standard of the proposal.
- IRB approval may be necessary for research involving human subjects. More info here: <https://research.ua.edu/compliance/irb/>

Thesis Defense

- The thesis defense will be scheduled by the student at any time of the academic year in conjunction with his/her thesis chair and committee and following the policies provided in the university’s graduate catalog.
- The student will provide a copy of the final thesis to the thesis chair and committee prior to the defense in conjunction with the policies provided in the university’s graduate catalog.
- The chair of the student’s thesis committee will announce the date, time, and place of the thesis defense to members of the department and College of Education at least one week in advance of the defense.
- The defense will begin with a formal presentation of the thesis research made by the student.
- Faculty will then question the student about the presentation and/or written document and content related to the thesis research.
- Other interested parties attending the thesis defense will also be given an opportunity to question the student about the thesis research.
- Once the thesis chair and committee have completed their questioning of the student, the student and all other parties, except for the chair and the committee, will retire from the room in which the defense is being held. Faculty will then deliberate as to the standard of the thesis defense and score it using a rubric.
- Students failing the thesis defense will be permitted only one further attempt to defend their thesis and may be required to take additional coursework.

Plan II - Non-Thesis Process Requirements

See previous Comprehensive Exam section.

Time Limit for Degree Completion

Graduate School information on Time Limits (p.).

Student Progress Requirements

For the Alternative Class A program in Physical Education, students must be formally admitted to the Alternative Certification Teacher Education Program during their program. Students must meet the minimum qualifications that are expected of candidates entering and completing undergraduate (Class B) certification in the same discipline. This usually means minimum GPA requirements in the core curriculum as well as minimum GPA requirements within the disciplines in which the applicant is seeking certification. Other requirements, such as completion of a writing assessment and other screening associated with undergraduate certification must be completed before formal admission to the alternative teacher education program.

Additional Academic Requirements

For the Alternative Class A program, a passing score on the appropriate Praxis subject assessment is required.

Electronic Learning Management System Requirement

For Physical Education, a designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Information on Academic Grievances (p. 255).

Grades and Academic Standing

Exercise Science and General Studies require a 3.0 GPA.

As required for traditional Class A and Alternative Class A certification, students in Physical Education programs must earn a GPA of at least 3.25 on all courses in the program, with no grade below a “C.”

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadline.

Application for Graduation

Information on the Application for Graduation (p.).

Certification

Physical Education (P-12), Traditional Class A and Alternative Class A

The Alabama State Department of Education grants Class A professional educator certification in Physical Education (P-12). To be eligible, candidates must hold appropriate prerequisite certification OR complete an Alternative Class A program and must successfully complete all requirements for the MA degree as described in this catalog.

To be awarded Alabama Class A Physical Education (P-12) certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C,
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum,
- earn a passing score on the required Praxis subject assessment (Alternative Class A)

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall during the student's last semester. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program.

Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education. Students planning to teach outside the state of Alabama are responsible for knowledge about professional licensure requirements in those states.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

Information regarding financial assistance can be found here: <https://education.ua.edu/student-resources/financial-assistance/>.

Kinesiology, PhD

The Department of Kinesiology offers programs leading to the Doctor of Philosophy (PhD) degree in Kinesiology with areas of study in exercise science and sport pedagogy.

Admissions

Admission to the Ph.D. program is competitive and based on prior academic achievement, graduate record examination (GRE) scores, recommendations, and research interests. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- a graduate degree or PGCE (sport pedagogy only) from an accredited institution
- a GRE score
- 3.0 GPA for a completed graduate degree program.

Preference is given to students who have strong backgrounds in the Life Sciences (for the exercise science focused area of study), teaching (for the sport pedagogy focused area of study), or related fields, meet the minimum requirements stated above, and have research interests compatible with at least one of the Kinesiology faculty members.

Students will be admitted on a rolling basis at the discretion of program faculty as applications are received. Prospective students should identify a prospective research mentor and contact that person for more information regarding the admission procedure.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Ph.D. degree requires a minimum of 66 hours beyond the master's degree. This program includes 1) 24-hour kinesiology (i.e., exercise science or sport pedagogy) core; 2) 12-hour competency in research and statistics; 3) 12 hours of foundation courses to support the major (must be taken outside of the department); and 4) 18 hours of dissertation.

Advising

All doctoral students will be advised by a major professor with whom they will have been aligned as part of the admissions process. In the event a doctoral student is granted admission without a research mentor/major professor, they will be assigned an interim advisor upon admission to the PhD program. The advisor will assist the student in the evaluation of previous work, selection of coursework, and research oversight.

Coursework Focusing on Exercise Science		Hours
Major Field Coursework		
KIN 592	Physiology of Exercise	3
KIN 651	Systems Physiology I	3
KIN 652	Systems Physiology II	3
KIN 670	Exercise Biochemistry	3
Additional KIN coursework (Students may select from the following courses.)		12
KIN 506	Techniques of Research	
KIN 507	Lab Techniques in Kinesiology	
KIN 566	Evaluation in Kinesiology	
KIN 593	Adv Fit Test Ex Prescript	
KIN 596	Independent Study	
KIN 602	Readings in Kinesiology	
KIN 603	Special Proj Kinesiology	
KIN 685	Field & Lab Experience	
KIN 690	Exercise Health Disease	
KIN 692	Sem Exercise Physiology	
KIN 698	Non-Dissertn Research	
Research/Statistics *		12
Students may select from the following courses:		
BER 639	Applied Regression Analysis	
BER 640	Adv Statistical Methods in Ed	
BER 642	Advanced Regression Methods	
BER 643	Multivariate Statistics	
BER 645	Advanced Experimental Design	
BER 646	Structural Equation Modl	
BER 648	Advanced SEM	
ST 540	Stat Prog & Comp with R	
ST 550	Stat Methods In Res I	
ST 552	Applied Regression Analy	
ST 553	Appld Multivariate Analy	
ST 560	Statistical Methods	
ST 561	Applied Design Expermnts	

ST 635	Nonparametric Statistics	
POPH 522	Biostatistics	
PY 602	Advanced Statistics I	
PY 603	Advanced Statistics II	
Foundations Area Coursework **		12
Courses may include but are not limited to the following examples:		
CHS 550	Intro to Fundamentals of Med I (6)	
CHS 551	Intro to Fundamentals Med II (6)	
BSC 524	Human Physiology	
BSC 535	Immunology	
BSC 549	Endocrinology	
BSC 550	Fundamentals of Biochemistry	
NHM 557	Childhood Obesity	
NHM 558	Nutr Prev Trtmt Chron Disease	
NHM 561	Adv. Vitamins and Minerals	
NHM 562	Metabolism of Energy Nutrients	
NHM 568	Nutrition for the Older Adult	
POPH 523	Basic Epidemiology	
PY 658	Psychopathology	
RCH 500	Rural Envir/Occup Health	
Dissertation Research		18
KIN 699	Dissertation Research	
Total Hours		66

Footnotes

- * Research prerequisite: If a student has not completed a basic statistics course in a master's degree program, BER 540 Statistical Methods In Educ must be completed. BER 540 does not count toward the required 12 hours of Research/Statistics.
- ** Sample areas include health promotion, psychology, nutrition, biochemistry, physiology, immunology, epidemiology, and occupational health.

Coursework Focusing on Sport Pedagogy		Hours
Major Field Courses*		
KIN 512	PE Curriculum	3
KIN 538	Adv Adapted Phys Ed.	3

KIN 691	Res Sociology Human Perf	3
Research/Statistics **		
BER 640	Adv Statistical Methods in Ed	3
Choose one research grouping below for 9 hours.		9
Qualitative option: BER 631, BER 632, and BER 633		
Quantitative option: BER 645, BER 643, and BER 642		
Combination option: BER 631, BER 645, and BER 643		
Major Area Foundations ***		12
Dissertation Research		18
KIN 699	Dissertation Research	
Total Hours		66

Footnotes

- * Sport pedagogy students who have not completed a master's degree at The University of Alabama take these 8 courses for a total of 24 hours. Sport pedagogy students who have taken some of the major field courses in a master's degree program at The University of Alabama may substitute the major field courses with KIN 596, KIN 602, KIN 603, KIN 685, and/or KIN 698. Students who will focus on adapted sport pedagogy may obtain approval from Dr. Hardin to substitute a maximum of two of these courses for KIN 632 and KIN 691: KIN 596, KIN 602, KIN 603, KIN 685, and/or KIN 698.
- ** Research/Statistics prerequisite: If a student has not completed a basic research methods course in a master's degree program, KIN 506 Techniques of Research is a prerequisite. If a student has not completed a basic statistics course in a master's degree program, BER 540 Statistical Methods In Educ must be completed. Neither KIN 506 nor BER 540 counts toward the required 12 hours of Research/Statistics.
- *** Sample areas include health promotion, human development, educational psychology, educational leadership, educational foundations, educational policy, research, special education, or other areas to suit student's research/teaching interests.

Transfer Credit

A maximum of 6 hours of graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree in Kinesiology under the following conditions:

- The credit hours must have been completed prior to the student enrolling in the doctoral program at The University of Alabama.

The credit hours must not have been taken in order to satisfy the requirements for degrees the student has earned previously.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirements

Graduate School information on the Doctoral Plan of Study c (p. 21) can be found here (p. 21).

Comprehensive Exam

Dates for and Registering to Take Comprehensive Exams

- Doctoral degree comprehensive examinations for students will be offered at any time of the academic year in conjunction with the student's dissertation chair (or academic advisor in the event a dissertation chair has not yet been designated, hereafter referred to as "major professor") and following the policies provided in the university's Graduate Catalog.
- Only eligible students may take their comprehensive examination, eligibility being dictated by policies provided in the university's Graduate Catalog.
- Students wishing to take their comprehensive examinations must inform their major professor—who will be responsible for scheduling, organizing, and proctoring the comprehensive examination—at least four weeks prior to their desired examination date.
- Any necessary retakes of the doctoral comprehensive examination will take place when the major professor deems the student ready. The time frame in which retakes must be completed is decided by the major professor in conjunction with the faculty member whose question is being retaken.

Doctoral Degree Comprehensive Examination Format and Content

- The faculty member organizing the comprehensive examination will solicit at least 8 questions from program faculty.
 - *Exercise Science only:* Questions will be solicited from at least 3 and no more than 5 exercise science faculty.
- Within 1 month after the written session, an oral examination will follow. At the discretion of faculty, the student may receive feedback regarding the written answers during the 1-month period before the oral follow-up. A written and oral component will comprise a single comprehensive examination attempt. The oral component will be administered by the faculty members who provided questions.
- The doctoral degree comprehensive examination will consist of morning and/or afternoon sessions to be completed over the course of 1 work week (Monday – Friday).
- During each session, students answer relatively broad questions and are expected to draw on coursework, coursework reading, and work and reading done outside of coursework.
- Questions asked may not be tied to specific courses. Instead, they may cross the boundaries of a number of different courses.
- The faculty member responsible for scheduling and organizing the doctoral degree comprehensive examination may provide examples of past questions for students studying for the examination.
- Students will complete the examination by typing within a word processing program on a computer.
- Personal technology including phones, tablets, personal laptop computers, and portable drives will not be permitted in the examination room.
- Each examination session will be monitored as needed by the faculty member overseeing the examination process.
- On completion of the examination, the faculty member responsible for its scheduling and organization will distribute students' answers to the faculty who composed individual questions for evaluation, collect all evaluated answers, and inform each student of his or her result (pass or fail).
- Students failing the comprehensive examination will be required to rewrite individual questions on which they received a score of 1. They will be permitted only one further attempt to pass and may be required to take additional coursework.
 - *Exercise Science only:* The faculty administering questions will consider both the written and oral components in determining a score on a given attempt. Students failing the examination may be required to wait until the following semester to retake the exam. Additional coursework may be required. Retakes of written portions will only involve question(s) failed, but the oral portion of a retake will be administered by the full committee of faculty who administered questions. The committee will decide the pass/fail outcome of the retake attempt.

The major professor will keep a record of and report results to the program administrative assistant, who will then report results to the graduate school.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

A student is admitted to candidacy after passing the comprehensive exam.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Graduate School information on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Dates for and Registering to Complete the Dissertation

- Students wishing to complete a dissertation will register for KIN 699 Dissertation Research.
- The student will work with the research advisor to formulate a committee of 5 faculty members, one of whom must be from outside the Department of Kinesiology. A majority of the dissertation committee members must be full-time regular University of Alabama faculty (that is, full-time instructor, assistant professor, associate professor, or professor). The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty.
- The dissertation proposal meeting will be scheduled by the student at any time of the academic year in conjunction with the dissertation chair and committee and following the policies provided in the university's graduate catalog.
- Students can opt to write a "traditional" five-chapter dissertation consisting of an introductory chapter, a literature review chapter, a methods chapter, a results chapter, and a conclusions chapter. In this case, the formal proposal will consist of the first three chapters with the methods section being written in the future tense.
- Alternatively, students can opt to write an "article-style" dissertation which describes 3 studies to be conducted by the student and written in a format consistent with a reputable journal in the student's subdiscipline of Kinesiology. In this case, the proposal will consist of all sections of each study article prior to the reporting of results and any discussion of or conclusions about the results (e.g., introduction, literature review, theoretical framework, purpose statement, and methods) with the methods written in the future tense.

Dissertation Proposal

- The student will provide a copy of the final dissertation proposal to the dissertation chair and committee prior to the proposal meeting in conjunction with the policies provided in the university's graduate catalog.
- The student will then make a formal presentation of the proposed dissertation research.
- Faculty will then question the student and provide feedback about the presentation and/or written document and content related to the proposed research.
- Once the dissertation chair and committee have completed their questioning of the student, the student and all other parties, with the exception of the chair and the committee, will retire from the room in which the proposal is being held. Faculty will then deliberate as to the standard of the proposal.
- IRB approval may be necessary for research involving human subjects. More info here: <https://research.ua.edu/compliance/irb/>

Dissertation Defense

- The dissertation defense will be scheduled by the student at any time of the academic year in conjunction with the dissertation chair and committee and following the policies provided in the university's graduate catalog.

- The student will provide a copy of the final dissertation to the dissertation chair and committee prior to the defense in conjunction with the policies provided in the university's graduate catalog.
- The chair of the student's dissertation committee will announce the date, time, and place of the dissertation defense to members of the department and College of Education at least one week in advance of the defense.
- The defense will begin with a formal presentation of the dissertation research made by the student.
- Faculty will then question the student about the presentation and/or written document and content related to the dissertation research.
- Other interested parties attending the dissertation defense will also be given an opportunity to question the student about the dissertation research.
- Once the dissertation chair and committee have completed their questioning of the student, the student and all other parties, with the exception of the chair and the committee, will retire from the room in which the defense is being held. Faculty will then deliberate as to the standard of the dissertation defense and score it using a rubric.
- Students failing the dissertation defense will be permitted only one further attempt to defend their dissertation and may be required to take additional coursework.

Graduate School information on Dissertation Requirements (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

The sequence of steps for a doctoral student from admission to graduation is:

1. Satisfaction of admission requirements
2. Formation of doctoral program of study
3. Completion of coursework
4. Completion of major comprehensive exams
5. Admission to candidacy
6. Formation of doctoral dissertation committee
7. Proposal of doctoral dissertation
8. Oral defense of the dissertation
9. Submission of final copies of the dissertation

A limited number of graduate assistantships are available each year. These assistantships are awarded on a competitive basis. Graduate assistants may be asked to assist with teaching, research, and/or the outreach mission of the academic unit.

Graduate School information on Financial Assistance (p. 254).

Department of Music Education

General Requirements

The content of all graduate programs in music education is determined, in part, by the background and goals of the individual student. Each program will include graduate courses in music, music education (choral, instrumental, or general) and professional education, and may include other graduate study as indicated by the student's background and interests in consultation with a music education advisor. It is recommended that each student work closely with the music education graduate coordinator during the first year of graduate study and then with an academic advisor in music education in order to plan the program.

Degree requirements are noted on the official Plan of Study for the various degrees and tracks. These documents are available from the chairperson, graduate coordinator, or administrative staff in the Department of Music Education.

Graduate-level music education courses that meet requirements for specific State-approved certification programs (Class A, Class AA) are offered on a two-year rotation. Applicants for music education graduate degrees should anticipate that summer enrollment may be necessary to complete degree requirements. Questions concerning the rotation of course offerings should be directed to the **Music Education Department**; Box 870366; Tuscaloosa, AL 35487-0366; (205) 348-6054.

Before 12 hours of graduate study are completed in any graduate degree program, students enrolled in music education graduate programs may be required, at the discretion of the department, to demonstrate professional competence in music theory and music history and, if requested, to perform a placement audition on their major instrument. Information about specific examinations can be obtained through the Music Education Office, Box 870366, Tuscaloosa, AL 35487-0366 (205) 348-6054.

Traditional Class A Certification in Music Education, MA in Secondary Education

The MA is designed to enhance the performance and pedagogical capabilities required to actively participate in creative activity as a performer, conductor, or educator while allowing for flexibility to address a variety of differences and directions. Graduates aspire to careers as advanced practitioners in Music Education and the innovative teaching of Music Education beyond undergraduate preparation. The degree is awarded to candidates who complete the course of study with distinction, demonstrating ability in teaching and musicianship.

The MA is designed to include a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student's

program will include courses in music, music education, conducting, pedagogy, and professional education.

Admission and degree requirements (p. 552) for Secondary Education, MA (Class A Music Education certification)

Alternative Class A Certification in Music Education (Nontraditional, Initial Teacher Certification), MA in Secondary Education

The MA leading to Alternative Class A certification is designed to enhance the performance and build pedagogical capabilities required to actively participate in creative activity as a performer, conductor, or educator while allowing for flexibility to address a variety of differences and directions. Graduates aspire to careers as practitioners in Music Education beyond undergraduate preparation as a performer. The degree is awarded to candidates who complete the course of study with distinction, demonstrating ability in teaching and musicianship.

The Alternative Class A certification program is designed to include specific methods coursework, education classes, and study in a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student's program will include courses in music, music education, conducting, pedagogy, methods, and professional education.

Admission and degree requirements (p. 552) for Secondary Education, MA (Alternative Class A Music Education certification)

Class AA Certification in Music Education, EdS in Secondary Education

The EdS is designed to enhance the performance and pedagogical capabilities required to actively participate in creative activity as a performer, conductor, or educator while allowing for flexibility to address a variety of differences and directions. Graduates aspire to careers as advanced practitioners in Music Education and the innovative teaching of Music Education beyond master's-level preparation. The degree is awarded to candidates who complete the course of study with distinction, demonstrating ability in teaching and musicianship.

The EdS is designed to go beyond master's coursework to include a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student's program will include courses in music, music education, conducting, pedagogy, and professional education.

Admission and degree requirements (p. 544) for Secondary Education, EdS (Class AA Music Education certification)

EdD in Curriculum and Instruction (Music Education)

The EdD is designed to develop the performance, pedagogical, and research capabilities required to conduct applied research, prepare pre-service music teachers, and actively participate in creative activity as a performer or conductor while allowing for flexibility to address a variety of differences and directions. Graduates aspire to careers as advanced practitioners and leaders in Music Education and the innovative teaching of Music Education. The degree is awarded to candidates who complete the course of study with distinction, demonstrating ability in teaching, musicianship, scholarly study, and ability to conduct original research.

The EdD is designed to include a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student's program will include courses in music, music education, professional education, and research.

Admission and degree requirements (p. 527) for Curriculum and Instruction, EdD

PhD in Curriculum and Instruction (Music Education)

The PhD program is designed to develop the pedagogical, performance, and research capabilities required to independently conduct scholarly research, thoroughly prepare pre-service music teachers, and actively participate in high-level creative activity as a performer or conductor while allowing for flexibility to address a variety of differences and directions. Graduates pursue positions as collegiate teachers, conductors, performers, and researchers. The degree is awarded to candidates who complete the course of study with distinction, demonstrating ability in teaching, musicianship, scholarly study, and outstanding aptitude in conducting original research.

The PhD is designed to include a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student's program will include courses in music, music education, professional education, and research.

Admission and degree requirements (p. 530) for Curriculum and Instruction, PhD

Graduate work in music education is an option through the **Curriculum and Instruction Department** in the College of Education. Interested applicants should contact Music Education, Box 870366, Tuscaloosa, AL 35487-0366 (205) 348-6054, or speak with the Graduate Program Coordinator for Music Education by e-mail at chancock@ua.edu or phone at (205) 348-6335.

MUE500 Foundatn Music Education

Hours 3

Investigation of the purposes and functions of music education from antiquity to the present. Philosophical foundations and a chronological survey of historical issues related to the inclusion of music in general education will also be discussed.

MUE522 General Music: Approaches and Practices

Hours 3

This course examines curricular approaches and contemporary practices in general music education. Students explore important questions about the purposes and characteristics of general music programs and how those programs meet the needs of diverse learners and communities. Students develop critical and reflective understandings of general music education within the context of current challenges and opportunities facing the field.

Special Education, Ed.D.

The Doctor of Education (EdD) program in special education at The University of Alabama is designed to prepare educational leaders who will work to provide a direct educational benefit to the lives of children and youth with disabilities and their families. Graduates will likely work as administrators but they could also be teacher trainers or executive directors of nonprofit organizations.

The program is delivered online and designed to prepare students for leadership roles in special education.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- An earned master's degree in special education (or a related area)
- Three years of appropriate experience, defined as three years of teaching experience (that will be accompanied by teaching certification).
- An interview
- Three letters of recommendation
- Responses to two program-specific questions:
 - In one page, please describe what is meant by evidence-based practices.
 - In three to five pages, please list some of these evidence-based practices and describe their role in contemporary gifted education or special education (select the area of program

application). Please also discuss why you think there is a gap in implementing these practices.

Graduate faculty members individually evaluate and collectively discuss admission applications.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 72 semester credit hours beyond the master's degree is required for completion of the Ed.D. program. These 72 hours consist of the following required courses: 36 hours of special education courses, 12 hours of educational foundations courses, 12 hours of research courses, and 12 dissertation hours.

Transfer Credit

A student holding an earned, in-field master's degree and working in the field or a related field since earning the degree may request approval for up to 1/2 coursework hours of credit to be applied to the EdD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the EdD degree.

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study c (p. 21)an be found here (p. 21).

Comprehensive Exams

Students may take comprehensive examinations as late as the last semester of coursework. Students should notify their chair as soon as possible at the beginning of the semester if they intend to take comprehensive examinations in order to solicit questions from the committee members. Dates for comprehensive examinations are announced at the beginning of each semester. Students must be registered for at least one hour in order to take comprehensive examinations per Graduate School policy.

The dissertation committee will write the comprehensive examination questions for the student in view of the course of study as well as the anticipated dissertation study. Comprehensive examinations will be delivered via Blackboard. Students have 10 consecutive days to complete their questions. The comprehensive examinations are open book and open note. Students may not consult with other students or faculty members outside of their committee when completing their comprehensive examinations. Comprehensive examination responses are subject to evaluation for plagiarism and other forms of academic dishonesty as outlined in the code of student conduct.

If a student fails or comprehensive examinations, they must wait until the next semester before taking it again. A student may only retake their comprehensive examinations once. If a student fails or comprehensive examination twice, they will be terminated from the program.

Graduate School information on Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

Admission to candidacy requires: 1) the completion of all required coursework outside of dissertation hours (SPE 699) with a GPA of at least 3.00 and 2) successfully passing comprehensive examinations. Once a student has met the requirements for admission to candidacy for a doctoral degree, doctoral students must pursue completion of the dissertation without interruption by enrolling each semester for at least 3 hours of dissertation research.

Graduate School information on Admission to Candidacy (p. 21).

Continuous Doctoral Research Hours Registration

Graduate School information on Continuous Doctoral Research Hours Registration (p. 21).

Dissertation Requirements

Selecting a chair

Upon admission to the program, the student will be assigned an advisor. This advisor may or may not become the chair of the dissertation study. In selecting a chair, it is highly recommended that the student has had past interactions with this faculty member sufficient to discern their work style and interests. Throughout their coursework, students will have the opportunity to interact with many faculty members. If a student wants to work with a particular faculty member that they may not have had the opportunity to interact with through coursework, the student may want to reach out to this faculty member indicating interest in their work and ask to be involved in some way. Please note that no faculty member is required to serve or chair your dissertation committee. Individual faculty will evaluate your grades in their courses as part of the determination whether to serve at all on your dissertation committee. You should generally not expect a faculty member to serve on your committee if you receive a grade below a "B" in their course, some faculty members may even require an "A" for consideration. Based on a student's

research interests and past interactions with faculty members, the student should contact a potential chair begin by e-mail to begin this discussion.

In this e-mail, the student should describe their potential research idea(s) for a dissertation study. This email should be limited to approximately one paragraph. A faculty member may respond that they are unable to chair any additional students at this time. They may also respond that the student's research interests are not sufficiently aligned with theirs. Please note that both faculty members and students have academic freedom, so they must both come to an agreement when it comes to the dissertation study. For some students, the selection of a chair may be obvious, but for other students it may require more flexibility in terms of what their dissertation study will be. Finally, it is important to be open to faculty members honing and reshaping research ideas for the dissertation study. Faculty members understand the time and effort entailed to complete a dissertation study. We want the dissertation study to be a success.

Selecting committee members

After selecting your chair and discussing potential research ideas, your chair will have suggestions as to who should serve on your dissertation committee. For your dissertation study, you will need at least three faculty members plus one outside member for total of four members. This committee would include your chair to serve on your committee per graduate school policy for EdDs.

One of these committee members is typically a methodologist, who is a person who has demonstrated expertise in the methodology used in the dissertation study. This person might or might not be on the SPEMA faculty. As mentioned above, another member of the committee is an outside member of the committee. This person will be a faculty member in another department, outside of the department. In taking courses with a non-SPE prefix, please think about the selection of the outside member.

The dissertation at a distance

Each student will complete a dissertation while enrolled in SPE 699 Dissertation Research hours. Students are not permitted to enroll in SPE 699 hours until after having successfully passed their comprehensive examination. In selecting the dissertation topic, both faculty and students have academic freedom. Faculty members will guide students to dissertation topics aligned with their mutual interests and that can be executed at a distance. There are generally five categories of research studies that can be well executed at a distance:

1. Studies with existing or archival publicly-available data. Students can access many publicly available data sets relevant to special education. Publicly-available data sets include but are not limited to:
 - a. National Center for Education Statistics
 - i. Early Childhood Longitudinal Study
 - ii. High School Longitudinal Study
 - iii. National Household Education Study
 - iv. School Survey on Crime and Safety
 - b. Office of Civil Rights Data Collection
 - c. IDEA Part B data
 - d. National Survey of Children's Health (NSCH)
 - e. National Survey of Children with Special Health Care Needs (can be merged with NSCH)
 - f. CDC Survey of Pathways to Diagnosis and Services
 - g. National Survey of the Diagnosis and Treatment of ADHD and Tourette Syndrome

2. Studies with existing or archival data from your state or local education agency. Students will most likely need approval from your agency to use data belonging to the agency.
3. Studies using online survey techniques. The University of Alabama provides access to Qualtrics free of charge to faculty and students. This is the perfect tool for students to design an online survey.
4. Historical studies using archival collections or from papers held in private collections.
5. Qualitative studies using such data as policy documents, interviews, and focus groups.

Other categories of research studies could work for a dissertation at a distance as well. Ultimately, your chair needs to be comfortable supervising your dissertation study at a distance and the Institutional Review Board (IRB) approving studies with human subjects needs to be willing to approve this study with the understanding that faculty supervision would be at a distance. For instance, the IRB may not approve a study involving an intensive intervention, where it would be impossible for a faculty member being at a distance to supervise the research process. Students need to consider dissertation studies, where faculty supervision at a distance is appropriate.

Dissertation Proposal

Once the student and the chair have agreed upon a dissertation topic, the student should begin to write the dissertation proposal. The dissertation proposal is the first three chapters of the dissertation study. This document is written in future tense that is as it is what the student proposes to do for the dissertation. After the dissertation is completed in its entirety, the student will then need to change the tense of the proposal accordingly. In Chapter 1, the student will write an introduction to the dissertation study. In Chapter 2, the student will provide a complete review of the literature related to the dissertation topic. In Chapter 3, the student will provide the methodology that will be utilized for the proposed study. The student will need to follow all formatting guidelines per the Graduate School requirements. Students must adhere to the most recent edition of APA style. The student and the chair will determine the process for developing the dissertation proposal. The chair may request one chapter at a time, a complete draft of the dissertation proposal, or some other approach. Students should discuss this with their chair before proceeding.

Once the chair and the student have agreed upon a draft of the proposal, the student will provide this agreed-upon draft to all committee members. The student will also ask committee member members for their availability in the next two to three weeks to meet online via videoconferencing to discuss the dissertation proposal. According to the Graduate Catalog, "the written dissertation proposal must be provided to members of the committee at least 10 working days prior to the proposal meeting." The student should not under any circumstances send a draft of a proposal or ask the committee members to meet to discuss your proposal without the chair and the student agreeing on this step. When meeting with the committee via videoconferencing, the student will give a 30- to 45-minute slide presentation summarizing the dissertation proposal. After the presentation, the committee members will ask questions regarding the proposal. The student should take the feedback constructively and be prepared to have revisions requested by the committee members.

After the presentation and discussion have ended on the proposal, the committee members will meet without the student present. The committee members will discuss whether the student has passed, passed with revisions, or failed. Students who fail at the dissertation proposal stage will need to write a new proposal or discontinue in the

program. Once students have passed the dissertation proposal stage, they are permitted to carry out their dissertation study pending any IRB approval needed. Students may not submit the dissertation study to the IRB before passing the proposal stage.

Dissertation Formatting

The dissertation study will follow *APA Publication Manual* for the reporting of references and statistics unless otherwise specified by the Graduate School. The most recent edition of the manual should be used. The Graduate School provides a manual to guide students on the preparation and formatting of the dissertation study, which can be found here on their website.

IRB approval

The student will work with the chair to obtain Institutional Review Board (IRB) approval for the dissertation study, if human subjects will be involved. The purpose of the University of Alabama's IRB is to ensure the safe and ethical treatment of humans as subjects in research, public service, and training programs. In accordance with federal and university regulations, it is required that the IRB review all research involving human subjects conducted at or sponsored by the University of Alabama regardless of the funding source. The University of Alabama's IRB has a moral duty and obligation to protect human subjects prior to the commencement of any research study and to discontinue any protocol upon notification of irregular activity warranting such action.

The time it takes to obtain IRB approval varies considerably by the study submitted. Students may not start the recruitment nor collection of any human subjects data before IRB approval. Please note that archival data requires IRB approval, though typically exempt, unless specified otherwise. After the student has obtained IRB approval, the collection of human subjects data may begin. Students should retain a copy of the IRB approval once received.

Appointment of Doctoral Dissertation Committee

As indicated in the Graduate Catalog, the graduate dean's approval of the proposed dissertation committee is required. This approval is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting.

Dissertation Defense

After completing dissertation study as proposed at the proposal meeting, the student will write the final two chapters of the dissertation. Chapter 4 contains the results of the dissertation study while Chapter 5 contains a discussion of the dissertation study. Again, the student and the chair will work together to develop an agreed upon draft of the entire dissertation study. Once the student and the chair are both satisfied with the draft of the entire dissertation study, then the student may contact the committee members and inform and ask their availability to set a date to defend the dissertation as well as provide the agreed upon draft. Again, the student will ask committee member for their availability in the next two to three weeks to meet online via zoom to discuss the dissertation and provide the defense. Per the Graduate Catalog, at least 10 working days is required. According to the Graduate Catalog, virtual participation is permitted for online programs and specifically states:

For online and hybrid programs that handle oral examinations in an online setting, all committee members as well as the student may participate virtually in the oral examination. However, these programs must fully adhere to the guidelines outlined in the Technical Requirements section above for any oral examination involving the entire committee.

In scheduling the dissertation defense, students should be mindful of Graduate School deadlines. The student will present a 45 minute to

one hour long presentation summarizing the entire dissertation. Given Chapters 1 through 3 have already been presented at the proposal meeting, the student should focus the dissertation defense presentation more on Chapters 4 and 5. After the student presents, the committee members will ask questions. Students should respond as best as they can and take the feedback constructively. Revisions to some degree are typical but should be much less than the revisions requested during the proposal stage. The dissertation document should reflect a close to final piece of work.

According to the Graduate Catalog, at least 10 working days before defending the dissertation, **the student** must arrange to send an abstract of the dissertation to all faculty in the College of Education along with an invitation to attend the defense that indicates time and place of the defense. The chair will help with this, but the student should prompt him or her to ensure at least 10 working days.

According to the Graduate Catalog, it is the responsibility of the student to submit to the Office of the Graduate School, six weeks prior to graduation, two copies of the dissertation and the abstract in the final, approved form. Further changes or corrections might be suggested by the Graduate School at this time, and these must be completed or reconciled before graduation.

Students will be required to submit their dissertation document via Blackboard to check the originality of their document via iThenticate, TurnItIn, or similar service provided. The chair will evaluate the results accordingly.

As an online program, departmental funding for EDD students is rare. If an EDD student is funded, this funding will be contingent upon an academic year-to-year basis as PhD students have preference for funding. Funding will typically to be discontinued or not renewed on an academic year-to-year basis.

Special Education, Ed.S.

Special education graduate programs are designed to help bring improvements to the educational services offered to exceptional children. Courses of study leading to the Educational Specialist (EdS) degree and Class AA professional educator certification in the education of exceptional children are listed below:

Traditional Class AA programs are available in

- collaborative education
- early childhood special education
- gifted and talented

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- have earned a master’s degree with appropriate prerequisite Class A certification
- hold valid master’s level certification in a teaching field
- submit three recommendations (applicants to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant’s academic and professional capabilities.)

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Early Childhood Special Education Concentration

This course listing applies to candidates having appropriate prior certification who begin this program June 13, 2024, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. Credits used for the previous Class A support certificate may not be used for this program.

Candidates admitted to the Class AA program without prior Class A certification in early childhood special education must take the following courses in addition to the coursework below: SPE 576 (or its equivalent), SPE 571, SPE 578, SPE 594, and SPE 579. Up to three semester hours of the prerequisite work may be used to meet the elective requirements in this program.

Transfer Credit

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam

Students complete a comprehensive examination during their last semester of coursework. Dates for comprehensive examinations are announced at the beginning of each semester. Student must be registered for at least one hour in order to take the comprehensive per Graduate School policy. The department will provide the comprehensive examination question/assignment in view of each student's course of study. Comprehensive examination responses are subject to evaluation for plagiarism and other forms of academic dishonesty as outlined in the code of student conduct.

Graduate School information on Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship Requirements

Students enrolled in College of Education courses that require a clinical placement should obtain professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Admission to Candidacy

Students apply for admission to candidacy when they enroll in their last semester of coursework. Admission to candidacy entails completion of the following conditions: (a) the removal of any deficiencies imposed by the department or college, (b) the filing of a formal Plan of Study, and (c) the certification of the major department that the student is well qualified to continue work toward the degree.

Graduate School information on Admission to Candidacy (p. 21).

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 18).

Certification

The Alabama State Department of Education grants Class AA professional educator certification in special education (collaborative, early childhood special education, or gifted). To be eligible, students must hold appropriate prerequisite Class A certification and must complete all requirements for the EDS degree in the chosen program as described in this catalog, including *Praxis* subject assessment(s) (if applicable).

To be awarded Alabama Class AA Special Education certification, students must:

- earn a passing score on a comprehensive assessment covering the content of the program,
- maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C,
- hold a valid, appropriate, prerequisite Alabama certificate, and
- complete the State Department of Education certification application forms

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Special Education, M.A.

Special education graduate programs are designed to bring improvements to the educational services accorded to exceptional children. Courses of study leading to the Master of Arts (MA) degree and Class A professional educator certification in the education of exceptional children are listed below:

Class A certification programs are available in

- collaborative education
- early childhood special education
- gifted
- severe disabilities

Additionally, an Overseas master's degree program in Special Education is available to overseas students. The Overseas Program does not lead to professional licensure or certification. There is also a concentration in Autism, which also does not lead to professional licensure or certification.

While the Graduate Catalog is published annually, program checklists for state-approved certification programs may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. Students should refer to the appropriate program checklists for their teaching fields and consult their advisors before registering each semester.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must be aware of the admission requirements established by the Alabama State Department of Education.

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Traditional Class A Certification Programs

For admission to traditional Class A programs of study in collaborative education, early childhood special education, or gifted and talented education, the appropriate prior certification must be held in a teaching field.

For admission to the Class A program of study in severe disabilities, the appropriate prior certification must be held in an appropriate area of special education.

Three recommendations are required. (Applicants to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.)

Applicants must also meet the fingerprinting requirement (p. 525) for background clearance.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

Admission Requirements for the Autism Concentration (non-certification) and the Overseas Program for Special Education, MA (non-certification)

In addition to the minimum Graduate School admission requirements, three recommendations are required.

Transfer Credit

For Traditional Class A programs, credits used for previous Class B certification(s) may not be used for the Class A program.

Graduate School information on Transfer Credit (p.).

Comprehensive Exam

Students complete a comprehensive examination during their last semester of coursework. Dates for comprehensive examinations are announced at the beginning of each semester. Students must be registered for at least one hour in order to take comprehensive examinations per graduate school policy. Comprehensive examination responses are subject to evaluation for plagiarism and other forms of academic dishonesty as outlined in the code of student conduct.

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

Clinical Placements

All Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of the field experiences shall be in the candidate's teaching field.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should have professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Time Limit for Degree Completion

Graduate School information on Time Limits (p.).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

As required for traditional Class A certification, students must earn a GPA of at least 3.25 on all courses in the program, with no grade below a C.

A student completing requirements for a master's degree during a semester or summer session who does not need a full class load to meet those requirements may, with approval of the advisor and department head, register for additional courses toward a Class AA professional educator certificate, not to exceed the maximum prescribed class load.

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p.).

Certification

The Alabama State Department of Education grants Class A professional educator certification in special education (collaborative, K-6; collaborative, 6-12; early childhood special education, P-3; gifted, P-12; or severe disabilities, P-12). The Associate Dean for Student Services in the College of Education has been designated as the teacher certification officer for The University. Students who need information about or assistance with certification should consult the associate dean for student services.

To be eligible for Class A certification, candidates must hold appropriate prerequisite certification and must successfully complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive assessment, state assessments (if applicable), and *Praxis* subject assessment(s) (if applicable). It is important to remember that the awarding of a master's or higher degree does not necessarily imply that the student is eligible for Class A certification.

To be awarded Alabama Class A certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C,
- receive a passing score on a comprehensive assessment covering the content of the curriculum (MA seeking candidates only),
- earn a passing score on the required *Praxis* subject assessment(s), if applicable
- earn a passing score on Foundations of Reading 190, if applicable.

Students must complete the proper application form(s) for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall during the student's last semester. An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. A student who does not apply for professional licensure within 60 months after completing the state-approved program will be required to meet the current program. The Class A certificate is valid for five years and may be renewed according to regulations of the Alabama State Department of Education. Individuals

are responsible for meeting renewal requirements and submitting the application for renewal.

Students who plan to teach in other states must secure the proper professional licensure application forms from those states' departments of education. Students planning to teach outside the state of Alabama are held personally responsible for knowledge of professional licensure requirements in those states.

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

Special Education, Ph.D.

The Ph.D. program in the Department of Special Education (SPED) is a noncategorical terminal degree, suiting the interests of the student and the expertise of the faculty. Our philosophy is that doctoral students and faculty often learn together; therefore, many interests in the special education field can be accommodated in SPED. The doctoral program prepares researchers and future university faculty in the following subfields of exceptionalities:

- Autism spectrum disorders
- Behavior disorders and prevention
- Early childhood special education/early intervention
- Gifted and talented/creativity/twice-exceptionality
- High incidence disability
- Learning disabilities
- Severe disabilities
- Transition

The Ph.D. degree in special education requires more extensive contact with and immersion in the university culture than does the online Doctor of Education (Ed.D.) degree (e.g., 18 coursework hours and 24 hours of dissertation research; residency requirement, extensive interaction, dialogue, and work with faculty on research projects; and expectations that students disseminate their research at conferences or in publications). The Ph.D. program emphasizes the development of theoretical thinking and knowledge development in the field of special education through the development of strong research skills. Ideal graduates are those who cannot only provide a detailed critique of existing research in their areas of expertise but also contribute to the research knowledge. Prospective applicants should pay attention to the distinctions between the Ph.D. and Ed.D. degrees. It is important to note that students cannot switch between the Ed.D. and Ph.D. programs after admission.

Admissions

Doctoral students are admitted throughout the year, to start in the Fall, Spring, or Summer. Applicants can begin the process at any time. Funding opportunities are available upon admission by application.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, an application must include the following:

- A recent (within the last five years) GRE score of 300 (verbal + quantitative) or higher.
- A master's degree in special education (or a related area) that has been awarded prior to initial enrollment in our PhD program.
- Three years of appropriate experience (defined as three years of work in agencies serving children and youth, one year of which must have been spent in direct, full-time interaction with exceptional children).
- A demonstrated commitment to a scholarly career in special education.
- A successful interview with faculty members.

Other application requirements include the following:

- Three letters of professional and academic **reference** (as described in and as part of the Graduate School Application Process).
- A convincing, written rationale as to why they wish to pursue this degree, how its focus/purposes are consistent with their career goals, and how they plan to meet the on-campus residency requirement. This **purpose statement** must address the following: (1) the student's rationale for applying for the Ph.D.; (2) a statement regarding career and professional goals; and (3) a statement of how the student's rationale and career goals are consistent with the purpose of the Ph.D. degree as articulated by the Department and Program.
- To assess an applicant's writing ability, an academic or professional **writing sample** (authored within the last year) is required. Examples include a professional article, a paper written for a class assignment, or a professional blog entry.
- A **curriculum vitae** is required.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 66 semester credit hours beyond the master's degree is required for completion of the Ph.D. program, but highly recommended additional research courses would extend the hours. These 66 hours consist of the following courses: 24 hours of special education courses; 12 hours of educational foundations courses; 12 hours of research courses; and 18 dissertation hours.

Code and Title	Hours

Acquisition of Financial Support:

All students in good standing in the Special Education PhD program may apply to be supported by a graduate research assistantship (GRA) funded through their department, a graduate teaching assistantship (GTA) funded by the Department, or a fellowship or training grant (when available). Non-conditional admitted students will have priority over those with conditional admissions. Both GRA and GTA types of assistantships provide an equivalent stipend and benefits along with paid tuition and fees. Fellowships and training grants will have varying stipend and recruitment packages as are required by the funding agency. Financial support may be available through the first four years in the program for PhD students who meet performance expectations and who do not meet any Conditions for Termination of Financial Support (see below). Students will be informed of impending financial support termination at least one semester prior to the support termination date except in

the special cases noted under Conditions for Termination of Financial Support.

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in the Special Education PhD program.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support
- The student must complete all mandatory annual training and abide by all rules and policies held by The University of Alabama, College of Education, and Department of Special Education
- Graduate teaching assistants must adequately perform all duties assigned to them in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria will be subject to termination of financial support pending Department of Special Education review. Depending upon the severity of the infraction or the extent of non-compliance, the Department Chair and Graduate Director—with input from the Graduate Committee—will recommend immediate termination of financial support, termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

- *Dereliction of duty.* Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee (for teaching assistants) or the research advisor (for research assistants); or failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee (for teaching assistants) or by the research advisor (for research assistants) and the student's departmental memorandum of appointment.
- *Resolved finding of Academic Misconduct.* Penalties, including potential loss of financial support, will be determined with guidance from the UA Graduate School.
- *Loss of good academic standing.* Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing—with the non-passing grade exception noted below. Financial support will be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the Graduate Committee. This review will determine whether the student should continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered prior to the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.
- *Delinquent Annual Review.* Students who neglect to complete the required departmental annual review

College of Engineering

Department of Aerospace Engineering and Mechanics (p. 662)

Department of Chemical and Biological Engineering (p. 667)

Department of Civil, Construction and Environmental Engineering
(p. 672)

Department of Computer Science (p. 681)

Department of Electrical and Computer Engineering (p. 685)

Department of Mechanical Engineering (p. 694)

Department of Metallurgical and Materials Engineering (p. 704)

General Engineering Studies Courses

Graduate courses are offered on a regular basis in some departments, as indicated in the course listings. However, all graduate courses are taught only upon sufficient demand.

The College of Engineering requires that a grade of "C" or better be earned in all prerequisite courses.

Additional information is in the Admission Criteria (p. 10) section and the Degree Requirements (p. 15) section of this catalog.

GES courses are interdisciplinary and may be taken to meet individual program requirements.

GES500 Engineering Statistics

Hours 3

Probability and basic statistical concepts. Discrete and continuous distributions; the central limit theorem; sampling distributions; point and interval estimation; hypothesis testing; regression and correlation analysis; analysis of variance.

GES551 Matrix And Vector Analysis

Hours 3

This course provides a graduate level overview of linear algebra and vector analysis. Topics covered include; linear simultaneous equations, eigenvalues and eigenvectors, matrix functions, computer techniques, and transformations, vector calculus, the Laplacian, and integral theorems such as the theorems of Green and Stokes.

GES554 Partial Diff Equations

Hours 3

This course examines the solution of partial differential equations by focusing on three specific equations: (1) the heat equation, (2) the wave equation, and (3) Laplace's equation. Topics covered include: Fourier transforms, Sturm-Liouville problems, classification of partial differential equations, Bessel functions, and numerical methods for solving partial differential equations.

GES555 Nonlinear Partial Differential Equations

Hours 3

An introduction to nonlinear partial differential equations. Exact solutions, approximate solutions, and numerical solutions will all be considered. The course content is supported by numerous applications.

Prerequisite(s): GES 554

Department of Aerospace Engineering and Mechanics

- Majors
 - Aerospace Engineering and Mechanics, MS (p. 663)
 - Aerospace Engineering and Mechanics, PhD (p. 665)

Department Head

- Baker, John
- Jones, Stanley E.
- Karr, Charles L.

Associate Professor Emeritus

- Whitaker, Kevin

Assessment Coordinator

- Klose, Katherine

Master’s students may, with permission of the department and prior approval by the Graduate School, receive credit for six (6) hours of 400-level credit. The Graduate School Policy on 400-level credit may be found here (p. 7).

AEM500 Intermediate Fluid Mechanics
Hours 3

Development and use of the integral and differential forms of the equations of continuity, momentum, and energy with ideal fluids, viscous fluids and compressible fluids. Advanced topics in fluid mechanics, including potential flow, viscous flow and compressible flow.

AEM508 Propulsion Systems
Hours 3

Basic propulsion dynamics, thermodynamics of fluid flow, combustion kinetics, air-breathing engines, rockets, design criteria, performance, and advanced propulsion systems.

[View All Courses](#)

Aerospace Engineering and Mechanics, MS

The Department of Aerospace Engineering and Mechanics offers a Master of Science in aerospace engineering and mechanics degree via an on-campus program and an off-campus (distance learning) program through the Office of Teaching Innovation and Digital Education. An MSAEM can be earned by coursework only or by a combination of coursework and an approved thesis. Most distance learning students elect to complete the coursework only degree option. On-campus students supported by assistantships are expected to complete an approved thesis.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation (only two letters for Accelerated Masters Program applicants)
- GRE (optional)

Aerospace Engineering and Mechanics standards are higher than the graduate school minimums, and all application materials are carefully considered. Meeting minimum graduate school requirements does not guarantee admission into the Aerospace Engineering and Mechanics MSAEM program.

Students applying to the Aerospace Engineering and Mechanics MSAEM program without a bachelor’s degree in aerospace engineering, mechanical engineering or engineering mechanics are required to complete the following coursework from an accredited university (if not already completed) prior to applying:

- Calculus (12 semester credit hours)
- Ordinary Differential Equations
- 12 semester credit hours of calculus-based engineering mechanics - Statics, Dynamics, Mechanics of Materials and Fluid Mechanics.

Students have the opportunity to enroll in the mechanics courses through the Office of Teaching Innovation and Digital Education as a non-degree seeking (NDS) applicant.

The Aerospace Engineering and Mechanics MSAEM distance program is open to US students as well as international students residing in the US with appropriate visas.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The MSAEM degree can be earned by 30 hours of coursework (non-thesis option) or by a combination of 24 hours of coursework, 6 hours of thesis research, and a committee approved thesis that includes an oral defense and written document (thesis option). A 3.0 GPA for coursework is required. Most distance learning students elect to complete the coursework only degree option. On-campus students supported by assistantships are expected to complete an approved thesis.

For both degree options, students must complete two core courses, one from each core designation.

AEM Core Courses		Hours
Mechanics		
AEM 500	Intermediate Fluid Mechanics	3
AEM 546	Intermediate Solid Mechanics	3
AEM 562	Intermediate Dynamics	3
Mathematics		
GES 551	Matrix And Vector Analysis	3
GES 554	Partial Diff Equations	3
AEM 548	Stochastic Mechanics	3

Elective, thesis and culminating experience requirements are outlined in the Thesis and Non-Thesis links. At least 18 hours must be AEM designation. Non-AEM courses must be approved by the Graduate Program Coordinator or the student’s research advisor.

Plan I: Thesis Option Curriculum		Hours
Core Coursework		6
Elective Coursework		18
AEM 599	Thesis Research	6
Total Hours		30
Plan II: Non-Thesis Option Curriculum		Hours
Core Coursework		6
Elective Coursework		24
Total Hours		30

Independent study hours AEM 593/594 counting for elective coursework is limited to 3 hours for Plan I students and 6 hours for Plan II students.

Transfer Credit

Transfer credit requests are evaluated by the Graduate School and the AEM department and follow Graduate School policy.

Accelerated Master's Program

The Accelerated Masters Program (AMP) is designed specifically for outstanding UA students to complete the requirements for both their bachelor’s degree and a master’s degree in aerospace engineering in an accelerated five year period. Both BSAE and BSME students can apply to the MSAEM program via AMP. General eligibility requirements, maximum number of dual-credit hours allowed and information about scholarships and assistantships are location on the Graduate School’s AMP page (p. 7)

In addition to the graduate school's AMP requirements, the AEM department also requires students applying to AMP to

1. Complete prior to admission at least six hours of BSAE or BSME junior-level (300 or higher) core-program courses as listed on the appropriate department's flow chart,
2. Submit a statement of purpose and two letters of recommendation.

Applications are evaluated by the Graduate School and the AEM department. Meeting minimum GPA eligibility requirements does not guarantee admission.

Students interested in AMP and the MSAEM program can contact the AEM Graduate Program Coordinator, Dr. James P. Hubner (phubner@eng.ua.edu), for more information.

Students apply for the program online. Applications are evaluated by the Graduate School and the AEM department. Meeting minimum eligibility requirements does not guarantee admission.

Comprehensive Examination/Capstone

Students pursuing the MSAEM Plan II degree option have the choice of completing one of the following options to satisfy the requirement of a culminating experience:

1. Complete a capstone project and receive faculty advisor approval for the written report detailing the culminating experience: The research project is an in-depth study of a topic that must be approved by the student's research advisor, an AEM faculty member or an approved non-AEM faculty member on the Graduate Faculty in which the student selects based on mutual research interests. The project is not as comprehensive as a thesis. The project must integrate knowledge and concepts from more than one of the program courses. MSAEM Plan II students may, but are not required to, enroll in three hours of AEM 593 or AEM 594 Special Projects and submit the written reports detailing the culminating experience as part of the AEM 593 or AEM 594 course requirements. The approved written report for the culminating experience must be submitted to their advisor providing sufficient time to evaluate and potentially require edits prior to the end of the semester, usually two to three weeks before final exam week.
2. For students currently employed and working in the engineering profession, write a report and receive faculty advisor approval on how knowledge gained from MSAEM coursework has been used and integrated into your work assignments and projects over the past year. The faculty advisor must be an AEM faculty member in which the student selects based on mutual interests. The report is not as comprehensive as a thesis. Examples must integrate specific knowledge, concepts, models, and/or analyses from more than one of the program courses.

The student must complete at least 18 hours prior to starting the culminating experience. For both options, a conference-style technical paper is a good guide.

Plan I: Thesis Option

The MSAEM Thesis option degree requires 24 hours of coursework, 6 hours of thesis research (AEM 599), and an approved thesis. Additional requirements to those outlined under Curricular Requirements include:

- 18 hours of the 30 required must have AEM designation or transferred under AEM designation
- Non AEM electives must be approved by the student's Research Advisor or the Graduate Program Coordinator

- Thesis committee requirements follow Graduate School policy. The thesis committee should be formed at least the semester prior to the thesis defense.
- Thesis submission deadlines, document formatting, and graduating semester enrollment requirements follow the Graduate School calendar and policy.

Plan II: Non-Thesis Option

The MSAEM Non-Thesis option degree requires 30 hours of coursework and the completion of a Capstone Project or Comprehensive Exam. Additional requirements to those outlined under Curricular Requirements include:

- 18 hours of the 30 required must have AEM designation or transferred under AEM designation
- Non AEM electives must be approved by the student's Research Advisor or the Graduate Program Coordinator

Time Limits for Degree Completion Requirements

Graduate School Policy

Student Progress Requirement

Students are expected to progress through their degree program in a timely manner and with consultation with their advisor.

Academic Grievances Information

Graduate School Information (p. 255)

Grades and Academic Standing

Graduate School Policy (p. 28)

Graduate School Deadlines Information

Graduate School Information

Application for Graduation Information

Graduate School Policy (p. 15)

Assistantships (teaching and research) are offered by the department and faculty to highly-qualified applicants with preference towards those pursuing a PhD. Most assistantships start in the fall and last one academic year with consideration for renewal. A full assistantship provides a competitive stipend, tuition and health benefits. Assistantships usually do not cover fees related to personal items.

Assistantship offers are contingent upon receipt of acceptable results of a pre-employment background report. To maintain assistantship funding, recipients must register for at least the minimum number of graduate hours, remain in good academic standing, competently and timely perform departmental assigned activities, successfully complete our International Teaching Assistant Program (ITAP) within the first academic year if an international student, and continually progress through the degree program. These criteria are evaluated by your assigned research

advisor and the Department Head. Failing to meet or complete any of these criteria can result in the termination of the assistantship but not necessarily dismissal from the program if in good academic standing.

No additional application is necessary to be considered for a departmental assistantship; however, **if seeking an assistantship then it is recommended to submit your application by January 31 or earlier for the ensuing fall semester.** Contacting faculty with similar research interests is encouraged.

Several national, state and university fellowship programs exist, including the University's Graduate Council Fellowship. Students are encouraged to seek these opportunities as well.

For additional information about financial assistance in the AEM graduate programs, contact the Graduate Program Coordinator.

Aerospace Engineering and Mechanics, Ph.D.

Doctor of Philosophy in Aerospace Engineering and Mechanics

The Department of Aerospace Engineering and Mechanics offers a Doctor of Philosophy degree on campus and through an alternative residency (distance learning). In a research-based degree, students are required to propose, complete and defend an approved dissertation on a research topic that contributes to the field of aerospace engineering and/or engineering science and mechanics.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- GRE (optional)

AEM department standards are higher than the graduate school minimums, and all application materials are carefully considered. Meeting minimum graduate school requirements does not guarantee admission into the PhD program.

Students applying to the PhD program without a bachelor's or master's degree in aerospace engineering, mechanical engineering, or engineering mechanics are required to complete the following coursework from an accredited university (if not already completed) prior to applying:

- Calculus (12 semester credit hours)
- Ordinary Differential Equations
- 12 semester credit hours of calculus-based engineering mechanics - Statics, Dynamics, Mechanics of Materials and Fluid Mechanics.

Students have the opportunity to enroll in the mechanics courses through the Office of Teaching Innovation and Digital Education as a non-degree seeking (NDS) applicant.

The PhD distance program is open to US students as well as international students residing in the US with appropriate visas. For students interested in the distance PhD program, it is highly recommended to contact faculty with similar research interests and arrange an on-campus visit or video conference prior to applying to the program. Gaining faculty interest and support is essential in the application review.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The PhD degree can be earned by completing 42 hours of coursework, 18 hours of dissertation research, and a committee approved dissertation that includes an oral defense and written document. Students must complete and earn a grade of B or higher in two core courses from the table below, one from each core designation: Mechanics and Mathematics. Students must also complete an additional Mathematics course from the table or approved by their Research Advisor or the Associate Department Head-Graduate Programs, completing a total of nine hours of core coursework.

Of the 42 coursework hours, at least 21 must have AEM designation. Elective coursework must be approved by the Research Advisor. A 3.0 GPA for coursework is required.

Independent study hours AEM 593/AEM 594/AEM 693/AEM 694 counting for elective coursework is limited to 6 hours for students with a block transfer or 9 hours for students that transfer 15 or less hours.

Curricular Table	Hours
Mechanics Core: AEM 500, AEM 546 or AEM 562	3
Mathematics Core: GES 551, GES 554 or AEM 548	3
Mathematics Core: Approved by Research Advisor or the ADH-Graduate Programs	3
ENGR 501	3
Elective Coursework	30
AEM 699 Dissertation Research (minimum)	18
Total Hours	60

In their careers, PhD engineers are expected to be thought leaders, mentors, trainers of other developing professionals, and communicators with a variety of audiences. Therefore, in addition to technical training in their discipline, all UA College of Engineering PhD students will have a Mentored Instructional Experience (MIE) that will enhance their abilities in these critical areas of communication, giving and receiving formal feedback, mentoring, and training, as well as deepen their own discipline-specific knowledge through educational support experiences (typically office hours, laboratory instruction, conducting recitations, preparing instructional materials, and guiding in-course design teams of undergraduate students).

All PhD students will receive pedagogical training in these instructional support areas through a pedagogy practicum course: ENGR 501 Engineering Instruction Prep. In addition, each student shall complete a set of instructional experiences during designated semesters (2 semesters at 10 hours/week, 4 semesters at 5 hours/week, or the equivalent) under the guidance of a faculty mentor. This additional instructional practice is a graduation requirement and will be tracked through the departmental office.

Transfer Credit

Transfer credit requests are evaluated by the Graduate School and the AEM department and follow Graduate School policy. The department does support the block transfer option of an appropriate MS degree in aerospace engineering, mechanical engineering, or engineering mechanics that meets Graduate School requirements and is approved by their research advisor and the Associate Department Head - Graduate Programs. An MS block transfer will count for 21 hours of coursework, of which 12 hours will be considered AEM designated. Of the 42 coursework credit hours required by the AEM PhD program, at least 21 must have an AEM or ENGR designation.

Doctoral Plan of Study Requirement

Graduate School Information on the Doctoral Plan of Study can be found here (p. 21).

Qualifying Exam

Students must pass a qualifying exam prior to Candidacy and enrolling in AEM 699 dissertation research. The qualifying exam is to help determine the student's preparedness for the advance knowledge and critical thinking required for independent research, two areas of assessment for the PhD program.

The exam is created and evaluated by a qualifying exam committee. The qualifying exam committee will consist of the student's research advisor and two faculty members selected by the advisor with consideration of input by the student, the student's expected research area, and the student's core curriculum.

Except for study week and finals week, the qualifying exam may be scheduled when the university is in session for fall, spring, or summer and the committee is available. The exam is a take-home assignment based on the student's coursework and research area. The student then presents their results to the committee, followed by a question-and-answer session.

The qualifying exam committee will assess the student's pass or fail performance in context to their preparedness for the advance knowledge and critical thinking required for independent research in their area. Students have two opportunities to pass the qualifying exam; exam attempts must be in different semesters.

Further information about the qualifying exam such as timelines is available by contacting the Associate Department Head - Graduate Programs.

Admission to Candidacy Requirements

Admission to Candidacy is determined by either:

- passing the AEM Department Qualification Exam and completing 75% of their coursework hours

OR

- passing the AEM Department Qualification Exam and passing the Dissertation Proposal

Candidacy should be attained by the third year for on-campus students and at least a year before the dissertation defense. An up-to-date Plan of Study detailing courses completed and transferred is required. Students may start enrolling in AEM 699 once they have attained candidacy.

Continuous Enrollment Policy

Graduate School Policy.

Dissertation Requirements

On-campus students should form their dissertation committee (minimum of five graduate faculty, the majority from AEM and at least one outside the department) and propose their dissertation topic after passing their qualifying exam and nearing the completion of their coursework. The proposal must be submitted eight months prior to the oral dissertation defense.

Dissertation submission deadlines, document formatting, and graduate semester enrollment requirements follow the Graduate School calendar and policy including submitting the Public Notice of a Dissertation

Defense form at least two-weeks prior to the scheduled dissertation date. Department requirements include:

- The defense to occur on campus unless a departmental waiver is approved.
- The publication of at least one research paper related to the subject of the dissertation prior to signing the Committee Acceptance Form of the Electronic Dissertation

Time Limits For Degree Completion Requirements

CHE512 Polymer Materials Engineering

Hours 3

Introduction to the manufacture, processing, and applications of organic polymeric materials. This course covers the chemistry of polymer manufacture, the molecular structures of polymers, and the structure-property relationships for thermoplastic and thermosetting polymers.

CHE514 Computer Methods in Chemical Engineering

Hours 3

A survey of common software, data processing, and statistical analysis tools applied to chemical engineering, science, and general interest topics. This course covers the fundamentals of computer programming (coding) and problem solving for chemical engineering students. Offered primarily in the fall semester.

[View All Courses](#)

Chemical Engineering, MS

Our Master's program offers a streamlined educational experience that bolsters knowledge and professional skills in chemical engineering. The program covers basic subjects important to all chemical engineers, including thermodynamics, transport phenomena, kinetics and applied mathematics, along with coursework tailored to student interest.

All students in the thesis-based track (Plan I) conduct innovative, original research in faculty-run labs. All students in the non-thesis track (Plan II) complete specialized coursework in chemical engineering and a capstone experience.

The Master's degree typically requires one to two years to complete, depending on the intensity of study and whether a thesis is produced.

We welcome students with undergraduate degrees in chemical engineering, as well as in other related STEM fields such as chemistry, biology, and materials science and engineering. Students entering with a degree other than a BS ChemE, however, may require additional coursework, thereby adding time to the degree.

Admissions

Admission is contingent upon recommendation by the graduate faculty of the Department of Chemical and Biological Engineering. Special opportunities are available for students with undergraduate degrees in fields other than chemical engineering.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Master of Science-Thesis Option (Plan I): 30 Credit hours

Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and write a thesis (a minimum of six semester hours of thesis research required).

- A minimum of 24 credit hours of coursework is required.
- A minimum of six hours of thesis research is required.

- A student's curriculum and thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. In addition, the student must satisfy all University requirements defined in the current edition of The University of Alabama Graduate Catalog.

All graduate students in chemical engineering are required to pass the following core graduate courses:

Code and Title	Hours
Required Core Course	
CHE 551 Adv Thermodynamics I	3
CHE 552 Transport Phenomena	3
CHE 553 Computation In Chem Engr	3
CHE 554 Chemical Reaction Engr	3
Elective Courses Options	12
CHE 512 Polymer Materials Engineering	
CHE 514 Computer Methods in ChemE	
CHE 516 Stem Cell Bioengineering	
CHE 518 Tissue Engineering	
CHE 540 Health Safety Chem Process Ind	
CHE 545 Intro to Biochemical Engr	
CHE 591 Special Problems	
CHE 592 Special Problems	
Additional elective course options available upon approval of Advisor	
Thesis Research	
CHE 599 Thesis Research	6
Total Hours	30

Master of Science-Non-Thesis Option (Plan II): 30 Credit hours

Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of credit and complete a culminating or "Capstone experience" as described below.

- A minimum of 30 credit hours of coursework is required.
- A student's curriculum must be approved by the student's graduate advisory committee. The graduate advisory committee must also approve the submission of a manuscript, a conference proceeding or a graduate seminar presentation. This activity shall constitute The University of Alabama Graduate School culminating experience requirement for a MS Plan II degree in chemical engineering.
- The "Capstone Experience" consists of two required components:
 - a. First, a research presentation must be delivered to the faculty. The research presentation can be based on a literature review of a chemical engineering topic or a presentation of hands-on research results. The student must register for 1 hour of CHE 595 Seminar during the semester of the presentation (this 1 hour counts towards the total of 30 credit hours of coursework).
 - b. The second component is a mentored grading experience, CHE 591 Special Problems (1 to 4 hr.), and this will count towards the 30 credit hours of coursework. The student will gain first-hand experience with several aspects of the chemical engineering educational process (homework design, grading, test preparation, etc.).

Code and Title	Hours
Required Core Courses	
CHE 551 Adv Thermodynamics I	3
CHE 552 Transport Phenomena	3
CHE 553 Computation In Chem Engr	3
CHE 554 Chemical Reaction Engr	3
Elective Courses Options	14
CHE 514 Computer Methods in ChemE	3
CHE 516 Stem Cell Bioengineering	3
CHE 512 Polymer Materials Engineering	
CHE 518 Tissue Engineering	
CHE 540 Health Safety Chem Process Ind	
CHE 545 Intro to Biochemical Engr	
CHE 592 Special Problems	
Additional elective course options available upon approval of Advisor	
Capstone Experience Courses	
CHE 595 Seminar	1
CHE 591 Special Problems	3
Total Hours	36

Transfer Credit

Accelerated Master's Program

Information on the Accelerated Master's Program (p. 7).

Comprehensive Exam/Capstone

- The "Capstone Experience" consists of two required components:
 - a. First, a research presentation must be delivered to the faculty. The research presentation can be based on a literature review of a chemical engineering topic or a presentation of hands-on research results. The student must register for 1 hour of CHE 595 Seminar during the semester of the presentation (this 1 hour counts towards the total of 30 credit hours of coursework).
 - b. The second component is a mentored grading experience, CHE 591 Special Problems (1 to 4 hr.), and this will count towards the 30 credit hours of coursework. The student will gain first-hand experience with several aspects of the chemical engineering educational process (homework design, grading, test preparation, etc.).

Plan I – Thesis Process Requirements

Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and write a thesis (a minimum of six semester hours of thesis research required).

- A minimum of 24 credit hours of coursework is required.
- A minimum of six hours of thesis research is required.
- A student's curriculum and thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. In addition, the student must satisfy all University requirements defined in the current edition of The University of Alabama Graduate Catalog.

Plan II – Non-Thesis Process Requirements

Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of credit and complete a culminating or "Capstone experience" as described below.

- A minimum of 30 credit hours of coursework is required.
- A student's curriculum must be approved by the student's graduate advisory committee. The graduate advisory committee must also approve the submission of a manuscript, a conference proceeding or a graduate seminar presentation. This activity shall constitute The University of Alabama Graduate School culminating experience requirement for a MS Plan II degree in chemical engineering.

Chemical Engineering, Ph.D.

The doctoral program in chemical engineering provides students with advanced education and training in a variety of technical topics, including biotechnology, environmental technologies, high-performance computing and simulations, electrochemical systems, renewable energy and storage, and clean water. Students work closely with faculty to perform hands-on research, develop original research articles and intellectual property, and make scientific presentations at national and international conferences. Students from this program will be prepared to enter a variety of careers, such as higher education, entrepreneurship, consulting, and industrial and government research.

Admissions

Admission is contingent upon recommendation by the graduate faculty of the Department of Chemical and Biological Engineering. Admission opportunities are available for students with undergraduate degrees in fields other than chemical engineering (e.g., chemistry, biomedical engineering, and other related fields).

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The minimum coursework for the Ph.D. degree is 60 hours, which includes 42 hours of coursework and 18 hours of dissertation research.

An overview of the curriculum is shown in the curricular table below, followed by a summary of the mandatory course requirements (core courses and seminar) and options for electives.

Curriculum Overview		Hours
Core Courses		
CHE 551	Adv Thermodynamics I	3
CHE 552	Transport Phenomena	3
CHE 554	Chemical Reaction Engr	3
Mathematics Core Elective		3
CHE 570	Chemical and Biological Engineering Research Techniques	1
CHE 595	Seminar	1
CHE 695	Seminar	1
CHE 593	Chem & Biol Engr Practicum	3
CHE 693	Chem & Biol Engr Practicum	3
Electives		21
Dissertation Research		18
Total Hours		60

Core Course Requirements

The department requires four "core" graduate courses, one research skill course and two seminar courses. The core courses must be taken at UA, unless the equivalent course credit is transferred from another domestic institution (with a grade of A- or higher). The four core courses are comprised of the three required CHE courses, plus one mathematical elective course, as well as research skill and seminar requirements.

Electives

21 Hours of Electives may be any of the following:

Code and Title	Hours
CHE 512 Polymer Materials Engineering	3
CHE 514 Computer Methods in ChemE	3
CHE 516 Stem Cell Bioengineering	3
CHE 518 Tissue Engineering	3
CHE 540 Health Safety Chem Process Ind	3
CHE 545 Intro to Biochemical Engr	3
CHE 591 Special Problems	3
CHE 592 Special Problems (Newly Developed Elective Courses)	3
CHE 598 Non-Thesis Research	6
CHE 691 Special Problems	3
CHE 698 Non-Dissertation Research	6

Mathematics Core Elective

Three hours may be any of the following:

Mathematical Core Course Elective Options	Hours
CHE 553 Computation In Chem Engr	3
CHE 514 Computer Methods in ChemE	3
GES 500 Engineering Statistics	3
GES 554 Partial Diff Equations	3
ST 560 Statistical Methods	3

MATH 509	Data Analysis: Sec Teachers	3
MATH 510	Numerical Linear Algebra	3
MATH 541	Boundary Value Problems	3
MATH 551	Math Stats W/Applictn I	3

Graduate Seminar Requirements

The department requires that students take and pass the Graduate Seminars: CHE 595 seminar during the first part of the doctoral program of study (normally during the second semester of enrollment) and the CHE 695 Seminar in the latter part of the program (normally during the final semester of enrollment). These two hours of seminars count towards the coursework hours needed for graduation.

Seminar Course Requirement		Hours
CHE 595	Seminar	1
CHE 695	Seminar	1

Mentored Instructional Experience (MIE)

In their careers, PhD engineers are expected to be thought leaders, mentors, trainers of other developing professionals, and communicators with a variety of audiences. Therefore, in addition to technical training in their discipline, all UA College of Engineering PhD students will have a Mentored Instructional Experience (MIE) that will enhance their abilities in these critical areas of communication, giving and receiving formal feedback, mentoring, and training, as well as deepen their discipline-specific knowledge through educational support experiences (typically office hours, laboratory instruction, conducting recitations, preparing instructional materials, and guiding in-course design teams of undergraduate students).

All PhD students will receive pedagogical training in these instructional support areas through pedagogy practicum courses (CHE593, and CHE693). In addition, each student shall complete a set of instructional experiences during designated semesters (2 semesters at 10 hours/week, 4 semesters at 5 hours/week, or the equivalent) under the guidance of a faculty mentor.

This additional instructional practice is a graduation requirement.

CHE 593 Chem & Biol Engr Practicum (3 hr.)

CHE 693 Chem & Biol Engr Practicum (3 hr.)

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study (p. 21).

Comprehensive Exams

Doctoral Qualifier Exam

Once a student has completed all of the four core required graduate courses, the student is required to take the doctoral qualifier ("qualifier") exam as a first evaluation stage in the doctoral program. This qualifier exam is offered twice per year, immediately following the end of the spring semester (during the month of May) and immediately following the end of the fall semester (Dec/Jan). If significant extenuating circumstances prevent the student from completing the qualifier during the required period, the student must submit a petition to the graduate committee to postpone the exam. The student needs to propose a time to complete the exam but no later than the following cycle.

The nature of the qualifier exam is an assignment to independently write (and defend in front of a faculty committee) a research proposal in a field related to (but not directly overlapping) the student's dissertation topic. The faculty committee will be composed of the major advisor plus two other departmental faculty members. The proposal topic and the committee composition will be the responsibility of the student/advisor to determine. The student will provide a written copy of the proposal to the committee, and the student will defend the proposal in front of the committee during an oral presentation. The student will typically be given 2-3 weeks to complete the assignment. There are three different possible outcomes from the qualifier exam:

a) Pass – Students take a "bypass" Plan II MS degree (after completing 30 hours) and continue in the doctoral program.

b) Conditional - Students perform extra work based on the deficiencies identified by the committee. After reevaluation (within 2-3 months) by the committee, the student will pass or fail. No other extensions or reevaluations will be provided.

c) Fail - The student may not continue as a doctoral student. The student is expected to work with the advisor to make a plan to finish any ongoing projects. Financial support beyond this point should not be expected by the student.

Ph.D. candidacy exam

The ChBE candidacy examination is a single examination consisting of two parts (written and oral), typically administered (1) one year after the qualifier exam and (2) after completing at least 30 hours of coursework (including transfer credits). The written document should be distributed to the committee at least one week prior to the oral exam.

Written Document Guidelines

The format of the written document emphasizes the research progress to date, understanding of the entire research project, and a detailed plan for future research. It should be a compact, carefully worded document (no more than 2 pages, single-spaced) including the following key information:

- *Significance*: significance of the work to provide suitable motivation for the dissertation project.
- *Novelty*: the novelty of the work should be clearly identified by comparing to what others have done in the field.
- *Progress*: Adequate progress toward identifying an important and impactful research problem, as well as a summary of the research progress to date.
- *Skills*: skill sets acquired, as well as those to be developed.
- *Plan*: A detailed research plan, along with a specific research strategy and methodology (including specific aims). For each aim, identify the research goals, experimental design, anticipated outcomes/milestones, timetable for completion, etc.

Oral Exam Guidelines

Students should prepare a 30 min oral presentation (uninterrupted), but they should expect the entire examination to last up to 90 minutes to allow time for questions during and after the presentation (schedule exam for 2 hours). Students are expected to answer the questions from the committee without the help of the advisor.

The student will be evaluated on the scientific and technical comprehension, preliminary results to warrant continuation towards Ph.D. candidacy, the quality of the research plan, overall scholarly understanding of the research area, the ability to communicate clearly and effectively, and accomplishments to date.

The candidacy exam will be scored as **pass**, **conditional pass** (with conditions such as, "repeat within one semester," "re-write document," or "take other additional actions suggested by the committee"), and **fail**. The score will be a consensus of the committee. Students who fail the examination can still graduate with a Master's degree if all the requirements are met. However, if a student fails, there should be *no further financial support expected* beyond the end of the current semester, since the student would no longer be in the Ph.D. program.

Preliminary Defense Exam

The preliminary defense ("prelim") exam normally takes place when ~80% of the dissertation research is completed. *The exam is scheduled based on the research progress, not a year after the candidacy exam.* If there is over a year between the candidacy exam and the preliminary exam, an annual review is required. However, the preliminary exam should be minimum 6 months before the defense time. The exact date should be coordinated between a student and his/her Ph.D. advisor. The prelim exam is a formal presentation to the dissertation committee that provides a summary of progress to date (research accomplishments, scholarly publications, conference presentations, etc.). The exam consists of a written document (normally 15 pages in length, plus references), as well as a presentation (normally 30-45 minutes in duration, followed by a period of questions from the committee). Representative examples of the prelim exam (format, expectations, etc.) can be obtained from the Graduate Program Director upon request. A copy of the written document must be provided to the committee a minimum of two weeks before the scheduled prelim exam. There are three different possible outcomes from the prelim exam:

- a) **Pass** – Students continue in the doctoral program and continue their research and dissertation progress.
- b) **Conditional** - Students perform extra work based on the deficiencies identified by the committee. After reevaluation (within 2-3 months) by the committee, the student will pass or fail. No other extensions or reevaluations will be provided.
- c) **Fail** - The student may not continue as a doctoral student. The student is expected to work with the advisor to make a plan to finish any ongoing projects. Financial support beyond this point should not be expected by the student.

Final defense

The final defense is scheduled when the student's assigned dissertation projects are completed. The student is required to deliver an oral presentation (~45 min) publicly and a dissertation following Graduate School guideline. A copy of the complete dissertation must be provided to the committee a minimum of two weeks before the scheduled defense time. The student is required to publicly announce the defense date and location with an abstract.

Expectation :

- Fully understand the dissertation topic (overall picture and research details)
- Completed assigned research project (two first author research paper published or accepted)
- A well thought out future plan.

In order for the student to graduate, the committee must approve both the oral defense and the dissertation.

There are two different possible outcomes from the final defense:

- a) **Pass** – The student may graduate with a Ph.D. degree.

- b) **Fail** - The student may not obtain the Ph.D. degree.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment Policy (p. 21).

Dissertation Requirements

Dissertation Committee Formation

Students should identify their committee and immediately after completing their qualifier exam. Since this exam is normally taken after the second semester in the program, the dissertation committee formation should be completed no later than the end of the third semester.

Dissertation Format

Dissertation format and submission procedures should follow Graduate School policies.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 21).

Student Progress Requirement

Once the doctoral qualifier (comprehensive) exam is passed, doctoral students are required to form a dissertation committee and schedule required Ph.D. assessment exams with their dissertation committee accordingly. It is the *student's responsibility* to schedule and coordinate the exam date as suggested by the program requirements. If a formal exam (e.g., candidacy exam or preliminary exam) is not scheduled during that year, an annual review should be performed. It should be a formal presentation lasting approximately 20-30 minutes (a written document is not required). No more than 12 months should transpire between meetings that a student has with his/her dissertation committee.

Satisfactory progress, as judged by the dissertation committee is required for continued participation in the doctoral program. In certain cases, the committee will provide a probationary period with specific deliverables/outcomes identified, in order for the student to continue in the doctoral program.

Application for Graduation Information

Graduate School information on the Application for Graduation.

Acquisition of Financial Support:

All students in good standing in the chemical engineering Ph.D. program within the Department of Chemical and Biological Engineering (ChBE) are normally supported by a graduate research assistantship (GRA) funded through their advisor, a graduate teaching assistantship (GTA) funded by the department, a fellowship, or a combination of various forms. Both types of assistantships provide an equivalent stipend and benefits along with paid tuition and fees. Financial support is typically guaranteed through the Ph.D. studies for Ph.D. students who meet performance expectations and who do not meet any Conditions for Termination of Financial Support (see below). Students will be informed of impending financial support termination at least two months prior to the support termination date except in the special cases noted under Conditions for Termination of Financial Support. As the source of student support may vary from semester-to-semester, the obligations of the student may also vary. These obligations will normally be communicated to the student at the beginning of the semester, but there may be some variance over the course of the semester.

Fellowship Nominations:

Eligible students who excel in the ChBE graduate program or are anticipated to excel in the program may be nominated by the department for various fellowships. Nominees are selected by votes of the ChBE Graduate Program Committee, based upon prospective nominee research productivity, academic performance, and contributions to the department.

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in the chemical engineering Ph.D. program. In general, students in the chemical engineering M.S. program **do not** receive departmental financial support.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support.
- The student must complete all mandatory annual training and abide by all rules and policies held by The University of Alabama, The UA College of Engineering, UA Environmental Health and Safety, and the ChBE department.
- Graduate teaching assistants must adequately perform all duties assigned to them in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.
- Once a research group is assigned, students must conduct research under the direction of a department-approved research advisor. Continuous research progress is expected as directed by the research advisor and the student's dissertation committee.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria will be subject to termination of financial support, pending ChBE department administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the ChBE Department Head and Graduate Program Chair (with possible input from other stakeholders, such as the ChBE Graduate Program Committee, College of Engineering, or the UA Graduate School) will recommend immediate termination of financial support, termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

- *Dereliction of duty.* Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior

notification to the instructor of record or designee (for teaching assistants) or the research advisor (for research assistants); or failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee (for teaching assistants) or by the research advisor (for research assistants) and the student's departmental memorandum of appointment.

- *Resolved finding of academic misconduct.* Penalties, including potential loss of financial support, will be determined by the ChBE Department Head with guidance from the UA Graduate School and/or the UA College of Engineering.
- *Failure to have a department-approved research advisor for more than one semester.* Ph.D. (or thesis-based M.S.) students without an approved research advisor may not enroll in research courses and, therefore, cannot proceed toward degree completion. Students without an advisor may be relegated to the Plan II (non-thesis) M.S. program. Students in the chemical engineering M.S. program are normally not provided with departmental financial support.
- *Loss of good academic standing.* Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing—with the non-passing grade exception noted below. Financial support will be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the ChBE Graduate Program Committee. This review will determine whether the student should be allowed to continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered prior to the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.
- *Insufficient continuous research progress.* The dissertation committee determines by majority vote if a student is making adequate research progress commensurate with their time in the program during required annual reviews. If the committee determines the student is not making adequate research progress, the student will be granted one probationary semester (i.e., academic semester or full summer term) to remedy productivity deficiencies, as assessed by the dissertation committee. Failure to meet minimum research expectations by the end of the probationary semester will result in immediate termination of financial support.

Master's students may, with permission of the department and approval by the Graduate School, receive credit for six hours of 400-level credit. No 400-level courses can be approved for application to a PhD degree, other than the maximum of 6 hours already completed as part of a master's degree. A master's student may, with approval of a petition, meet prerequisites with a combination of related coursework and experience.

CE501 Masters Capstone Project-Plan II

Hours 3

Development of a research paper, professional practice or policy paper, or other equivalent report. Topic to be approved in advance by the student's graduate advisor.

Prerequisite(s): MS Plan II students only

CE514 Information Systems Design

Hours 3

An overview of management information systems (MIS). The course will focus on the practical aspects, applications, and methodology of MIS, particularly from the construction engineer's perspective. Information design methodology and building information modeling (BIM) will be covered in detail.

[View All Courses](#)

Civil Engineering, MS

The department offers programs leading to the Master of Science in civil engineering, Master of Science in engineering (environmental engineering) and Doctor of Philosophy degrees in civil engineering. Research programs in the department include environmental quality and water resources; management and safety of transportation systems; structural engineering including assessment, renewal, and protection of infrastructure; and construction engineering and management. Laboratory facilities are provided for graduate research and instruction in these and other areas.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, an applicant should have enrolled in a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET Inc. Applications from a non-EAC/ABET-accredited program will also be considered. The requirements for regular admission include

- A completed bachelor's degree in civil, construction, environmental engineering, or related fields is required prior to enrollment in the graduate program.
- A current resume.
- A concise Statement of Purpose. This short document should describe the reasons for pursuing an advanced degree as well as possible research interests.
- Three letters from recommenders. These recommenders may be previous faculty or supervisors.
- A TOEFL/IELTS/DET/PTE score for non-native English speakers who are required to submit an English Language test score (as per graduate school requirements)
- GRE score is not required for admission.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Master of Science in Civil Engineering (MCV) program is offered with both a thesis option (Plan I) as well as a non-thesis option (Plan II). The designation of the selected program is not required or expected at the time of application. All MCV students on teaching or research assistantships in the department are generally expected to pursue the thesis degree option. However, the Plan-II option is also allowed for students on teaching or research assistantships. All students must complete a total of 30 credit hours to meet the MCV requirements.

Master of Science—Thesis Option (Plan I): 30 Credit Hours

Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and write a thesis (a minimum of six semester hours of thesis research, CE 599, is required).

- A minimum of 24 credit hours of coursework is required. The student is required to have a minimum of 15 credit hours of CE-prefixed courses.
- A minimum of 6 credit hours of thesis research (CE 599) is required.
- The graduate advisory committee may require additional prerequisite courses for those students without an ABET or EAC-accredited degree.
- A student's thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. A student is given a maximum of two attempts to defend their thesis successfully. In addition, the student must satisfy all university requirements defined in the current edition of the University of Alabama Graduate Catalog.

All graduate students in civil engineering are required to take "core courses" based on the student's area of study interest. All M.S. students are required to take a total of nine credits of core courses, including six credits of area-specific core classes and three credits of data science classes.

Code and Title	Hours
Core Coursework (6 credits of area specific coursework + 3 credits of Data Science coursework)	

The students must take 6 credits of area specific classes from the courses listed for specific program areas and must take 3 credits of Data Science from the Data Science Course list provided.

Area Specific Core Coursework (6 credits required)	6

Architectural Engineering

CE 566	Sustainable & Lean Constr.

CE 551	Roadway/Intersection Design
CE 552	Traffic Safety and Security
CE 553	Intelligent Transportation Sys
CE 554	Urban Transportation Planning
CE 555	Traffic Flow Theory
CE 558	Traffic Engineering
Thesis Research Requirements	
CE 599	Thesis Research

Total Hours **30**

- Only 400-level courses without 500-level counterparts are allowed and must be approved prior to taking the class. A maximum of 6 hours of approved 400-level courses can be used for course work requirements. Students should complete Graduate School's "Approval of a 400-Level Course for Master's Credit" form.
- Students are responsible for all forms and must route all forms through the department prior to submission to UA's Graduate School.

Master of Science-Non-Thesis Option (Plan II): 30 Credit hours

Candidates for the master's degree under Plan II must earn a minimum of 30 credit hours of credit, including 27 credits of approved coursework, and complete a 3-credit class (CE 501) for the culminating experience.

- A minimum of 27 credit hours of approved coursework, including a minimum of 18 hours of CE-prefix classes.
- Students are required to take a total of nine credits of core courses, including six credits of area-specific core classes and three credits of data science classes.
- must complete a 3-credit-hour MS Capstone Project Plan-II course (CE 501).
- Culminating Experience or Capstone (CE 501): This must be taken during the graduating semester. This requires the student to develop a research paper, a policy and practice paper, or an equivalent culminating experience which is graded by the student's graduate advisor. This is taken with permission under the direction of the student's graduate advisor. The graduate advisor must be a full member of the department's graduate faculty.
- Only 400-level courses without 500-level counterparts are allowed and must be approved prior to taking the class. A maximum of 6 hours of approved 400-level courses can be used for coursework requirements. Students should complete the Graduate School's "Approval of a 400-Level Course for Master's Credit" form.

Civil Engineering, Ph.D.

During the pursuit of a Doctor of Philosophy (PhD) degree in civil engineering, students engage in a multifaceted academic journey. They enroll in graduate-level courses, actively participate in research under the guidance of a faculty advisor, develop instructional skills and competencies, and witness how these endeavors contribute to significant engineering innovations and their societal impacts within the civil engineering field. The Civil, Construction, and Environmental Engineering (CCEE) Department, equipped with cutting-edge computational and experimental resources, conducts dynamic research programs across various disciplinary groups, including Architectural Engineering, Construction Engineering and Management, Structural Engineering and Materials, Environmental (water quality), Water Resources (water quantity), and Transportation Systems Engineering. Faculty members not only instruct graduate-level courses but also engage in research activities within these specialized areas. The comprehensive range of graduate courses, spanning these domains and supplemented by core graduate coursework, lays the foundation for attaining a PhD in civil engineering.

Furthermore, students pursuing this degree must demonstrate their expertise in their chosen field of study through qualifying exams, the presentation of a research proposal, and the successful defense of a research-oriented dissertation.

Additionally, qualified undergraduate students enrolled in the department's programs at the University of Alabama have the opportunity to pursue early admission into the PhD program via the Accelerated Masters Program (AMP). This unique program permits students to concurrently count up to 9 hours of graduate credit toward their undergraduate degree, facilitating a seamless transition into advanced studies at the PhD level.

Admissions

To be eligible for regular admission, beyond meeting the basic admission criteria set by the Graduate School, an applicant should have enrolled in or earned a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET Inc. However, applications from individuals who have enrolled in or graduated from programs not accredited by EAC/ABET will also be considered.

Regular Admission Requirements

For regular admission to the graduate program in the Civil, Construction, and Environmental Department, by the time of enrollment, prospective graduate students should have:

- Bachelor's degree or Master's degree in civil, construction, environmental engineering, or a closely related field from an ABET-accredited program. Applications from graduates of a non-EAC/ABET-accredited programs will be considered.
- Grade point average of at least 3.0 on a 4.0 scale
- A short Statement of Purpose describing possible research or study interests
- Resume/CV
- Two to three letters of recommendation.

- A TOEFL/IELTS/DUOLINGO/PTE score for non-native English speakers who are required to submit an English Language test score (as per graduate school requirements)
- GRE is NOT required for admission.

Admission with Permission to Continue

Admission with Permission to Continue may be granted to applicants who do not meet these requirements, for example, those who have degrees in related fields or a GPA below 3.0.

Please see the Graduate School website for more details.

Admission Requirements for Applicants Without a Civil, Construction, Environmental, or Construction-Related Degree

Applicants without a civil, construction, environmental engineering, or related field bachelor's or master's degree may be admitted. However, such students may be asked to complete a few basic civil engineering courses, which will be decided by the CCEE Graduate Program Committee with input from the faculty advisor and faculty members in the student's specific area of interest. Successful completion requires a "B" or better in each course.

Application Deadlines

There are no formal deadlines for graduate applications. Once an application is complete, the internal review process typically takes a few weeks. However, **international applicants** should consider the time required to obtain any necessary visa documents.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A total of 54 hours is required for the degree, including a minimum of 36 hours of coursework with a letter grade beyond the baccalaureate and 18 hours of dissertation research (CE 699). All PhD students must complete Mentored Instructional Experience (MIE) requirements (see below). Students must be Ph.D. candidate (after successfully completing the preliminary exam; see below) before they can register for CE 699. Any UA coursework with Pass/Fail as an outcome cannot be used towards the 36-hour coursework requirement. Up to 18 hours of transfer credit may be permitted, subject to approval by both the department and the Graduate School. This approval is sought through the 'Request for Transfer of Graduate Credit' form. The Request for Transfer of Graduate Credit form must be initiated by the student.

Students need to contact the department office for the submission of the plan of study (POS) and candidacy forms.

Core Course Requirements

All doctoral graduate students are required to meet Core Course requirements and complete Mentored Instructional Experience (MIE). The department requires three "core" graduate courses. The three core courses are comprised of two required area-specific courses plus one Data Science elective course.

Code and Title

Mentored Instructional Experience (MIE)

In their careers, PhD engineers are expected to be thought leaders, mentors, trainers of other developing professionals, and communicators with a variety of audiences. Therefore, in addition to technical training in their discipline, all UA College of Engineering PhD students will have a Mentored Instructional Experience (MIE) that will enhance their abilities in these critical areas of communication, giving and receiving formal feedback, mentoring, and training, as well as deepen their discipline-specific knowledge through educational support experiences (typically office hours, laboratory instruction, conducting recitations, preparing instructional materials, and guiding in-course design teams of undergraduate students).

All PhD students in the CCEE program will receive pedagogical training in these instructional support areas through a pedagogy practicum course (ENGR 501). In addition, each student shall complete a set of instructional experiences during designated semesters (2 semesters at 10 hours/week, 4 semesters at 5 hours/week, or the equivalent) under the guidance of a faculty mentor.

This additional instructional practice is a graduation requirement.

Transfer Credit

Graduate School information on Transfer Credit.

Doctoral Plan of Study Requirement

The student's faculty advisor and supervisory committee will work with the student to define an appropriate plan of study that meets all degree requirements, including any prerequisite or preparatory work and a core set of courses as required and specified by each specialty area. After approval by the department, the PhD Plan of Study is submitted to the

Graduate School for final approval. All doctoral students must have a completed plan of study approved by the graduate school.

Graduate School Information on the Doctoral Plan of Study can be found here (p. 21).

Comprehensive Examinations

Doctoral Qualifying Exam

Once a student has completed sufficient coursework (at least all three required core courses), the student is expected to take the doctoral qualifying ("qualifier") exam as a first evaluation stage in the doctoral program. Students are required to pass a qualifying examination that may include both written and oral components. The nature of the qualifying exam will be area-specific, and students should contact their advisor for details. The qualifying exam in each area is administered by a faculty committee composed of at least three faculty members. There are two different possible outcomes from the qualifier exam:

a) Pass: Students can continue their progress toward a PhD. Students may be asked to take extra coursework based on the deficiencies identified by the committee.

b) Fail: The student may be given one more chance to successfully complete the qualifying exam at a later date. Financial support beyond this point should not be expected by the student. If the student fails to pass the exam on the second attempt, they may not continue as a doctoral student. The student is expected to work with the advisor to make a plan to finish any ongoing projects. The student will still have the option to complete an M.S. degree if desired.

Ph.D. Candidacy Exam (Preliminary Exam)

The student should plan to give their Ph.D. candidacy exam (1) roughly a year after passing the Ph.D. qualifier exam and (2) after completing at least 30 hours of coursework (including transfer credits). The student should present a research proposal to his or her dissertation committee to provide details of their research topic, an update on research progress, along with a summary of completed course work, presentations, publications, etc. The students are encouraged to provide a written document along with the presentation to the dissertation committee. A detailed research plan for future work must also be included.

- A pass/fail grade will be given. A student who fails the candidacy exam will be provided with written feedback on areas for improvement, and the student will have only one additional attempt to pass, which must be attempted during the following semester. A student that ultimately does not pass the exam will not be able to continue in the Ph.D. program, but the student will still have the option to complete an M.S. degree if desired.

Graduate School Information on Candidacy and Qualifying Examinations (p. 21). (p. 21)

Admission to Candidacy Requirements

After passing the examinations (Qualifying Exam and Ph.D. Candidacy Exam), the student should complete and submit an Admission to Candidacy for the Doctoral Degree to the department for approval. A department-approved candidacy form will be forwarded to the Graduate School for final approval.

Application for Graduation Information

Graduate School information on the Application for Graduation.

Financial Support

Normally, Ph.D. students are considered for fellowships or other forms of financial support within the Department of Civil, Construction, and Environmental Engineering. Financial support for graduate students may include teaching assistantships, research assistantships, scholarships, or combinations of these sources. Once a student is admitted into the Ph.D. program, the stipend level is specified, but the source of the financial support may vary during the course of study. As the source of student support may vary from semester to semester, the obligations of the student may also vary. These obligations will normally be communicated to the student at the beginning of the semester, but there may be some variance over the course of the semester.

Continuation of Financial Support

If the faculty advisor judges that the student's research or academic performance is insufficient during a given semester, the faculty member will provide a written warning that funding may be terminated at the end of the semester. If the student is unable to improve performance by the end of the semester, the faculty member (after approval from the department head confirming that adequate warning was provided to the student) may terminate the student's funding. If a faculty advisor terminates funding for a graduate student, there is no obligation on the department to provide any additional funding to the student. Alternately, if a student is not able to pass one of his or her mandatory exams (Ph.D. Qualifier Exam, Annual Review, Candidacy Exam, or Preliminary Exam), the faculty advisor and/or department are under no obligation to continue funding the student in any future semester. If the GPA of a student in a single semester falls below 3.0, the advisor and/or department are under no obligation to continue funding the student in any future semester.

In unusual circumstances, the financial support of a student may be terminated before the end of the semester, but this will only occur if the faculty advisor, department head, and dean of engineering support this decision.

Environmental Engineering, MS

The department offers programs leading to the Master of Science in civil engineering, Master of Science in engineering (environmental engineering) and Doctor of Philosophy degrees in civil engineering. Research programs in the department include environmental quality and water resources; management and safety of transportation systems; structural engineering including assessment, renewal, and protection of infrastructure; and construction engineering and management. Laboratory facilities are provided for graduate research and instruction in these and other areas.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, an applicant should have enrolled in a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET Inc. Applications from non-EAC/ABET-accredited programs will also be considered. The requirements for regular admission include

- A completed Bachelor's degree in civil, construction, environmental engineering, or related fields is required prior to enrollment in the graduate program.
- A current resume.
- A concise statement of purpose. This short document should describe the reasons for pursuing an advanced degree as well as possible research interests.
- Three letters from recommenders. These recommenders may be previous faculty or supervisors.
- A TOEFL/IELTS/DET/PTE score for non-native English speakers who are required to submit an English Language test score (as per graduate school requirements)
- GRE is not required for admission.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Master of Science in Environmental Engineering program is offered with both a thesis option (Plan I) and a non-thesis option (Plan II). The designation of the selected program is not required or expected at the time of application. All MS students on teaching or research assistantships in the department are generally expected to pursue the thesis degree option. However, the Plan II option is also allowed for students on teaching or research assistantships. All students must complete a total of 30 credit hours to meet the requirements.

All graduate students in environmental engineering are required to take "core courses" based on the student's area of study interest. **All M.S. students are required to take a total of nine credits of core courses, including six credits of area-specific core classes and three credits of data science classes (see below for details).**

Master of Science—Thesis Option (Plan I): 30 Credit Hours

Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and write a thesis (a minimum of six semester hours of thesis research, CE 599, is required).

- A minimum of 24 credit hours of coursework is required. The student is required to have a minimum of 15 credit hours of CE-prefixed courses.
- A minimum of 6 credit hours of thesis research (CE 599) is required.
- The graduate advisory committee may require additional prerequisite courses for those students without an ABET or EAC-accredited degree.
- A student's thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. A student is given a maximum of two attempts to defend their thesis successfully. In addition, the student must satisfy all university requirements defined in the current edition of the University of Alabama Graduate Catalog.

Code and Title	Hours
Core Coursework (6 credits of area specific coursework + 3 credits of Data Science coursework)	
Environmental Area courses	6

CE 526 Groundwater Mechanics	
CE 529 EWR Proposal Writing	
CE 570 Open Channel Flow	
CE 576 Process Hydrology	
CE 586 GIS for Civil Engineers	
CE 591 Special Problems	
And other Approved Courses	
Thesis Course ³	6
CE 599 Thesis Research	
Total Hours	30

- Only 400-level courses without 500-level counterparts are allowed and must be approved prior to taking the class. A maximum of 6 hours of approved 400-level courses can be used for course work requirements. Students should complete the Graduate School's "Approval of a 400-Level Course for Master's Credit" form.
- Students are responsible for all forms and must route all forms through the department prior to submission to UA's Graduate School.

Master of Science-Non-Thesis Option (Plan II): 30 Credit hours

Candidates for the master's degree under Plan II must earn a minimum of 30 credit hours of credit, including 27 credits of approved coursework, and complete a 3-credit class (CE 501) for the culminating experience.

- A minimum of 27 credit hours of approved coursework, including a minimum of 18 hours of CE-prefix classes.
- Students are required to take a total of nine credits of core courses, including six credits of area-specific core classes and three credits of data science classes.
- must complete a 3-credit-hour MS Capstone Project Plan-II course (CE 501).
- Culminating Experience or Capstone (CE 501): This must be taken during the graduating semester. This requires the student to develop a research paper, a policy and practice paper, or an equivalent culminating experience, which is graded by the student's graduate advisor. This is taken with permission under the direction of the student's graduate advisor. The graduate advisor must be a full member of the department's graduate faculty.
- Only 400-level courses without 500-level counterparts are allowed and must be approved prior to taking the class. A maximum of 6 hours of approved 400-level courses can be used for course work requirements. Students should complete the Graduate School's "Approval of a 400-Level Course for Master's Credit" form.

Comprehensive Examination/Capstone Project

The paper/report, or non-thesis, option requires a research paper, a policy and practice paper, or equivalent culminating experience, which is graded by the student's graduate advisor:

- Taken with permission under the direction of the student's graduate advisor
- The graduate advisor must be a full member of the department's graduate faculty
- It requires the completion of a research paper, a policy and practice paper, or equivalent report with the topic, scope, and format pre-approved by the student's advisor
- Must be taken the semester the student plans to graduate

CS503 Programming Languages

Hours 3

This course provides a graduate level presentation of Programming Languages. Formal student of programming language specification, analysis, implementation, and run-time support structures; organization of programming languages with emphasis on language constructs and mechanisms; and study of non-programming paradigms. Students who have successfully completed CS 403 may not also receive credit for CS 503.

CS504 CS Curriculum for Math Education
Hours 3

Building upon the concepts from CS 104, students will explore in-depth how computer science education is presented in the secondary education setting. Students will get the opportunity to explore current computer science curriculum and develop resources for future teaching, with a specific emphasis on the College Board's AP CS Principles (AP CSP) curriculum.

Prerequisite(s): CS 104 or permission by instructor.

[View All Courses](#)

Computer Science, MS

The University of Alabama's Computer Science Department offers interdisciplinary graduate programs leading to master's and doctoral degrees.

Students in the master's degree program may pursue either a thesis or non-thesis option.

Research activity in the department includes active investigations in software engineering, cyber security, big data analytics, distributed autonomy and human-computer interaction, autonomous vehicles, networking and its applications, and computer science education.

Admissions

In addition to meeting the admission requirements established by the Graduate School, students applying for graduate study in the department must also meet the following general requirements:

- Demonstrated competence in programming.
- Completion of the equivalent of the department's undergraduate core computer science curriculum.
- Grades earned in all prior computer science courses must be above the grade of C+.
- It is strongly recommended that students who wish to be considered for funding opportunities submit a score from the GRE general exam.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Master of Science

Departmental degree requirements for the MS degree, which are in addition to those established by the College and by the Graduate School, are as follows for Plan I and Plan II students:

- Each Plan I candidate must earn a minimum of 24 semester hours of credit for coursework, plus a six-hour thesis under the direction of a faculty member.
- Each Plan II candidate must earn a minimum of 30 semester hours of credit for coursework, which may include a three-hour non-thesis project under the direction of a faculty member.
- Unlike the general College of Engineering requirements, graduate credit may not be obtained for courses at the 400-level.

Transfer Credit

Information on transfer credit can be found here. (p. 15)

Accelerated Master's Program

Computer Science and Cyber Security students can learn more at the Graduate School AMP Program page which can be accessed here (p. 7).

Comprehensive Exam

The student will complete a comprehensive exam. This exam is scheduled with the Graduate Program Director in the semester in which the student intends to graduate.

Plan I - Thesis Process Requirements

- The student must select a thesis advisor and a thesis committee. The committee must contain at least four members, including the thesis advisor. At least two members are faculty of the Computer Science department, and at least one member must be from outside the Department of Computer Science.
- The student must develop a written research proposal that contains an introduction to the research area, a review of relevant literature in the area, a description of problems to be investigated, an identification of basic goals and objectives of the research, a methodology and timetable for approaching the research, and an extensive bibliography.
- The student must deliver an oral presentation of the research proposal, which is followed by a question-and-answer session that is open to all faculty members and which covers topics related directly or indirectly to the research area. The student's committee will determine whether the proposal is acceptable based upon both the written and oral presentations.
- The student must develop a written thesis that demonstrates that the student has performed original research that makes a definite contribution to current knowledge. Its format and content must be acceptable to both the student's committee and the Graduate School.
- The student must defend the written thesis. The defense includes an oral presentation of the thesis research, followed by a question-and-answer session. The student's committee will determine whether the defense is acceptable.

Plan II - Non-Thesis Process Requirements

- The student may elect to replace 3 hours of course work with 3 hours of CS 598 Non-Thesis Research.
- The non-thesis research should be proposed in writing in advance, approved by the instructor, and a copy placed in the student's file.
- The non-thesis proposal should specify both the course content and the specific deliverables that will be evaluated to determine the course grade.

Time Limits for Degree Completion Requirements

Information on time limits for degree completion can be found here (p. 15).

Student Progress Requirement

Student progress requirements are located here (p. 28).

Academic Misconduct Information

Academic Misconduct information can be found here. (p. 7)

Withdrawals and Leave of Absence Information

Information regarding withdrawals and leave of absences is located here (p. 244).

Academic Grievances Information

Scholastic Grievances information is located here (p. 255).

Grades and Academic Standing

Scholastic Requirements information is located here (p. 28).

Graduate School Deadlines Information

Graduate School deadlines can be found on the Graduate School website.

Application for Graduation Information

Master's degree application information can be found here. (p.)

Computer Science, Ph.D.

The doctor of philosophy degree is regarded as a research degree and is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and the capacity for independent, original investigation.

Admissions

In addition to meeting the admission requirements established by the Graduate School, students applying for graduate study in the department must also meet the following general requirements:

- A 3.5 GPA (on a 4.0 scale) or equivalent
- Demonstrated competence in programming
- Completion of the equivalent of the department's undergraduate core computer science curriculum
- It is strongly recommended that students who wish to be considered for funding opportunities submit a GRE score.

See the Admission Criteria section of this catalog for more information.

Mentored Instructional Experience

- In their careers, PhD engineers are expected to be thought leaders, mentors, trainers of other developing professionals, and communicators with a variety of audiences. Therefore, in addition to technical training in their discipline, all UA College of Engineering PhD students will have a Mentored Instructional Experience (MIE) that will enhance their abilities in these critical areas of communication, giving and receiving formal feedback, mentoring, and training, as well as deepen their discipline-specific knowledge through educational support experiences (typically office hours, laboratory instruction, conducting recitations, preparing instructional materials, and guiding in-course design teams of undergraduate students).
- All PhD students will receive pedagogical training in these instructional support areas through a pedagogy practicum course(s). Computer Science students will be required to complete the three-hour course, ENGR 501 Graduate Assistant Pedagogy, during their first semester as graduate students at UA. In addition, each student shall complete a set of instructional experiences during designated semesters (2 semesters at 10 hours/week, 4 semesters at 5 hours/week, or the equivalent) under the guidance of a faculty mentor. Students are required to register for either one-credit hour or two-credit hours of the course CS 697 (PhD Mentored Instructional Experience) during each semester in which they are completing their instructional experiences, and students must complete a total of four-credit hours in CS 697.

This additional instructional practice is a graduation requirement.

Transfer Credit

Graduate coursework can be transferred from other institutions with department approval.

- Graduate School information on Transfer Credit (p. 21).

The department supports the block transfer option of an MS degree in Computer Science that meets Graduate School requirements and is approved by the student's research advisor and the Graduate Committee. An MS block transfer will count for 18 hours of the coursework requirements. The remaining 18 hours will be comprised of:

- 9 hours of 600-level courses
- 3 hours of Additional Graduate Courses (Students may not count CS 592, CS 598, CS 599, CS 692 or CS 699 courses towards this total.)
- 6 hours of Other Coursework, including
 - Additional Graduate CS Courses
 - CS 592 or CS 692
 - Courses taken outside of CS are subject to the approval of the Graduate Program Director and the student's advisor (where applicable). Students should contact the Associate Head for Graduate Studies and their Advisor (where applicable) prior to registering for courses outside of CS.

Doctoral Plan of Study Requirement

- Graduate School information for the Doctoral Plan of Study (p. 21).

Qualifying Exams

- The student must pass the Ph.D. Qualifying Exam.
- The student must select an advisor for their Ph.D. Qualifying Exam.
- The Ph.D. Qualifying Exam is composed of a Qualifying Exam Written Document and an Oral Presentation. The student must pass both portions.
 - The Written Document either describes original research (Track 1) or is a review paper on an assigned research topic (Track 2).
 - Written Document Track 2: The document must pass an initial editorial review, after which the written document is rated by the Ph.D. Qualifying Exam committee as either Pass or Fail.
 - Oral Presentation: the student must deliver a conference-style presentation of the research contained in the paper. The faculty members present will then question the student regarding the contents of the written document and the presentation. The members of the faculty who are present will rate the Oral Presentation as either a Pass or a Fail.
- Deadlines for taking the Ph.D. Qualifying Exam
 - The first attempt at the qualifying exam must occur at the beginning of the third semester in the PhD program.
 - Students are allowed two attempts to successfully complete the Ph.D. Qualifying Exam. Students who do not pass their first attempt must retake the exam at the next offering of the Ph.D. Qualifying Exam.

Admission to Candidacy Requirements

- A student is admitted to candidacy after the successful completion of both portions of the dissertation proposal.

Continuous Enrollment Policy

- Graduate School Policy on Continuous Enrollment (p. 21).

Dissertation Requirements

- The student must select a dissertation advisor and a dissertation committee. At least four members, including the dissertation advisor, must be from the faculty of the Department of Computer Science, and at least one member must be from outside the department.
- The student must develop a dissertation proposal composed of both a written document and an oral presentation.
 - The written document should contain an introduction to the research area, a review of relevant literature in the area, a description of problems to be investigated, an identification of basic goals and objectives of the research, a methodology and timetable for approaching the research, and an extensive bibliography.
 - The student must deliver an oral presentation of the dissertation proposal, which is followed by a question-and-answer session that is open to all faculty and which covers topics related directly or indirectly to the research area. The student's committee will then examine the proposal privately with the student.
- The student must develop a written dissertation that demonstrates that the student has performed original research that makes a definite contribution to current knowledge. Its format and content must be acceptable to both the student's committee and the Graduate School.
- The student must defend the written dissertation. The defense includes an oral presentation of the dissertation research, followed by a question-and-answer session. The student's committee will determine whether the defense is acceptable.
- Graduate School information on Dissertation Requirements (p. 21).

Time Limits for Degree Completion Requirements

- Graduate School information on Time Limits (p. 21).

Student Progress Requirement

- Students must complete the Qualifying Exam by the specified deadlines
- Graduate School information on Student Progress (p. 21).

Academic Misconduct Information

- Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

- Graduate School information on Withdrawals and Leave of Absence (p. 244).

Application for Graduation Information

- Information on the Application for Graduation (p. 21).

Department of Electrical and Computer Engineering

The ECE Department offers two different paths to the MSEE degree: Plan I includes coursework, research, and the completion of a thesis. Plan II requires additional coursework and the completion of a culminating experience in place of a thesis.

The PhD is a degree based on coursework and research. This degree provides graduates with the background needed to become experts in their selected area of specialization.

During the first semester, a student enrolled in any graduate program should identify a primary faculty advisor and become familiar with all the required forms and deadlines associated with their program.

- Majors
 - Electrical Engineering, MS (p. 686)
 - Electrical Engineering, PhD (p. 690)

The faculty and students in ECE Department conduct research worth several million dollars annually in four core areas:

- **Devices and Materials**

This research area is focused on fundamental and applied research on materials and devices. Active research includes magnetic materials for electromagnetic devices in electric machines; synthesis of nanomaterials for electronic and photonic nanodevices; and oxide materials for MEMS piezoelectric and multiferroic sensors/actuators. A group of ECE faculty work on a broad spectrum of solid-state devices including solar cells, sensors, and terahertz (THz) biomedical imaging.

- **Electromechanical and Energy Systems**

This research area focuses on the design, development, and control of electrical systems as well as combined electrical and mechanical systems. On the electrical system side, research activities include electric power and energy systems and power electronics with modern applications covering renewable energy systems, microgrids, vehicle-grid integration, smart grid, energy internet, etc. Within the sub-discipline of power electronics, several faculty are involved in design and optimization of high-performance converters utilizing

emerging wide-bandgap semiconductor technology including Silicon Carbide (SiC) and Gallium Nitride (GaN) devices. Management and mitigation of electromagnetic interference (EMI) in high-frequency SiC and GaN converter systems is also an active area of research within the department. On the integrated electrical and mechanical system side, research activities include electric machines, energy conversion, and motion control systems with modern applications covering electric vehicles, wind energy conversion, smart homes and buildings, process automation, robotics, etc.

• Embedded Systems

This research area is focused on computing systems in all aspects and applications. Active research by the ECE faculty includes robotics, intelligent sensors, computer vision, machine learning, deep learning, wearable sensors, security and privacy in computing systems, intelligent wireless communications and networks, big data, tele-healthcare, systems-on-chip, virtual reality, IoT devices, biosensors, implantable devices, and autonomous ground, air, and underwater vehicles. This research area also covers embedded system hardware (microcontrollers and FPGAs), digital signal/image processing, real-time systems, and biomedical applications of computing devices.

• Electromagnetics

Electromagnetics involves solving Maxwell's four equations and is the foundation for electromagnetic device and system design. Maxwell's equations describe the laws of electricity and magnetism. Electromagnetics applies the four equations to electromagnetic device performance analysis. Microwave communications, radio propagation in antennas, microwave millimeter engineering, remote sensing, and object imaging are common subdisciplines.

Department Head

- Ricks, Kenneth G. (Interim)

Professors

- Abu Qahouq, Jaber
- Balasubramanian, Bharat
- Cheng, Mark Ming-Chen
- Gogineni, Siva Prasad - James R. Cudworth Professor of Electrical and Computer Engineering and Aerospace Engineering and Mechanics
- Hu, Fei
- Kim, Seongsin Margaret
- Li, Dawen
- Li, Shuhui
- Ricks, Kenneth
- Sazonov, Edward - James R. Cudworth Professor of Electrical and Computer Engineering - Associate Department Head for Graduate Programs

Associate professors

- Freeborn, Todd
- Jeong, Nathan
- Kotru, Sushma
- Kung, Patrick - Associate Department Head for Undergraduate Programs
- Lemmon, Andrew - Graduate Program Director
- Song, Aijun
- Taylor, Andrew - Undergraduate Program Director

Assistant professors

- Baker, Nick
- Neshani, Sara
- Reyhanigalangashi, Omid
- Sun, Shunqiao
- Wang, Lusha

Master's degree students may earn graduate credit for a maximum of 6 semester hours of 400-level course credit but only if a form for Approval of 400-Level Course Work for Master's Credit (p. 7) is approved by the department and Graduate School prior to the semester in which the 400-level coursework will be taken.

ECE508 Communications

Hours 3

Analog and digital communication systems, random signals, sampling, filtering, analog-to-digital encoding, advanced digital modulation/demodulation, source encoding/decoding, channel encoding/decoding, multiplexing, system performance analysis.

Prerequisite(s): ECE 370 and MATH 355

ECE509 Communications Lab

Hours 1

Modeling and design of communication systems. Familiarization with specialized communications equipment and techniques. Proper use of laboratory instruments.

Prerequisite(s): ECE 370 and MATH 355

Prerequisite(s) with concurrency: ECE 508

[View All Courses](#)

Electrical Engineering, MS

The Master of Science in Electrical Engineering (MSEE) degree may be obtained through either of two plans.

1. Plan I (thesis research)
2. Plan II (non-thesis option)

Admissions

A. Regular Admission Requirements

For regular to the graduate program in the ECE Department, a prospective graduate student should have:

- A Bachelor's degree, at the time of initial enrollment, in Electrical or Computer Engineering or related field from an ABET-accredited program. Applications who are graduates of a non EAC/ABET-accredited program will be considered.
- Grade point average of at least 3.0 on a 4.0 scale, 3.0 for the last 60 semester hours in a degree program, or 3.0 for a completed graduate program.
- Combined verbal and quantitative GRE requirement of 300 or greater.

There is no minimum score on the writing section of the GRE for admission to the MSEE Program.

GRE Verbal and Analytical Writing scores must be consistent with an international applicant's English language score.

Non-native speakers are required to submit unofficial TOEFL, IELTS, DET, or PTE scores (official scores are submitted on admission) unless they meet at least one of the following criteria:

- At the time of initial enrollment, they will hold a degree from a U.S. institution or an institution in one of the English-speaking countries or regions in the link below;
- At the time of initial enrollment, they will have been enrolled in coursework for at least two years at a U.S. institution or an institution in one of the English-speaking countries or regions in the link below;
- They are a citizen or legal resident of one of the English-speaking countries or regions in the link at: <https://graduate.ua.edu/applicants/international-students/>

The minimum score(s) to be considered for regular admission:

TOEFL: 79, IELTS: 6.5, DET: 110, PTE: 59.

Admission with Permission to Continue may be granted to applicants who do not meet these requirements, for example those who have degrees in related fields or a GPA below 3.0.

Please see the Graduate School website for more details.

B. Accelerated Master's Program (AMP) Admission Requirements

The Accelerated Master's Program (AMP) allows undergraduate students to simultaneously count up to 6 hours of graduate coursework toward both the undergraduate and graduate degrees. The **GRE admissions test and recommendation letter requirements are automatically waived for AMP applicants.**

Please see the Graduate School catalog page for admission requirements for the Accelerated Master's Program (p. 7).

C. Admission Requirements for Applicants Without an Electrical Engineering or Computer Engineering Bachelor's Degree

Applicants without an electrical engineering or computer engineering bachelor's degree may be admitted with Permission to Continue. Such students will be required to complete successfully three 400-level electrical engineering courses, each in a different sequence area. Successful completion requires a "B" or better in the course. Slash-listed (400/500) courses taken to satisfy this policy cannot be counted toward the graduate degree. Equivalent undergraduate or graduate courses in related fields (for example, electromagnetics in physics, computer architecture in computer science, or control in mechanical engineering) may be counted as a course in the corresponding electrical engineering area upon approval by the Electrical and Computer Engineering Graduate Program Director.

D. Required Application Materials

In addition to the online application form, the following information is required as part of your application:

1. A short Statement of Purpose describing possible research/study interests
2. Resume
3. External applicants should submit three letters of recommendation
4. English proficiency test results (TOEFL, IELTS, DET, PTE) if required
5. GRE test scores
6. Transcripts for any institutions where 15 or more credit hours were completed

E. Application Deadlines

There are no formal deadlines for graduate applications. Once an application is complete, the internal review process typically takes 2-3

weeks. However, **international applicants** should consider the time required to obtain any necessary visa documents.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Master of Science in Electrical Engineering (MSEE) degree may be obtained through either of two plans, which are detailed in this section.

MSEE – Thesis Option (Plan 1)

Code and Title	Hours
Area of Concentration	
A minimum of 12 hours of Electrical and Computer Engineering (ECE) designated courses in the student's area of concentration, as defined by the advisory committee.	12
Elective Area of Study	
A minimum of 9 hours of courses in an elective area approved by the advisory committee.	9
Mathematics or Science	
A minimum of 3 hours of Mathematics (MATH, ST, or GES) or Science (Physics, Chemistry, or Biology) courses at the 500 level or above.	3
Graduate Research Seminar	
One hour of seminar (ECE 695 Graduate Research Seminar). This can be part of the Area of Concentration or the Elective Area of Study.	
Total Coursework Hours	24
Thesis Course	
ECE 599 Thesis Research (A minimum of 6 hours of thesis research are required.)	6
Minimum Total Hours	30

Additional Requirements:

- A minimum of 3 hours of closely related Electrical and Computer Engineering (ECE) designated courses in the student's Area of Concentration must be at the 600 level.
- No more than 6 hours may be from courses at the 400 level. In order to receive degree credit, 400-level courses require written application and approval by the Graduate School prior to the semester in which any 400-level course is to be taken.
- The Graduate Research Seminar can be considered as part of the student's Area of Concentration or Elective Area of Study with approval from the student's advisory committee.
- A student's curriculum and thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. In addition, the student must satisfy all University requirements defined in the current edition of The University of Alabama Graduate Catalog.

The MSEE Plan I candidate's committee will consist of three department faculty. The MSEE Plan I candidate's committee is responsible for administering the thesis defense.

MSEE – Non-Thesis Option (Plan II):

Code and Title	Hours
Area of Concentration	
A minimum of 12 hours of Electrical and Computer Engineering (ECE) designated courses in the student's area of concentration, as defined by the advisor.	12

Elective Area of Study

A minimum of 12 hours of courses in an elective area approved by the advisor.	12

Mathematics or Science

A minimum of 3 hours of Mathematics (MATH, ST, or GES) or Science (Physics, Chemistry, or Biology) courses at the 500 level or above.	3

Graduate Research Seminar

One hour of seminar (ECE 695 Graduate Research Seminar). This can be part of the Area of Concentration or the Elective Area of Study.	

Culminating Experience

ECE 598	Non-Thesis Research (A minimum of 3 hours of non-thesis research are required.)	3

Total Hours	30

Additional requirements:

- A minimum of 3 hours of closely related Electrical and Computer Engineering (ECE) designated courses in the student's Area of Concentration must be at the 600 level.
- No more than six (6) hours may be courses at the 400 level. In order to receive degree credit, 400-level courses require written application and approval by the Graduate School prior to the semester in which any 400-level course is to be taken.
- The Graduate Research Seminar can be considered as part of the student's Area of Concentration or Elective Area of Study with approval from the student's advisory committee.
- A student's curriculum must be approved by the student's graduate adviser, which must be chosen during the first semester of the degree program.
- The graduate advisor must also approve either of the following to satisfy University of Alabama Graduate School culminating experience requirement for an MS Plan II degree:
 1. Submission of a manuscript, authored or co-authored by the candidate, to a refereed journal or conference proceeding;
 2. A written research report submitted to the advisor.

During the first semester in the MSEE Plan II program, the candidate must select an adviser from the department faculty who will be responsible for administering the culminating experience.

For AMP students, 6 credit hours can be double counted towards both the bachelor's and master's degree. Of the double counted hours, a maximum of 3 may be from the student's minor.

Graduate Courses

Graduate courses are those with numbers in the 500-level and 600-level. 500-level courses are intermediate-level courses and are often associated with Master's-level work. 600-level courses are advanced-level courses and are often associated with PhD-level work. However, both MSEE and PhD plans of study can contain both 500- and 600-level courses.

Graduate courses are listed in the Graduate Catalog at: Electrical and Computer Engineering Courses.

Courses taken for graduate credit generally cannot be repeated. This includes audited courses. Required courses can be repeated for credit if the student makes a D or F grade with the recommendation of the Department Head and the Dean of the Graduate School.

Note that 400-level courses are generally not acceptable for graduate degree requirements. However, there are strict exceptions to this rule as described below in the "Grades and Academic Standing" section.

Undergraduate students enrolled in the Accelerated Masters Program may double count a limited number of graduate course hours as undergraduate electives. More information about his program is available on the Graduate School web site.

Graduate Seminar

The ECE department holds a seminar series each regular academic term.

In addition to student presentations, outside speakers distinguished in some area of engineering are invited to make seminar presentations. Graduate students are expected to attend these seminars.

There is a one-hour course that students may take to obtain course credit for this seminar series each semester. MSEE students (both Plan I and Plan II) are required to complete 1 hour of seminar before graduation.

Grades and Academic Standing

Grades in graduate courses are assigned on the A, B, C, D, F system. Plus and minus grades are not used for graduate courses. A weighted grade point average (GPA) is computed using 4 points for A's, 3 for B's, 2 for C's, 1 for D's and 0 for F's. In order to be in good academic standing and to graduate, a student must maintain at least a B average (GPA ≥ 3.0). Graduate students with 12 or more credit hours and a GPA < 3.0 will be placed on academic warning and may not hold a graduate assistantship. To remain in the program, students on academic warning must raise their GPA to 3.0 or better by the end of the semester following being placed on academic warning.

400-Level Courses:

While 400-level courses may be applied toward a master's degree, see Section 4.9 of the Graduate Catalog for some very important considerations that should be noted. For example, approval for such coursework must be obtained before the course is taken and it will only count if a graduate course on the same topic is not available. Students are expected to do additional work as well. Note 400-Level courses may not be accepted for a doctoral degree except when taken as part of the master's degree. It is very rare that a 400-level course will count toward a graduate degree. Consult with your advisor or graduate program director prior to pursuing this option.

Please see the Grades and Academic Standing (p. 28) catalog page.

Transfer Credit

The UA Graduate Catalog provides a comprehensive high-level description of graduate transfer credit policies.

Please see the Graduate School information on Transfer Credit (p. 15) and ECE-specific procedures on ECE website.

Comprehensive Examination

A final comprehensive examination is required of all MSEE candidates. The content of this exam depends on the candidate's degree program.

Plan I MSEE candidates submit a thesis of their research work to the committee members and defend their thesis work in a formal presentation.

Plan II MSEE candidates can satisfy the comprehensive exam via one of the following:

- Pass a formal defense of a conference or journal paper in which the student is an author. The student must meet with the advisor and report on their portion of the work described in the paper.
- Submit a written research report on a topic defined by the academic advisor.

The specific format of this exam is at the discretion of the advisor. Both options require 3 hours of ECE 598 Non-Thesis Research.

Note that the examination must be passed and the results filed with the Graduate School on the Master's Examination Form no later than the deadline posted by the Graduate School at: <https://graduate.ua.edu/current-students/student-deadlines/>.

Plan I – Thesis Process Requirements

A. Thesis

The thesis is a formal research document and must be prepared following the Graduate School's thesis and electronic submission guidelines (<https://graduate.ua.edu/students/thesis-and-dissertation/>). A student's thesis will be reviewed by their thesis advisor and advisory committee.

Once they are satisfied with the thesis, the student and thesis advisor will schedule the Comprehensive Exam/Thesis Defense. After successfully defending the thesis, there may be final corrections and revisions required to the thesis before the committee gives their final approval. Such conditions should be considered in scheduling the presentation/defense relative to the Graduate School submission deadlines.

B. Thesis Defense

The final step in the pursuit of the MSEE degree (Plan I) is a formal defense of the completed thesis before the student's graduate advisory committee. The thesis defense consists of two major components.

The first component is a technical presentation that summarizes the major findings of the thesis. This presentation should include a survey of the available literature and a summary of the major technical achievements of the research. The technical presentation is followed by a question-and-answer session, during which audience members may ask the student specific questions about his or her thesis research. This portion of the defense must be open to the public.

The second component of the thesis defense is a closed question & answer session that is restricted to the defending student and the graduate advisory committee. This portion of the defense is not open to the public. The graduate advisory committee will typically ask a series of detailed questions about the student's research. After the committee has concluded asking questions, the student will be asked to leave the room so that the committee may deliberate and render a decision on whether the student has passed or failed the defense. After a decision has been reached, the student will be called back into the room and notified of this decision.

The thesis defense must be announced publicly. The procedure for public announcement is as follows. No less than four weeks before the scheduled defense date, the student must complete a thesis announcement document, which includes the following elements: the student's name, the student's email address, the advisor's name, the thesis title, and abstract of no more than 300 words, and the scheduled date and time of the defense. A template of this announcement form is available from the ECE office staff.

When the thesis announcement document is complete, it should be sent to the ECE office staff for distribution. This will generally be done at the same time that the room reservation for the defense is scheduled. To ensure that this policy is enforced, ECE office staff will not schedule a

room for a thesis defense without first receiving the completed thesis announcement document. After receiving this document, the ECE office staff will add the confirmed room location and will then send this document to the department email distribution list. The document will also be posted to the ECE department website and sent to the office of the Dean for further distribution within the College of Engineering.

Graduate Advisory Committee

Every MSEE candidate (Plan I) is responsible for working with their advisor to select a faculty committee to oversee the candidate's progress toward earning the MSEE degree. The MSEE Plan I candidate's committee will consist of at least three members of the faculty. At least two of the members must be from the ECE Department faculty. Up to one member may be from outside the department. The MSEE Plan I committee will work with the advisor to approve the candidate's plan of study, evaluate the candidate's thesis and thesis defense, and help the candidate with any problems that may arise in the course of obtaining the MSEE degree.

The MSEE Plan II candidate does not have to form a committee, but instead select an advisor from the members of the ECE Department faculty. The advisor will be responsible for administering the culminating experience.

Time Limits for Degree Completion

All requirements for the MSEE degree must be completed during the six years prior to the date that the degree is awarded.

Please see the Graduate School catalog page for information on Time Limits (p. 15).

Student Progress Requirement

Please see Satisfactory Academic Progress Website.

Academic Misconduct Information

Please see the Graduate School catalog page for information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Please see the Graduate School catalog page for information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Please see the Grievance Procedure (p. 255) catalog page.

Grades and Academic Standing

Please see the Grades and Academic Standing (p. 28) catalog page.

Graduate School Deadline Information

Please see the Graduate School website.

Application for Graduation Information

Please see the Graduate School catalog page for information on the Application for Graduation (p. 15).

Unconditionally admitted full-time graduate students may seek and receive financial assistance in the form of a graduate assistantship. Assistantships generally include a monthly stipend as well as all or a part of tuition and health insurance. Graduate assistantships are highly

competitive and being admitted into the graduate program does not in any way guarantee an assistantship award.

Graduate Research Assistantships (GRAs) are awarded by individual professors with funded research. Applicants should communicate directly with a faculty member in the applicant's area of interest concerning the availability of GRA positions and a potential match.

The ECE Department offers Graduate Teaching Assistantships (GTAs) for students assisting faculty members with undergraduate courses and laboratories. GTA awards are determined by the ECE Department Administration at the request of individual faculty members who submit GTA applications on behalf of their students. A university-wide requirement for all GTAs is that they should either have English as their native language or have successfully completed an English language proficiency course and passed an English language proficiency exam administered by UA's English Language Institute. The English language proficiency exam and course process typically require at least one semester. There is a limited number of GTA positions each semester.

The GRAs and GTAs must register for a minimum number of credit hours based upon their level of funding as described in the Graduate Catalog. GTAs/GRAs are also expected to perform a minimum number of work hours per week as part of their position. A full-time GTA/GRA is expected to work 20 hours per week; a half-time GTA/GRA is expected to work 10 hours per week. Accepting an assistantship implies an obligation on the part of the student. Students supported by an assistantship are expected to fulfill their roles as students, meeting all academic requirements, as well as carrying out teaching and/or research assignments. Students who do not maintain good academic standing, as defined in the UA Graduate School, are not eligible for assistantships.

Assistantships may also be terminated by faculty advisors for unsatisfactory performance of the assigned research and/or teaching duties, as defined by ECE Department GRA/GTA Student Employee Performance Standards. The ECE Department is not obligated to provide funding for students terminated from their positions. Additionally, the possibility of future funding requires continued enrollment in the electrical and computer engineering graduate program, the availability of funding, and satisfactory progress toward degree objectives. It should be noted that a loss in funding does not equal dismissal from a program, for students in good academic standing and who have not been found to have committed misconduct worthy of dismissal.

Domestic students may be eligible for student loans and other financial aid and should visit the UA Financial Aid Office website to learn more about these options.

Additional support is available in the form of fellowships, available from the University and other funding agencies. Applicants are encouraged to visit the Graduate School website to learn more about these opportunities, application requirements and deadlines. Some professional societies also offer assistance to new graduate students.

Qualified applicants are encouraged to apply for fellowships like the NSF Graduate Research Fellowship, the DoD SMART Fellowship, the Alabama Space Grant Consortium Fellowship, and UA's Graduate Council Fellowship. Note that most of these have early application deadlines and some require interaction with a nominating faculty member.

Additional information can be found on the Financial Assistance page of the Graduate Catalog.

Electrical Engineering, Ph.D.

Ph.D. in Electrical Engineering

The Department of Electrical and Computer Engineering offers a Doctor of Philosophy degree in Electrical Engineering. This is a research-based degree where students are required to propose, complete, and defend an approved dissertation on a research topic that contributes to the field.

The Ph.D. program in Electrical Engineering provides students with the opportunity to work with leading, world-renowned faculty members in four core research areas:

- **Devices and Materials**

This research area is focused on fundamental and applied research on materials and devices. Active research includes magnetic materials for electromagnetic devices in electric machines; synthesis of nanomaterials for electronic and photonic nanodevices; and oxide materials for MEMS piezoelectric and multiferroic sensors/actuators. A group of ECE faculty work on a broad spectrum of solid-state devices including solar cells, sensors, and terahertz (THz) biomedical imaging.

- **Electromechanical and Energy Systems**

This research area focuses on the design, development, and control of electrical systems as well as combined electrical and mechanical systems. On the electrical system side, research activities include electric power and energy systems and power electronics with modern applications covering renewable energy systems, microgrids, vehicle grid integration, smart grid, energy internet, etc. Within the sub-discipline of power electronics, several faculty are involved in design and optimization of high-performance converters utilizing emerging wide-bandgap semiconductor technology including Silicon Carbide (SiC) and Gallium Nitride (GaN) devices. Management and mitigation of electromagnetic interference (EMI) in high-frequency SiC and GaN converter systems is also an active area of research within the department. On the integrated electrical and mechanical system side, research activities include electric machines, energy conversion, and motion control systems with modern applications covering electric vehicles, wind energy conversion, smart homes and buildings, process automation, robotics, etc.

- **Embedded Systems**

This research area is focused on computing systems in all aspects and applications. Active research by the ECE faculty includes robotics, intelligent sensors, computer vision, machine learning, deep learning, wearable sensors, security and privacy in computing systems, intelligent wireless communications and networks, big data, tele-healthcare, systems-on-chip, virtual reality, IoT devices, biosensors, implantable devices, and autonomous ground, air, and underwater vehicles. The research area also covers embedded system hardware (microcontrollers and FPGAs), digital signal/image processing, real-time systems, and biomedical applications of computing devices.

- **Electromagnetics**

Electromagnetics involves solving Maxwell's four equations and is the foundation for electromagnetic device and system design. Maxwell's equations describe the laws of electricity and magnetism. Electromagnetics applies the four equations to electromagnetic device performance analysis. Microwave communications, radio propagation in antennas, microwave millimeter engineering, remote sensing, and object imaging are common subdisciplines.

Admissions

A. Regular Admission Requirements

For regular admission to the graduate program in the ECE Department, a prospective graduate student should have:

- Bachelor's degree in Electrical or Computer Engineering or related field from an ABET-accredited program. Applications who are graduates of a non EAC/ABET-accredited program will be considered.
- Grade point average of at least 3.0 on a 4.0 scale, 3.0 for the last 60 semester hours in a degree program, or 3.0 for a completed graduate program.
- Combined verbal and quantitative GRE requirement of 300 or greater.

There is no minimum score on the writing section of the GRE for admission to the Ph.D. Program.

GRE Verbal and Analytical Writing scores must be consistent an international applicant's English language score.

Non-native speakers are required to submit unofficial TOEFL, IELTS, DET, or PTE scores (official scores are submitted on admission) unless they meet at least one of the following criteria:

- At the time of initial enrollment, they will hold a degree from a U.S. institution or an institution in one of the English-speaking countries or regions in the link below;
- At the time of initial enrollment, they will have been enrolled in coursework for at least two years at a U.S. institution or an institution in one of the English-speaking countries or regions in the link below;
- They are a citizen or legal resident of one of the English-speaking countries or regions in the link at: <https://graduate.ua.edu/applicants/international-students/>

The minimum score(s) to be considered for regular admission:

TOEFL: 79, IELTS: 6.5, DET: 110, PTE: 59.

Admission with Permission to Continue may be granted to applicants who do not meet these requirements, for example those who have degrees in related fields or a GPA below 3.0.

Please see the Graduate School website for more details.

B. Admission Requirements for Applicants Without an Electrical Engineering or Computer Engineering Bachelor's Degree

Applicants without an electrical engineering or computer engineering bachelor's degree may be admitted with Permission to Continue. Such students will be required to complete successfully three 400-level electrical engineering courses, each in a different sequence area. Successful completion requires a "B" or better in the course. Slash-listed (400/500) courses taken to satisfy this policy cannot be counted toward the graduate degree. Equivalent undergraduate or graduate courses in related fields (for example, electromagnetics in physics, computer architecture in computer science, or control in mechanical engineering) may be counted as a course in the corresponding electrical engineering area upon approval by the Electrical and Computer Engineering Graduate Program Director.

C. Required Application Materials

In addition to the online application form, the following information is required as part of your application:

1. A short Statement of Purpose describing possible research/study interests

2. Resume
3. External applicants should submit three letters of recommendation
4. English proficiency test results (TOEFL, IELTS, DET, PTE)
5. GRE test scores
6. Transcripts for any institutions where 15 or more credit hours were completed

D. Application Deadlines

There are no formal deadlines for graduate applications. Once an application is complete, the internal review process typically takes 2-3 weeks. However, **international applicants** should consider the time required to obtain any necessary visa documents.

Curricular Requirements

Code and Title		Hours
Major Area of Concentration		
A minimum of 21 hours of Electrical and Computer Engineering (ECE) designated courses in the student's area of concentration, as defined by the advisory committee, with at least 12 of these hours at the 500-level or above. At least 9 hours should be at the 600 level. Courses at the 400-level will only be applied to this hour requirement if they were completed as part of the student's master's degree requirements.		21
Minor Area of Concentration		
A minimum of 9 hours of courses in a minor in Electrical and Computer Engineering or other approved area, as defined by the advisory committee, all of which are to be at the 500-level or above.		9
Mathematics or Science		
A minimum of 3 hours of Mathematics (MATH, ST, or GES) or Science (Physics, Chemistry, or Biology) courses at the 500-level or above.		3
Graduate Research Seminar		
ECE 695	Graduate Research Seminar (3 hours of seminar. This can be part of the Major Area of Concentration or the Minor Area of Concentration.)	3
Total Coursework Hours		36
Dissertation Research		
A minimum of 18 hours of dissertation research (ECE 699 Dissertation Research) are required.		18
Total Hours		54

Additional Requirements:

- A maximum of 18 credit hours earned for coursework taken to complete a master's degree can be applied to the doctoral coursework requirement.
- The Graduate Research Seminar can be considered as part of the student's Major Area of Concentration or Minor Area of Concentration with approval from the student's advisory committee. However, the minimum of 36 coursework hours must still be met.
- A student's curriculum and dissertation must be approved by the student's graduate advisory committee. All candidates must pass a written and oral qualifying examination, administered by the graduate advisory committee, at such a time as the candidate's adviser deems appropriate and in accordance with departmental policy. The oral portion of the qualifying examination is typically as the presentation of a dissertation proposal. Furthermore, all candidates must pass

a final examination, which generally consists of a presentation and defense of the dissertation.

- A doctoral student must fulfill the residency requirements set forth by The University of Alabama Graduate School.
- As part of their research, a student must have at least one journal manuscript accepted for publication.
- Until a Ph.D. student is admitted to candidacy for the doctoral degree, ECE 698 should be taken to reflect research hours. Credit hours awarded for ECE 698 do not count toward the Ph.D. degree and ECE 698 hours cannot be converted into ECE 699 hours.

Mentored Instructional Experience

In their careers, PhD degree holders are expected to be thought leaders, mentors, trainers of other developing professionals, and communicators with a variety of audiences. Therefore, in addition to technical training in their discipline, all UA College of Engineering PhD students will have a Mentored Instructional Experience that will enhance their abilities in these critical areas of communication, giving and receiving formal feedback, mentoring, and training, as well as deepen their discipline-specific knowledge through educational support experiences (typically office hours, laboratory instruction, conducting recitations, preparing instructional materials, and guiding in-course design teams of undergraduate students).

All PhD students will receive pedagogical training in one or more of these instructional support areas through a pedagogy practicum course, ECE 697 PhD Instructional Training ECE 697 PhD Instructional Training ECE 697 PhD Instructional Training . As part of this course, each student shall complete a set of instructional experiences during designated semesters under the guidance of a faculty mentor.

This additional instructional practice is a graduation requirement.

Graduate Seminar

The ECE department holds a seminar series each regular academic term.

In addition to student presentations, outside speakers distinguished in some area of engineering are invited to make seminar presentations. Graduate students are expected to attend these seminars.

There is a one-hour course that students may take to obtain course credit for this seminar series each semester. Ph.D. students are required to complete 3 hours of seminar before graduation.

Grades and Academic Standing

Please see the Grades and Academic Standing (p. 28) catalog page.

Transfer Credit

The UA Graduate Catalog provides a comprehensive high-level description of graduate transfer credit policies.

Please see the Graduate School information on Transfer Credit (p. 21) and ECE-specific procedures on ECE website.

Doctoral Plan of Study Requirements

Graduate School Information on the Doctoral Plan of Study can be found here (p. 21).

Residence Requirements

In addition to completing a minimum of 50% of the graduate coursework at The University of Alabama (UA), all of the dissertation research hours (699) must be earned while attending UA. Note that 599 hours are not the same as 699 and these hours generally cannot be converted. Note also that once ECE 699 courses are started, students must continuously

register for a minimum of 3 hours of ECE 699 each semester until graduating. There are a few exceptions for the final semester, depending on when the dissertation defense is completed. See the Graduate Catalog for additional information.

Comprehensive Qualifying Examination

The Ph.D. qualifying examination is a formal process used to evaluate a student's capacity for successfully completing the Ph.D. program.

Successful completion of the qualifying examination is required of all Ph.D. students prior to admission to candidacy. The qualifying examination consists of both an oral and a written component, which may be administered at different times. However, both portions of the qualifying exam must be completed at least nine months before graduation. It is also noted that the qualifying exam and the dissertation defense cannot occur within the same semester.

Written Component

The content, nature, and format of the written component of the qualifying examination is determined by the student's graduate advisory committee. This portion of the qualifying examination may be taken when the advisory committee determines that sufficient coursework has been completed, but no later than the semester immediately after all coursework has been completed. Prior to issuing the written component to the student, the chair of the graduate advisory committee will submit a written statement defining the content, duration, and nature of the exam to the Department Head, each member of the advisory committee, and the student.

The written examination will be based upon graduate-level coursework in the student's major area of concentration. The examination provides a vehicle for the student to demonstrate the capability to apply independent thinking by bringing together material from a number of different courses.

There is no specific requirement for the content or format of the written portion of the qualifying examination. However, graduate advisory chairs often request that members of the graduate advisory committee contribute a suitable set of questions or a project, which collectively represent a comprehensive qualifying examination for the student. External graduate advisory committee members may also contribute questions if desired, at the discretion of the graduate advisory chair.

In this model, the questions or projects contributed by the members of the graduate advisory committee may be open-ended (requiring literature review, etc.) or they may be taken from graduate coursework. Regardless of approach, it is generally recommended that the scope of each committee member's questions be constrained such that the student can complete them in 1-2 weeks of concentrated effort.

The graduate advisory committee will decide whether the student passed or failed the written exam. The chair of the graduate advisory committee will inform the student and the Department Head in writing of this result within two weeks of the completion of the written exam. Students may take this written exam only twice. The graded exam will become part of the student's academic file. The written portion of the qualifying examination must be successfully completed prior to undertaking the oral portion of the qualifying exam.

Oral Component

The oral component of the qualifying examination will include a formal presentation of the dissertation proposal to the graduate advisory committee. At least two weeks prior to this presentation, the student must submit a written draft of the proposal to the graduate advisory committee, who approves the formal proposal defense. When the student

has presented a satisfactory proposal, the chair of the graduate advisory committee will inform the Department Head that the student passed both the written and oral portion of the Qualifying Exam.

Candidacy and Continuous Registration

A student who has successfully completed the qualifying examinations and has had a dissertation research proposal approved will be admitted to *candidacy* for the doctoral degree. The completed candidacy form with attached Plan of Study is submitted to the Graduate School well in advance of the final semester. Students admitted to candidacy are expected to pursue completion of the dissertation without interruption by enrolling each semester following admission to candidacy for at least three hours of dissertation research (ECE 699).

Dissertation and Final Examination Requirements

The dissertation research and dissertation are the defining elements of the Ph.D. degree. The dissertation must demonstrate independent, original scholarship within the field.

The dissertation is a formal research document and must be prepared following the Graduate School guidelines. The dissertation will be reviewed by the advisor and advisory committee. The advisor will help in scheduling the student's Final Exam/Dissertation Defense. After a successful defense, there may be additional corrections and revisions required by the committee. Such conditions should be considered in scheduling the presentation/defense relative to the Graduate School submission deadlines.

The article-style dissertation can be used as an alternate to the traditional dissertation format. This format is beneficial for publication of the dissertation research.

Dissertation Defense

The final step in the pursuit of the Ph.D. degree is a formal defense of the completed dissertation before the student's graduate advisory committee. The dissertation defense consists of two major components.

The first component is a technical presentation that summarizes the major findings of the dissertation. This presentation should include a survey of the available literature, a summary of the major technical achievements of the research described in the dissertation, and a synopsis of the contributions of the research to the broader engineering community. The technical presentation is followed by a question-and-answer session, during which audience members may ask the student specific questions about his or her dissertation research. This portion of the defense must be open to the public.

The second component of the dissertation defense is a closed question & answer session that is restricted to the defending student and the graduate advisory committee. This portion of the defense is not open to the public. The graduate advisory committee will typically ask a series of detailed questions about the student's dissertation research. After the committee has concluded asking questions, the student will be asked to leave the room so that the committee may deliberate and render a decision on whether the student has passed or failed the dissertation defense. After a decision has been reached, the student will be called back into the room and notified of this decision.

The dissertation defense must be announced publicly. The procedure for public announcement is as follows. No less than four weeks before the scheduled defense date, the student must complete a dissertation announcement document, which includes the following elements: the student's name, the student's email address, the advisor's

name, the dissertation title, and abstract of no more than 300 words, and the scheduled date and time of the defense. A template of this announcement form is available from the ECE office staff.

When the dissertation announcement document is complete, it should be sent to the ECE office staff for distribution. This will generally be done at the same time that the room reservation for the defense is scheduled.

To ensure that this policy is enforced, ECE office staff will not schedule a room for a dissertation defense without first receiving the completed dissertation announcement document. After receiving this document, the ECE office staff will add the confirmed room location and will then send this document to the department email distribution list. The document will also be posted to the ECE department website and sent to the office of the Dean for further distribution within the College of Engineering.

Graduate Advisory Committee

Every Ph.D. candidate is responsible for working with his/her advisor to select an advisory committee of five or more members. The candidate's committee will consist of the advisor plus at least three members of the department's faculty plus at least one faculty member from outside the department. The committee will work with the advisor to approve the candidate's plan of study, to evaluate the candidate's dissertation and plan the dissertation defense, as well as to help the candidate with any problems that may arise in the course of obtaining the Ph.D. degree.

Time Limits for Degree Completion

All requirements for the Ph.D. degree must be completed during the nine years immediately prior the date that the degree is awarded.

Please see the Graduate School catalog page (p. 21) under the heading "Time Limits".

Student Progress Requirement

Please see the Satisfactory Academic Progress Website.

Academic Misconduct Information

Please see the Graduate School catalog page for information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Please see the Graduate School catalog page for information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Please see the Grievance Procedure (p. 255) catalog page.

Application and Deadlines for Graduation

Please see the Graduate School catalog page for information on the Application for Graduation (p. 21).

Unconditionally admitted full-time graduate students may seek and receive financial assistance in the form of a graduate assistantship.

Assistantships generally include a monthly stipend as well as all or a part of tuition and health insurance. Graduate assistantships are highly competitive and being admitted into the graduate program does not in any way guarantee an assistantship award.

Graduate Research Assistantships (GRAs) are awarded by individual professors with funded research. Applicants should communicate directly with a faculty member in the applicant's area of interest concerning the availability of GRA positions and a potential match.

The ECE Department offers Graduate Teaching Assistantships (GTAs) for students assisting faculty members with undergraduate courses and laboratories. GTA awards are determined by the ECE Department Administration at the request of individual faculty members who submit GTA applications on behalf of their students. A university-wide requirement for all GTAs is that they should either have English as their native language or have successfully completed an English language proficiency course and passed an English language proficiency exam administered by UA's English Language Institute. The English language proficiency exam and course process typically require at least one semester. There is a limited number of GTA positions each semester.

The GRAs and GTAs must register for a minimum number of credit hours based upon their level of funding as described in the Graduate Catalog. GTAs/GRAs are also expected to perform a minimum number of work hours per week as part of their position. A full-time GTA/GRA is expected to work 20 hours per week; a half-time GTA/GRA is expected to work 10 hours per week. Accepting an assistantship implies an obligation on the part of the student. Students supported by an assistantship are expected to fulfill their roles as students, meeting all academic requirements, as well as carrying out teaching and/or research assignments. Students who do not maintain good academic standing, as defined in the UA Graduate School, are not eligible for assistantships.

Assistantships may also be terminated by faculty advisors for unsatisfactory performance of the assigned research and/or teaching duties, as defined by ECE Department GRA/GTA Student Employee Performance Standards. The ECE Department is not obligated to provide funding for students terminated from their positions. Additionally, the possibility of future funding requires continued enrollment in the electrical and computer engineering graduate program, the availability of funding, and satisfactory progress toward degree objectives. It should be noted that a loss in funding does not equal dismissal from a program, for students in good academic standing and who have not been found to have committed misconduct worthy of dismissal.

Domestic students may be eligible for student loans and other financial aid and should visit the UA Financial Aid Office website to learn more about these options.

Additional support is available in the form of fellowships, available from the University and other funding agencies. Applicants are encouraged to visit the Graduate School website to learn more about these opportunities, application requirements and deadlines. Some professional societies also offer assistance to new graduate students.

Qualified applicants are encouraged to apply for fellowships like the NSF Graduate Research Fellowship, the DoD SMART Fellowship, the Alabama Space Grant Consortium Fellowship, and UA's Graduate Council Fellowship. Note that most of these have early application deadlines and some require interaction with a nominating faculty member.

Additional information can be found on the Financial Assistance page of the Graduate Catalog.

Department of Mechanical Engineering

The **MSME** degree can be pursued by taking one of two approaches. One plan is based on both coursework and research and the presentation and submission of a thesis (Plan I). The other plan is based on coursework and the completion of a comprehensive exam (Plan II). The Plan II option is available via distance to off-campus students residing within the borders of the United States or serving on a U.S. military installation. For more information on online Master of Science in Mechanical Engineering

see UA Online Degree Programs. We are confident that distance education students will have a great opportunity to obtain their degrees with minimal travel or job disruption. For on-campus students, there is also an option to pursue the MSME while simultaneously pursuing a business degree.

The **PhD** degree is based on coursework as well as a heavy research component. This degree provides graduates with the background needed to become experts in their selected area of specialization. This program is also offered via the distance option. For more information on online PhD in Mechanical Engineering see UA Online Degree Programs. We are confident that distance education students will have a great opportunity to obtain their degrees with minimal travel or job disruption. Applicants interested in the distance approach are encouraged to contact faculty members in the area of research interest to inquire about the formulation of a research project that is suitable for completion via distance. Note that the distance option is restricted to students residing within the borders of the United States or serving on a U.S. military installation.

During the first semester, a student enrolled in any graduate program should identify a primary faculty advisor and become familiar with all the required forms and deadlines associated with their respective program.

Both of the programs described above and linked below are available to The University of Alabama Mechanical Engineering students interested in starting their graduate program early. The **Accelerated Master's Program** allows qualified BSME students to double-count a limited amount of graduate course credit toward their undergraduate degree. Additional information is available in the links below as well as on specific UA web pages related to this program.

- Majors
 - Mechanical Engineering, MS (p. 695)
 - Mechanical Engineering, PhD (p. 699)

In pursuing a graduate degree in Mechanical Engineering, many MSME students and all PhD students conduct research in an area of interest and under the direction of a faculty member advisor. That research enables students to use novel solution techniques and state-of-the-art experimental instrumentation, depending on the particular topic of research that the student and faculty member decide to pursue. Students are able to solve unanswered problems, develop new analysis, computational, or experimental methods, and test their hypotheses as they become the expert on their chosen research topic.

As part of developing, writing, and defending a dissertation, students receive feedback and advice from both their faculty advisor as well as their dissertation committee. This approach allows students to receive guidance that helps them look at a novel problem from various perspectives. While conducting their research, students have access to a range of computational and/or experimental facilities and are able to work alongside other students conducting research in related areas. On-campus students typically conduct their research while receiving some sort of assistantship or fellowship. That support provides tuition, health insurance, and a monthly stipend. Students are encouraged to communicate directly with potential faculty to learn about possible research opportunities in their laboratories, open research positions, as well as internal fellowship opportunities. Given the nature of students participating in the distance program, applicants to that program are encouraged to contact faculty members in their area of research interest to learn about projects that are suitable to conduct from a location remote to campus. Prior to enrolling, all applicants are welcome to schedule a campus visit through our graduate program director. Such a visit provides a means to meet graduate students and faculty while simultaneously learning about various research opportunities. While

touring, applicants also see the College of Engineering campus, a beautiful modern multi-building complex with easy access to the central part of campus and transportation facilities. All on-campus PhD students are provided access to these facilities along with dedicated office space.

Department Head

- Shepard, W. Steve

Director of Graduate Programs

- Srinivasan, Kalyan

Professors

- Agrawal, Ajay K.
- Balasubramanian, Bharat
- Krishnan, Sundar Rajan
- Shen, Xiangrong

- Woodbury, Keith A.

ME501 Mech Engr Analysis I

Hours 3

This course is designed to provide the graduate students with fundamental concepts of advanced mathematical analysis of continuous and discrete mechanical engineering systems. The course includes intensive discussion of ordinary differential equations, Fourier analysis, and advanced vector calculus with applications to dynamic systems, heat transfer as well as fluid and solid mechanics.

ME506 Found Thermal Power Gen

Hours 3

Thermal power systems; components, process analysis and modeling, fuels, combustion, environmental aspects, and availability analysis in steam and gas turbine plants. Examination of recent trends such as cogeneration and combined cycles.

[View All Courses](#)

Mechanical Engineering, MS

While pursuing a Master of Science in Mechanical Engineering (MSME), the student will take graduate-level courses and may conduct research with a faculty advisor and observe how these studies will lead to key engineering innovations and societal impacts in the field of mechanical engineering. Equipped with complementary and state-of-the-art computational and experimental facilities, the Mechanical Engineering Department has active research programs in the following three disciplinary groups; Dynamic Systems & Control (DSC), ThermoFluids Science (TFS), and Materials Processing & Manufacturing (MPM). Faculty teach graduate-level courses and conduct research in cross-disciplinary thrust areas that include: automotive systems, robotics and human systems, automation and mechatronic systems, energy and building efficiency, internal combustion engines, manufacturing systems, additive manufacturing, and materials processing and modeling. Graduate courses in these areas, in addition to the general core graduate courses, provide the foundation for earning an MSME degree.

In addition to offering a thesis and non-thesis master's degree for the traditional on-campus student, the non-thesis master's degree is available as a distance degree. This distance option is available to students residing within the United States or serving abroad at a U.S. military installation. For more information on the online Master of Science in Mechanical Engineering, see the departmental program web page as well as the specific UA Online Degree Program. We are confident that distance education students have a great opportunity to obtain their degrees with minimal travel or job disruption.

Students and faculty in the Department of Mechanical Engineering have access to state-of-the-art computational facilities and capabilities. On-campus assets include numerous commercially available computational modeling software packages. In addition, high performance computing capabilities are accessible through The University of Alabama's Office of Information Technology.

Qualified students in the Mechanical Engineering undergraduate program at The University of Alabama are eligible for early admission into the

MSME program through the Accelerated Master's Program (AMP). This program allows students to double-count up to 9 hours of graduate credit toward their undergraduate degree.

Admissions

The following is in addition to the minimum Graduate School admission requirements. To be considered for regular admission to the Main Campus (MA) or Distance Learning (DL) MSME program, prospective applicants should have:

- A Bachelor's degree, at the time of initial enrollment, in mechanical engineering or related field (see below).
- A current resume.
- A concise Statement of Purpose. This short document should describe the reasons for pursuing an advanced degree as well as possible research interests. Those interested in funding support should consult the Funding for Students section.
- Three letters from recommenders (waived for University of Alabama graduates). These recommenders may be previous faculty or supervisors.
- A residence within the borders of the US or serving on a US military installation (DL applicants only).
- If you are a non-native English speaker, you may be required to submit an English language score report. Please see the admission section link for details.

Note that there are specific admissions requirements for UA undergraduates interested in the Accelerated Master's Program as well as graduates interested in the Dual MSME/MBA Program. See the appropriate section(s) of this catalog for additional information.

Non-BSME Applicants

Applicants who hold, or will hold, a BS or MS degree in a discipline other than Mechanical Engineering may apply for admission to the MSME program. However, there is a basic level of undergraduate understanding that applicants are expected to have upon entering the program. The following prerequisite undergraduate courses (or acceptable equivalents) are expected:

- Mathematics: Calculus (usually 12 semester credit hours) and Ordinary Differential Equations
- Chemistry: General Chemistry (usually 4 semester credit hours)
- Physics: Calculus-Based Physics (usually 8 semester credit hours)

Further, individual advisors/thesis committee chairs reserve the right to require admitted students to take undergraduate coursework necessary for students to gain understanding in foundational topics. Credit in undergraduate coursework will not count toward any curricular requirements for MSME degree completion.

Application Deadlines

There are no formal deadlines for MSME applications to the Department of Mechanical Engineering. Once an application is complete, the internal review process typically only takes a few weeks. International applicants should consider the time required to obtain any necessary visa documents.

Curricular Requirements

MSME Curriculum Overview

The MSME program is offered with both a thesis option (Plan I) as well as a non-thesis option (Plan II). Designation of the selected program is

not required or expected at the time of application. All MSME students on teaching or research assistantships in the department are expected to pursue the thesis option (see Funding for Students section). All thesis MSME students should develop a plan of coursework to satisfy their curricular requirements (see below) in coordination with their faculty advisors.

Unless prior arrangements are made with an advising faculty member, Distance Learning (DL) students are expected to pursue the non-thesis option, which includes a comprehensive examination.

MSME Curriculum Requirements

All MSME students must complete the 30-hour curriculum requirement through the following three areas:

1. MSME Core Area Course Requirements Hours

The first two courses are chosen based on the student's area of study interest. That is, select one of the following Major Core Areas and then complete at least two courses from that list.

Dynamic Systems and Control (DSC) Core		
ME 556	Mechatronics	3
ME 562	Intermediate Dynamics	3
ME 575	Control Systems Analysis	3
ME 577	Advanced Linear Control	3
Materials Processing and Manufacturing (MPM) Core		
ME 538	Modeling of Deformation 1	3
ME 540	Failure of Engr Materials	3
ME 544	Forming Processes	3
ME 583	Additive Manufacturing	3
ME 585	Microfabrication	3
ThermoFluids Science (TFS) Core		
ME 505	Intermediate Thermodynamics	3
ME 509	Intermed Heat Transfer	3
ME 511	Cmp Heat Transfer & Fluid Flow	3
ME 560	Thermal Fluid Meas. & Analysis	3
AEM 500	Intermediate Fluid Mechanics	3

2. MSME Mathematics Core Requirements Hours

The second two courses are selected to satisfy the mathematics area core requirement. That is, complete at least two courses from the following list. Note that other courses may be petitioned as fulfilling the math requirement upon permission of the student's faculty advisor.

ME 501	Mech Engr Analysis I	3
GES 500	Engineering Statistics	3
GES 551	Matrix And Vector Analysis	3
GES 554	Partial Diff Equations	3
ST 560	Statistical Methods	3

3. MSME Research and/or Elective Course Requirements Hours

The final courses and/or research hours will depend on the MSME plan being pursued. One of the following is required:

ME 599	Thesis Research (Plan I, Thesis Option)	6
ME 598	Non-Thesis Research (Plan II, Comprehensive Exam Option)	3

With the remaining hours coming from a selection of the following:

ME 500-level, and/or

ME 600-level, and/or

AEM 500-level, and/or

CHE 500-level, and/or

CE 500-level, and/or

CS 500-level, and/or

ECE 500-level

GES 500-level, and/or

MTE 500-level, and/or

Note that no more than 50% of these hours may be from outside Mechanical Engineering (ME) without advisor approval. Courses not contained by the parameters of this list must have advisor approval.

Energy Systems Concentration

MSME students may choose to earn an Energy Systems concentration as part of their MSME degree. For such students, their curriculum will be developed in coordination with their graduate advisor who is a faculty member in the TFS Mechanical Engineering Departmental Disciplinary Group (DDG).

Each student in the Energy Systems concentration must take 6 hours of basic TFS courses (not taken as part of the MSME TFS core) and 6 hours of Elective TFS courses (see below for the course list).

Energy Systems Concentration		Hours
Required Core Courses		6
Select two (2) courses not taken in TFS core		
ME 505	Intermediate Thermodynamics	3
ME 509	Intermed Heat Transfer	3
ME 511	Cmp Heat Transfer & Fluid Flow	3
ME 560	Thermal Fluid Meas. & Analysis	3
AEM 500	Intermediate Fluid Mechanics	3
Required Elective Courses		6
Select at least two (2) courses from the following:		
ME 506	Found Thermal Power Gen	3
ME 514	Principles of Combustion I	3
ME 516	Fnd Energy Conserv & Mgt	3
ME 526	Internal Combustion Engines	0 or 3
ME 607	Conduction Heat Transfer	3
ME 618	Princ Of Combustion II	3
Total Hours		12

Other Coursework: Thesis or Non-Thesis Plans (Plan I or Plan II) (6 hours)

The non-thesis plan is intended primarily for (1) students employed full-time in government or industry, (2) doctoral students pursuing research and seeking to establish a foundational coursework experience, and (3) self-supported on-campus or UA Online students. Thesis research credits may not be used to satisfy the hour requirements for the non-thesis Plan II MSME degree.

Six hours of Research (Plan I) or elective courses (Plan II)

1. Thesis (Plan I) – six (6) hours of ME 599 Thesis Research. Plan I MSME students must conduct research, prepare a thesis document, and present and defend it to their thesis committee.
2. Non-Thesis (Plan II) – One graduate level elective course (as approved by the advisor). and ME 598 Non-Thesis Research. Plan II MSME students must pass a comprehensive exam, typically taken

during the final semester of study, as part of the ME 598 course. Refer to the Comprehensive Exam section.

Transfer Credit

For information on transfer credit, refer to the UA graduate catalog or click on the highlighted text. Note that new students should not apply for transfer credit until after they have started their first set of courses at UA.

Accelerated Master's Program

Current Mechanical Engineering (ME) and Aerospace Engineering and Mechanics (AEM) undergraduate students at The University of Alabama with a sufficiently high GPA and the required number of undergraduate course credit hours are eligible to apply for the Accelerated Master's Program (AMP). For additional information on the Accelerated Master's Program, please refer to the UA graduate catalog or click on the highlighted text. AMP is also available for distance students currently enrolled in our undergraduate (BSME) program as well as students in the dual MSME/MBA Program.

Dual MSME/MBA Program

Students may be simultaneously enrolled in the MSME and MBA Programs at The University of Alabama (including STEM path to MBA).

This dual program provides an overall reduced course credit hour requirement for both degrees through the double-counting of various courses. Both degrees must be earned at the same time to take advantage of this program. Students interested in the Dual MSME/MBA Program must apply to each degree program separately and the two applications are reviewed for admission separately by each respective program. Please contact the Mechanical Engineering Department for more information on the Dual MSME/MBA Program.

Plan I - Thesis Requirements

The MSME degree Thesis-Option (Plan I) is obtained by successfully completing the following requirements:

- Complete 24 hours of graduate-level course work (500-level and above) approved by the committee, where:
 - 12 semester course hours are in the major area, with 6 hours taken from the approved major core area (see above list). Major area courses are ME and ME cross-listed courses. Three (3) hours of approved coursework in a closely allied area may be used with additional hours requiring advisor approval.
 - 6 hours are in the mathematics core area (see above list).
 - Any transfer credit request is submitted electronically after classes start and within the first year.
- Pass 6 hours of ME 599 Thesis Research (does not impact GPA),
- Complete and present a thesis (see additional information in the section below), and
- Submit a course portfolio to the MSME thesis committee and have the thesis committee chair (faculty advisor) submit the forms evaluating that portfolio to the ME Graduate Program Director (currently, via a Qualtrics Survey). This information is not submitted to the UA Graduate School.

Plan II - Non-Thesis Requirements

The MSME degree Non-Thesis Option (Plan II) is obtained by successfully completing the following requirements:

- Complete 30 hours of graduate-level course work (500-level and above) approved by the committee, where:

- 18 semester course hours are in the major area, with 6 hours being selected from the approved major core area (see list above). Major area courses are ME and ME cross-listed courses. Three (3) hours of approved coursework in a closely allied area may be used with additional hours requiring advisor approval.
- 6 hours are in the mathematics core area (see list above).
- 3 hours of ME 598 Non-Thesis Research as part of the comprehensive exam process (see below).
- Any transfer credit request is submitted electronically after classes start and within the first year.
- This program differs slightly for students in the dual MSME/MBA program. A chart outlining this program is available upon request.
- Pass a comprehensive exam (see below), and
- Submit a course portfolio to the faculty advisor (who facilitates the comprehensive exam through ME 598), who will submit the forms evaluating that portfolio to the ME Graduate Program Director (currently, via a Qualtrics Survey). This information is not submitted to the UA Graduate School.

Comprehensive Exams

Students pursuing the MSME Plan II option will enroll in 3 hours of a section of ME 598:Non-Thesis Research under a faculty member, who will serve as the “major professor / research advisor” for the student’s culminating experience. The culminating experience should be undertaken in the student’s final semester of the MSME degree program (i.e., the semester in which the student is completing all other curricular requirements). Also, the availability of a specific ME 598 section under a specific faculty advisor is limited and first-come first-served; students should register with any open section, understanding that the faculty member on record for that section may not be in the student’s specific area of interest. Students pursuing the MSME Plan II degree will have the following options to satisfy the requirement of a culminating experience/comprehensive exam:

- **Option 1:** Complete a **capstone project** and receive faculty advisor approval for the associated written report. This project is an in-depth study of a topic that must be approved by the student’s research advisor, an ME faculty member the student selects based on mutual research interests. While the project is not as comprehensive as a thesis, it must integrate knowledge and concepts from more than one of the program courses. Students are required to submit a written report drafted in accordance with the UA thesis/dissertation format guidelines found here: <https://graduate.ua.edu/students/thesis-and-dissertation/>. The approved written report for the culminating experience must be submitted to the research advisor, providing sufficient time to evaluate and potentially require edits prior to the comprehensive exam deadline for the term of graduation. Students must also submit a graduate course portfolio as part of this process (see below).
- **Option 2:** Complete an **Internship or practicum** and receive faculty advisor approval for the written report detailing how the student used/continues to use knowledge gained from the MSME core courses in their internship/practicum experience. The written report will need to be drafted in accordance with the UA thesis/dissertation format guidelines found here: <https://graduate.ua.edu/students/thesis-and-dissertation/>. The approved written report for the culminating experience must be submitted to the research advisor, providing sufficient time to evaluate and potentially require edits prior to the comprehensive exam deadline for the term of

graduation. Students must also submit a graduate course portfolio as part of this process (see below).

- **Option 3:** Pass the **PhD qualifying examination** in accordance with the ME Department policies outlined here: <https://catalog.ua.edu/graduate/engineering/mechanical/phd/#requirementstext>. Students must also submit a graduate course portfolio as part of this process (see below).

All students regardless of whether they choose Option 1, Option 2 or Option 3 **must** submit a **graduate course portfolio**, which is a short presentation summarizing the learning outcomes from 3 to 5 graduate-level courses. The research advisor can provide information on satisfying this requirement.

Thesis Process Requirements

Students in the MSME thesis program (Plan I) must describe their completed research in a thesis document that is presented to the committee. To accomplish this, students must:

- Complete the electronic thesis committee formation form,
- Submit the completed thesis to the thesis committee two weeks prior to the presentation,
- Present the research described in the thesis to the thesis committee, which satisfies UA’s comprehensive exam requirement, and
- Upload the revised (if necessary) final approved thesis and the *required electronic forms* to the graduate school web site prior to the deadline for the intended semester of graduation (see below).
- Students are also expected to submit a course portfolio for evaluation per the requirements stated above.

Note that students are expected to give thesis presentations, proposal presentations, exam presentations, and dissertation defenses in person with the full committee in attendance. In the case of time conflicts, students are furthermore expected to reschedule a presentation to minimize the need for virtual participation. In the event it is not possible for all members to attend in person even with rescheduling, a presentation may occur with the student and at least a majority of the committee participating in person and the remainder of the committee participating virtually in accordance with The University’s policy on virtual participation. Under extenuating circumstances, when the student and a majority of the committee cannot attend in person, the thesis committee chair may petition the Graduate Program Coordinator or the Department Head for an exception by providing details as to why rescheduling the event will not enable one of the two acceptable formats to be used.

Time Limits for Degree Completion

For information on time limits for degree completion, refer to the UA graduate catalog or click on the highlighted text.

Academic Misconduct

The Mechanical Engineering Department expects all students to adhere to The University’s policy on academic conduct. Please refer to the UA graduate catalog or click on the highlighted text for more information.

Withdrawals and Leave of Absence

The ME department adheres to The University’s policies on withdrawals and leaves of absence.

Academic Grievances

For information on academic grievances, refer to the UA graduate catalog or click on the highlighted text.

Grades and Academic Standing

The ME department expects all graduate students to remain in good academic standing. Graduate school policies on grades and academic standing can be accessed in the UA graduate catalog page or by clicking on the highlighted text.

Graduate School Deadlines

Important information regarding deadlines for graduation, including thesis submission and comprehensive exam deadlines can be found on the UA graduate catalog page or by clicking on the highlighted text.

Application for Graduation

Information regarding the application for graduation can be found on the UA graduate catalog page or by clicking on the highlighted text. Students are expected to apply for graduation prior to the deadlines posted by the graduate school for the respective term of graduation.

Note that funding is not provided at the department level nor is funding considered during the admissions process. Funding is requested (GTA) or granted (GRA) by **individual** faculty members within the department. If you are an unconditionally admitted full-time main campus (MA) MSME graduate student interested in seeking some form of financial assistance through a fellowship or graduate assistantship, please read this page carefully. Applicants contacting the graduate coordinator or department head with a request for funding will be redirected to this page.

Assistantships and fellowships generally include a monthly stipend, tuition, and health insurance. Because the financial assistance application process is **separate** from the admissions process, applicants are encouraged to learn about different funding options and **how to pursue funding**. Due to the nature of these opportunities, only main campus (MA) students completing an MSME thesis are eligible for assistantships and fellowships. Note that offers of funding can only be made to applicants that have been admitted to the program.

Furthermore, **applicants should not contact the Graduate Program Director or the ME Department Head with a specific request for funding**.

Additional information on funding and academic requirements for maintaining funding can be found in the Financial Assistance section of the Graduate Catalog.

Graduate Research Assistantships (GRAs) are awarded by individual professors with funded research. Applicants should communicate directly with a faculty member in the applicant's area of study interest concerning the availability of GRA positions and a potential match. Visit the department website for additional information about research areas. Funding is not considered during the admission process.

Furthermore, requests for funding are not handled by the Graduate Program Director. While the Graduate Program Director is happy to answer questions regarding the process of seeking a GRA, please do not contact the Graduate Program Director or Department Head with a direct request for a GRA.

The ME Department also offers **Graduate Teaching Assistantships (GTAs)** for students assisting faculty members with undergraduate courses and laboratories. There are a very limited number of GTA positions each semester and those are typically reserved for current PhD students, though there may be exceptions. A university-wide requirement for all GTAs is that they should either have English as their native language or have successfully completed an English language proficiency course and passed an English language proficiency exam administered by UA's English Language Institute. The English language proficiency exam and course process typically require at least one semester. To obtain GTA funding, it is necessary to work with a faculty member to inquire

about the possibility of obtaining a teaching assistantship. While GTA awards are determined by the ME Department Head, applicants should not contact the Department Head or the Graduate Program Director requesting a GTA. **All requests for GTAs must come from a faculty member interested in recruiting the student/applicant.**

MSME students supported by assistantships are expected to follow the Plan I Thesis Option, as described in the Graduate Catalog.

Half-time assistants must register for at least six credit hours of graduate credit during the semester. In addition, assistants are expected to perform 20 hours of work per week as part of their position. Accepting an assistantship implies an obligation on the part of the student. Students supported by an assistantship are expected to fulfill their roles as students, meeting all academic requirements, as well as carrying out teaching and/or research assignments. Students who do not maintain good academic standing, as defined in the UA Graduate School, are not eligible for assistantships. Assistantships may also be terminated for unsatisfactory performance of the assigned research and/or teaching duties or for not maintaining satisfactory academic performance.

Domestic students may be eligible for student loans and other financial aid and should visit the UA Financial Aid Office website to learn more about these options.

Additional support is available in the form of **fellowships**, available from The University and other funding agencies. Applicants are encouraged to visit the Graduate School and Mechanical Engineering websites to learn more about these opportunities, application requirements, and deadlines.

Some professional societies also offer assistance to new graduate students. Qualified applicants are encouraged to learn more about fellowships like the NSF Graduate Research Fellowship, the DoD SMART Scholarship, the Alabama Space Grant Consortium Fellowship, and UA's Graduate Council, National Alumni Association, and McNair Fellowships.

Note that most of these have early application deadlines and some require interaction with and support from a nominating faculty member.

For example, **nominations for the UA Graduate Council Fellowship must come from an ME faculty member interested in recruiting the applicant.**

While the Graduate Program Director can answer questions about the fellowship and faculty-based nomination process, please do not contact the Graduate Program Director or the Department Head specifically asking to be nominated.

Additional information on funding and academic requirements for maintaining funding can be found in the Financial Assistance section of the Graduate Catalog.

Mechanical Engineering, Ph.D.

While pursuing a Doctor of Philosophy (PhD) degree in mechanical engineering, the student will take graduate-level courses and conduct research with a faculty advisor and observe how these studies will lead to key engineering innovations and societal impacts in the field of mechanical engineering. Equipped with complementary and state-of-the-art computational and experimental facilities, the Mechanical Engineering Department has active research programs in the following three disciplinary groups; Dynamic Systems & Control (DSC), ThermoFluids Science (TFS), and Materials Processing & Manufacturing (MPM). Faculty teach graduate-level courses and conduct research in cross-disciplinary research thrust areas that include: automotive systems, robotics and human systems, automation and mechatronic systems, energy and building efficiency, internal combustion engines, manufacturing systems, additive manufacturing, and materials processing and modeling. Graduate courses in these areas, in addition to the general core graduate courses, provide the foundation for earning

a PhD degree in mechanical engineering. The student must demonstrate mastery of the selected study area through the qualifying exam, the proposal of a research topic, and the defense of a research-based dissertation. In addition to conducting research, the student also gains teaching experience through a practicum.

In addition to the traditional on-campus degree offering, the PhD program in mechanical engineering is also offered via the online option. The online option is available to students residing within the United States or serving abroad at a U.S. military installation, with performance expectations being identical to those of the on-campus program. For more information on the online PhD in Mechanical Engineering, see the departmental web page as well as the UA Online Degree Program. We are confident that online education students have a great opportunity to obtain their degrees with minimal travel or job disruption. Applicants interested in the online option are encouraged to contact faculty members in the area of research interest to inquire about the formulation of a research project suitable for completion via online education as well as any on-campus visits that individual faculty may require.

Students and faculty in the Department of Mechanical Engineering have access to state-of-the-art computational facilities and experimental capabilities. On-campus assets include numerous commercially available computational modeling software packages. In addition, high performance computing capabilities are accessible through The University of Alabama's Office of Information Technology. The department also has many state-of-the-art experimental facilities available for daily use by graduate students.

Qualified students in the Mechanical Engineering undergraduate program at The University of Alabama are eligible for early admission into the PhD program through the Accelerated Masters Program (AMP). This program allows students to double-count up to 9 hours of graduate credit toward their undergraduate degree.

Admission

Application Deadlines

The Department of Mechanical Engineering only offers admission in the Fall semester. The application deadline for admission to the Fall semester is December 1 of the preceding year.

The application deadline is administered in order to allow enough time to properly process application and (if admitted) process visa, funding, and on-boarding paperwork. As such, the application deadline is absolute, and no application will be considered after the deadline. Applicants who submit after the deadline will be considered for the following year.

Application Package and Materials

Students may apply to the PhD program having completed either a BS degree in Mechanical Engineering or a closely related field (i.e., direct-admit), or a BS and MS degree in Mechanical Engineering or a closely related field. In addition to the Graduate School's general application requirement for advanced degrees, applications require and/or are judged upon the following (note that these are minimum requirements for review of application, not admission to the program):

- A minimum of 3.5 GPA in the students last-completed degree.
- A current CV.
- A concise statement of purpose describing interests in an advanced degree, research interests, and faculty interests.
- Three letters from recommenders, including previous faculty or supervisors (note: this is waived for applicants from the UA BSME or MSME).

- If you are a non-native English speaker, you may be required to submit an English language score report. Please consult the UA Graduate School catalog for further information.
- Distance learning applicants only: A residence within the borders of the US or serving on a US military installation.

Applicants Without a Prior Mechanical Engineering Degree

Applicants who hold a BS or MS degree in a discipline other than Mechanical Engineering may apply for admission to the PhD program. However, there is a basic level of undergraduate understanding that applicants are expected to have upon entering the program. The following prerequisite undergraduate courses (or acceptable equivalents) are expected:

- Mathematics: Calculus (usually 12 semester credit hours and Ordinary Differential Equations)
- Chemistry: General Chemistry (usually 4 semester credit hours)
- Physics: Calculus-Based Physics (usually 8 semester credit hours)

Further, individual advisors/dissertation committee chairs reserve the right to require admitted students to take undergraduate coursework necessary for students to gain understanding in foundational topics. Credit in undergraduate coursework will not count toward any curricular requirements for PhD or MSME degree completion.

Curricular Requirements

Curriculum Overview

The PhD in Mechanical Engineering is obtained by successfully completing the following requirements (in approximate order of completion):

- Form dissertation committee, which may be revised at any time during a student's studies (see section: Formation of Committee).
- Complete 39 hours of coursework, where:
 - 18 credit hours are in a major area, of which 9 hours may be in approved, closely related supporting fields upon written request and approval of the Department (see subsection: Coursework Requirements).
 - 9 credit hours are in any minor technical area (see subsection: Coursework Requirements).
 - No more than 18 credit hours of coursework may be transferred from previous graduate studies (see section: Transfer Credit). Note that 30 credit hours may count toward an en route MSME degree (see section: En route MSME Degree).
 - Each student is required to complete a mentored instruction experience, which includes successful completion of ENGR 501 (See subsection: Mentored Instructional Experience).
- Be admitted to candidacy by passing the Qualifying Examination/Research Proposal (see section: Admission to Candidacy).
 - Students must be in the process of completing at least 24 credits toward the required 39 to be admitted to candidacy.
 - The entire dissertation committee must submit a "Graduate Outcome Assessment" form to the Graduate Program Director in the Department of Mechanical Engineering prior to departmental approval for the "Admission to Candidacy" form.
 - The advisor/dissertation committee chair must submit the "Admission to Candidacy" form to be approved by the Graduate Program Director in the Department of Mechanical Engineering, as well as the Graduate School.

- The Qualifying Examination / Research Proposal is not considered passed until the "Admission to Candidacy" form is finalized.
- Students must be admitted to candidacy at least nine months prior to their final Dissertation Defense.
- Pass 18 credit hours of ME 699 Dissertation Research.
 - Students may not register for ME 699 until the semester after which the "Admission to Candidacy" form is finalized.
 - ME 699 is Pass/Fail, does not impact GPA, and does not count toward the 39 credit hours of required coursework.
 - Credit hours of ME 698 do not count toward the requirement of 18 credit hours for ME 699.
 - Note: there is a continuous registration requirement for ME 699 (see subsection: Continuous Enrollment Policy).
- Present, defend, and upload the final dissertation along with the required electronic forms to the Graduate School website prior to the deadline for graduation in the desired semester (see section: Dissertation Requirements).
 - Students must be in the process of completing all curriculum requirements
 - The entire dissertation committee must submit a "Graduate Outcome Assessment" form to the Graduate Program Director in the Department of Mechanical Engineering prior to departmental approval of the "Final Defense" form. this is in addition to the submission of the "Graduate Outcome Assessment" form at the time of the Qualifying Examination/Research Proposal.
 - The advisor/dissertation committee chair will submit the "Final Defense" form, to be approved by the Graduate Program Director in the Department of Mechanical Engineering, as well as the Graduate School.

Coursework Requirements

All PhD students in Mechanical Engineering must complete the minimum of 39 non-dissertation credit hours of coursework and the minimum of 18 credit hours of post-Admission to Candidacy dissertation research through the following four areas, and no more than 50% of these courses being from outside Mechanical Engineering (ME) without approval by the advisor/dissertation committee.

Ph.D. Curriculum Requirements

	Hours
1. Major Core Area	21
ME 500-level and/or	
ME 600-level and/or	
AEM 500-level and/or	
CE 500-level, and/or	
CHE 500-level, and/or	
CS 500-level, and/or	
ECE 500-level and/or	
GES 500-level, and/or	
MTE 500-level.	
Note that other courses require advisor approval.	
2. Minor Technical Area	9
ME 500-level, and/or	
ME 600-level, and/or	
AEM 500-level, and/or	
CE 500-level, and/or	
CHE 500-level, and/or	
CS 500-level, and/or	

ECE 500-level and/or

GES 500-level, and/or

MTE 500-level.

Note that other courses require advisor approval.

3. Elective Area **9**

ME 500-level, and/or

ME 600-level, and/or

AEM 500-level, and/or

CE 500-level, and/or

CHE 500-level, and/or

CS 500-level, and/or

ECE 500-level and/or

GES 500-level, and/or

MTE 500-level.

Note that other courses require advisor approval.

4. Dissertation Research **18**

ME 699 Dissertation Research

*Restrictions and Notes

1. At least 50% of the 39 non-dissertation coursework credit hours must be ME 500- or 600-level.

2. Students are limited to only 6 credit hours of ME 591/594/691/694 courses per instructor/faculty member.

3. Students are limited to a total of only 6 credit hours of ME 594/694 courses.

4. ME 698 (Non-Dissertation Research) will not count toward the total hours required in this table.

Total Hours **57**

Mentored Instructional Experience

In their careers, PhD engineers are expected to be thought leaders, mentors, trainers of other developing professionals, and communicators with a variety of audiences. Therefore, in addition to technical training in their discipline, all UA College of Engineering PhD students will have a Mentored Instructional Experience (MIE) that will enhance their abilities in these critical areas of communication, giving and receiving formal feedback, mentoring, and training, as well as deepen their discipline-specific knowledge through educational support experiences (typically office hours, laboratory instruction, conducting recitation, preparing instructional materials, and guiding in-course design teams of undergraduate students).

All PhD students will receive pedagogical training in these instructional support areas through a pedagogy practicum course. Students will be required to take one semester of ENGR 501 Engineering Instruction Prep, which will not count towards the 39 credit hours of required coursework or the 18 credits of dissertation research (ME 699) required for the PhD degree. In addition, each student shall complete a set of instructional experiences during designated semesters (2 semesters at 10 hours/week, 4 semesters at 5 hours/week, or the equivalent) under the guidance of a faculty mentor.

This additional instructional practice is a graduation requirement.

Restrictions on 59X/69X Courses

Of the minimum 39 credit hours or coursework necessary for the PhD, student may take a maximum of 6 hours of either ME 591/ME 691 Special Topics or ME 594/ME 694 Independent Research Topics from any single professor in any department (i.e., a student may take more than 6

credit of ME 591/ME 691 if they are from course offerings from multiple professors, though students are limited to a total of 6 credits of ME 594.

Graduate Seminar

All PhD students, irrespective of year of graduate studies, are required to attend all graduate seminars hosted by the Department of Mechanical Engineering, with a minimum of 75% attendance. Each semester's list of graduate seminars will be published on the department website prior to the start of the semester and disseminated to students via email.

Minimum Credit Enrollment Requirements

All students funded by GRA or GTA, or students holding international visas, must register for at least 6 graduate-level credit hours during the semester. Note that if it is the student's final semester, they may register for a reduced number of ME 699 credits (see subsection: Continuous Enrollment Policy).

For whatever reason if a student is below 6 credit hours (e.g. lack of relevant courses, completion of required coursework), but has not yet met the requirements to being registering for ME 699 (i.e., their "Admission to Candidacy" form has not received final approval), they may register for ME 698, which will not count toward any curricular requirements, neither the 39 credit hours necessary for coursework nor the 18 credit hours of ME 699.

Continuous Enrollment Policy

Graduate School Information on the Continuous Enrollment Policy (Continual Doctoral Research Hours Registration) can be found here.

Student Progress Requirement

Students are expected to maintain satisfactory academic progress each semester. Students that do not remain in good academic standing and/or fail complete their assigned research in a satisfactory manner may be dismissed from the program.

Transfer Credit

For students entering the PhD program with prior graduate-level coursework in Mechanical Engineering or a closely related field, maximum of 18 credit can be transferred toward the PhD program's minimum requirement of 39 credits. In general, the transfer of course hours is subject to approval by both the Department of Mechanical Engineering as well as the Graduate School. Transfer credit requests are submitted electronically, as described below, only after the start of classes and within a student's first year.

For students that completed an MS degree prior to entering the PhD program, they may opt for a block transfer of credit. For students that did not complete an MS degree prior to entering the PhD program, they will be required to find the closest equivalent course at the University of Alabama for transfer on a course-by-course basis.

Students are required to initiate the process of credit transfer via the "Request for Transfer of Graduate Credit" form. For students whose prior graduate-level coursework was completed more than 6 years prior to their UA PhD admission date, they must initiate the process via the "Field-Related Employment Since Earning Master's Degree" form. Forms regarding credit transfer can be accessed here.

Formation of Dissertation Committee

Students must identify an advisor who will serve as their dissertation committee chair, as well as professors who will serve on their dissertation committee. Students are required to initiate the "Appointment/Change

of Doctoral Dissertation Committee" form. An approved and up-to-date form must be on file with the Graduate School before both the student's Qualifying Examination/Research Proposal and Dissertation Defense. The form can be access here.

The makeup of the dissertation committee is left to the student and their advisor/dissertation committee chair, granted that the dissertation committee comprises:

- An advisor/dissertation committee chair who is a professor or adjunct professor in the Department of Mechanical Engineering.
- At least five dissertation committee members in total, including the advisor/dissertation committee chair.
- A majority of member who are part of the graduate faculty in the Department of Mechanical Engineering.
- At least one external member, who can be a professor in a department outside of the Department of Mechanical Engineering, or a member external to the University of Alabama, granted that they have a PhD in Mechanical Engineering or a closely related field.

Admission to Candidacy

To be admitted to candidacy, students must successfully complete a Qualifying Exam/Research Proposal as described below. Note that students cannot complete their Qualifying Exam/Research Proposal or be admitted to candidacy until the semester in which they are completing at least 24 credit hours towards the total 39 credit hours necessary for degree completion. The Qualifying Exam/Research Proposal is not considered complete until:

- The student has completed their Qualifying Exam/Research Proposal and their dissertation committee has voted to pass.
- The dissertation committee has completed the "Graduate Outcome Assessment" form.
- The advisor/dissertation committee chair has completed the "admission to Candidacy" form and the form has been approved by both the Graduate Program Director in the Department of Mechanical Engineering as well as the Graduate School.

Qualifying Examination/Research Proposal

The specific format of the Qualifying Examination/Research Proposal is at the discretion of their dissertation committee, granted that there is an oral presentation associated with the Qualifying Examination/Research Proposal, and the student completes a Course Portfolio. While the Qualifying Examination component may be satisfied as part of the Research Proposal oral presentation, the dissertation committee may choose other avenues, including (but not limited to) a traditional written examination, an oral examination, a written paper, etc.

Note that Admission to Candidacy must be earned no earlier than the semester in which the student is completing at least 24 credit hours towards the total 39 credit hours necessary for degree completion, and at least nine months prior to the Dissertation Defense date. Also note that the Qualifying Examination/Research Proposal is not considered complete until finalization of the "Admission to Candidacy" form. Furthermore, student must have a finalized "Admission to Candidacy" form prior to registration of ME 699 Dissertation Research hours. This means, de facto, that the Qualifying Examination/Research Proposal should be take sufficiently prior to the add/drop deadline for the semester in which they plan to enroll in ME 699, to give ample time for the finalization of the "Admission to Candidacy" form. These factors should

be considered when consulting with the dissertation committee regarding the specific exam format and timing.

In addition to the specifics of the Qualifying Examination/Research Proposal decided upon by the dissertation committee, the student must also complete and present a Course Portfolio at the time of the Qualifying Examination/Research Proposal, which will be evaluated by the entire dissertation committee and assessed and submitted via the "Graduate Outcome Assessment" form. This evaluation typically occurs when the proposal is presented. The portfolio paperwork is not submitted to the Graduate School.

Upon completion of the Qualifying Examination/Research Proposal, the entire dissertation committee (including the advisor/dissertation committee chair) should complete the "Graduate Outcome Assessment" form. Upon completion by all dissertation committee members, the advisor/dissertation committee chair will then initiate the "Admission to Candidacy" form, which will be vetted and approved by the Graduate Program Director in the Department of Mechanical Engineering as well as the Graduate School.

The Qualifying Examination/Research Proposal may only be taken twice, failing which the student faces dismissal from the PhD program in Mechanical Engineering.

Dissertation Requirements

To successfully complete the Dissertation, student must:

- Have an up-to-date "appointment/Change of Doctoral Dissertation Committee" form on file with the Graduate School (see section: Formation of Dissertation Committee).
- Have been successfully admitted to candidacy at least 9 months prior to the Dissertation Defense date (see section: Admission to Candidacy).
- Complete a Dissertation Defense, comprising an oral presentation and examination defending the dissertation.
- Candidates must provide a written dissertation to the dissertation committee at least two weeks prior to the defense.
- Candidates must initiate the "Public Notice of Dissertation Defense" form at least two weeks prior to the defense.
- The entire dissertation committee must submit a "Graduate Outcome Assessment" form to the Graduate Program Director in the Department of Mechanical Engineering prior to departmental approval of the "Final Defense" form. This is in addition to the submission of the "Graduate Outcome Assessment" form at the time of the Qualifying Examination/Research Proposal.
- The advisor/dissertation committee chair will submit the "Final Defense" form, to be approved by the Graduate Program Director in the Department Mechanical Engineering, as well as the Graduate School.
- The candidate must upload the revised (if necessary) final approved dissertation in one of the approved formats to ProQuest.
- The advisor/dissertation committee chair must initiate, and the entire dissertation committee must complete the "Committee Acceptance Form for Electronic Dissertation".

Note that students are required to complete the oral portion of the Dissertation Defense in person with the full dissertation committee in attendance. In the case of time conflicts, student are expected to reschedule a presentation to minimize the need for virtual participation. In the event it is not possible for all dissertation committee members to attend in person even with rescheduling, a presentation may occur with the student and at least a majority of the dissertation committee

participating in-person and the remainder of the dissertation committee participating virtually in accordance with The University's policy on virtual participation. Under extenuating circumstances, when the student and a majority of the dissertation committee cannot attend in person, the advisor/dissertation committee chair may petition the Graduate Program Coordinator or the Department Head for an exception by providing details as to why rescheduling the event will not enable one of the two acceptable formats to be used.

En Route MSME Degree

PhD students may also pursue an en route MSME degree during their PhD studies. Students who wish to earn an MSME degree en route to their PhD degree must satisfy the MSME degree requirements as specified in that portion of the graduate catalog, including the completion of the ME 598 (note that ME 598 will not count toward any PHD curricular requirements, either the 39 credit hours necessary for coursework nor the 18 hours of ME 699). Upon completion of the MSME degree requirements the student must apply for the MSME degree program (separately from their application to the PhD program).

Per Graduate School restrictions, students with a prior MSME degree may not pursue an en route MSME degree.

AMP to PhD

Current BSME students at UA may pursue the AMP to PhD program, which allows for counting a limited number of coursework credits toward both the BSME and PhD curricular requirements. More information about the AMP program, including program and application requirements can be found [here](#).

In the AMP to PhD program, 9 credits of 500-level or higher coursework can be applied toward the curricular requirements of both the BSME and PhD degrees. Those courses will only count toward the technical electives or ME electives for the BSME degree but will count generally toward the curricular requirements of the PhD degree.

Per Graduate School restrictions, if a student wishes to pursue an en route MSME degree on the way to earning their PhD degree, the 9 credits of coursework applied to the BSME and PhDs degrees may not be counted toward the MSME degree. This effectively increases the credit requirement from 39 credit to 48 credits for AMP to PhD students wishing to earn an en route MSME degree. Further, if an AMP to MSME student decides to pursue a PhD degree after completion of their MSME degree, they can only count the 18 credits that were exclusively applied to their MSME degree toward the 39 credits necessary for degree completion.

Plan of Study

Graduate School information on the Doctoral Plan of Study can be found [here](#).

Time Limits for Degree Completion Requirements

Graduate School information on the time limits for degree completion can be found [here](#).

Academic Misconduct Information

The Department of Mechanical Engineering expects all students to be knowledgeable of and adhere to the University's policies on academic conduct, specified [here](#).

Withdrawals and Leave of Absence Information

Graduate School information on withdrawal and leave of absence can be found here.

Academic Grievances Information

University policies on academic grievances can be found here.

Grades and Academic Standing

Graduate School information on grades and academic standing can be found here.

Graduate School Deadlines Information

Graduate School information on deadlines can be found here.

Application for Graduation Information

Graduate School information on application for graduation can be found here.

Admission to the program does not imply that the student will be funded, whether through a graduate teaching assistantship (GTA), graduate research assistantship (GRA) or fellowship. Funding is requested (GTAs), granted (GRAs), or applied for (fellowships) **by individual faculty members** within the department, and **students should contact individual faculty in their area of research** to inquire about funding opportunities. **Applicants should not contact the Graduate Program Director, Associate Department Head for Graduate Studies, or the Department Head with a request for funding.**

Department of Metallurgical and Materials Engineering

An interdisciplinary PhD degree in materials science is also offered (see Interdisciplinary Programs (p. 810)). The graduate program in metallurgical and materials engineering allows for close association between graduate students and the faculty.

- Majors
 - Metallurgical Engineering, MS (p. 707)
 - Materials/Metallurgical Engineering, PhD (p. 704)

Department Head

- Steven Daniewicz

Undergraduate Program Director

- Mark Weaver

Graduate Program Coordinator

- Ramana Reddy

Professors

- Luke Brewer
- Ramana Reddy
- Gregory Thompson
- Mark Weaver

ACIPCO Professor

- Ramana Reddy

Associate professor

- Laurentiu Nastac

Assistant professors

- Rachel Cook
- Gregory Kubacki
- Nilesch Kumar
- Tianjiao Lei
- Evan Schwind
- Xin Wang
- Qiaofu Zhang

Professor Emeritus

- Subhadra Gupta
- Doru Stefanescu
- Takao Suzuki
- Garry Warren

Associate Research Professional

- Lorena Perez-Andrade

Adjunct Professors

- Matthew Kasemer
- Kasra Momeni

MTE519 Solidificatn Science

Hours 3

Overview of the principles of solidification processing, the evolution of solidification microstructure, segregation, defects and the use of analytical and computational tools for the design, understanding and use of solidification processes.

MTE539 Metallurgy Of Welding

Hours 3

Thermal, chemical, and mechanical aspects of welding using the fusion welding process. The metallurgical aspects of welding, including microstructure and properties of the weld, are also covered. Various topics on recent trends in welding research.

Prerequisite(s): MTE 380

[View All Courses](#)

Materials/Metallurgical Engineering, Ph.D.

The Department of Metallurgical & Materials Engineering (MTE) offers a masters of science along with a Ph.D. In addition, many of the MTE faculty are members of the UA Tri-campus Materials Science PhD program giving materials orientated graduate students a range of academic opportunities.

Admissions

The program for the PhD in the area of materials/metallurgical engineering is conducted jointly with The University of Alabama at Birmingham (UAB). This arrangement permits sharing of facilities, exchange of faculty, joint seminars, and a wide choice of dissertation advisers. The PhD degree in the area of materials science is also offered, in collaboration with UAB and The University of Alabama in Huntsville. Full details of this interdisciplinary program (p. 810) may be found in this catalog.

For additional information, see the Graduate School's general requirements for advanced degrees below.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A defined field of specialization is required of all candidates for the doctor of philosophy degree. A minimum of **36 semester hours** of non-dissertation course credit is required. These courses must be at the 500/600-level. **Unlike the M.S. degree which can accept up to two prior approved 400-level courses for the M.S. Degree, this is not an option for the Ph.D. course requirements.** Ph.D.-track students should consult their graduate supervisory committee on courses that are suited to fulfilling their course of study in the department and research specialty. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of **24 hours of dissertation research (MTE 699)**. Students enrolled in the Ph.D.-track should register for MTE 699. Please consult the UA Graduate Catalog, Graduate Dean, and Graduate School for other university requirements..

Additional requirements set forth by the Graduate School and MTE Department include the following:

1. **Seminar.** The MTE department will still host seminars periodically through each semester. All graduate students, whether MTE or Materials Science designated, that reside in the MTE department are required to attend departmental seminars as part of their employment or fellowship obligations. If a student cannot attend a seminar, the student must inform the MTE graduate coordinator and advisor prior to the seminar providing documentation of the conflict, such as a class or medical appointment. Students that fail to attend seminar, without prior approval, will be required to meet with the MTE department head with his/her advisor to explain any absences. Unexcused absences can result in a loss of financial support. As part of seminar series, the MTE faculty encourages students to engage and participate in the Q&A. Also, please demonstrate proper seminar etiquette of turning your cell phone off (or on mute) as well as avoid doing email or surfing the internet on any electronic devices.
2. **500- and 600-Level Courses.** At least 36 hours of course work is required at the 500/600 levels.
3. **MTE 698 Non Dissertation Research:** Ph.D. students who conduct research prior to admission to candidacy can enroll in non-dissertation research credits (MTE 698) with the course name and content suited to the research specialty. It is suggested that no more than 3 credits of MTE 698 be enrolled in any one semester. Per the UA graduate school catalog, "a maximum of 20 percent of a graduate student's required course credit may be taken on a pass/fail basis". As such, a student can apply a maximum of 7 credits of MTE 698 towards the required 36 semester course credits for Ph.D. degree if no other pass/fail graduate courses are used in the plan of study.
4. **MTE 699 Dissertation Research:** A minimum of 24 hours of MTE 699 dissertation work must be completed for the Ph.D. degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.
5. **Math requirement.** At least six (6) hours of GES 500 Engineering Statistics level or higher math courses must be completed for a Ph.D. degree.
6. **MTE core courses:** All Ph.D. students are required to take a common set of three core courses (9 total semester hours) as follows:

Mentored Instructional Experience

In their careers, PhD engineers are expected to be thought leaders, mentors, trainers of other developing professionals, and communicators with a variety of audiences. Therefore, in addition to technical training in their discipline, all UA College of Engineering PhD students will have a Mentored Instructional Experience (MIE) that will enhance their abilities in these critical areas of communication, giving and receiving formal feedback, mentoring, and training, as well as deepen their discipline-specific knowledge through educational support experiences (typically office hours, laboratory instruction, conducting recitations, preparing instructional materials, and guiding in-course design teams of undergraduate students).

All PhD students will receive pedagogical training in these instructional support areas through a pedagogy practicum course ENGR 501. In addition, each student shall complete a set of instructional experiences during designated semesters (2 semesters at 10 hours/week, 4 semesters at 5 hours/week, or the equivalent) under the guidance of a faculty mentor.

This additional instruction practice is a graduation requirement.

MTE Core Courses		Hours
MTE 556	Advanced Mechanical Behavior	3
MTE 562	Metallurgical Thermodyn	3
MTE 579	Advanced Physical Metallurgy	3
Total Hours		9

Curricular Table		Hours
MTE Core Coursework		9
Elective Coursework		27
MTE 699 Dissertation Research (minimum)		24
Total Hours		60

Transfer Credit

For students entering into the Ph.D. program, a maximum of 1/2 of the M.S. course work hours (non-thesis research) in the major or related field area of study can be transferred towards the Ph.D. program's coursework hour minimum requirement. This transfer of course hours is subject to approval by the MTE department and the Graduate School according to their policy.

Doctoral Plan of Study Requirement

Early in the graduate program, each Ph.D.-track student must confer with the appropriate departmental adviser or major professor to select courses, plan of study, research direction, any residency requirements will be completed, and so forth. At that time, a Plan of Study must be prepared and submitted to the Graduate School. The PhD Plan of Study can be found at the Graduate School website. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations. An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits an approved form for Admission to Candidacy for Doctoral Degree.

Comprehensive Exams

After completing the core course requirements, the student is now eligible to complete the written examination, oral examination, and

research proposal examination. The guidelines for these examinations are as follows:

1. The student, with the graduate advisor, will assemble a supervisory or dissertation committee consisting of at least five total members. The student will present a research proposal to the dissertation committee that integrates the graduate course work and a literature review of the topic that demonstrates scholarly proficiency and capacity for independent, original investigation in his/her specialized field of research. This proposal should be given to the committee within two semesters of completing the core course requirements. This should be completed in less than three years of continuous graduate school attendance.
2. Each committee member will provide up to two (2) written questions within ten (10) days of receiving the proposal. These questions provide the written portion of the doctoral degree exam. The committee chair will coordinate the collection of these questions, assemble them, and then disseminate them to the student. These questions are based upon undergraduate and graduate material in metallurgical and materials engineering principles. These questions are to ensure that the fundamental understanding of materials science is achieved by the student. **The student will provide a written response to each question and submit them to the committee chair within five (5) days of receiving them.** The committee chairperson will then disseminate the student answers to the committee members for evaluation. As a courtesy to the committee, the primary advisor should submit the student responses to the committee at least five (5) days prior to the oral exam date.
3. At the oral examination of the proposal, the student will present a series of slides (which should be numbered) based on the written proposal. It is recommended that the number of slides is no more than thirty (30). This presentation will be open to the public and is recommended to be thirty (30) minutes. At the conclusion of the presentation, the public is excused and the oral examination by the committee members occurs. The closed-door examination is not to exceed two hours (120 minutes) in duration. The committee will ask questions related to the topic of the proposal to ascertain the student's competency in the subject, ability to compile information to conduct doctoral-level research, and follow-up questions (if necessary) related to the written responses to the questions previously provided by the committee.
4. The research proposal will follow the National Science Foundation (NSF) grant proposal guidelines. This includes no more than a one-page length abstract summary that includes the overview, intellectual and broader impact of the research, a table of contents, and up to 15-pages of technical content. References are treated as a separate section and do not count in the page limit and should follow the NSF guidelines for referencing (i.e., full author list, the title of the article, etc.). The student should provide a CV, a facilities section for the resources needed to complete the research, and a budget and justification as additional resource material to the proposal which are also not part of the 15-page limit of technical content. The technical content of the proposal should include (1) the integration of prior, referenced literature to the proposed topic which demonstrates an adequate understanding for doctoral-level research, (2) clearly defined scientific questions and/or technical objectives that the dissertation will address, and (3) proposed methods of investigation to address those questions posed. Prior work completed in the lab by the student should be used sparingly; **the proposal is not a summary of research completed but what is being planned.** The proposal is given to the supervisory committee **no later than three (3) weeks before a commonly agreed date to orally defend the proposal**, where

the student will answer questions related to relevant course work and the research proposal which satisfies the oral examination requirement for the doctoral degree examination.

5. After the completion of the oral examination, the student will be excused and the committee will assess the student's performance on the written exam, oral exam, and research proposal. A majority vote of the committee approves the student to candidacy. If the student does not receive a majority vote, the student is eligible for a second attempt. If the student is unable to receive a majority vote upon the second attempt (written exam, oral exam, and research proposal), the student is ineligible to receive a doctoral degree from the program. If the vote is tied, this is equivalent to not receiving a majority.

Admission to Candidacy Requirements

Successful completion and passing of the Ph.D. competency examination and proposal defense transfers a Ph.D. student to a Ph.D. candidate, and the student is admitted to candidacy for the doctoral degree. The Admission to Candidacy for the Doctoral Degree form is submitted to the Graduate School.

Continuous Enrollment Policy

Graduate School Policy

Dissertation Requirements

After a student has successfully passed the Ph.D. examinations, the student, with the graduate advisor, will assemble a supervisory or dissertation committee consisting of at least five total members (see Dissertation Committee below). The student will present a research proposal that integrates the graduate course work and demonstrates scholarly proficiency, and capacity for independent, original investigation in their specialized field of research. The research proposal should include a one-page abstract summary, no more than fifteen (15) pages of technical content. The technical content should include the integration of prior, referenced literature to the proposed research which demonstrates adequate understanding of doctoral level research. This proposal should provide the basis for the dissertation. The proposal should include curriculum vitae of the student, budget and budget justification for the doctoral research project. These latter documents and the list of references are not included in the 15 page limit. The proposal should be given to your supervisory committee no later than two (2) weeks before a commonly agreed date where the student will answer questions related to course work and the research proposal provided.

The written research proposal will be presented and orally defended to the supervisory committee. This committee will evaluate the merit of the research proposal and oral presentation and provide constructive input for the research.

The proposal examination should be completed within three academic semesters of passing the Ph.D. examination and at least one academic term before the Ph.D. dissertation defense. See the UA graduate catalog for further details and required forms.

Time Limits

All requirements for the doctoral degree must be completed within seven (7) years (21 fall, spring, and summer semesters) following admission to the doctoral program. Also refer to the Graduate School Policy about time limits for degree completion requirements.

Metallurgical Engineering, MS

The MTE department is one of only eight accredited metallurgical degree granting institutions in the United States. Its core emphasis in metallurgy and materials provides students depth in structure-processing-property relationships.

Admissions

Prospective students will need to provide a statement of purpose, official academic transcript and references. International applicants (non-native English speakers) will also be required to complete a provisional language exam (TOEFL, IELTS, PTE, or DET). Regular admission requirements are >3.0 GPA and >=79iBT TOEFL, >=6.5 IELTS, >=59 PTE, >=110 DET. Competitive MTE entering graduate applications have scores exceeding these minimums.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Plan I (thesis) is the standard MS degree plan. However, in exceptional cases, a student who has the approval of his or her supervisory committee may follow Plan II (non-thesis). A student who believes there are valid reasons for using Plan II must submit a written request detailing these reasons to the department head no later than midterm of the first semester in residence.

Plan I - Thesis		Hours
Metallurgical and Materials Engineering Courses		18
Related Fields or Major		6
With the approval of the major department, the remainder of the coursework may be completed in either the major or related fields.

HES509 Research Methods

Hours 3

This course is an introduction to scientific methods appropriate for human sciences. It is designed to acquaint students with types of research, methods, and materials necessary for scientific inquiry and to provide students with practical steps to conduct and understand scientific research. Emphasis will be placed on quantitative, qualitative, and mixed methods designs appropriate for research in human sciences.

HES554 Management and Administration in Sports Business Management

Hours 3

This course is designed for sport professionals desiring to increase their knowledge and understanding of management and administration issues in the sport industry.

Prerequisite(s): Graduate student in Human Environmental Sciences

HES565 Legal and Ethical Issues in Sports Business Management Hours 3

This course is designed for student/prospective sport industry professional desiring to increase their knowledge and understanding of current legal and ethical issues in sports business management and the sport industry. This class (HES 565) uses Blended (Hybrid) Delivery Methods of readings, classroom presentations and online and residential exams to present critical topics.

Prerequisite(s): Graduate student in Human Environmental Sciences

HES570 Fellowship in Sports Business Management Hours 3

Under the supervision of an approved and qualified sports business management professional, the graduate student will experience activities related to job specific tasks in sports business management. This full-time work experience/fellowship in the sport industry must take place in a professional organization, in which the student has been selected and offered a fellowship.

Prerequisite(s): Graduate student in Human Environmental Sciences

HES590 Special Problems in Human Environmental Sciences SP

Hours 3-6

A detailed examination of a discipline-specific issue, topic or problem that impacts the lives of individuals, families or communities.

Special Topics Course

HES591 Special Problems in Human Sciences SP

Hours 3

This course is open to qualified graduate students who will study special problems in human sciences.

Special Topics Course

HES592 Special Problems in Sports Business Management SP

Hours 3

Under the supervision of an approved and qualified sport management professional, the graduate student will experience activities related to job specific tasks in sport management. This full-time work experience/fellowship in the sport industry must take place in a professional organization, in which the student has been selected and offered a fellowship.

Prerequisite(s): Graduate student in Human Environmental Sciences

Special Topics Course

HES598 Non-Thesis Research Hours 1-6

Development of a professional paper on a topic selected by the student and approved by the graduate committee.

Prerequisite(s) with concurrency: CSM 562 and HES 509 and CSM 564 and CSM 572

HES650 Special Topics In Hes SP

Hours 3

Critical analysis of current issues in selected areas of human environmental sciences. May be taken up to a total of four times.

Special Topics Course

Department of Clothing, Textiles, and Interior Design

The Human Environmental Sciences (MS) (p. 749) focused area of study in Clothing, Textiles, and Interior Design provides preparation for careers in higher education, business and industry, and government services, and for admission to doctoral programs in clothing, textiles, and related fields. Students complete 30 semester hours of coursework designed to prepare them for advancement in their professional discipline. A research thesis or capstone project is required during the final term of enrollment.

CSM500 Personal Insurance Plan & Mgt

Hours 3

Survey of the myriad of personal risks facing consumers and families throughout the life cycle. An emphasis is placed on the fundamentals of risk management. Includes a comprehensive study of insurance products.

Prerequisite(s): CSM 204 or CSM 205

CSM501 Consumer Protection

Hours 3

Study of laws and agencies affecting the consumer's well-being, sources of consumer information, and discussion of current consumer issues.

View All Courses

Conflict Resolution Certificate

The Graduate Certificate in Conflict Resolution equips students with essential communication, emotional intelligence, and negotiation skills. The 15-credit hour certificate program focuses on understanding perception, culture, and values to enhance conflict resolution in various settings. Students learn to develop interest-based solutions, evaluate consumer conflict situations, and apply strategies to preserve and enhance relationships. The program aligns with the Department's mission to generate new knowledge in consumer sciences and improve the quality of life for individuals, families, and communities. For main-campus students, most classes are completed in a face-to-face learning environment. Online students will complete all courses in an online, asynchronous format.

Admissions

See the Admission Criteria section of this catalog for more information.

Consumer Sciences, MS

The Master of Science in Consumer Sciences is a 30-credit-hour degree program that offers advanced study in two complementary concentration areas.

Consumer Economics Concentration

The Consumer Economics concentration offers an applied microeconomics approach to understanding consumers in home, policy, and market environments. This concentration prepares students to continue study in a doctoral program or employment in a research-oriented setting investigating consumer decision-making, personal finance, and related family and consumer policy. This research-oriented concentration requires the successful completion of a thesis.

Family Financial Planning and Counseling Concentration

The Family Financial Planning and Counseling concentration focuses on the knowledge and skills necessary for a career in financial planning and related careers. The curriculum fulfills the educational requirements to sit for the CFP® certification exam that leads to the CERTIFIED FINANCIAL PLANNER™ certification registered with the Certified Financial

Planner Board of Standards, Inc. Students who successfully complete the concentration may sit for the CFP® certification exam that leads to the CERTIFIED FINANCIAL PLANNER™ certification. The concentration also fulfills the educational requirements to sit for the Accredited Financial Counselor® (AFC®) exam offered by the Association for Financial Counseling and Planning Education®. Successful completion of a capstone project is required.

Plan I: Thesis

The Consumer Economics Concentration requires completion of a thesis (Plan I). Upon admission to the M.S. program in Consumer Sciences, students are assigned an interim advisor (i.e., program coordinator or program director). The interim advisor will assist the student in the evaluation of previous work and selection of coursework. Students identify a permanent master's program advisor no later than the end of the first year of study for Consumer Economics concentration and end of the first semester of study for FFPC concentration. Advisors help students plan a course of study and research or professional internship experiences. Students should consult their advisor at least once per semester to review their progress. Students pursuing the Consumer Economics Concentration will select a thesis advisor who will assist in the formulation of the thesis committee. A student's advisor may also serve as their thesis advisor.

See the Master's Degree Academic Policies section of this catalog for more information.

Plan II: Non-Thesis

The Family Financial Planning and Counseling Concentration is a Plan II program. As such, no thesis is required. Instead, Plan II students complete a supervised practicum or a capstone project.

See the Master's Degree Academic Policies section of this catalog for more information.

Application for Graduation Information

See the Application for Graduation section of this catalog for more information.

A limited number of graduate assistantships and graduate school fellowships are available. The number of assistantships available varies each year. Graduate assistants must be available in-person approximately 20 hours/week. These assistantships are awarded on a competitive basis. Graduate assistants may be asked to assist with teaching, research, and service missions of the academic unit to which they are assigned. The application for Graduate Assistantship should be submitted before January 15 of each year for full consideration. For more information on the Financial Support, contact the Department of Consumer Sciences Graduate Coordinator.

Further financial assistant information is available at <https://catalog.ua.edu/graduate/about/general-information/financial-assistance/index.html>

ATR500 Fundamentals of Professional Practice

Hours 3

Study and discussion of topics and clinical skills related to the prevention; examination, assessment and diagnosis; immediate and emergency care; and therapeutic intervention of injuries and illnesses. Introduction to healthcare administration.

Prerequisite(s) with concurrency: ATR 503

ATR503 Patient-Centered Care

Hours 2

Study and discussion of topics related to the influence of cultural, environmental and intrapersonal factors on health; and the role of athletic trainers acting within their scope of practice to advocate for patients and incorporate outcomes measures in providing patient-centered care.

Prerequisite(s) with concurrency: ATR 500 and ATR 505 and ATR 507 and ATR 510

HHE506 Tech Research In Health

Hours 3

Designed to acquaint the student with the types of research and the methods and materials necessary for scientific inquiry; includes development of a research proposal, with emphasis on form and style.

HHE515 Advanced Foundations of Health Promotion

Hours 3

This course provides an overview of the history, principles, and philosophy of health education/promotion. Key issues in health education and health promotion will be discussed for various age groups and by site of implementation (schools, communities, worksites, and medical care settings).

Prerequisite(s) with concurrency: HES 509

[View All Courses](#)

Athletic Training, MS

Athletic trainers (ATs) are highly qualified, multi-skilled health care professionals who provide preventive services, emergency care, clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions. The University of Alabama Athletic Training Program is a limited-selection, two-year professional master's degree program.

Our mission is to prepare students for the Board of Certification (BOC) examination and successful careers in athletic training. To this end, we will provide quality graduate coursework with innovative and hands-on learning experiences in didactic, laboratory, and clinical education that emphasizes evidence-based practice, interprofessional collaboration in health care, and equitable patient-centered care.

Our program is housed in Capital Hall, a new facility that delivers ingenuity in the use of classroom lecture and lab spaces. All classrooms, offices, and laboratories are located under the same roof, providing more engagement between faculty and students, further developing mentorship that lasts beyond graduation.

The Master of Science in Athletic Training is a 46-credit hour master's program that includes in-person, hybrid, and online classes paired with a clinical education and experience. Students that choose the thesis track will have an additional four hours of research coursework for a total of 50 credit hours. This program requires simultaneous didactic and clinical preparation.

Each semester of the program includes clinical education experiences that parallel the professional coursework. Students are assigned to a different preceptor each semester to strengthen weaknesses, develop confidence, and push boundaries.

On campus, students will work with athletes of the highest caliber through our partnership with Alabama Athletics. Each student will experience either pre-season or post-season in addition to two immersive experiences, complete with travel, as a part of a team's support system across 16 different clinical sites within UA's intercollegiate athletics.

Designed to ensure exposure to diverse educational experiences, clinical education continues off campus with rotations in local high schools, physical therapy clinics, colleges, physician offices, and the UA Student Recreation Center.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission to the Master of Science in Athletic Training (MSAT) program an application must include:

1. Have a minimum of a 3.0 cumulative grade point average (GPA), and a grade of C or better on all prerequisite courses. Students must complete all prerequisite courses listed prior to successfully matriculating to the MSAT program.

2. Have Basic Life Support and First Aid Certification from the American Heart Association or American Red Cross.

3. Have documentation of at least 60 hours of athletic training observation experience with a certified athletic trainer.

Prerequisite Courses

Prerequisite courses include: 3 credit hours each of Psychology, Care and Prevention, Statistics, Biomechanics or Physics, and Exercise Physiology; 4 credit hours of Biology with lab and Chemistry with lab; and 8 credit hours of Anatomy and Physiology with lab (combined or separate).

Admissions Procedures

- Apply to the MSAT Program through The University of Alabama Graduate School.
- Submit the following documents with your application:
 1. A resume or curriculum vitae.
 2. A personal statement of professional and education goals.
 3. Three letters of recommendation from educators, employers, or healthcare professionals. At least 1 letter of application must come from a former instructor/professor.
 4. Evidence of 60 hours of observational experience with a certified athletic trainer using UA's Observational Experience Form.*
- Participate in a virtual interview with the UA AT Program Selection Committee, if offered. An interview is not a guarantee of admission.

Written Technical Standards

The Athletic Training Program (AT Program) at The University of Alabama is a rigorous and intense program that places specific requirements and demands on its enrolled students. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of physically active individuals. The technical standards set forth by the AT Program establish the essential qualifications considered necessary for admitted students to achieve the knowledge, skills, and competencies of an entry-level certified athletic trainer. These standards are also necessary for meeting the expectations of the program's accrediting agency, the Commission on Accreditation of Athletic Training Education (CAATE). All students admitted to the AT Program must meet the following abilities and expectations. In the event a student is unable to fulfill these technical standards, with or without reasonable accommodation, the student will not be admitted into the professional program. Compliance with the program's technical standards does not guarantee a student's eligibility for the Board of Certification (BOC) examination.

Candidates for selection to the Athletic Training Program must demonstrate:

- 1) The ability to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- 2) The ability to perform appropriate physical examinations using accepted techniques; this includes, but is not limited to, the ability to observe, position, lift and carry or otherwise transport patients. Some tasks require the ability to lift the equivalent of an adult human's body weight and students must also possess sufficient physical stamina to complete long periods of standing, sitting and moving in a variety of clinical settings. Students must also be able to accurately, safely and efficiently use equipment and materials during the assessment and treatment of patients.

3) The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.

4) The ability to record physical examination results and a treatment plan clearly and accurately.

5) The ability to maintain composure and continue to exercise good judgment and to function appropriately during periods of high stress.

6) Flexibility and the ability to adjust to changing situations and uncertainty in clinical settings.

7) Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Candidates for selection to the AT Program will be required to verify they understand and meet these technical standards or that they believe that, with certain accommodations, they can meet the standards. The Office of Disability Services will review the documentation of a student who states he/she could meet the program's technical standards with accommodation and confirm that the stated condition substantially limits the student. If a student states he/she can meet the technical standards with accommodation, then the University will determine whether it agrees that the student can meet the technical standards with reasonable accommodation. This includes a review of whether the accommodations requested are reasonable, taking into account whether accommodation would jeopardize clinician/patient safety, or the educational process of the student or the institution, including all coursework, clinical experiences and internships deemed essential to graduation.

Injury, illness or other situations may temporarily impact a student's ability to meet our Written Technical Standards. This, in turn, would impact a clinical placement and/or ability to participate in some lab activities. In the event of injury or illness, the Medical Director will work with the Office of Disability Services to determine the potential and appropriateness of any accommodations. The student will be required to complete an amended technical standards form for the duration of the accommodation period and a new document following full clearance for return.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Capstone/Non-Thesis Option		Hours
ATR 500	Professional Practice	3
ATR 503	Patient-Centered Care	2
ATR 505	Examination and Diagnosis I	3

ATR 550	Culminating Experience II	2
ATR 599	Thesis Research (Students will take ATR 599 in 2 semesters for 6 total hours)	6
Total Hours		50

Students will take 3 clinical integration courses during which they will complete clinical experiences at affiliated clinical settings. In addition, the curriculum includes 2 immersive clinical experiences with one lasting a minimum of 4 weeks (ATR 530) & the other lasting 8 weeks (ATR 550). All of these courses have assigned academic credit and are included in the list above.

Students will complete a non-thesis capstone project (ATR 598) or a thesis (ATR 599). Both of these options have assigned academic credit and are included in the list above.

Transfer Credit

Due to specialty accreditation standards, students cannot transfer any courses into the MSAT program.

Capstone Requirement

Students will complete a culminating experience in ATR 550 Culminating Experience II to meet the Capstone Requirement.

Clinical Requirements

Each semester of the program includes clinical education experiences linked directly to the professional coursework through the Clinical Skills courses. Students are assigned to a different preceptor each semester of program enrollment. In accordance with accreditation guidelines and program philosophy, students complete exposures to a variety of patients. Each student will complete a clinical rotation requiring either pre-season or post-season experience and travel. Clinical education assignments are designed to ensure the student exposure to diverse educational experiences through work with a variety of Preceptors, patients and allied medical and medical professionals in many different settings. In addition to the 16 clinical sites within the UA Department of Intercollegiate Athletics, a range of local high schools, physical therapy clinics, colleges, physician offices and the UA Student Recreation Center serve as affiliated clinical settings within the AT Program.

While in clinical education experiences, students must be directly supervised by your preceptor. Students are expected to comply with all facility and organizational rules that are outlined by the assigned preceptor and all patient care decisions should be discussed with a preceptor prior to providing care.

In order to be allowed to participate in clinical education experiences through The University of Alabama Athletic Training Program, students must maintain clearance through Castlebranch. In order to receive and maintain clearance, students must submit the following requirements by the assigned dates (varies each year). Students that do not meet the requirements will not be allowed to begin his/her clinical experiences and students that fail to maintain clinical experience will be removed from his/her clinic site. Failure to participate in clinical experience will result in earning a grade of F in clinical courses and will delay progress through the AT Program.

- Background Check
- 10-panel Drug Screen
- CPR certification
- Physical Examination
- Influenza (vaccine or signed declination)
- Varicella (chicken pox) - 2 vaccinations or positive antibody titer
- Measles, Mumps, & Rubella (MMR) - 2 vaccinations or positive antibody titer
- Tetanus, Diphtheria, and Acellular Pertussis (TDaP) - TDaP vaccination within the past 10 years
- Tuberculosis (TB) - 1 step TB skin test OR QuantiFERON-TB Gold Plus test
- Child Protection Training
- Confidentiality Statement

Students are required to pass a 10-panel drug screen for clinical clearance. Students are required to undergo additional screening for drugs, alcohol or other controlled substances if:

- injury occurs at clinical site.
- there is a medication or handling discrepancy at clinical site.
- medication may have been stolen or improperly used at clinical site (by anyone associated with site).
- the student appears unfit for duty as a result of use reasonable cause or suspicion to believe student is under the influence or is otherwise impaired & unable to perform 1 or more essential functions of the placement with or without reasonable accommodation.

- the student poses a direct threat to health or safety of self or others specifically because of use.

A positive result from a required additional screening will result in your removal from the clinical setting, which will impact your grade in the associated clinical class. You will undergo a 10-panel urinalysis on a weekly basis until your test is negative. You will be cleared to return to your clinical setting following that negative test. Athletic Training Students are responsible for all costs associated with drug testing. Repeated positive tests may result in your release from the AT Program.

Confidentiality Requirements

In collecting, maintaining, and disclosing personnel information, the University and the AT Program affiliated settings make every effort to protect employee and patient privacy rights and interests and prevent inappropriate or unnecessary disclosures of information from any patient's file or record.

While complying with governmental reporting and record keeping requirements, the clinical settings associated with the AT Program strive to ensure that it handles all personal and job-related information about patients in a secure, confidential, and appropriate fashion. Therefore, athletic training students should prevent and not participate in the unauthorized access, use, review, disclosure, dissemination, alteration, or destruction of confidential information regarding patients, students, or employees. Such confidential information includes, but is not limited to:

- Information from student records in violation of the institution's policy on confidentiality of student records and/or the Family Educational Rights and Privacy Act (FERPA);
- Information from employee records in violation of the institution's personnel privacy policy or state or federal laws;
- Information from internal discrimination/ harassment investigations when such information is required to be kept confidential and shared only on a need to know basis;
- Any personally identifiable health information relating to the past, present, or future physical or mental health condition of an individual, the provision of health care to an individual, or the past, present, or future payment for the provision of health care to an individual, in violation of state or federal laws (including but not limited to: HIPAA, ADA, Section 504 of the Rehabilitation Act, or FMLA)

Violation of the Confidentiality Policy will result in release from the AT Program.

Professional Appearance and Relationships Guidelines

There will be program-wide and site-specific professional appearance and relationship guidelines. Failure to comply with these guidelines may limit clinical access and result in dismissal from the MSAT Program. Students will be provided with these guidelines at the start of each academic year and will sign an attestation form to indicate their understanding and agreement to comply with the guidelines.

Gambling

Students enrolled in MSAT Program shall not knowingly:

- Provide information to individuals involved in organized gambling activities concerning intercollegiate athletics competition;
- Solicit a bet on any intercollegiate or professional team;
- Accept a bet on any team representing the institution;

- Solicit or accept a bet on any intercollegiate competition for any item (e.g. cash, shirt, dinner) that has tangible value; or
- Participate in any gambling activity that involves intercollegiate athletics or professional athletics, through a bookmaker, a parlay card or any other method employed by organized gambling.

Athletic training students shall not participate in any gambling activity that involves intercollegiate or professional athletics, through a bookmaker, a parlay card or any other method employed by organized gambling (e.g. sports "pools", internet gambling, "800" numbers, etc.). This includes other methods not run through organized gambling (e.g. pools, fantasy leagues, etc.), even if the bet or value of the prize is a "friendly" wager. Violation of the Gambling Policy will result in your release from the AT Program.

Plan I - Thesis Process Requirements

The MSAT Program is a thesis-optional program. Students that are interested in the thesis option should discuss this with the AT Program Director as early as possible. There are specific deadlines that need to be met for the thesis process and failure to meet this deadlines may result in a delay in graduation and AT certification. A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be directly related to Athletic Training and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Plan II- Non-Thesis Process Requirements

The non-thesis option is the plan that best fits the professional goals of most MSAT students. In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all MSAT students. The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. The capstone experience will be completed as part of ATR 598 Non-Thesis Research in the final semester of the MSAT Program.

Time Limits for Degree Completion Requirements

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students. More information on the Graduate School policy on Time Limits for Degree completion can be found [here](#).

Student Progress Requirement

Students admitted to the MSAT Program must meet the following criteria for retention:

- earn a grade of C or higher in all MSAT courses
- uphold The University of Alabama Code of Student Conduct and the NATA Code of Ethics
- meet all clinical clearance deadlines (through CastleBranch) without delay
- follow all AT Program policies and procedures
- comply with all clinical education site- specific policies and procedures during assignment to the corresponding clinical site
- show commitment to the AT Program through demonstration of academic, organizational and financial ability to participate in all program requirements

Students that do not earn a C or higher in their coursework will have to repeat the course in the next semester that it is offered before continuing on through the course sequence. This will delay graduation approximately 1 academic year.

Academic Misconduct Information

According to the Code of Academic Conduct, academic misconduct by students includes all acts of dishonesty in any academically related matter and any knowing or intentional help or attempt to help, or conspiracy to help, another student commit an act of academic dishonesty.

Any suspected violation of the Academic Honor Code will be sent to the Academic Misconduct Monitor (in HES: Assistant Dean). Except in divisions that have alternate academic misconduct policies that have been approved by the academic vice president, academic misconduct cases shall be resolved by the divisional academic misconduct monitor or the academic dean of the division in which the alleged action took place after consultation with the academic dean or monitor in the division where the student is enrolled. However, with the concurrence of both deans, the responsibility for resolving an academic misconduct case can be transferred to the dean of the division in which the student is enrolled. Appeals from the monitor's decisions may be made to the academic

dean; appeals from the academic dean's decisions may be made to the Office for Academic Affairs.

The Graduate School Academic Misconduct policy can be found [here](#).

Withdrawals and Leave of Absence Information

All courses within the MSAT Program are in a required sequence and must be completed in this order. Withdrawing from an individual course cannot be done as each semester class is a co-requisite for each other.

A graduate student may withdraw from the university (i.e., withdraw from all courses in the semester), either for non-medical or medical reasons, in accordance with deadlines. The first thing a student considering withdrawal should do is to consult with his or her academic advisor.

It is the student's responsibility to initiate a withdrawal through myBama and provide the information necessary to complete the withdrawal process. Academic Bankruptcy (described in the Undergraduate Catalog) is not available to graduate students.

Withdrawing from a semester will delay graduation. MSAT students can re-take the course sequence in the next semester that the courses are offered. Students should contact student accounting for information about the financial effects of withdrawing, including information on how federal financial aid, loans, and scholarships may be affected.

Under compelling circumstances beyond the student's control, a graduate student may request that the department petition the Graduate School with the rationale for granting a leave of absence. If granted by the Graduate School, a leave of absence will cover one or more upcoming semesters rather than any prior semester(s). A leave of absence is not a method of avoiding continuous registration requirements, and it does not lengthen the time limit. When a student returns from a leave of absence, the Graduate School must be notified and will work with the department and student to determine the number of semesters remaining on the time limit and the degree requirements that remain.

The Graduate School Withdrawals and Leave of Absence information can be found [here](#).

Academic Grievances Information

Students should attempt to resolve academic grievances with the course instructor. If the issue cannot be resolved, the student should contact the AT Program Director and/or Health Science Department Chair. If the grievance still cannot be resolved, the Internal Complaint Process for Students can be found [here](#).

The Graduate School Academic Grievances information can be found [here](#).

Grades and Academic Standing

In addition to the requirements for MSAT Program Retention, The Graduate School scholastic requirements will have to be met. The Graduate School scholastic requirements can be found [here](#) (p. 28).

Graduate School Deadlines Information

Graduate School deadlines can be found [here](#).

Application for Graduation Information

Application for Graduation information can be found [here](#) (p. 15).

Health Education & Promotion, MPH

The Department of Health Science offers a Master's of Public Health (MPH) degree program in Health Education & Promotion. The program is offered both on campus and through a distance education format (online). The 42-credit-hour MPH program provides a high quality, student-oriented, and health-equity-focused curriculum developed to deliver core public health competencies that emphasize the application of health education and promotion. Designed for eventual Council on Education for Public Health (CEPH) accreditation, the curriculum offers education in the foundational areas of public health (health behavior, environmental health, epidemiology, biostatistics, and health services administration) and is tailored to train health promotion professionals to plan, implement, and evaluate programs to promote individual and population-based health. Upon program completion, students are eligible to take two national exams for professional certification: Certified Health Education Specialist (CHES) exam and the Certified in Public Health (CPH) exam.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. At least 3 letters of recommendation
 - Applicants should seek out at least 3 recommenders who are familiar with their skills and abilities
 - Letters written by family or friends are not accepted
 - Quality letters of recommendation are typically at least one single-spaced page in length
 - Applicants should reach out to the MPH Program Director if more guidance on selecting recommenders is needed
2. A résumé or curriculum vita (CV)
3. A statement of purpose that details the following information. Please be sure to proofread your statement before submitting:
 - Interests in the fields of Health Education, Health Promotion, and related areas
 - Any skills, abilities, or experience applicants may have that would support enrollment in the selected program
 - Professional goals and aspirations in public health
 - How the program aligns with the applicant's goals and aspirations
 - Any other information applicants would like to share regarding their qualifications to study at the graduate level at UA

The Statement of Purpose should be at least 1-2 pages in length and the writing should be representative of a potential graduate student. Please be sure to proofread and edit your statement before submitting it with your application.

4. A brief video of no more than 3 minutes in which the applicant responds to the following questions:
 - How would our MPH in our field of Health Education and Promotion meet your educational needs?
 - What are your current or future career aspirations in public health, and specifically in Health Education and Promotion?
 - How have you been successful in your past academic pursuits and how would you foresee yourself being successful in this MPH program?

The video should be no more than 3 minutes long. Applicants can upload their video to a video sharing website such as YouTube and provide

the link to their video if they are not able to attach or upload their video directly to the application. The video or a link to the video should be added on the "Portfolio" page of the application. Instructions for the video are also available on the "Portfolio" page in the application.

Please note that no academic credit, course waivers, or credit shall be granted for life experience or previous work experience. Also, a student cannot earn both the MA in Health Studies degree and the MPH degree. Courses completed can only be used to earn one degree from the Department of Health Science.

All applicants who receive an offer of admission must accept that offer by submitting their intent to enroll. The link to accept an offer of admission is in the official notice of communication sent by the UA Graduate School. Once a student has accepted admission, they will be required to have an initial advising appointment with the MPH Program Director.

See the Admission Criteria section of this catalog for more information.

*Under the guidance of a department faculty advisor, students will work with a preceptor in a practice-based setting (e.g., community or volunteer organization, health department, etc.) and produce two high-quality work products (e.g., needs assessments, tool kits, trainings) that benefit the organization and advance public health practice. The work products produced must demonstrate student attainment of at least five MPH competencies (3 foundational and 2 program). By the end of the Applied Practice Experience (APE), all students must produce a high-quality written report and submit their two approved products.

Transfer Credit

Applicants interested in transferring graduate credit to the MPH program from an outside institution should reach out to an MPH Program Coordinator. *Please note the Department of Health Science allows a maximum of 6 hours of transfer credit as approved by a Program Coordinator. All transfer credit must have been completed with a B or higher from a regionally accredited school within 6 years of the date of admission to the program.* See also the UA Graduate School's information on Transfer Credit (p. 15).

Accelerated Master's Program (AMP)

Information on the AMP is listed in AMP section of this catalog

Specialized Degree Programs

The Department of Health Science offers some specialized degree programs with other academic programs.

Accelerated Master's Program (AMP) for current BSPH undergraduate students

MA in Anthropology/MPH

PhD in Anthropology/MPH

Dual Graduate Programs - MA in Anthropology/MPH and PhD in Anthropology/MPH

The dual degree programs blend excellent graduate training in biocultural medical anthropology with rigorous and applied preparation in public health education and promotion. The aim is to produce graduates versed in the assessment of and engagement with health as a biological, cultural and structural phenomenon, and trained to engage multiple levels of the social ecology of health.

Application and Admission - MA in Anthropology/MPH Program

Applicants must meet the admission criteria for each program

Applicants will indicate interest in the dual degree program in the notes section of the application and in their Statement of Purpose.

- Applicants will identify a departmental 'home' (anthropology or health science) in their Statement of Purpose.
- Departments will review applications separately. If the review decisions are the same (accept or reject):
 - The 'home' department will notify applicants of their status
- If the review decisions are not the same, the departments will convene a meeting (virtual or in person) to review files of applicants whose status is in dispute.
 - If the parties cannot agree on applicant status, the departments will notify applicants separately of their decisions.
 - Departments will track the number of disputed applications and will use this tracking as a basis for periodic review of admissions decisions and student performance in the program.

PhD in Anthropology/MPH Program

Applicants must meet the admission criteria for each program

Each department's admission committee will thoroughly review applicant transcripts to ensure that undergraduate course content and performance indicate the potential to pursue two advanced degrees successfully in a compressed time frame.

- Applicants will indicate interest in the dual degree program in the notes section of the application and in their Statement of Purpose. Students who develop an interest in the dual degree program after matriculation will need to formally apply and go through the admissions process for the second department.
- Applicants will identify a departmental 'home' (anthropology or health science) in their Statement of Purpose.
- Applicants will identify a faculty mentor, who must then agree to take the student on as a mentee.
- Departments will review applications separately. If the review decisions are the same (accept or reject):
 - The 'home' department will notify the applicant of her/his status
- If the review decisions are not the same, the departments will convene a meeting (virtual or in person) to review the files of applicants whose status is in dispute
 - If the parties cannot agree on applicant's status, the departments will notify the applicant separately of their decision.
 - Departments will track the number of disputed applications and will use this tracking as a basis for periodic review of admissions decisions and subsequent student performance.

MA/MPH Dual-degree completion requirements:

Students enrolled in the dual degree program must complete the minimum required credit hours for both programs. After review of the curricula and syllabi, the partner departments have identified 12 hours of course work in anthropology that may count toward both degrees, given the equivalent content and rigor:

- ANT 600 Research Design (3 hr.) may substitute for HES 509 Research Methods (3 hr.).
- ANT 502 Health Inequities (3 hr.) may substitute for HHE 587 Health Disparities (3 hr.).

The Anthropology Department reciprocates this acceptance. The Health Science courses named above (HES 509 and HHE 587) may substitute for their identified anthropology counterparts (ANT 600 and ANT 502, respectively) in the curricular plans of public health students pursuing a master's degree in anthropology. Additionally:

- Two of the following ANT Electives may substitute for two HHE Electives. These electives supply theoretical, methodological, or

content expertise beneficial to either discipline. All have a health focus.

- ANT 505 Culture, Mind, and Behavior
- ANT 511 Culture Health & Healing
- ANT 550 Probs In Anthropology: Legal Anthropology
- ANT 576 Nutritional Anthropology
- ANT 574 Neuroanthropology
- ANT 610 Theory Method Medical Anthropol

All courses are 3 credit hours.

Completion of the capstone experiences required by both degree programs must be met to receive the dual degrees.

PhD in Anthropology/MPH Dual-Degree Completion Requirements:

Students enrolled in the dual degree program must complete the minimum required credit hours for both programs. After review of the curricula and syllabi, the partner departments have identified 12 hours of course work in anthropology that may count toward both degrees, given their equivalent content and rigor:

- ANT 600 Research Design (3 hr.) may substitute for HES 509 Research Methods (3 hr.).
- ANT 502 Health Inequities (3 hr.) may substitute for HHE 587 Health Disparities (3 hr.).

The Anthropology Department reciprocates this acceptance. The Health Science courses named above (HES 509 and HHE 587) may substitute for their identified anthropology counterparts (ANT 600 and ANT 502, respectively) in the curricular plans of public health students pursuing a master's degree in anthropology. Additionally:

- Two of the following ANT Electives may substitute for two HHE Electives. These electives supply theoretical, methodological, or content expertise beneficial to either discipline. All have a health focus.
 - ANT 505 Culture, Mind, and Behavior
 - ANT 511 Culture Health & Healing
 - ANT 550 Probs In Anthropology: Legal Anthropology
 - ANT 576 Nutritional Anthropology
 - ANT 610 Theory Method Medical Anthropol
 - ANT 574 Neuroanthropology

All courses are 3 credit hours.

Successful completion of all coursework and a capstone experience for both programs must be met to receive the dual degrees.

Pursuit of dual degree paused (PhD/MPH):

If a student wishes to take a leave of absence from degree pursuit, three options are available:

1. The student may request a leave of absence from both programs. Requests must be made via letter, attached to an email to the student's doctoral advisor, the anthropology graduate director and the dual degree coordinators for both programs. Both programs must review the request and agree on the decision to grant or deny. The student must return and complete all remaining requirements in both programs within the degree completion time limit (within 9 years of enrollment in the PhD/MPH program), or both degrees will be forfeit.
2. The student may request to continue with one program of study and take a leave from the other. Requests must be made via letter, attached to an email to the student's doctoral advisor, the

anthropology graduate director and the dual degree coordinators for both programs. Both programs must review the request and agree on the decision to grant or deny the request. Deadlines and benchmarks for the program from which the leave is taken may be suspended at that program's discretion, but the overall degree time limit (9 years from enrollment in the dual degree program) will not change.

3. The student may request to de-couple the two degrees, have the degree for which the requirements have been completed conferred, and request a leave of absence from the other program. Requests must be made via letter, attached to an email to the student's doctoral advisor, the anthropology graduate director and the dual degree coordinators for both programs. Both programs must review the request and agree on the decision to grant or deny. If the programs agree to grant the request, the student will be considered to have withdrawn from the dual degree program and will forfeit the double-counting of credits for the program from which leave has been granted.

Pursuit of dual degree terminated:

For both dual degree programs (MA/MPH and PhD/MPH), if a student decides to discontinue work towards one degree but to continue pursuit of the other, he/she must meet all customary requirements for the continued program, with no double counting of courses, to receive a degree.

Capstone - Applied Practice Experience & Integrative Learning Experience

All students in the MPH program must complete a capstone requirement in the form of an Applied Practice Experience or APE. The APE requires students to complete at least 75 hands-on hours at a public health-related site under the guidance of a qualified Preceptor who is employed at the site. The student must complete two pre-approved products for their site by the end of their APE. In addition to the hours and products, APE students must complete and pass a written requirement called the Integrative Learning Experience (ILE) product and also compile a report of their APE experience.

The APE should be completed toward the end of a student's degree program. Students are able to enroll in the Applied Practice Experience I and II courses after satisfactorily completing 18 hours of course work including the required pre-requisites with a GPA of 3.0 or higher. The APE is two courses which will be taken consecutively. Students will enroll in HHE 580 Applied Practice Experience I (1 hr.) to locate their site as well as get approval for their planned experience. Students will then enroll in HHE 581 Applied Practice Experience II (2 hr.) in the subsequent semester to start and complete the hands-on experience.

Registration into HHE 580 Applied Practice Experience I (1 hr.) is by permit only and this course is a required pre-requisite for HHE 581 Applied Practice Experience II (2 hr.). Students should speak with their MPH Faculty Advisor regarding when they will be expected to enroll in the APE sequence.

Time Limits for Degree Completion Requirements

The MPH program adheres to the time limits set forth by the UA Graduate School. Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate. For details, see Graduate School information on Time Limits (p. 15).

Student Progress Requirement

All students will need to remain in good academic standing and make progress towards graduation by completing at least one course per semester. Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate. Graduate students are expected to maintain a cumulative GPA of 3.0 or higher throughout their enrollment. Students whose cumulative GPA drops below a 3.0 will be placed on Academic Warning. Details about Academic Warning and other scholastic standing information is available at Grades and Academic Standing (p. 258).

The MPH program follows the criteria and guidelines set forth by the UA Graduate School for student progress.

Academic Misconduct Information

The MPH program follows the criteria and guidelines set forth by the Graduate School on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students are encouraged to follow University policies and processes if seeking a withdrawal from a course, a withdrawal from all courses, or a leave of absence (p. 244).

Academic Grievance Information

The MPH program adheres to the academic grievance procedures (p. 255) as outlined by the Graduate School.

Grades and Academic Standing

The MPH program adheres to the Grades and Academic Standing (p. 28) set forth by the Graduate School, except for the transfer credit limit for the program is set to 6 hours. All students will need to remain in good academic standing and make progress towards graduation by completing at least one course per semester. Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate. Graduate students are expected to maintain a cumulative GPA of 3.0 or higher throughout their enrollment. Students whose cumulative GPA drops below a 3.0 will be placed on Academic Warning.

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information about the application to graduate (p. 15).

Health Education & Promotion, Ph.D.

The PhD program in Health Education & Promotion is designed to provide students with coursework and practical experiences needed to become leading faculty, researchers, and scholars in health education and health promotion. By the conclusion of the program, students will be able to do the following: clearly conceptualize the theoretical and philosophical basis of health education and health promotion; effectively plan, implement, and evaluate health education and health promotion programs; elucidate the psychological and sociological influences on health education and promotion; and conduct their own independent research projects. For more information, please contact the Department of Health Science at (205) 348-9087 or Box 870311, Tuscaloosa, AL

35487-0313. Additional information is also available on the Department's website.

Admissions

In addition to meeting the minimum Graduate School admission requirements, applications must include the following materials to be considered for regular admission as part of a holistic admissions process:

- Completion of a master's degree program at the time of initial enrollment;
- An unofficial GRE score (an official score will be required on admission);
- Updated CV;
- Submit at least one relevant course paper or graduate-level scientific writing project where the applicant is the primary contributor (e.g., Master's thesis, literature review, capstone project, research proposal, grant proposal);
- Statement of Purpose limited to 800 words that addresses the following items:
 - (1) How have your prior research and teaching experiences prepared you for a PhD in health education and promotion?
 - (2) How do your research interests align with the research interests of Health Science PhD Program faculty?
 - (3) What are your future career goals related to health education/promotion research?
- Clear alignment with the research agendas of Health Science PhD Program faculty;
- Three letters of recommendation from faculty or other professionals capable of judging the applicant's ability to be successful in a PhD program. At least one letter must come from a faculty member with a doctoral degree who taught the applicant in a graduate-level course; and
- A zoom interview with select PhD Program Faculty and the PhD Program Coordinator.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Code and Title	Hours
Health Education and Promotion Core Courses	12
HHE 604 Seminar In Health	
HHE 605 Theor Sci Basis Hlth Edu	
HHE 606 Plan Admin Hlth Ed Prog	
HHE 667 Ad Eval Health Ed & Hlth Promo	
Advanced Research and Statistical Methods	12
HHE 626 Adv Biostatistics in Hlth	
HHE 627 Multivariate Meth in Hlth	
Courses may include the following:	
HHE 628 Qual Research Meth in Hlth	
NHM 648 Secondary Analysis Survey Data	
Other Courses with Approval	
Social and Behavioral Science Coursework	12
Courses may include the following:	
HHE 530 Health Promotion Techniques	
HHE 586 Environmental Health Promotion	

HHE 587 Health Disparities	
HHE 588 Sex Ed: Theory & Practice	
HHE 589 Women and Health	
Other Courses with Approval	
Directed Research	12
Courses may include the following:	
HHE 596 Independent Study	
HHE 602 Readings In Health	
HHE 603 Spec Projects In Healt	
HHE 685 Field & Lab Experience	
HHE 698 Research	
Other Courses with Approval	
Dissertation Research HHE699	18
Total Hours	66

The PhD program in Health Education & Promotion has additional graduation requirements, including a comprehensive examination and dissertation. See below:

Dissertation: Students are required to complete an acceptable dissertation that shows their ability to conduct independent research. The dissertation should also demonstrate skills in organization, writing, and presentation on a particular topic in the field of health education and promotion. It should make an original contribution to knowledge and be approved by the dissertation committee and Dean of the Graduate School. A final oral dissertation defense is the culminating experience. A minimum of 18 hours of HHE 699 Dissertation Research hours must be completed.

Transfer Credit

The PhD Program in Health Education and Promotion allows students to transfer up to 6 semester hours of elective graduate courses completed previously into the program (no more than six years old). Only graduate lecture coursework with grades of B or higher may be considered for transfer. Transfer decisions are based on (1) equivalence of a previous course to a similar course offered here and (2) how the transfer course would support the student's program of study. However, students must complete a total of 66 credit hours of Doctoral work above the Master's level. In addition, students may not transfer graduate coursework to satisfy the health education/health promotion core or research and statistical methods requirements.

Transfer of elective courses occurs on a case-by-case basis, assuming that the course has some relationship to the student's overall career goals. Transfer credits often go toward the research focus or social and behavioral sciences. The Department accepts transfer courses they consider equivalent in rigor and content to similar courses offered in the department. The PhD Program Coordinator may request that students provide syllabi, course outlines, textbooks, and catalog descriptions for any courses they request to transfer.

See the Graduate School link below for more information about the UA Graduate School-wide transfer policies (p. 21).

Doctoral Plan of Study Requirement

Graduate School Information on the Doctoral Plan of Study can be found here (p. 21).

Comprehensive Exams

Doctoral students in the Health Education and Promotion Program are required to successfully complete the comprehensive examination.

Passing the comprehensive exam is required for proceeding with other program requirements (e.g., prospectus, dissertation) and obtaining the doctoral degree. The examination should be completed at least nine months before the degree is to be awarded. The comprehensive exam is offered on the first Tuesday/Thursday of the Fall semester, first Tuesday/Thursday of the Spring semester, and the last Tuesday/Thursday of the Spring semester each year. This exam should be prepared for by individual study expanding on the content covered in the courses listed below:

- **HHE 605:** Advanced Theoretical and Scientific Basis of Health Education and Health Promotion;
- **HHE 606:** Planning and Administration of Health Education and Health Promotion Programs;
- **HHE 626:** Advanced Biostatistics in Health;
- **HHE 627:** Multivariate Methods in Health; and
- **HHE 667:** Advanced Evaluation in Health Education and Health Promotion.

The exam must be passed unconditionally before the student can submit their dissertation prospectus and defend their dissertation proposal. Prior to taking the exam, students must have completed the courses listed above with a grade of at least a B. At least two weeks prior to the exam, each student will receive more information about the exam.

Students should NOT assume that “A” level performance in their coursework is adequate preparation for the comprehensive exam. Students must be registered for at least one semester hour of graduate work during the semester(s) the comprehensive exams are taken. To prepare, students should review all materials from listed coursework as well as other related courses and supplementary material. **Each student must demonstrate the highest levels of learning including application, synthesis, analysis, and evaluation of material covered throughout the core courses.** PhD comprehensive exam responses must be written in an essay or textual format and should not include bullet points or other list-based formatting.

Failed comprehensive examinations can only be retaken once. Failing the comprehensive exam twice results in dismissal from both the PhD program and the Graduate School.

Once a student has passed the comprehensive exam, the Doctoral Qualifying Exam Form in Slate must be submitted to the UA graduate school.

Admission to Candidacy Requirements

The requirements for advancing to candidacy include passing the comprehensive examination; completion of all core coursework; receiving dissertation committee approval of the dissertation prospectus during a mandatory meeting of all committee members, and having the committee recommend the student for admission to candidacy for the doctoral degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

Prospectus Meeting

The prospectus meeting is a key milestone for PhD students, conducted prior to admission into candidacy. This meeting involves the student and

five prospective dissertation committee members, serving to establish a shared understanding of the proposed dissertation research.

The prospectus document should summarize the research idea, questions, and proposed methodology in no more than 20 double-spaced pages, excluding references. The document must include the following:

- Abstract providing a concise overview of the research purpose, methods, expected results, and significance
- Introduction: Reviews background information, articulate the problem being addressed, and explain the rationale for the study, culminating in research questions or hypotheses.
- Method: Describe participants, procedures, and data analysis plans with enough detail to ensure feasibility and replicability
- Expected Outcomes & Implications: Reviews the study's connection to the field of health promotion.

Prior to the meeting, the student must obtain approval from their Dissertation Chair and share the completed prospectus with all committee members at least two weeks in advance.

During the meeting, the student is required to give a formal presentation summarizing their prospectus. This presentation should not exceed 20 minutes and must provide an overview of the key elements of the document, including the purpose of the study, research questions or hypotheses, proposed methods, anticipated outcomes, and their potential implications for the field of health education and promotion. The presentation is followed by a discussion during which committee members provide feedback, ask questions, and offer guidance. The meeting is expected to last no longer than two hours in total.

The committee will evaluate the prospectus and assign one of three outcomes: high pass, pass with edits, or resubmission necessary.

The Dissertation Chair is required to notify the PhD Program Coordinator and Department Chair of the meeting's outcome. Students may only advance to candidacy after their prospectus has been approved. If the prospectus is not approved, the student must revise it based on committee feedback and schedule a follow-up meeting.

Appointment/Change in Doctoral Dissertation Committee

Around the same time that your Dissertation Committee Chair submits the Doctoral Candidacy Form, you, as the student, should submit the “Appointment/Change in Doctoral Dissertation Committee Form.” The process for setting up or changing your dissertation committee is an electronic process. This paperless process will generate emails to each committee member so that they can accept or reject the invitation to serve on your committee. Members of the committee should be selected along with your Dissertation Committee Chair. This online form officially establishes the student's doctoral committee.

Dissertation Committee Membership

All dissertation committee members must hold Graduate Faculty status at UA and represent at least two academic departments. The chair of the committee must be a full member of the Graduate Faculty. Our Department requires that the Dissertation Committee Chair (or its lead Co-chair) is a PhD Program Faculty member in our department. The doctoral dissertation committee must include a minimum of five (5) faculty members. We also require a minimum of three (3) individuals from our Departments' PhD Program faculty serve on the dissertation committee. There should be at least one committee member from outside of our department. These individuals should be selected along with your dissertation committee chairperson. You and your Dissertation Chairperson should ensure that they have (or will have) Graduate Faculty

Membership. Students should try to form a dissertation committee by the end of their second semester of doctoral study.

Dissertation Proposal

Having received guidance from the dissertation committee, the formal dissertation proposal can be developed and generally completed after all or most of the course work is completed, and the comprehensive examination has been successfully completed. The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The department defines a dissertation proposal as the first three chapters of the traditional dissertation (note: the format will look different for an article-style dissertation). The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the proposed research's significance, literature review, and methodology. Each student will work closely with their Dissertation Chair and committee to develop a dissertation proposal.

Once the student and dissertation chair have developed a proposal and the graduate Dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. **The student cannot propose a dissertation and have its final defense in the same semester.**

Proposal presentations typically last about 30-50 minutes. They often include a brief handout of the presentation outline and main points and electronic presentation formats such as PowerPoint presentations. Dissertation Chairs help students decide on an appropriate presentation package. The Dissertation Chair invites all PhD students and department faculty to attend the public portion of dissertation proposal meetings.

An email announcement about a student's dissertation proposal should be sent to the Department Chair and College for inclusion in the CHES Newsletter. Posting for the Dissertation Proposal must be made public two weeks prior to the proposal.

In preparing for dissertation proposal meetings, PhD students will work closely with their dissertation committee at all stages in developing a dissertation proposal. The dissertation proposal format will be distinct depending on the dissertation style selected by the student.

Students who elect to pursue the **Traditional Dissertation Format** option will prepare a dissertation proposal that includes three (3) fully developed chapters consisting of the:

1. Introduction,
2. Comprehensive Literature Review, and
3. Proposed Methodology

Students who elect to pursue the **Article-Style Dissertation Format** option will prepare a dissertation proposal that includes:

1. An introduction with:
 - a. Theoretical foundations,
 - b. Comprehensive literature review,
 - c. Statement of the problem, and
 - d. Proposed methods for each of the three planned papers that will be written as part of the dissertation.

The proposal should be presented to the Dissertation Committee no later than 2 weeks (10-15 workdays) before the proposal meeting. Electronic copies can also be provided to other department PhD students and other faculty members, specifically as follows:

- *Dissertation Committee* –1 electronic copy (by email) as MS Word file.

After conferring with their Dissertation Chair, students traditionally take responsibility for contacting committee members and arranging a date, time, and location for proposal meetings. During the period of doctoral study, the faculty expects PhD students to attend the public portion of dissertation proposal meetings of other PhD students.

The initial proposal of the dissertation to the student's committee should be a formal presentation. A polished and professional quality proposal should be the standard. Students will be expected to present their formal research proposal to the graduate faculty, graduate students, and other auxiliary faculty and guests. Directly following the proposal, the student's dissertation committee will convene to approve the proposal or recommend that a student resubmit a modified proposal later.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in health education and promotion. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee and by the Dean of the Graduate School. The doctoral dissertation is designed to provide students with a significant research experience. Students may choose from 2 formats to conduct a dissertation: the typical 5-chapter format and the article-style dissertation format. The Dissertation Chair and committee members will assist the student in selecting a format.

Article-Style Dissertations

At the doctoral level, "article-style" dissertations are unified works that include several distinct but closely related research or creative activity studies, each of which is of publishable quality. This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. This option is strongly encouraged for students enrolled in the PhD Program in Health Education and Promotion.

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. The student must be the first author, or equivalent, as defined by the discipline for each article used. As with traditional dissertations, the article-style dissertation must be the student's original idea. It must be a unified work and include a sequence of three articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

In Article-style dissertations, there will be:

- introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary clarifies the importance of the studies, integrates the major findings, and discusses the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract. The manuscript will be one of the sets of tables, figures, and reference lists for the document.

All parts of article-style dissertations must conform to the provisions set forth by the UA Graduate School, except when the circumstances of a specific project or discipline's style manual require deviation. Doctoral students who choose the article-style dissertation will write a final, completed dissertation that will consist of at least three (3) journal-style manuscripts or articles. Students considering the article-style approach

should contact the Graduate School before beginning their work about specific article-style guidelines or deviations from traditional procedure.

Authorship Guidelines for Article-Style Dissertations

The student should be the primary author on all of the published or publishable works. Committee members are typically included on the papers produced by the dissertation work since they are working in a collaborative relationship with the graduate student. The decision regarding authorship should be based on the degree to which a given committee member contributed to each paper. Serving on the committee does not guarantee authorship.

If an article(s) is multi-authored, you should justify or clarify the contributions of the other authors in relation to the research project. Issues of clarification should include the origins of the conceptualization and design, data collection, analysis and interpretation of the data, and other significant areas of contribution. The student will be involved with every aspect of the dissertation.

General requirements for assigning authorship credit to the manuscripts generated during the dissertation process include:

- Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

For more details on peer-reviewed journal article authorship expectations.

The doctoral student will consult with the committee members to decide on the fate of unpublished papers at the time of graduation. Time limits should be established, so that publication of papers is not held up if the graduate does not submit papers following graduation.

Traditional Dissertation

A dissertation consists of three main parts: the preliminary pages, the text, and the reference matter. Each part contains several sections. Some sections may be omitted, but the order of the following outlines must be observed.

Preliminary Pages

- Title page includes Committee Chair and list of committee members (required; see Appendix A. Do not number this page)
- Copyright page (required; see Appendix A. Do not number this page)
- Abstract (required; number this page ii) - **must not exceed 350 words**
- Dedication page (Optional)
- List of abbreviations or symbols (required when symbols used are not self-explanatory)
- Acknowledgments (required)
- Table of contents (required; titles of each section listed must concur exactly with body of the paper. Do not list this page among the contents)
- List of tables (required when tables are used)
- List of figures (required when figures are used)
- List of illustrations (required when illustrations are used)

Main Manuscript

- Body of paper (with 5 chapters or sections formatted following the template available from the UA Graduate School)
- Bibliography or References (choose one, depends on accepted practice within the discipline)
- Appendices
- IRB Certificate (where applicable)

Illustrative Materials

- Drawings, graphs and colored images may be included only if they are of high quality. All materials must conform to the margin requirements outlined in this manual.
- Photographs, charts, maps, drawings, and similar items can be included.

Supplementary Files

- Supplementary materials, e.g. audio, video, and Spreadsheet, may be included as supplementary files as part of your electronic submission, however, you **MUST** follow the formatting and submission requirements set out in ProQuest's instructions for supplementary files.

IRB Certification

- A copy of the Institutional Review Board (IRB) certification must be included in the appendix where a dissertation involves human subjects.

Dissertation Defense

When the student and the committee consider the dissertation to be complete, the committee will conduct the final oral examination of the dissertation. The final oral dissertation defense is the culminating experience in the doctoral program. Once the dissertation committee has agreed that the student is prepared for the final oral dissertation defense, the student and committee members will set the defense date. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Final defense presentations typically last about 30-50 minutes. They often include a brief handout of the presentation outline and main points and electronic presentation formats. Dissertation chairs help students decide on an appropriate presentation package. During the period of doctoral study, the faculty expects PhD students to attend the public portion of dissertation final defense meetings of other PhD students.

After conferring with their Dissertation Chair, students traditionally take responsibility for contacting committee members and arranging a date, time, and location for dissertation final defense meetings. Refreshments are not required at the final defense. Dissertation Chairs announce the dissertation's final defense date, time, and the location at Department and College levels. Faculty Advisors invite all graduate students and department faculty to attend the public portion of dissertation final defense meetings. An email announcement should be sent to the Department Chair and College for inclusion in the CHES Newsletter.

In preparing for dissertation final defense meetings, PhD candidates will:

Work closely with the Dissertation Chair and Committee at all stages in completing the dissertation.

Provide Committee members with one electronic copy (delivered by email) as an MS Word file of the final version of the dissertation.

All members of a student's dissertation committee are expected to attend and participate in real-time, usually in person, in any oral examination as part of the student's graduate degree program. Traditionally, oral

examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and UA Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In addition, the dissertation must comply with the regulations of the UA Graduate School.

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student's major department and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation and the dissertation's field, but it may encompass the complete program for the degree. The majority of the committee must approve that the student successfully defended the dissertation. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Graduate School deadlines, including each semester's dissertation deadline, are available at the Graduate School's homepage, along with details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

All Committee members must be present and sign the appropriate paperwork following successful defense of the dissertation. Most dissertations, even in the final form for the meeting, require some follow-up work. The Doctoral Final Defense Form in Slate must be completed and submitted to the UA Graduate School once a student has passed their dissertation defense.

After the successful defense, the Committee Acceptance Form for Electronic Dissertation must be completed and submitted to the UA graduate school once the dissertation committee is ready to sign off on the final version of the dissertation. In other words, a student can pass their defense, but the committee may want them to make changes before the dissertation is submitted to the Graduate School. In this case, only the Doctoral Final Defense form would be submitted in Slate to acknowledge that the defense has taken place and the outcome of the defense, but the Committee Acceptance Form for Electronic Dissertation would be held until student has made the changes required by the dissertation committee. Thus, the PhD candidate's program effectively concludes when all Committee members accept the dissertation and sign the appropriate paperwork.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 21).

Student Progress Requirement

Annual Evaluation of Progress Toward Degree Completion by PhD Students

Faculty have a responsibility to evaluate students' competence across multiple aspects of performance, development, and functioning. Students should know that their faculty and department administrators will evaluate student competence in areas other than, and in addition to, their coursework, comprehensive examinations, and related program requirements. Students are expected to meet all academic requirements,

possess discipline-specific knowledge, display professional competency, and engage in scholarship activities that are fitting of a PhD program.

Students will be evaluated in the following areas:

ACADEMIC STANDARDS/REQUIREMENTS

1. Grades in Courses and Overall GPA:

Throughout the doctoral program, the student must maintain a minimum overall grade point average (GPA) of 3.00 in all coursework. Additionally, students must achieve a grade of "B" or higher on all courses listed in their Plan of Study (unless the class is for pass/fail credit, in which case the student must receive a "pass" grade). The student must re-take any course that does not meet this grade requirement.

EVALUATION STANDARDS

1. Engagement in Scholarly Activities (e.g., research, manuscripts, conference presentations, teaching, professional development):

Each year, students will be assessed on their engagement in scholarly activities. Sample activities that doctoral students might do to meet the annual scholarly engagement requirements are presented below.

- Actively participate in a faculty-supervised independent research project.
- Engage in collaborative research and development activity with core program faculty and other faculty on campus.
- Present at a state, regional, national, or international conference (e.g., SOPHE, APHA).
- Collaborate with the research mentor or department professor as author or co-author of a scholarly manuscript for publication consideration to a peer-review journal.
- Complete HHE 596 (Independent Study) and/or HHE 602 (Readings in Health) with at least one written product (e.g., a literature review, secondary analysis, thematic paper) that could serve as the basis for a published article/research project, grant proposal, or dissertation topic.

***Note. Prior to Enrolling in Dissertation Credit Hours, Students Must Have:**

1. Conducted a minimum of one research or other scholarly activity under the supervision of a PhD program faculty member(s); and
2. Disseminated a minimum of two research or other scholarly activities via professional publication or presentation. The student must be the first author or primary presenter for at least one of these research projects.

Teaching

- For teaching assistants (TAs) or doctoral students those listed as instructor of a course(s), complete evaluations of teaching effectiveness in the classroom (e.g., SSOI results, student-initiated surveys to obtain student feedback on teaching).
- Attend a campus-wide teaching workshop (<https://teachinghub.as.ua.edu/>) to improve teaching strategies when in the classroom.
- Serve in a leadership role on a committee or hold an office in a professional organization related to health promotion.

- Review abstracts for a professional organization's annual meeting (e.g., APHA, SOPHE, SEATA).

Professional Development

- Attend a campus-wide professional development research focused event (e.g., grant-writing workshop)
- Attend and/or volunteer to participate in Department/College/or UA research-related events (e.g., judge for URCA, attendance in Graduate Research Seminar).
- Attend a state, regional, national, or international conference.

1. NCHEC Competencies specified in the Eight Areas of Responsibility of a Health Education Specialist:

Students will self-assess their performance in profession-wide advanced competency areas, specifically, within NCHEC's eight areas of responsibility of a Health Education Specialist (<https://www.ncheec.org/responsibilities-and-competencies>).

The assessment process will include pre- and post-program self-assessments conducted by the student which are then reviewed and evaluated by the faculty. Results will be used to identify program strengths and weaknesses, and will inform discussions around program changes.

1. Assessment of Needs and Capacity
2. Planning
3. Implementation
4. Evaluation and Research
5. Advocacy
6. Communication
7. Leadership and Management
8. Ethics and Professionalism

Additional Professional Standards:

In addition to adherence to ethics and the honor code described above, other evaluative areas include, but are not limited to, demonstration of sufficient:

1. **interpersonal and professional competence** (e.g., the ways in which students relate to peers, faculty, other professionals, study participants, the public, and individuals from diverse backgrounds or histories);
2. **self-awareness, self-reflection, and self-evaluation** (e.g., knowledge of the potential impact of one's own beliefs and values on clients, peers, faculty, health education/promotion professionals, the public, and individuals from diverse backgrounds or histories);
3. **openness to processes of supervision** (e.g., the ability and willingness to explore issues that either interfere with or impede professional development or functioning); and
4. **resolution of issues or problems that interfere with student/professional development or functioning in a satisfactory manner** (e.g., responding constructively to critical feedback from supervisors or program faculty; the successful completion of remediation plans; participating in resolution of issues or problems).

The Code of Ethics for the Health Education Profession

Students are expected to adhere to rules, laws, and codes governing the academic training program and the field of health promotion, specifically the NCHEC Health Education Code of Ethics. Although students may not become Certified Health Education Specialists, doctoral students in this

program are expected to adhere to the 2020 Code of Ethics, Articles I and II, for the Health Education profession (<https://www.ncheec.org/code-of-ethics>).

The annual evaluation covers April 1 of the preceding year through March 15 of the current year. The Faculty Advisor or Dissertation Chair informs the student, PhD program coordinator, and department chair that the student passed the annual evaluation. If the Faculty Advisor or Dissertation Chair finds that the student is not making satisfactory progress, the Faculty Advisor works with the student and PhD program coordinator to resolve the problem. If the process does not resolve the problem, and the Faculty Advisor or Dissertation Chair exhausts all reasonable options to reach a solution, then the Faculty Advisor or Dissertation Chair refers the matter to the Department Chair for resolution. Depending on the chair's assessment outcome, the Faculty Advisor/ Dissertation Chair may support the student (with a "pass"), ask the student to comply with corrective measures, or dismiss the student from the program.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

Acquisition of Financial Support: A limited number of graduate assistantships (GAs) and fellowships are available to students in the Department of Health Science. These positions are awarded on a competitive basis and are contingent upon meeting performance expectations and remaining in good academic standing. Graduate assistantships are .50 FTE appointments, requiring 20 hours of service per week. In return, GAs receive a tuition scholarship, a monthly stipend, and health insurance benefits. Financial support is typically guaranteed through the first three to four years of the program for PhD students who meet performance expectations and who do not violate the conditions outlined below.

Applicants interested in a graduate assistantship must apply by November 1st for full consideration and no later than February 1st for admission for the following fall semester. Final decisions on graduate assistantship awards are made by the Department Chair, though faculty input and rankings play a significant role in the selection process. Employment outside of a departmental GA position is strongly discouraged.

Fellowship Nominations: Fellowships are offered through the UA Graduate School on a competitive basis. Exceptional students may

be nominated for fellowships by the Department based on their research productivity, academic performance, and contributions to the Department. Fellowship recipients receive tuition, a stipend, and benefits comparable to those provided through GAs. Fellowship nominations are determined by departmental faculty through a voting process.

Performance Expectations for Continuing Financial Support: To continue receiving financial support, students must meet the following expectations:

- **Good Academic Standing:** Students must maintain good academic standing in the PhD program, which includes maintaining satisfactory grades and timely progress toward degree completion.
- **Compliance with Policies:** Students must complete all mandatory annual training and adhere to the rules and policies of The University of Alabama, the College of Human Environmental Sciences, and the Department of Health Science.
- **Adequate Job Performance:** Graduate assistants must perform assigned duties satisfactorily, whether related to teaching or research, as determined by their assigned supervisor.
- **Continuous Research Progress:** Beginning in their second semester, students must demonstrate continuous research progress under the direction of a department-approved research advisor.

Conditions for Termination of Financial Support: Financial support may be terminated if a student meets any of the following conditions, as determined by departmental review:

- **Dereliction of Duty:** This includes failure to comply with human subjects protection policies, instructional policies, absence from scheduled obligations without prior notification, or unsatisfactory completion of duties associated with the funded position.
- **Academic Misconduct:** Resolved findings of academic misconduct may lead to termination of financial support, as determined by university policies.
- **Loss of Good Academic Standing:** Students not in good standing have one probationary semester to improve their academic status. Failure to do so will result in termination of financial support.
- **Insufficient Research Progress:** Students who fail to make adequate research progress, as determined by their dissertation committee, may be given one probationary semester to address deficiencies. Continued lack of progress will result in termination of financial support.
- **Delinquent Reviews:** Students who fail to complete required annual reviews within the specified timelines may face probation and eventual termination of financial support.

In all cases of potential termination, the Department Chair and PhD Program Coordinator, with input from relevant faculty, will review the circumstances and provide students with appropriate notice of impending actions. Immediate termination may occur in severe cases, while other cases will provide the student with a probationary period to address deficiencies.

Health Studies, MA

The Department of Health Science offers the program in health studies leading to the Master of Arts degree. The program courses address areas including the foundations of health promotion, program planning, implementation, and evaluation. Students are prepared to practice in community non-profits and worksite settings. The degree does not require a thesis. Students will complete a comprehensive exam as their culminating experience.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. At least 3 letters of recommendation.
 - Applicants should seek out 3 recommenders who are familiar with their skills and abilities.
 - Letters written by family or friends are not accepted.
 - Quality letters of recommendation are typically at least one single-spaced page in length.
 - Applicants should reach out to the Health Studies MA Program Director if more guidance is needed on selecting recommenders.
2. A Résumé or Curriculum Vita (CV)
3. A Statement of Purpose that details:
 - Interests in the field of Health Education, Health Promotion and related fields
 - Any skills, abilities, or experience applicants may have that would support enrollment in your selected program
 - Professional goals and aspirations
 - How the program to which the applicant is applying aligns with the applicant's goals and aspirations
 - Any other information the applicants would like to share regarding their qualifications to study at the graduate level at UA

Statements should be approximately 2 pages in length, double-spaced, and the writing should be representative of a potential graduate student. Please be sure to proofread and edit the statement before submitting with the complete application.

Please note no academic credit, course waivers, or credit shall be granted for life experience or previous work experience. Also, no student can earn both the MA in Health Studies and the MPH degrees. Courses completed can only be used to earn one degree from the Department of Health Science.

Requirements for After Admission

All applicants who receive an offer of admission must accept that offer by indicating their intent to enroll. The link to accept admission is in the official offer of admission letter sent by the UA Graduate School. Once a student has accepted admission, they will be required to have an initial advising appointment with the MA in Health Studies Program Director.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

**This program is only offered online through distance education.*

The Master of Arts in Health Studies degree will be awarded to the student who has met the following requirements:

- Successful completion of 30 hours of approved courses including 9 hours of electives.
- Evidence of the capacity to perform academically at the graduate level and to make satisfactory academic progress by maintaining an overall GPA of 3.0 or higher throughout the program.
- Completing their comprehensive exam through earning the Certified Health Education Specialist certification through the National Commission for Health Education Credentialing (NCHEC).
- Students are expected to demonstrate writing proficiency at a graduate level.

The MA in Health Studies program does not offer a thesis option. All students will complete 9 hours of electives and and earn the Certified Health Education Specialist Exam as their culminating experience to complete the degree requirements.

Transfer Credit

Applicants interested in transferring graduate credit to the MA program from an outside institution should reach out to the MA Program Coordinator. *Please note the Department of Health Science allows a maximum of 6 hours of transfer credit as approved by the MA Program Coordinator. To be counted toward the MA, all transferred hours must have been completed with a B or higher from a regionally accredited school and taken during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program.* See also the UA Graduate School's transfer policies (p. 15).

Comprehensive Exam

All students in the MA in Health Studies program must complete and pass a culminating experience in order to graduate from the program. The culminating experience is passing the Certified Health Education Specialist (CHES) Exam. The MA program does not require a thesis.

The CHES Exam is offered by the National Commission for Health Education Credentialing (NCHEC). NCHEC is a national health education organization that certifies health education specialists, promotes professional development, and strengthens the professional preparation and practice of health educators. The CHES Exam tests students on the concepts and areas of responsibility reflected in the program learning outcomes.

The CHES Exam is administered twice a year (each April and each October) for a period of 10 days in both months. CHES Exam dates are provided on the NCHEC website. The CHES Exam is computer-

based assessment offered at over 400 registered sites. The CHES Exam consists of 150 scored items and includes 15 additional, unscored pilot items. Examinees are provided three hours to complete the multiple-choice exam.

Students must plan to cover the CHES Exam fee and any other costs associated with the exam. Exam fee details and the registration information for current students are provided on the NCHEC website. Once they are eligible to register, students must submit proof of registration to the MA Program Coordinator. Exam eligibility and registration details are on the NCHEC website.

Students must complete and pass the exam in order to have the exam count as the culminating experience to earn the degree. Students must submit evidence of their passing score to the MA Program Coordinator before the deadline set for their semester of graduation.

Time Limits for Degree Completion Requirements

The MA in Health Studies program adheres to the time limits set forth by the UA Graduate School (p. 15). Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate.

Student Progress Requirement

The MA in Health Studies program adheres to the Student Progress Requirements set forth by the UA Graduate School.

Academic Misconduct Information

The MA in Health Studies program follows the criteria and guidelines set forth by the Graduate School on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students are encouraged to follow university policies and processes if seeking a withdrawal from a course, a withdrawal from all courses, or a leave of absence (p. 244).

Academic Grievances Information

The MA in Health Studies program adheres to the academic grievance procedures (p. 255) as outlined by the Graduate School.

Grades and Academic Standings

The MA in Health Studies program adheres to the grading and academic standing requirements set forth by the Graduate School, except for the transfer credit limit for the program is set to 6 hours.

HD500 Lifespan Human Development

Hours 3

This course will advance students' knowledge of the theories and research in human development across the lifespan. Major areas of study include: developmental theory and physical, cognitive, social and emotional development.

HD512 Adult Development

Hours 3

Theories of and research on development throughout adulthood; young adulthood, middle years and aging are presented.

[View All Courses](#)

Human Development and Family Studies, MS

Human Development and Family Studies (HDFS) focuses on helping children, families, and relationships thrive. Our students and faculty work from a lifespan ecological perspective on development and families, recognizing and supporting the many forms of diversity in individuals, families, developmental pathways, and contexts. We focus on discovering and applying new knowledge to strengthen individuals, families, relationships, and communities, and on preparing the next generation of professionals to serve and lead.

Human Development and Family Studies' (HDFS) students seek advanced employment or leadership positions in occupations serving children, adults, and families, or admission to PhD programs. All students complete coursework in lifespan human development, family science, research methods, statistics, and select additional courses aligned with their interest and career goals. Faculty research laboratories, The Children's Program, and collaborations with various agencies serving children and families across the state of Alabama provide opportunities for research and experiential learning.

Students have three options in pursuing the HDFS M.S. Degree:

1. The HDFS M.S. program with no concentration.
2. HDFS M.S. with a concentration in Marriage and Family Therapy
3. HDFS M.S. with a concentration in Child Life

Prospective students are strongly encouraged to reach out to the HDFS Graduate Program Coordinator or the Program Coordinator/Director for their concentration prior to applying.

Concentrations

Marriage and Family Therapy (MFT) provides graduate students with high quality training in the theory, skills, and professional identity essential to competent practice in the field of marriage and family therapy. Students graduate equipped to treat a wide variety of individual, couple, and family mental health issues with diverse populations.

Child Life (CL) is for students who wish to pursue the healthcare career of a Certified Child Life Specialist (CCLS). CCLSs support children and their families in the healthcare setting by providing education about diagnoses, support through procedures, and by promoting development. Through personalized advising and a flexible curriculum, the program accommodates students trained in other areas who wish to pursue a career in child life, as well as child life specialists seeking advanced training.

Admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

HDFS M.S.		Hours
HD 500	Lifespan Human Development	3
HD 562	Dynamics Of Family Reltn	3
HES 509	Research Methods	3
BER 540	Statistical Methods In Educ	3
Credit Hours Subtotal:		12
Students must also complete a thesis or comprehensive exam.		
Thesis Requirements		
HD 599	Thesis Research	6

Advisor Approved Statistics Class	3
Total Hours	21

The above table shows the 12 credit hour Program Core classes that students choosing any of the 3 program options (HDFS with no concentration, Marriage and Family Therapy, or Child Life) must take.

In addition to the 12 credit hour Program Core, students opting for a thesis will complete 9 credit hours (plus the 9 credit hours of thesis requirements), whereas students opting for the comprehensive exam will complete 18 credit hours.

Program Options

Students have three options in pursuing the HDFS M.S. Degree:

1. The HDFS M.S. program with no concentration.
2. HDFS M.S. with a concentration in Marriage and Family Therapy
3. HDFS M.S. with a concentration in Child Life

After being admitted into a specific concentration, any request to switch concentrations must be approved by the HDFS Graduate Faculty Committee. Students should consult with their advisor or the Department Chair before requesting to switch concentrations.

Students in all three options complete the same 12 credit hour Program Core classes highlighted in "Curricular Requirements" above. Each options has its own set of additional requirements.

HDFS M.S. with No Concentration

The HDFS M.S. with no concentration provides a more flexible program of study and prepares students for advanced employment and leadership roles in their field and/or research skills and preparation for PhD programs. To learn more about this option, please see our HDFS Graduate Program webpage.

Students choosing this option can choose to complete a research thesis (Plan I) or a non-thesis option (Plan II). In addition to the 12 credit hour Program Core and thesis or comprehensive exam requirements, students must complete the following:

HDFS M.S. with no concentration	Hours
Choose 9-18 credits from the following:	9-18
Must include one Family Studies Course	
HD 561 Theories Family Studies	
HD 535 Parent/Child Relationship	
Must include one Developmental Course	
HD 512 Adult Development	
HD 602 Adv Infant Development	
HD 601 Advanced Child Development	
HD 603 Adv Adol Development	
Advisor Approved Electives	
Total Hours	9-18

Marriage and Family Therapy Concentration

The Marriage and Family Therapy (MFT) concentration prepares students to take the licensure examination leading to Clinical Membership in the American Association for Marriage and Family Therapy. To learn more about the MFT graduate program, please visit our MFT Program webpage.

In addition to the 12 credit hour Program Core, students pursuing the MFT program of study will complete 39 credit hours (24 didactic + 15 practica and internship) of concentration courses. Clinical opportunities are provided in the College's Capstone Family Therapy Clinic.

Curricular Requirements

HDFS M.S. with MFT Concentration		Hours
HD 640	Couple and Sex Therapy	3
HD 641	MFT Ethics (MFT Ethics)	3
HD 642	Assess Psychopathology MFT	3
HD 645	Cultural Diversity in MFT	3
HD 664	Family Therapy	3
HD 665	Advanced Family Therapy	3
HD 567	Pract Marriage Family Therapy	3
HD 568	Pract I Marriage Family Thery	3
HD 667	Pract II Marriage Family Ther	3
HD 668	Intern Marriage Family Therapy	6
Choose 6 credits from the following:		6
HD 535	Parent/Child Relationship	
HD 561	Theories Family Studies	
HD 631	Readings Human Developmt	
Advisor Approved Electives		
Total Hours		39

Child Life Concentration

The concentration in Child Life prepares students to take the Child Life Professional Certification Exam to become a Certified Child Life Specialist. To learn more about our Child Life program, please visit our Child Life Concentration Graduate Program page.

In addition to the 12 credit hour program core, students pursuing the Child Life concentration will complete 24 credit hours as outlined below.

Curricular Requirements

HDFS M.S. with Child Life Concentration		Hours
HD 550	Hospitalzd Child & Youth	3
HD 551	Loss And Bereavement	3
HD 591	Sp Prob Hum Dev Fam Stdy	3
Choose 2 Developmental Courses		6
HD 602	Adv Infant Development	
HD 601	Advanced Child Development	
HD 603	Adv Adol Development	
HD 670	Internship in Child Life	9
Total Hours		24

Transfer Credit

Graduate School information on Transfer Credit. (p. 15)

Accelerated Masters Program (AMP)

Graduate School information on the Accelerated Masters Program (p. 7).

In addition to the requirements outlined by the graduate school, students applying to the AMP program for HDFS should have completed a minimum of 12 credits of HD coursework.

Capstone Requirements

All students must complete a requirement of a thesis (Plan I) or a non-thesis option (Plan II). Plan II is the option taken by students in the MFT and Child Life Concentrations. For students pursuing HDFS with no concentration, they may choose between a thesis (Plan I) or non-thesis option (Plan II).

Plan I - Thesis Process Requirements

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all Master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved first by the student's major professor and then by the graduate committee of the major department or school and by the head of the student's major department or division. The thesis committee must consist of at least three members approved by the Dean of the Graduate School. A student and his or her major professor will select the thesis committee. All members of a thesis committee must be members of the Graduate Faculty. Two members must be from the student's major department and one member must be from outside the student's major department. The student's major professor will serve as the committee chair.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline and timeline for the completion of the thesis project, as well as evidence that adequate facilities are available where the work will be done, to the head of the major department or school. Students are strongly encouraged to complete the thesis while in residence.

Note that students completing a thesis must also take an additional statistics class and at least 6 credit hours of HD 599 Thesis Research.

Plan II - Non-Thesis Process Requirements

Plan II is the option taken by students in the MFT and Child Life Concentrations, who complete comprehensive exams or comprehensive exam equivalents as their capstone requirement. HDFS students with no concentration who do not select Plan I will typically complete a comprehensive exam as part of Plan II. The comprehensive exam is a take-home essay exam normally completed in the student's final semester. Students will have two attempts to pass the comprehensive exam.

HDFS students with no concentration choosing Plan II may also pursue a project-in-lieu-of-thesis (PILOT) at the discretion of the student's major professor. A PILOT (Plan II) is not always available, or feasible. Students should not assume that they will be able to conduct a PILOT. The major difference between a traditional thesis and a PILOT is that in the former, the student originates the idea for the study and fully develops the research question and the design of the study. In contrast, a PILOT is likely to be an idea that the major professor has already fully developed, or is in the process of developing, or is a study or project already in the process of being conducted.

After consulting with their Major Professor about the possibility of completing a PILOT, and receiving approval to complete a PILOT, a written agreement should be developed between the student and the Major Professor as to what will comprise the PILOT, including a timeline to complete the PILOT. The Major Professor and student must sign the agreement for it to be valid. Prior to starting on the PILOT, students must also propose their project to a committee of three faculty members. All

three committee members may come from within the Department of Human Development and Family Studies. The student's major professor will chair the student's committee and will be one member on the PILOT Committee. Only two of the three committee members must be members of the Graduate Faculty.

The student must produce a written document that describes the planning and implementation of the project, including a literature review, (or similar acceptable document, such as an IRB protocol) to present to the PILOT committee. No date will be set for the committee to meet until the committee reads and provides feedback to the Major Professor and/or student about the PILOT. The student is responsible for scheduling a proposal meeting with the PILOT committee, presenting the proposal and receiving approval from the committee to conduct the PILOT. Once the project is completed, the student submits the written document to the committee, and presents the results of the project at a final defense before the committee members. The PILOT committee unanimously must approve the student's defense of the project and sign-off on the PILOT Defense Form. PILOT Defense Forms can be obtained from the Program Assistant in the Department of Human Development and Family Studies. If the PILOT is part of a study already being conducted, the IRB must be amended to include the student's name after the PILOT committee has approved the PILOT. The student is expected to write different sections of the PILOT, including assisting with the writing of the PILOT (e.g., literature review), collecting and working with data (e.g., administering assessments, coding videotapes, scoring and entering assessments into a database, etc.), assisting with the data analyses and interpretation and write up of the results and discussion sections.

Students who complete a PILOT must enroll for at least 6 credit hours of HD 598 Research Practicum - Non Thesis Research.

Internship Requirements

Each student completing the Marriage and Family Therapy, or the Child Life concentration will be required to complete an internship. The internship does not satisfy the capstone requirement. Students must also complete a thesis, PILOT, or comprehensive exam.

To be eligible to sit for the Child Life Professional Certification Examination, child life students must complete a 600 hour clinical internship under the supervision of a Certified Child Life Specialist. Child life internships are unique in that students apply and compete for an internship in child life programs of their choice. During an internship, child life students further their knowledge and skills and practice implementing child life services with patients and families in order to become job ready. Child life internships are very competitive, and child life students are encouraged to meet with their advisor to learn about and prepare for the process.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 15).

Student Progress Requirements

Each student pursuing the MFT concentration will meet with program faculty, at least annually, to review the student's progress and discuss steps for continued growth in the program. The meeting will address progress on coursework, clinical skills, professional competencies, ethical and legal competencies, and adherence to the non-discrimination, diversity, and inclusion code of conduct.

Faculty will provide three levels of support for student development. The first level encompasses the typical day-to-day professional interactions

and practices that occur during coursework and clinical supervision. The second level comes into play when a student struggles to make progress on one or more competencies through typical coursework and supervision procedures. Such “minor deficiencies” will be addressed through the collaborative development and implementation of an improvement plan. The third level typically occurs when a student fails to make progress toward overcoming a “minor deficiency,” but there may be occasions when a “severe deficiency” appears suddenly (e.g., a student commits a significant ethical violation). “Severe deficiencies” are addressed through the collaborative development and implementation of a remediation plan. Failure to adequately address a “severe deficiency” will result in dismissal from the program.

Application for Graduation Information

Graduate School information on the Application for Graduation (p. 15).

A limited number of merit-based graduate assistantships are available. All applicants are automatically considered for assistantships. Funding offers are typically communicated in late spring or summer. These assistantships involve a biweekly or monthly stipend in exchange for supervised work that both provides professional experience to the student and supports the university in carrying out its mission. Assistantships may be continued or rescinded based on availability of funding and performance of the student. Students' performance will be evaluated specific to their academic performance and their performance in duties related to the assistantship. If students drop below the minimum GPA of 3.0 or if there are deficiencies in their performance of their duties in their assistantship, their funding may be rescinded.

NHM509 Research Methods in Nutrition Hours 3

This course is an introduction to scientific methods appropriate for nutrition research. Approaches to designing, conducting, and evaluating nutrition research are discussed along with strategies for applying research into practice.

NHM530 Advanced Nutrition Counseling Hours 3

Focuses on advanced skills in nutrition counseling that incorporates behavioral theory and motivational interviewing.

HSM500 Sport Management Principles and Practices Hours 3

This course focuses on management theories and practices required to successfully manage sport organizations in a variety of different settings.

HSM521 Hospitality Law and Risk Management

Hours 3

Exploration of legal problems facing the hospitality industry. Legal cases related to restaurants, hotels, and meeting facilities are examined. Concerns and problem-solving for issues of risk management are explored.

[View All Courses](#)

Hospitality Management, MS

The Hospitality Management master's program prepares students wishing to advance and to excel in leadership/executive positions in the hospitality, tourism, and sport industries. A thesis option within this program will prepare students who wish to extend their education by providing a robust research foundation to be successful in a doctoral program in Tourism Management, Hospitality Management, Sport and Entertainment Management, Business Management, and Law. The Sport Hospitality concentration prepares students for success in a wide variety of sport, hospitality, entertainment, and tourism careers along with the opportunity to meet and interact with experienced industry professionals. The hospitality, tourism, and sport industries touch the lives of all citizens and provide economic and social benefits to the State of Alabama and the United States.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- Statement of Purpose (Include in the Header: Hospitality Management). Students should also include in their statement why they have chosen this area of study and how it will apply to their personal and/or professional goals.

See the Admission Criteria section of this catalog for more information.

Transfer Credit

Courses completed at other postsecondary institutions and accepted for UA graduate credit are given a grade of "P" and are not calculated in the overall graduate GPA.

Graduate School information on Transfer Credit (p. 15).

Accelerated Master's Program Information

The Hospitality Management program has an approved AMP program through the Graduate School. Please refer to the official information on the Graduate School's website. If you are interested in the AMP program, please schedule a meeting with the program director.

Graduate School information on the Accelerated Master's Program (p. 7).

Comprehensive Examination/ Capstone Project

All students must complete either a comprehensive exam or a capstone project (thesis or non-thesis project) to meet the graduation requirements. Students need to contact their graduate advisor and convey their decision regarding which option by the end of the second semester. Students selecting the thesis track need to contact their advisor during the first semester taking courses.

Comprehensive Examination

Students who choose the non-thesis Hospitality Management option will be required to take a comprehensive exam or complete a Capstone Project (see below). At the beginning of the final semester, you will receive an email from the Comprehensive Exam Coordinator with specific information about the exam along with important dates. You are required to confirm your graduation intent with the Comprehensive Exam Coordinator or your advisor within 2 weeks of the final semester. Upon confirmation, the student will be added to a Blackboard course where detailed exam information can be found along with the comprehensive exam guidelines. Students are required to take the comprehensive exam the last semester taking courses. The comprehensive exam is an essay exam that integrates prior learning. Students are provided with three questions and have 1 week to complete the exam.

Evaluation: Two HM graduate faculty members will independently answer to each exam question using a blind evaluation process. Each question will be scored as either pass, marginally pass, or fail. If a student fails any or all of the questions, they may retake the exam once during the current semester. If the student chooses to take the exam the following semester, the student must register for another graduate course.

Notification of Passing/Failing: Students will be emailed the results of the examination within 2 weeks after the exam period.

Capstone Special Project

Students not completing a thesis or comprehensive exam must complete a special project under the supervision of a faculty advisor. This project will allow students to work with an industry professional on a topic or issue where the results will benefit the hospitality organization. Students must gain approval to complete the Capstone Special Project.

Plan I- Thesis Process Requirements

Student interested in a thesis option should contact their advisor by the end of the first semester of graduate studies. Students completing a thesis will need to sign up for a total of six hours of HSM 599. These

hours can count toward the required 18 hours in RHM designated courses needed for the degree. To complete the thesis option, students will need to:

- select a designated mentor (Chair) from the UA Hospitality/Sport faculty who is willing to serve as your chair
- select a thesis committee of at least three members including their mentor
- write a proposal that includes an extensive review of the literature and proposed methods that will be used in the study
- receive approval of the proposal from the designated mentor
- seek guidance from committee members prior to collecting data
- formally propose the research plan to the committee and respond to feedback
- receive IRB approval for the project in their own institution and UA
- collect data
- analyze data
- interpret the data and write up the results
- discuss implications of the study
- seek final approval from committee members and formally present the research to the committee members and other faculty
- and electronically publish the thesis according to The University of Alabama's guide for "Electronic Theses and Dissertations."

Students completing a thesis should ensure that they can meet the Graduate School's deadlines for students.

Plan II- Non-Thesis Process Requirements

Students must complete 30 credit hours of coursework and successfully pass a comprehensive exam or complete a Capstone Project. Sport Hospitality students must schedule an appointment with their advisor to begin discussing their Capstone Project during their first semester in graduate school. Hospitality Management students must schedule an appointment with their advisor the first semester in graduate school to confirm the non-thesis option. Students must also contact their advisor the semester prior to the last semester to schedule the comprehensive exam.

Time Limits for Degree Completion

Graduate School information on Time Limits for Degree Completion (p. 15).

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence

Under compelling circumstances beyond the student's control, a graduate student may request that the department petition the Graduate School with the rationale for granting a leave of absence. If granted by the Graduate School, a leave of absence will cover one or more upcoming semesters rather than any prior semester(s). A leave of absence is not a method of avoiding continuous registration requirements, and it *does not* lengthen the time limit. When a student returns from a leave of absence, the Graduate School must be notified and will work with the department and student to determine the number of semesters remaining on the time limit and the degree requirements that remain.

Graduate School information on Withdrawals and Leaves of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Graduate School information on the Application for Graduation (p. 15).

Overview

Graduate assistantships at the University of Alabama may be available to students. For an overview of information regarding eligibility criteria, class hour requirements, and Full-Time Equivalent (FTE) levels for holding an assistantship, see the Graduate School catalog under Assistantships: Admission Status, Class Hours, and FTE Level.

Acquisition of Financial Support

Faculty vote to admit a limited number of students based on the availability of positions within the department. Unconditionally admitted full-time graduate students may seek and receive financial assistance in the form of a graduate assistantship. Graduate assistantships are highly competitive and being admitted into the graduate program does not in any way guarantee an assistantship award. Accepted students may receive up to three years (fall and spring) of funding if requirements are met (see below). When a student is admitted to the program with financial support, the stipend level is specified, but the source of the financial support may vary from semester to semester. In general, the majority of MS students within this program do not receive departmental financial support.

Types of Financial Support

Financial support for graduate students may include teaching assistantships, research assistantships, scholarships, fellowships, or combinations of these sources.

Graduate Research Assistant. Faculty members with awarded, external research funding may be able to support a graduate research assistant (GRA) for one or more semesters. Benefits associated with external research funding are determined by the funder and budget allocations within the grant.

Graduate Teaching Assistant. Alternatively, the Department offers a limited number of graduate teaching assistantships (GTA) available that may be used to financially support students. The responsibilities of these assistantships can vary based on departmental needs, such as serving as an instructor of record, lab instructor, or grader.

Fellowship Nominations: Additional support is available in the form of fellowships, available from the University and other funding agencies.

Eligible students may be nominated by the Department for UA fellowships. Nominees are selected by departmental faculty based upon prospective nominee research productivity, academic performance, and contributions to the Department or field. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits at least commensurate with those provided through GRA or GTA support.

Performance Expectations for Continuing Financial Support:

The student must be in good academic standing in their designated program.

The student must complete all mandatory annual training and abide by all rules and policies held by The University of Alabama, The UA College of Human Environmental Sciences, UA Environmental Health and Safety, and the Department of Human Nutrition, Hospitality and Sport Management.

Graduate teaching assistants must adequately perform all duties assigned to them in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.

Conditions for Termination of Financial Support:

Students who meet one or more of the following criteria will be subject to termination of financial support pending Department administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Department Chair and Graduate Director, with input from the Graduate Committee, may recommend immediate termination of financial support, termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

Dereliction of duty. Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee and/or the research advisor; failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee and/or by the research advisor and the student's departmental memorandum of appointment; or failure when publishing to adhere to the ethical principles in publishing. For more information, review the University's Policy on Academic Misconduct in Scholarly Activities (Appendix F).

Loss of good academic standing. Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing—with the non-passing grade exception noted below. Financial support may be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the Graduate Committee. This review will determine whether the student should continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered within two weeks after the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.

The Department is not obligated to provide funding for students terminated from their positions. It should be noted that a loss in funding does not equal dismissal from a program, for students in good academic standing and who have not been found to have committed misconduct worthy of dismissal.

Human Nutrition, MS

The Master of Science in Human Nutrition is a 30 credit-hour program designed to prepare nutrition professionals to practice dietetics at an advanced level and/or to pursue doctoral study. The program develops research skills, fosters independent thought, and provides up-to-date knowledge in food and nutrition. Applicants can choose to pursue the

major without a concentration (Generalist Track) or they may select from the Community Nutrition or Clinical Nutrition concentrations to provide a more in-depth study of their chosen area. The program is designed for the Registered Dietitian Nutritionist (RDN) and those pursuing the credential. The program can be completed by a dietetic intern or student with a bachelor's degree in nutrition or another discipline who has completed the required prerequisites.

Campus Options

The master's degree is available on campus or online through distance education. The degree requirements are the same, regardless of where it is completed.

Additional Information

For more information, refer to the Master of Science in Human Nutrition program website.

Direct additional questions to the Director of the Master's Program in Human Nutrition.

Students earning the Master of Science (MS) degree in Human Nutrition must complete all University, College, and Departmental degree requirements. These include the following requirements for a minimum of 30 applicable semester hours.

Admissions

Application Deadlines

Applications are accepted on a continual basis. The deadlines to apply for each semester are as follows:

- Spring admission: December 1
- Summer admission: April 15
- Fall admission: July 1

Regular Admission Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- GPA: Students with an overall, undergraduate grade point average (GPA) of 3.0 or higher may apply for admission. A student may also be considered if they have a 3.0 or higher in their last 60 hours of undergraduate coursework.
- Resume/Curriculum Vitae
- Statement of Purpose
 - Address letter to MS Program Director
 - 1-2 pages, Time New Roman, 12-point font, single-spaced and with one-inch margins
 - Include the following:
 - Discuss your relevant experience (academic, personal, work) and background.
 - Discuss your long-term professional goals and how completion of this program supports your goals.
 - Describe a unique personal characteristic or experience you feel prepares you to be successful in this program.
 - Any additional information that may be helpful as we review your application (early graduation, gap year, transferring schools, personal struggles, challenges you may have faced, etc.).
- Three letters of recommendation (at least two from academic references preferred)
- Transcripts from previous institutions attended for 15 or more hours.

- Prerequisite Courses: Students must have completed an ACEND accredited dietetic program or the following undergraduate prerequisite courses or their UA equivalent prior to admission into the program.

Code and Title		Hours
CH 104	Introductory Chemistry	4
CH 105	Introductory Org Chem	4
BSC 215	Human Anatomy & Physiology I	4
BSC 216	Human Anatomy & Physiology II	4
NHM 101	Intro Human Nutrition	3
NHM 201	Nutrition In Life Cycle	3
NHM 295	Intro Research Food Nutr	1
NHM 340	Community Nutrition	3
NHM 361	Nutritional Biochemistry	3
NHM 363	Applied Nutrition	3
NHM 365	Med Nutr Therapy I	3
Total Hours		35

Failure to provide any of these documents or complete any of the requirements may result in rejection of the application.

Permission-to-Continue

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue." Their acceptance letter will specify the conditions of admission. These students must meet the conditions listed in their acceptance letter and the following policy listed in the graduate catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Graduate students in Human Nutrition will choose from one of the following: 1) Generalist Track (no concentration), 2) Clinical Concentration, or 3) Community Concentration. Required core coursework and elective options will differ by track/concentration. Students should plan to take NHM 509 Research Methods in Nutrition and POPH 522 Biostatistics early in the program.

To complete the MS in Human Nutrition, students will need to complete the required core courses designated in their track/concentration, a minimum of 18 hours in NHM designated courses (may include non-thesis and thesis research hours), a minimum of 30 credit hours at the graduate level (500 or greater), and a Capstone Experience. Additionally, students need to earn a grade of B or better in all required core coursework and in at least 18 credit hours of NHM designated courses and earn at least a 3.0 overall graduate GPA for graduation.

Students should consult their advisor for a specific plan of study and when selecting graduate electives.

Note: The following pertains to the Generalist Track only. Additional information about the Clinical and Community Concentrations may be found below.

Human Nutrition, MS - No Concentration (Generalist Track)		Hours
Research Core Requirements		
NHM 509	Research Methods in Nutrition	3

Total Hours	35

Transfer Requirements

MS students may request the transfer of up to 12 credit hours of graduate courses taken at other institutions. The Program Director may request the student provide a copy of the course syllabus for evaluation.

Courses completed at other post-secondary institutions and accepted for UA graduate credit are given a grade of "P" and are not calculated in the overall GPA. ALL coursework must fall within six years from the date that this degree will be awarded. Thesis work, practicum hours, pass/fail courses and internship hours do not count towards the graduate credit hours that can be transferred into the program.

More information may be found on the Graduate School's catalog page.

Accelerated Master's Program

The Accelerated Master's Program (AMP) is closely integrated with the undergraduate and graduate programs in which highly qualified undergraduate students begin graduate study in their senior year and simultaneously work toward both an undergraduate degree in Food and Nutrition and a master's degree in Human Nutrition.

Admission Requirements

Current Food and Nutrition undergraduate students should review the admission requirements found on the Graduate School's catalog page.

Applicants should include the following in their application:

- Resume/Curriculum Vitae
- Statement of Purpose
 - Address letter to MS Program Director
 - 1-2 pages, Time New Roman, 12-point font, single-spaced and with one-inch margins
 - Include the following:
 - Specify you are applying to the Human Nutrition AMP
 - Discuss your relevant experience (academic, personal, work) and background.
 - Discuss your long-term professional goals and how completion of this program supports your goals.
 - Describe a unique personal characteristic or experience you feel prepares you to be successful in this program.
 - Any additional information that may be helpful as we review your application (early graduation, gap year, transferring schools, personal struggles, challenges you may have faced, etc.).
- Three letters of recommendation (at least two from academic references preferred)
- Prerequisite Courses: Students must have completed an ACEND accredited dietetic program or the following undergraduate

Graduate Coordinated Program

The Coordinated Program in Dietetics (CPD) provides students with both the required knowledge and supervised practice experiences to be eligible to sit for the national examination to become a Registered Dietitian Nutritionist (RDN) upon completion of the program.

Admission Requirements

Concurrent admission in the Master of Science in Human Nutrition program at The University of Alabama is required for admission into the Coordinated Program in Dietetics. Application materials include an application form, statement of purpose, resume, transcripts, and two letters of recommendation. Direct additional questions to the Director of the CPD, Mrs. Lori Greene at lgreene@ches.ua.edu or 205-348-4710.

Prerequisites coursework includes the following for the Coordinated Program in Dietetics:

- Introductory Chemistry + lab (4 hours)
- Introductory Organic Chemistry + lab (4 hours)
- Human Anatomy & Physiology I + lab (4 hours)
- Human Anatomy & Physiology I + lab (4 hours)
- Biochemistry or Nutritional Biochemistry (3 hours)
- Introduction to Nutrition (3 hours)
- Nutrition through the Lifecycle (3 hours)
- Community Nutrition (3 hours)
- Applied Nutrition (3 hours)
- Medical Nutrition Therapy I (3 hours): May be enrolled concurrently when applying.

Program Curriculum

The program curriculum outlined below meets certain knowledge requirements and competencies as required by the current accreditation standards of the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Twelve courses (36 hours) of didactic coursework and seven supervised practice courses (21 hours), including three Capstone rotations, are required to meet the completion requirements of the Coordinated Program in Dietetics for a verification statement and for degree completion.

- NHM 509 Research Methods
- NHM 530 Advanced Nutrition Counseling

- NHM 558 Nutrition in the Prevention and Treatment of Chronic Disease
- NHM 566 Advanced Clinical Nutrition
- NHM 587 Integrated Food Systems Management
- POPH 522 Biostatistics
- NHM 572 Metabolism of Energy Nutrients
- NHM 567 Nutrition Support of the Critically Ill
- NHM 588 Advanced Food Service Systems Management
- NHM 573 Advanced Vitamin & Mineral Metabolism
- NHM 550 Advanced Community Nutrition I
- NHM 585 Clinical Nutrition Management or NHM 515 Research & Pract in Sport Nutr
- NHM 574 Supervised Practice in Community Health & Wellness
- NHM 575 Supervised Practice in Long-Term Care
- NHM 576 Supervised Practice in Food Service Management
- NHM 577 Supervised Practice in Medical Nutrition Therapy
- NHM 578 Capstone Supervised Practice in Food Service Management
- NHM 579 Capstone Supervised Practice in Community Health & Wellness
- NHM 580 Capstone Supervised Practice in Medical Nutrition Therapy

Only students enrolled in the CPD are eligible to register for a supervised practice course (NHM 574-580). Students must earn a B or better in all required core requirements (see curricular requirements) and supervised practice rotation courses in the Coordinated Program in Dietetics. Please see the Student Remediation and Retention policy in the Coordinated Program handbook. Students earning a C or lower in a core course will be allowed to repeat the course. Students must receive a B or better when repeating a required course. Note, only one repeat is allowed for the Capstone Rotations (NHM 578, NHM 579, NHM 580).

If a student chooses to not complete all requirements for the Coordinated Program in Dietetics or is removed from the program, they may still have the option to complete the master's degree. If a student is no longer in the Coordinated Program in Dietetics, they would need to complete an appropriate Capstone Experience for the degree program option alone, such as a thesis, non-thesis research project, or NHM 597.

Capstone Experience

All students must complete a Capstone Experience by the end of their degree program. The Capstone Experience is a culminating project or course that integrates prior learning.

Students should contact their graduate advisor and discuss their decision regarding their Capstone Experience **at least** two semesters prior to the semester they wish to graduate. Students selecting the thesis option should contact their advisor earlier. Students will be required to submit an "Intent to Complete the Capstone Experience" form prior to registering for NHM 597, NHM 598, NHM 599 or Capstone CPD Supervised Practice Rotations. Failure to submit this form may delay program progression.

Main campus students may select from Plans I-III below. Distance learning students may select from Plans I and II. The thesis option from Plan I is typically not an ideal choice for distance learners as this process relies heavily on campus interaction with UA faculty committee members. Both the thesis and non-thesis research options from Plan I will require the student to secure a faculty mentor and will therefore rely on their availability.

Plan III is reserved for students who are accepted to the Coordinated Program in Dietetics only. CPD students will be required to complete 3 CPD Capstone Supervised Practice Rotations if they wish to earn their verification statement.

See graduate advisor for additional details.

Plan I - Research:

1. Thesis

Students interested in completing a thesis should contact their advisor early in their studies. Thesis projects usually take two to three semesters to complete. Students completing a thesis will need to sign up for a total of six hours of NHM 599. These hours can count toward the required 18 hours in NHM designated courses needed for the degree. The thesis should focus on current nutritional concerns in which the student has a special interest. To complete the thesis option, students will need to:

- Select a designated mentor (Chair) from the UA Nutrition faculty who is willing to serve as your chair
- Select a thesis committee of at least three members including their mentor (one member must be from outside of the nutrition department)
- Write a proposal that includes an extensive review of the literature and proposed methods that will be used in the study
- Receive approval of the proposal from the designated mentor
- Seek guidance from committee members prior to collecting data
- Formally propose the research plan to the committee and respond to feedback
- Receive IRB approval for the project in their own institution and UA
- Collect data
- Analyze data
- Interpret the data and write up the results
- Discuss implications of the study
- Seek final approval from committee members and formally present the research to the committee members and other faculty
- Electronically publish the thesis according to The University of Alabama's guide for "Electronic Theses and Dissertations."
- Earn a Pass (P) in each section of NHM 599.

Students completing a thesis should ensure that they can meet the Graduate School's deadlines for students.

2. Non-Thesis Research Project

The non-thesis research project will take at least two semesters to complete. The student should take NHM 598 (Non-Thesis Research) with a designated mentor (UA Nutrition faculty) as the instructor in the semester the student plans to complete the project. The course is worth 3 credit hours and can be applied to the 30 hours required for graduation and the required 18 hours in nutrition. Students will need to write a proposal and seek approval by a designated mentor, seek and obtain IRB approval in their own institution and UA, collect data, analyze the data, and write up results using the brief manuscript style used by the *Journal of the Academy of Nutrition and Dietetics*. If the student plans to complete research in their hospital or health care facility, then the project may require review by the medical IRB at UA. This group meets to review IRB proposals only once per month. Students must follow HIPPA guidelines when conducting medical research. Students should plan their project and seek IRB approval in the semester prior to registering for NHM 598. Students must earn a B or better in this course.

Plan II - Capstone Course

The Human Nutrition Master's Capstone Course (NHM 597) is the required 3 credit hour Capstone Experience for students in the Human Nutrition Master's Program who are not completing a thesis or non-thesis research project and who are not enrolled in the CPD. The course focuses on professional development, integration of nutrition knowledge and skills gained through previous NHM courses, and community engaged learning. Students must earn a "B" or better in this course.

Plan III – CPD Capstone Supervised Practice Rotations

Students enrolled in the Coordinated Program in Dietetics (CPD) must complete the following Capstone Supervised Practice Rotations as part of the verification statement and MS Capstone requirements.

- NHM 578 Capstone Supervised Practice in Food Service Management
- NHM 579 Capstone Supervised Practice in Community Health & Wellness
- NHM 580 Capstone Supervised Practice in Medical Nutrition Therapy

Students not enrolled in the CPD are ineligible to register for a Capstone Supervised Practice Rotation. Students must earn a B or better in each rotation. If a student chooses to not complete a rotation or does not earn a B or better after one retake, they may still have the option to complete the master's degree; however, they would not be eligible to earn their verification statement. Under this scenario, these students would need to complete an appropriate Capstone Experience for the degree program option alone, such as a thesis, non-thesis research project, or NHM 597 Capstone Course.

Retake Policy

Failure to earn a B or better in a Capstone Course will null eligibility to graduate in the current term. Only 1 retake for a Capstone Course is allowed. This includes each option described above: NHM 578, NHM 579, NHM 580, NHM 597, NHM 598, and NHM 599. Failure to successfully pass any Capstone Course retake will result in dismissal from the degree program and the Graduate School without confirmation of the degree.

Time Limits for Degree Completion Requirements

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students.

More information may be found on the Graduate School's catalog page.

Additional Academic Requirements

As a graduate student in the Department of Human Nutrition, Hospitality and Sport Management, you are responsible for your overall program of study and progress toward your degree. Progress toward degree includes adherence to all deadlines, milestones, and curriculum requirements. Your primary advisor and research project/thesis committee members (when applicable) will advise you throughout your time with us. However, it is incumbent on each student to be familiar with all requirements and take responsibility for your own education.

A graduate student is considered a professional student. Therefore, students should demonstrate professionalism in all aspects of course work and research. In addition, a graduate degree in Human Nutrition builds on foundational knowledge. As a new graduate student, you will notice a significant difference in expectations between undergraduate and graduate studies.

Onboarding

- Newly admitted graduate students must complete mandatory onboarding/orientation requirements. These requirements apply to undergraduate AMP students, degree-seeking MS students, and non-degree seeking MS students.
- Failure to complete required activities and/or assignments may impact program progression and future enrollment.
- The MS Program Director will provide additional details upon acceptance.

Academic Expectations

- Graduate students should expect assignments that are complex and challenging. Graduate level courses usually require a research paper and/or project with critical analyses of multiple peer-reviewed research articles. Students who are not familiar with research designs should start their education by taking a graduate level research methods course (ex: NHM 509).
- Students should review assignments early so they can schedule an appropriate amount of time to complete each assignment. Students should expect that graduate level assignments will take two to three times longer than undergraduate assignments.
- Graduate students should expect lectures with a greater level of detail than undergraduate courses. Instructors will expect the same level of detail in exam answers and assignments.
- Graduate students should expect that exam questions may ask the student to apply, analyze, or evaluate materials presented in class rather than simply list or describe.
- Students should not assume that every instructor has the same policies (ex. due dates, late assignments, etc.). Students should view each instructor's introduction to the course, syllabus, and any additional materials provided.
- Most instructors of graduate courses assume that the student has mastered English grammar and punctuation. Students needing additional help or reassurance should complete their writing assignments early and use the Writing Center to help improve these skills.
- In courses where Turnitin.com is used, students are expected to review matches, edit, and resubmit their edited work to Turnitin prior to submitting the paper for grading. Papers submitted to Turnitin.com should match the paper submitted to the instructor for grading.
- Main campus students are encouraged to participate in research activities.

Attendance

- Distance learning students should set aside time to virtually attend class each week, this includes weekly participation and engagement in each course. Students are responsible for reviewing the course schedule and developing a plan to complete each unit in a timely manner. Additional time is needed to complete assignments and readings.
- Main campus students are expected to attend class and participate in discussion. Students should prepare for class by completing all assigned readings.

Academic Advising

- Students should consult their academic advisor prior to registering for classes each term.
- Students attempting to complete a graduate level course in lieu of an undergraduate course should note that the course may require

additional time to master both the undergraduate and advanced materials.

- Graduate courses are designated as either masters (5XX) or doctoral (6XX). Courses designated as 100-400 are undergraduate courses and cannot be counted toward graduate hours.

Student Performance Monitoring

Student performance is continually monitored by the Program Director and Graduate Advisors. Students are encouraged to meet with their advisor at least twice each academic year - once in the fall and once in the spring. In the event that a student is not meeting program requirements, they are provided recommendations to correct deficiencies.

Course Load Restrictions

The maximum course load for a semester is 15 credit hours. Students may register for a maximum of 6 semester hours in a summer term or 12 hours during an entire summer dual session. No more than 3 semester hours may be taken during the Interim session. Taking more than 12 semester hours in a summer dual term requires a petition from the department regarding the extraordinary circumstances for approval by the Graduate School. A student who is employed part-time should consider taking a reduced load. It is recommended that fully employed students should register in no more than one course.

Academic Warning and Dismissal

Students may be dismissed from this program for failure to meet the scholastic requirements listed above. Departmental suspension (dismissal) from a degree program also results in suspension from the Graduate School.

Unconditional Admission (Regular Admission): A graduate student with good academic standing whose GPA drops below 3.0 at any time after earning 12 semester hours will have earned Academic Warning.

Academic Warning: A student placed on Academic Warning has the next 12 hours of graduate work to raise the overall GPA to 3.0 or better. The overall GPA after the next 12 hours following academic warning must be at least 3.0 to avoid Academic Suspension (dismissal) from the Graduate School at The University of Alabama.

The department may dismiss a student from a degree program if there is unsatisfactory academic or other progress toward completion of the degree. Departmental dismissal also results in suspension from the Graduate School at The University of Alabama. Students who are suspended may not attend class or enroll in any form of distance learning courses.

Students are encouraged to use the time of the suspension in ways that assist their academic progress. Students may study in order to finish courses in which they have earned an incomplete (I) or no grade (N). Students are encouraged to work with faculty members in this process. Students may also address other non-academic problems that have impeded their progress.

Warning status must be removed by raising the overall GPA to 3.0 or better and/or retaking all required courses with grades below B to achieve a grade of B or better, during the next 12 hours of graduate course work. Failure to remove either a warning or conditional status within the first attempted 12 hours of graduate course work will result in Academic Suspension (dismissal) from the Graduate School.

Permission to Continue Admission: Some students are admitted with the understanding that they must meet certain requirements. Their acceptance letter (sent as an email or letter) will specify the conditions of their admission. These students must meet the conditions listed in their

acceptance letter and the following policy listed in the graduate catalog.

If such an applicant is admitted, they will need to obtain *permission to continue* in the program after the first 12 semester hours of graduate-level work have been completed. Permission to continue is granted by achieving a GPA of B or better (3.0) in the first 12 semester hours of graduate-level work completed and by satisfying any other conditions specified by the department or the Graduate School at the time of admission. If the 12 hours are completed in a term in which the total credits exceed 12, the evaluation is made based on all graduate-level work completed at the end of that term of enrollment. Students admitted under this circumstance who do not meet the 3.0 requirement after their first 12 hours of graduate-level work will not receive permission to continue in their graduate program and will be dropped from the program. A student who meets the requirements will assume automatically the status of a regularly admitted graduate student.

Conditional Admission (English Language requirements met after admission): Students receiving conditional admission (English language requirements met after admission) should review the University's International Admissions requirements. Students will need to discuss enrollment in Intensive English Program courses with their advisor.

Assistantships

Students must maintain a minimum of a 3.0 while holding any assistantship. If the GPA drops below a 3.0 overall, this will result in the loss of the assistantship.

Academic Misconduct Information

Students who are completing courses in the Department of Human Nutrition, Hospitality and Sport Management are expected to maintain high standards of honesty and integrity as befits those in or planning to enter the workforce in health care or human service professions.

All students in attendance at The University of Alabama are expected to be honorable and to observe standards of conduct appropriate to a community of scholars. The University expects from its students a higher standard of conduct than the minimum required to avoid discipline. According to the Code of Academic Conduct, academic misconduct includes all acts of dishonesty in any academically related matter and any knowing or intentional help or attempt to help, or conspiracy to help, another student. The Academic Misconduct Disciplinary Policy will be followed in the event of academic misconduct.

Situations involving any suspected violation of the Academic Honor Code on the comprehensive exams for the doctoral degree will be sent to the Academic Misconduct Monitor (in HES: Assistant Dean). Any student found in violation of the Academic Honor Code will be subject to penalties imposed by the Academic Misconduct Monitor and may be as severe as dismissal from the University.

Students are also expected to adhere to UA's Code of Student conduct. Failure to do so, could result in disciplinary action or dismissal from the program and/or University.

More information may be found on the Graduate School's catalog page.

Withdrawals and Leave of Absence Information

Information may be found on the Graduate School's catalog page.

Academic Grievances Information

If concerns arise, students are encouraged to communicate with the instructor or staff member who is directly involved with

the concern. Usually, the concern can be resolved satisfactorily through honest and open communication with the faculty or staff member. Meeting with the instructor or staff member should be the first step in resolving the concern.

However, if informal discussions have not yielded a satisfactory resolution, or where the matter is more serious, the student may bring the concern to the Assistant Department Chair. Should the Assistant Department Chair not be able to come to a satisfactory resolution, they will direct the student on the next steps to move the concern to the next level.

More information may be found on the Graduate School's catalog page.

Grades and Academic Standing

Students must earn a B or better in a required core course. Students earning a C or lower in a required core course will be allowed to repeat the course. Students must receive a B or better when repeating a required course. The first attempt will not be counted toward the degree but will be counted in the overall GPA. Additionally, students must earn a B or higher in a minimum of 18 credit hours taken within the nutrition department.

Seventy-five Percent Rule

At least 75 percent of the hours taken at The University of Alabama for the Human Nutrition master's degree must be completed with grades of A or B.

Repeating Courses

Regular courses (courses other than IDGR assistantship, thesis, dissertation, etc.) typically may not be repeated for graduate credit; this includes courses initially taken on an audit basis. However, a course that is required in a student's curriculum in which the student earned a C, D, or F may be repeated. Both grades contribute to the computation of the GPA. Only required courses where the student has received a B or better will be counted toward the degree requirements. Federal regulations limit the number of times a student may repeat a course and receive financial aid for that course.

DPD Verification Statement

DPD requirements to receive a Verification Statements will apply to any graduate level DPD course. For more information, students should check with their advisor and DPD Program Director.

More information may be found on the Graduate School's catalog page.

Graduate School Deadlines Information

Information may be found on the Graduate School's website.

Application for Graduation Information

Each candidate for a master's degree must apply for graduation through myBama no later than the last day to add a class for the semester or the first session of the summer term in which requirements for the degree are to be completed. For the specific date, refer to the Graduate School's deadlines for students.

Information may be found on the Graduate School's catalog page.

Overview

Graduate assistantships at the University of Alabama may be available to students. For an overview of information regarding eligibility criteria, class hour requirements, and Full-Time Equivalent (FTE) levels for holding an assistantship, see the Graduate School catalog under Assistantships: Admission Status, Class Hours, and FTE Level.

Acquisition of Financial Support

Faculty vote to admit a limited number of students based on the availability of positions within the department. Unconditionally admitted full-time graduate students may seek and receive financial assistance in the form of a graduate assistantship. Graduate assistantships are highly competitive and being admitted into the graduate program does not in any way guarantee an assistantship award. Accepted students may receive up to three years (fall and spring) of funding if requirements are met (see below). When a student is admitted to the program with financial support, the stipend level is specified, but the source of the financial support may vary from semester to semester. In general, the majority of MS students within this program do not receive departmental financial support.

Types of Financial Support

Financial support for graduate students may include teaching assistantships, research assistantships, scholarships, fellowships, or combinations of these sources.

Graduate Research Assistant. Faculty members with awarded, external research funding may be able to support a graduate research assistant (GRA) for one or more semesters. Benefits associated with external research funding are determined by the funder and budget allocations within the grant.

Graduate Teaching Assistant. Alternatively, the Department offers a limited number of graduate teaching assistantships (GTA) available that may be used to financially support students. The responsibilities of these assistantships can vary based on departmental needs, such as serving as an instructor of record, lab instructor, or grader.

Fellowship Nominations: Additional support is available in the form of fellowships, available from the University and other funding agencies.

Eligible students may be nominated by the Department for UA fellowships. Nominees are selected by departmental faculty based upon prospective nominee research productivity, academic performance, and contributions to the Department or field. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits at least commensurate with those provided through GRA or GTA support.

Performance Expectations for Continuing Financial Support

The student must be in good academic standing in their designated program.

The student must complete all mandatory annual training and abide by all rules and policies held by The University of Alabama, The UA College of Human Environmental Sciences, UA Environmental Health and Safety, and the Department of Human Nutrition, Hospitality and Sport Management.

Graduate teaching assistants must adequately perform all duties assigned to them in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.

Conditions for Termination of Financial Support

Students who meet one or more of the following criteria will be subject to termination of financial support pending Department administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Department Chair and Graduate Director, with input from the Graduate Committee, may recommend immediate termination of financial support, termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

Dereliction of duty. Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee and/or the research advisor; failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee and/or by the research advisor and the student's departmental memorandum of appointment; or failure when publishing to adhere to the ethical principles in publishing. For more information, review the University's Policy on Academic Misconduct in Scholarly Activities (Appendix F).

Loss of good academic standing. Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing with the non-passing grade exception noted below. Financial support may be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the Graduate Committee. This review will determine whether the student should continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered within two weeks after the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.

The Department is not obligated to provide funding for students terminated from their positions. It should be noted that a loss in funding does not equal dismissal from a program for students in good academic standing and who have not been found to have committed misconduct worthy of dismissal.

Human Nutrition, Ph.D.

Overview

The PhD in human nutrition is a three-year, 54-credit-hour program designed to align with the goals and objectives of the National Institutes of Health's National Center for Advancing Translational Sciences (NCATS). As such, the program supports the training and development of researchers and leaders in the field of nutrition by focusing on developing the skills needed to perform bench-to-bedside-to-community research. Graduates of the PhD in human nutrition will be experts in nutrition research methodologies and translational nutrition, thereby efficiently advancing the field of nutrition through research to improve human health.

In accordance with the goals of the National Institutes of Health NCATS to implement and promote translational science approaches that foster collaborative bench-to-bedside-to-community approaches, a student who has completed this doctoral program in human nutrition will demonstrate mastery of:

- 1) Translational nutrition – Demonstrate proficiency in nutrition techniques that are integrated across discrete areas of nutrition research methodologies into a cohesive research agenda that moves nutrition research from the laboratory to the patient/community.
- 2) Communication - Effectively communicate nutrition information, evidencing the ability to evaluate and interpret current research for presentation to the academic, scientific, and/or the lay community.
- 3) Nutrition research practice – Demonstrate an understanding of relevant laboratory analyses methodologies, metabolic assessment

techniques, and statistical research methodologies appropriate for developing strong, competitive research proposals.

4) Independent research – Demonstrate the ability to support an independent career in research by successfully developing and implementing a research protocol, gathering data to effectively test the hypothesis (or hypotheses), and analyzing and interpreting the data.

5) Effective educators - Demonstrate skills of effective classroom presentation of nutrition-related information.

Application Deadline: February 1. Admission decisions for Fall term will be made in late February.

Contact Information: Before applying, it is recommended that you contact the director of the PhD Program in Human Nutrition, Dr. Linda Knol, at lknol@ches.ua.edu or 205-348-8129.

For additional information, please visit the program webpage.

Admissions

Students may enter the program with either a bachelor's or master's degree in nutrition or a master's degree in a closely nutrition-related field.

Requirements for admission to the Ph.D. in Human Nutrition will be:

- A completed application, including a Statement of Purpose
- A current resume or curriculum vitae
- Three letters of recommendation from faculty or other health professionals capable of judging the applicant's ability to complete graduate work.
- Test Scores:
 - If a student has previously completed or will complete a Master's degree prior to beginning the Doctoral program and has a current graduate GPA ≥ 3.5 out of 4.0, their application will be considered without the need to submit a GRE score.
 - Students who have previously completed or will complete a Master's degree prior to beginning the Doctoral program with a graduate GPA of 3.3-3.49 out of 4.0 may be considered for admission providing they also have a combined (qualitative and quantitative) GRE score of ≥ 300 .
 - Students with a Bachelor's degree will need to submit GRE scores. Minimum requirement for admission is a combined (qualitative and quantitative) GRE score of ≥ 300 .
- If an applicant does not have a previous degree in nutrition, minimum prerequisite course work would include NHM 558 Nutr Prev Trtmt Chron Disease, NHM 572 Metabolism of Energy Nutrients, and NHM 573 Advanced Vitamins and Minerals. These would need to be completed in the first year of study. The sequencing of course offerings will be structured such that taking these prerequisites courses will not increase time to graduation nor will they require additional burden or heavier academic loads on the students in order to achieve a timely graduation.
- Additionally, if a student is admitted without having previously completed a Master's degree, they will need to complete NHM 509 Research Methods in Nutrition. The sequencing of course offerings will be structured such that taking prerequisites course(s) will not increase time to graduation nor will they require additional burden or heavier academic loads on the students in order to achieve a timely graduation.

Please see the link below for general Graduate School admission criteria. See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Ph.D. in Human Nutrition requires completion of 54 graduate hours, including 18 hours of nutrition core classes, 9 hours of statistics, 9 hours of nutrition electives, and 18 hours of dissertation research.

To complete the PhD in Human Nutrition, students will need to complete the required courses, obtain at least 54 credit hours (including dissertation courses), pass both the written and oral preliminary exams, and complete the dissertation. Additionally, students need to earn a grade of B or better in all required coursework and any NHM designated course, and at least a 3.0 overall GPA to graduate.

Human Nutrition, Ph.D.		Hours
Required Courses		
NHM 601	Contemp Research Nutrition Sci	3
NHM 602	Methods Integrat Nutr Assess	3
NHM 603	Nutrition Intervention	3
NHM 635	Adv Prac. in Post Sec. Diet Ed	3
NHM 691	Grant Writing Nutrition Res	3
NHM 648	Secondary Analysis Survey Data	3
NHM 695	Interpret Nutrition Research	3
Statistics Elective (600 Level)		6
Research Hours		
NHM 699	Dissertation Research	18
Nutrition Electives		9
NHM 550	Advanced Community Nutrition I (Nutrition Electives)	
NHM 551	Adv. Community Nutrition II	
NHM 555	Maternal and Infant Nutrition	
NHM 556	Child and Adolescent Nutrition	
NHM 557	Childhood Obesity	
NHM 564	Nutrition in IPP	
NHM 565	ID Mgmt of Chronic Disease	
NHM 568	Nutrition for the Older Adult	
NHM 590	Special Prob Nutrition	
NHM 605	Analysis Transl Nutrition Res	
NHM 611	Nutritional Neuroscience	
NHM 625	Nutritional Epidemiology	
NHM 698	Non-Dissertation Research	
Total Hours		54

Transfer Credit

With the approval of the student's PhD Advisor and the Dean of the Graduate School, up to 9 of the required course hours may be transferred from another institution. Required courses must be taken at UA. Submit the form, Request for Transfer of Graduate Credit, to the Graduate Office who will submit it to the Graduate School during the first semester enrolled at the University of Alabama.

For students who have earned a master's degree at The University of Alabama, all applicable hours (i.e., course hours for which graduate credit has been received in the same department or in a closely affiliated department, but not including NHM 598 or NHM 599) may transfer to the PhD program. The number of hours that qualify for transfer is at the discretion of the Department, as recommended by the student's PhD Advisor and as approved by the Dean of the Graduate School. Subject to the approval of the student's PhD Advisor, graduate courses in allied

departments may be taken to meet the remainder of the requirements. Transfer credits are considered Pass/Fail for calculation of grade point average, but are included in the course hours, provided they are from graded courses.

Doctoral Plan of Study Requirement

For more information, see the Plan of Study section of this catalog. (p. 21)

Comprehensive/Qualifying Examination

The purpose of the comprehensive examination is to determine the student's research competence to begin work on a dissertation. The written examination should be successfully completed at least nine months before the degree is to be awarded. Students should consult their academic advisor regarding the timing of the exam in the context of their academic plan. The comprehensive or preliminary qualifying examination is required of all doctoral candidates. This examination is administered after:

- foreign language/research skill requirements are met,
- completion of the core nutrition courses covered (see below), and
- the comprehensive exam committee deems the student to have adequate preparation in the major and minor fields of study.

To take the qualifying exam, students must be in good standing based on graduate school guidelines.

- Students may not have any incompletes "I."
- Students must have a current overall GPA of 3.0 or above.

Courses Covered: The written comprehensive examination is required of all candidates for the Ph.D. degree. The written exam will be offered in January and May of each year. This exam should be prepared for by individual study expanding on the content covered in four core courses: NHM 601 Contemp Research Nutrition Sci, NHM 602 Methods Integrat Nutr Assess, NHM 603 Nutrition Intervention, and NHM 648 Secondary Analysis of Survey Data. The exam must be passed unconditionally before the student can defend his/her proposal and be advanced to candidacy. Students should NOT assume that "A" level performance in their coursework is adequate preparation for the comprehensive exam. Students must be registered for at least one semester hour of graduate work during the semester(s) in which the comprehensive exams are taken.

Procedures: Four weeks prior to the scheduled exam due date, students will randomly select their nutrition topic from a list of clinical nutrition topics and receive the questions. The student will be asked to develop a translational research agenda for the topic and develop three study protocols with the following designs:

- Section 1: Bench or Basic/Mechanistic Study
- Section 2: Epidemiological/Cross-Sectional Study
- Section 3: Efficacy and Pragmatic Studies

Academic Misconduct: Situations involving any suspected violation of the Academic Honor Code on the comprehensive exams for the doctoral degree will be sent to the Academic Misconduct Monitor (in HES: Assistant Dean). Any student found in violation of the Academic Honor Code will be subject to penalties imposed by the Academic Misconduct Monitor and may be as severe as dismissal from the University.

Grading: Each section of the exam will be graded by three nutrition professors for content, grammar, and organization of thought. Graders will be blinded to reduce bias. Answers within each section will be graded separately. Students may receive one of the following grades:

pass (80% or better), contingency (70-80%), and fail. Insufficient depth or detail or incorrect content will not result in a passing grade.

- Students who pass all three sections of the written exam may move to the oral exam.
- Students who receive a contingency grade on any section of the exam will be allowed to rework that section of the exam for a better grade. Contingency grades will need to be resolved within one week after initial exam feedback. The rewrite will be graded as pass or fail. If the grade is a fail, then the student will need to retake that portion of the exam in the following semester with a new topic.
- Once any contingency grades are removed, the student may move to the oral exam.
- Student who fail one or more sections will be allowed to retake those sections during the next available testing opportunity. **Only 1 retake is allowed.**

Failure to successfully pass any part(s) of the examination retake will result in dismissal from the degree program and the Graduate School without confirmation of the degree. Students retaking a section of the exam will randomly receive a new topic to base their answer upon from the set of topics distributed during that testing period.

Admission to Candidacy Requirements

The requirements for advancing to candidacy include:

- passing the written qualifying examination;
- completion of all coursework as listed on the approved program of study;
- receiving approval of the dissertation subject;
- successfully defending the dissertation proposal, which includes the written proposal; and
- having the designated dissertation committee recommend the student for admission to candidacy for doctoral degree. The completed Admission to Candidacy for Doctoral Degree form must be submitted to the Graduate School well in advance of the final semester.

The oral exam will be completed at the dissertation proposal defense. To complete the oral exam, the student will:

- Select a chair as a primary mentor (see information on advisory committees),
- Select a minimum of 5 professors that will serve on the dissertation committee according to graduate school guidelines,
- Complete the Dissertation Research Proposal and the IRB/IACUC/IBC protocol,
- Schedule a formal proposal defense with an open invitation to all faculty and graduate students,
- Formally present the proposed project including background, research questions and hypotheses, methods, and projected timeline to the committee and other audience members, and
- Answer questions from both the general audience and the dissertation committee.

The PhD Dissertation Advisory Committee will assess the quality of the proposal. Evaluation of the proposal will be based on the following considerations:

1. Scope of the proposal (10%). Is the research topic novel and important? Is the proposed project appropriate for the timeline?

2. Background (30%). Is the literature review comprehensive and appropriate? Does the literature review identify a problem or series of problems that justifies the direction of the proposal?
3. Experimental plan (40%). Are there clearly stated hypotheses for each section, or at least clearly stated expectations of experimental outcomes? Are the proposed experiments/methods appropriate tests of the hypotheses? Does the author have realistic expectations of the experimental methods? Are alternate hypotheses and experimental approaches proposed to cover the possibilities that: (i) the primary approaches prove to be inappropriate, (ii) the primary approaches disprove the hypotheses?
4. Presentation (20%). Is the proposal well organized and clearly written?

Each of the above evaluation criteria will be assigned a score of 1-5 as follows:

- 1 – Outstanding
- 2 – Excellent
- 3 – Good/Average
- 4 – Fair
- 5 – Poor

An *average weighted cumulative score* of no greater than 3.0 must be earned in order to pass the proposal-based written exam.

Successful defense of the oral exam resulting in at least 80% favorable vote from the committee is required for students to be recommended for admission to candidacy. Committee members will sign the Admission to Candidacy for the Doctoral Degree form. At this point, the student will be considered a doctoral candidate and may register for dissertation hours.

Continuous Enrollment Policy

See the Continuous Dissertation Registration section of this catalog. (p. 21)

Dissertation Requirements

Once the proposal and IRB/IUCC/IBC are approved, the student may begin research. The student should not be allowed to complete the research until they receive these approvals. The student cannot propose a dissertation and have its final defense in the same semester. The following procedures should be completed prior to submitting the final dissertation to the committee:

- Complete the research under the guidance of the chair,
- Ensure the document conforms to the guide for thesis and dissertation,
- Gain approval of the chair (co-chairs) to distribute the dissertation to all committee members allowing committee members two weeks to read the dissertation,
- Schedule a formal dissertation defense with an open invitation (including title, name, date, time and location) to all faculty and graduate students,
- Ensure all committee members can attend the defense,
- Formally present the final dissertation including background, gaps in the literature, research questions and hypotheses, methods, results, conclusions, and publication plan to the committee and other audience members on the scheduled day and time of the defense, and

- Answer questions from both the general audience and the dissertation committee.

All students must pass a final oral examination related to their dissertation. Final oral examination questions may also include other subjects beyond the student's research that the PhD Dissertation Committee or other faculty deem relevant. Final oral examinations and defense of the dissertation for the PhD must be taken not less than six weeks prior to the proposed graduation date. Each semester the graduate school posts dissertation due dates.

The outside member of the student's committee must attend and participate in the final defense; this may be a virtual presence if the member can see and hear the presentation and actively participate in questioning of the candidate. All departmental faculty have the right to attend the oral defense, and have the right to ask questions of the student that are relevant to the goals of the examination.

Only faculty on the student's committee may vote on whether the student has passed or failed the examination. Evaluation of the final defense will be completed using the procedures described in the proposal section of this document.

Upon successful defense of the dissertation, file the Doctoral Final Defense form with the Director and submit this form to the Graduate School. At the conclusion of the defense, it is common practice that committee members ask for changes in the final dissertation document. Substantive changes may require an additional committee meeting. Minor changes may require revisions to the document only.

Prior to submission of the final dissertation to the online thesis/dissertation portal, students should have received approval to submit by all committee members.

It is the student's responsibility to submit the dissertation to the online thesis/dissertation portal. The student should be aware of all deadlines regarding the dissertation defense and adjust his/her timeline to meet these deadlines.

Changes to Approved Dissertation Proposals. In some rare instances, students may not be able to complete the proposed research approved by their committee. Examples of such instances include but are not limited to:

- changes in University policies that restrict or limit the proposed research,
- newly published research that may change the significance, scope or methods of the proposed work,
- early results that suggest the research should be discontinued due to adverse effects or severe adverse effects,
- recruiting problems that cannot be resolved,
- change in the health status of the student that limits their ability to complete the proposed work, and
- early results that suggest no therapeutic effect to be derived.

If any of these situations were to occur, the student should contact the committee chair. The committee chair will then contact the Director of the MS or PhD program and the department chair. The Committee chair, director, and department chair will meet to review the original proposal, description of the problem, and potential solutions. This group will decide to either continue the research as proposed, make significant changes to the proposed methods (example: change from a clinical trial to an online survey, change from a clinical trial with humans to a rodent model, etc), or propose an alternative dissertation. If changes are approved, these changes may lead to a delay of graduation. Students

should refer to their offer letters for the term of their assistantship, if applicable.

If a student is allowed to make minor alterations to the methods only without changing the composition of the committee, then the student should:

- propose those changes in writing and submit to the committee members,
- schedule a meeting to discuss the proposed changes with the committee members,
- develop an alternative timeline approved by the committee, and
- obtain IRB/IACUC/IBC approval of modifications.

Once the committee and IRB/IACUC/IBC approve the new plan, the student can continue the research utilizing the new methods. The committee chair should notify their program director that the committee has approved the desired changes.

If a student is allowed to propose an alternative thesis or dissertation or substantially altered thesis or dissertation, then the student will need to:

- Work with the chair of the committee to alter the research plan.
- Create a project abstract that can be distributed to committee members.
- Assess the composition of the existing committee and add or eliminate committee members.
- For existing committee members, the student should provide each committee member with a copy of the revised abstract, meet with the members to discuss changes in research questions and hypotheses, methods, and projected timelines, and discuss the member's willingness to continue to serve on the committee.
- For new committee members, the student should invite the new member to serve on the committee, provide the potential member with the abstract, meet with the potential committee member and the Committee Chair (in person or by phone, Zoom, etc), discuss the project with the potential member, and confirm whether the faculty member wants to serve on the committee.
- Committee members, whose expertise is no longer needed, should be contacted by the student to discuss the changes in the plan and committee.
- If committee member changes are made, the student is responsible for edits to the "Thesis/Dissertation Committee" form.
- Complete or modify the Thesis or Dissertation Research Proposal (See Guidelines for Writing the Dissertation Proposal) and the IRB/IACUC/IBC protocol.
- Revise the proposal document to the chair's satisfaction (a student cannot set a proposal meeting until the chair is satisfied with the document).
- Gain approval of the chair (co-chairs) to distribute the proposal to all committee members.
- Schedule a formal meeting to discuss the changes to the plan with the committee members only.
- Formally present the proposed revised or significantly altered project including rationale, any additional background needed, research questions and hypotheses, methods, and projected timeline to the committee.
- Answer questions from the dissertation committee.

Once the committee and IRB/IACUC/IBC approve the new plan, the student can continue the research utilizing the new methods. The

committee chair will notify their program director that the committee has accepted the revised plan.

Note: While changes in the proposed research plan may extend time to graduation, they will NOT extend the time limit for the degree. Although a change in plan may be granted, the student should not expect to receive additional financial assistance in the form of an assistantship from the department. Please review your offer letter, if applicable.

See Dissertation section of this catalog. (p. 21)

Time Limits for Degree Completion Requirements

See Time Limits section of this catalog. (p. 21)

Student Progress Requirement

PhD students are encouraged to engage in research as soon as practical and may explore short-term projects before solidifying a dissertation project. All students must make continuous satisfactory research progress while enrolled in the PhD program. Student performance will be evaluated each semester by their mentor starting in their second semester of their first year. Each student will be evaluated for their continuation in the program and their eligibility of receiving financial support.

Each student is asked to complete the PhD Student in Human Nutrition Progress Report and submit this form to the mentor. At the beginning of each semester, the student will meet with the mentor to outline goals and objectives for the semester. The research mentor will meet with the student to evaluate progress toward meeting the stated goals and objectives at the end of each semester. The student will be rated by the mentor as either exceeds expectations, meets expectations, or fails to meet expectations. The major professor must complete the evaluation page of the Progress Report (see Appendix) and discuss the findings with the student. A copy of this report shall be sent to the Department Chair, the Director and the student.

Students who fail to meet expectations will be placed on probation and have one semester to improve their evaluation to a meets/exceeds expectations rating. All evaluations are reviewed by the Director and the Department Chair. If the student fails to improve his/her rating, the student may be dismissed from the program. Decisions regarding dismissal will be made by the mentor, Director, and Department Chair.

Evaluation Criteria:

- **Exceeds Expectations:** The student has an overall GPA of 3.0 or higher, met stated goals and objectives for the semester, made satisfactory research progress commensurate with time in the program, completes all research tasks in an ethical manner, follows standard and established research protocols, and has accomplished two or more of the following:
 - a. Presentation of research at a national or international meeting or submission of an abstract for a presentation.
 - b. Submission of a research proposal for funding external to the University.
 - c. Any honor or award reflecting outstanding achievement.
 - d. Submission/acceptance/publication of a research manuscript as a junior author.
- **Meets Expectations:** The student has an overall GPA of 3.0 or higher, met stated goals and objectives for the semester, made satisfactory research progress commensurate with time in the

program, completes all research tasks in an ethical manner, follows standard and established research protocols, and has accomplished one or more of the following:

- a. Presentation of research at a national or international meeting or submission of an abstract for a presentation.
 - b. Submission of a research proposal for funding external to the University.
 - c. Any honor or award reflecting outstanding achievement.
 - d. Submission/acceptance/publication of a research manuscript as a junior author.
- **Fails to Meet Expectations:** The student has an overall GPA of 3.0 or higher, and is **NOT** meeting one of the following expectations:
 - a. Stated goals and objectives for the semester,
 - b. Satisfactory research progress commensurate with time in the program,
 - c. Completion of all research tasks in an ethical manner, or
 - d. Following standard and established research protocols.

Students who are not making appropriate progress toward the degree based on the Degree Time Line or students with an overall GPA below 3.0 must be rated fails to meet expectations.

Students on assistantships will receive a review of their progress from their supervisor. The student's progress toward degree completion, mentor's review, and the supervisor's review will be considered when making decisions for continuation of assistantship funding.

Academic Misconduct Information

Academic Misconduct: All students in attendance at the University of Alabama are expected to be honorable and to observe standards of conduct appropriate to a community of scholars. The University expects from its students a higher standard of conduct than the minimum required to avoid discipline. Academic misconduct includes all acts of dishonesty in any academically related matter and any knowing or intentional help or attempt to help, or conspiracy to help, another student.

The Academic Misconduct Disciplinary Policy will be followed in the event of academic misconduct.

Students and their mentors must adhere to the four key guidelines of scholarship, authorship, approval and agreement as well as the protocols of ensuring good publication ethics outlined by the National Institutes of Health (NIH) and the International Committee of Medical Journal Editors (ICMJE).

See Academic Misconduct section of this catalog. (p. 7)

Withdrawals and Leave of Absence Information

See Withdrawals and Leave of Absence policy section of this catalog. (p. 244)

Academic Grievances Information

If concerns arise, students are encouraged to communicate with the instructor or staff member who is directly involved with the concern. Usually the concern can be resolved satisfactorily through honest and open communication with the faculty or staff member. Meeting with the instructor or staff member should be the first step in resolving the concern.

However, if informal discussions have not yielded a satisfactory resolution, or where the matter is more serious, the student may bring the concern to the Assistant Department Chair. Should the Assistant Department Chair not be able to come to a satisfactory resolution, they will direct the student on the next steps to move the concern to the next level.

See Academic Grievances section of this catalog (p. 255).

Grades and Academic Standing

Each student must have an overall graduate grade point average of 3.0 or better for all graduate courses undertaken at The University of Alabama. Students may be dismissed from this program for failure to meet the scholastic requirements listed above. Departmental suspension (dismissal) from a degree program also results in suspension from the Graduate School.

See the Grades and Academic Standing (p. 28) section of this catalog.

Graduate School Deadlines Information

Students should be aware of graduate school deadlines.

Application for Graduation Information

Students will need to submit an Application to Graduate through mybama by the published deadlines.

Funding

Overview

Graduate assistantships at the University of Alabama may be available to students. For an overview of information regarding eligibility criteria, class hour requirements, and Full-Time Equivalent (FTE) levels for holding an assistantship, see the Graduate School catalog under Assistantships: Admission Status, Class Hours, and FTE Level.

Acquisition of Financial Support

Faculty vote to admit a limited number of students based on the availability of positions within the department. Unconditionally admitted full-time graduate students may seek and receive financial assistance in the form of a graduate assistantship. Graduate assistantships are highly competitive and being admitted into the graduate program does not in any way guarantee an assistantship award. Accepted Ph.D. students may receive up to three years (fall and spring) of funding if requirements are met (see below). When a student is admitted to the program with financial support, the stipend level is specified, but the source of the financial support may vary from semester to semester.

Types of Financial Support

Financial support for graduate students may include teaching assistantships, research assistantships, scholarships, fellowships, or combinations of these sources.

Graduate Research Assistant. Faculty members with awarded, external research funding may be able to support a graduate research assistant (GRA) for one or more semesters. Benefits associated with external research funding are determined by the funder and budget allocations within the grant.

Graduate Teaching Assistant. Alternatively, the Department offers a limited number of graduate teaching assistantships (GTA) available that may be used to financially support students. The responsibilities of these assistantships can vary based on departmental needs, such as serving as an instructor of record, lab instructor, or grader.

Fellowship Nominations: Additional support is available in the form of fellowships, available from the University and other funding agencies.

Eligible students may be nominated by the Department for UA fellowships. Nominees are selected by departmental faculty based upon prospective nominee research productivity, academic performance, and contributions to the Department or field. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits at least commensurate with those provided through GRA or GTA support.

Performance Expectations for Continuing Financial Support

The student must be in good academic standing in their designated program.

The student must complete all mandatory annual training and abide by all rules and policies held by The University of Alabama, The UA College of Human Environmental Sciences, UA Environmental Health and Safety, and the Department of Human Nutrition, Hospitality and Sport Management.

Graduate teaching assistants must adequately perform all duties assigned to them in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.

For doctoral students beginning their second semester, students must conduct research under the direction of a department-approved research advisor as dictated by the expectations. Continuous research progress is expected beginning in the second semester as directed by the research advisor and later by the student's dissertation committee.

Conditions for Termination of Financial Support

Students who meet one or more of the following criteria will be subject to termination of financial support pending Department administrative review. Depending upon the severity of the infraction or the extent of non-compliance, the Department Chair and Graduate Director, with input from the Graduate Committee, may recommend immediate termination of financial support, termination of financial support at the end of the current semester, or termination of financial support (partial or full) at the end of the following semester.

Dereliction of duty. Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee and/or the research advisor; failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee and/or by the research advisor and the student's departmental memorandum of appointment; or failure when publishing to adhere to the ethical principles in publishing. For more information, review the University's Policy on Academic Misconduct in Scholarly Activities (Appendix F).

Failure to have a department-approved research advisor for more than one semester (applies to doctoral students only). For more information, see the Graduate School Catalog under Dissertation Committee.

Loss of good academic standing. Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing—with the non-passing grade exception noted below. Financial support may be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the Graduate Committee. This review will determine whether the student should continue to receive financial support and/or be dismissed from the

program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered within two weeks after the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.

Delinquent Coursework. Doctoral students who neglect to complete the required coursework within the first four semesters are no longer in good academic standing.

Performance Review. Doctoral students will meet with their advisors at the beginning and end of each semester. Semester-based goals will be developed and reviewed. In the event that a student is not meeting goals, they are provided recommendations to correct deficiencies and placed on an improvement plan. If deficiencies are not resolved within one semester, students may be at risk of losing funding.

The Department is not obligated to provide funding for students terminated from their positions. It should be noted that a loss in funding does not equal dismissal from a program for students in good academic standing and who have not been found to have committed misconduct worthy of dismissal.

Sport Management, MS

Sport Management is the study of business functions that deal with the administration of sport organizations, sporting events, and the operations of community, collegiate, and professional teams. Sport Management also involves venue and team operations, ticket sales, risk management and assessment, fan experience creation, contract negotiations, NCAA and professional sports rules and regulation compliance, marketing, and sales.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- Statement of Purpose (Include in the Header: Sport Management). Students should also include in their statement why they have chosen this area of study and how it will apply to their personal and/or professional goals.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Sport Management - Non-Thesis Option - Core Courses		Hours
HSM 521	Hosp. Law and Risk Mgt.	3
HSM 551	Sport Properties Venue Mgt	3
HSM 555	Sports Sales & Entrepreneurs	3
HSM 559	International Strat in Sport	3
HSM 561	Mktg. Sales & PR in Sport	3
HSM 575	Sport & Hosp Financial Mgt	3
HES 509	Research Methods	3

Approved Electives - Select 3 (9 credit hours)		Hours
HSM 500	Sport Mgt Principles & Pract.	3
HSM 552	Sport Bus. Mgt. Trends/Issues	3
HSM 560	Fellowship in Sport Mgt.	3
HSM 570	Leadership Hospitality & Sport	3

HSM 576	Strategic Mgt in Hosp. Tourism	3
HSM 580	Consumer Behav Hosp & Tourism	3

Students selecting the non-thesis option must complete a e-Portfolio project for their capstone experience as defined by The University of Alabama or successfully pass the comprehensive exam. The Capstone Project in Sport Management is a documentation of Professional Development and Scholarly Achievement in the Sport Industry in an e-Portfolio format. The e-Portfolio includes evidence of professional growth and scholarship. The project provides each graduate student, as well as faculty and potential employer(s), with a "unique tool for assessing what each student has gained through their graduate studies." Both the e-portfolio project and comprehensive exam is in addition to the 30 hour course requirement.

Transfer Credit

Courses completed at other postsecondary institutions and accepted for UA graduate credit are given a grade of "P" and are not calculated in the overall graduate GPA.

Graduate School information on Transfer Credit (p. 15).

Accelerated Master's Program

Please refer to the official information on the Graduate School's website (p. 7). If you are interested in the AMP program, please schedule a meeting with the program director.

Time Limits for Degree Completion

Graduate School information on Time Limits for Degree Completion (p. 15).

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Under compelling circumstances beyond the student's control, a graduate student may request that the department petition the Graduate School with the rationale for granting a leave of absence. If granted by the Graduate School, a leave of absence will cover one or more upcoming semesters rather than any prior semester(s). A leave of absence is not a method of avoiding continuous registration requirements, and it *does not* lengthen the time limit. When a student returns from a leave of absence, the Graduate School must be notified and will work with the department and student to determine the number of semesters remaining on the time limit and the degree requirements that remain.

Graduate School information on Withdrawals and Leaves of Absence (p. 244).

Human Environmental Sciences, MS

The Master of Science degree is designed for graduate students who seek to improve the lives of individuals, families and communities.

Students complete 30 semester hours of coursework designed to prepare them for advancement in their professional discipline. A capstone project is required during the final term of enrollment and a thesis is optional. Areas of focus within this degree program include:

- Clothing and Textiles
- Conflict Resolution (stand-alone graduate certificate is also available)
- Human Environmental Sciences

For additional information on each area of focus please contact the following faculty members

- Clothing and Textiles - Dr. Amy Thompson
- Conflict Resolution - Dr. Jennifer Humber
- Human Environmental Sciences - Dr. Deidre Leaver-Dunn

Admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students in the MS degree program complete 30 semester hours of coursework in disciplines offered by the College of Human Environmental Sciences. This includes HES 509, Research Methods; and HES 590, Special Problems in Human Environmental Sciences; CSM 590, Capstone CQM; or CTD 590, Special Problems in Clothing. The remaining 21-24 hours (7-8 classes) are drawn from graduate offerings in the area of focus. Within the Human Environmental Sciences area of focus, these may include courses from any discipline within the college that support the student's professional development goals and for which the student has completed the appropriate prerequisites.

Students will complete degree requirements following Plan II (non-thesis process), although there is an option for Plan I (thesis process). Each student must earn a cumulative GPA of 3.0 or better for all graduate work. Grades below a 'C' are computed in the GPA, but they do not carry credit toward a degree.

Required for All MS Graduate Students		Hours
HES 509	Research Methods	3
HES 590 or CSM 590 or	Special Problems in HES Spec Prob Consmr Affairs	3 to 6

CTD 590 Spec Prob Clothing

Transfer Credit

Graduate School information on Transfer Credit.

Comprehensive Exam/Capstone Project

Students in the MS degree program complete a Capstone Project during their final term through enrollment in the Special Topics or Capstone class that aligns with their area of focus: HES 590 for Human Environmental Sciences, CSM for Conflict Resolution or Consumer Quality Management, or CTD 590 for Clothing and Textiles.

As part of the Special Topics or Capstone class, the student will work with their faculty mentor to identify an issue, topic or problem in their discipline and then develop a comprehensive document that addresses that specific focus. The final product will draw on the coursework included in the student's specific plan of study and represent a synthesis of the major concepts from each one as they relate to the issue, topic or problem. It will include references using the citation style most often associated with the student's discipline.

The Capstone Project must be submitted no later than 2 weeks before the final day of classes for the term in which the student is enrolled, and results reported to the Graduate School 2 weeks before the date of commencement for that semester.

Capstone College of Nursing

The Capstone College of Nursing offers the following:

- Master's of Science in Nursing (MSN) degree for Nurse Practitioners (e.g. Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and dual Psychiatric Mental Health and Family Nurse Practitioner), Nurse Educators and Nurse Executives
- RN to BSN with a pathway to the MSN program (Nurse Executives Concentration only)
- Master's Entry to the Profession of Nursing, MSN
- Post-graduate certificates with Family Nurse Practitioner and Psychiatric Mental Health Nurse Practitioner specialties
- Doctor of Nursing Practice (DNP) degree (Post-Baccalaureate and Post-Masters)
- Joint Nursing Science PhD
- Degree Programs
 - Nursing, MSN (p. 774)
 - Master's Entry to the Profession of Nursing, MSN (p. 767)
 - Doctor of Nursing Practice, DNP (p. 761)
 - Joint Nursing Science, PhD (p. 769)
- Certificate Programs
 - Family Nurse Practitioner (p. 764)
 - Psychiatric Mental Health Nurse Practitioner (p. 779)

Nursing Course

NUR505 Advanced Health Assessment

Hours 3

Advanced Health Assessment is designed for graduate level nurse practitioner students to enhance their clinical skills and deepen their understanding of comprehensive patient evaluation to build a foundation for advanced practice nursing competencies. Through a combination of theoretical knowledge and practical application, students will engage in obtaining a comprehensive health history and performing advanced health assessment techniques on individuals across the lifespan.

NUR506 Advanced Clinical Foundations

Hours 3

This required course in the MSN non-APRN programs with a direct care focus prepares students to integrate advanced concepts of pathophysiology, pharmacology, and health assessment within the contexts of individuals, families, and populations. This course may also be taken by those in APRN concentrations who have previously successfully completed Advanced Health Assessment, Advanced Pathophysiology, and Advanced Pharmacology courses.

NUR508 Health Assessment

Hours 3

This course prepares the novice nursing student in the development of health assessment skills including the health history, physical, psychosocial, and spiritual aspects necessary for critical thinking in professional nursing practice. Adult physical assessment techniques will be developed through simulation and practice within a practice lab setting. (2 didactic & 1 clinical: 60 clock hours).

Prerequisite(s): Admission into the Master of Science Entry to the Profession of Nursing (MEPN) Program

Prerequisite(s) with concurrency: NUR 512 Human Pathophysiology - Minimum grade of a B or higher and NUR 515 Introduction to Dosage Calculations - Minimum grade of a B or higher and NUR 523 Conceptual Foundations for Nursing - Minimum grade of a B or higher and NUR 733 Informatics for Advanced Practice Nursing - Minimum grade of a B or higher

NUR510 Basic Concepts of Teaching Diabetes Self-Management Techniques

Hours 3

This online elective course is open to any graduate student in the health or social sciences. The course focuses on: Diabetes Self-Management Techniques (DSMT) and instructs the provider in what manner to impart information that has immediate application for people living with diabetes. The course focuses on application of clinical guidelines for exercise and fitness, nutrition and diet, and the techniques, products, and strategies that help patients learn diabetes self-management techniques that empower them to take charge of their well-being and live healthier lives.

Prerequisite(s): Permission by Instructor

NUR512 Human Pathophysiology

Hours 4

This course is an introduction to fundamental pathophysiology of the human body. This course examines physiological change that results in disruptive adaptive responses throughout the lifespan. These disruptive responses are approached in a systematic manner. A combination of identified cellular concepts and body systems approach is used to structure course content. Included are basic cellular processes in human pathology, pathology associated with the major body systems, and physiology associated with the aging process.

Prerequisite(s): Admission into the Master of Science Entry to the Profession of Nursing (MEPN) Program

Prerequisite(s) with concurrency: NUR 508: Health Assessment - Minimum grade of a B or higher and NUR 515: Introduction to Dosage Calculation - Minimum grade of a B or higher and NUR 523: Conceptual Foundations for Nursing - Minimum grade of a B or higher and NUR 733 Informatics for Advanced Practice Nursing - Minimum grade of a B or higher

NUR513 Special Topics

SP

Hours 1-4

This course focuses on selected MSN topics under the sponsorship of a nursing faculty member with relevant expertise.

Special Topics Course

NUR515 Introduction to Dosage Calculation

Hours 2

The purpose of this course is to provide students with the opportunity to review basic math concepts and problems; examine the different systems of measurement and abbreviations; examine methods of dosage calculation required for the safe administration of adult and pediatric medications; interpret drug orders; and solve calculations of different medication preparations. Through didactic instruction, case studies, and multimedia, students will develop and enhance their knowledge of medication calculations.

Prerequisite(s): Admission to program

Prerequisite(s) with concurrency: NUR 508 Health Assessment - Minimum grade of a B or higher and NUR 512 Pathophysiology - Minimum grade of a B or higher and NUR 523 Conceptual Foundations for Nursing - Minimum grade of a B or higher and NUR 733 Informatics for Advanced Practice Nursing - Minimum grade of a B or higher

NUR516 Advanced Diabetes Management: An Interdisciplinary Approach Across the Lifespan

Hours 3

This online elective course is open to any graduate student in the health or social sciences. The course focuses on the primary, secondary, and tertiary prevention and management of diabetes mellitus offering expanded content suitable to students pursuing graduate study in nursing, medicine, nutrition, and other social sciences. Building on the basic and advanced science and clinical management courses a multi-disciplinary approach is offered for the prevention of pre-diabetes, metabolic syndrome, type 2 diabetes, management of both types 1 and 2 diabetes mellitus across the lifespan. Special emphasis is placed on the prevention and management of the complications and co-morbid conditions potentially resulting from diabetes mellitus.

NUR517 Graduate Independent Study

SP

Hours 1-4

No description available

Special Topics Course

NUR521 Advanced Pharmacology

Hours 3

This course will assist the graduate nursing student to further develop knowledge of evidence-based clinical pharmacology. Course content will include basic principles of pharmacology as they apply to drug therapy across the lifespan. A prototype approach will be used to present content covering selected drugs affecting the peripheral nervous system, central nervous system, cardiovascular system, renal system, endocrine system, immune system, musculoskeletal system, respiratory system, gastrointestinal system, and chemotherapy for infection and cancer.

NUR523 Conceptual Foundations for Nursing

Hours 3

This course prepares the student for concepts and issues relevant to professional nursing practice. Content related to the values of professional nursing and issues affecting practice will be examined. Emphasis is placed on concepts related to professional values; legal and ethical responsibilities of the professional nurse; an introduction to interprofessional teams, teamwork, and collaboration; and care of the psychosocial integrity of culturally diverse individuals and populations across the lifespan.

Prerequisite(s) with concurrency: NUR 508 Health Assessment - Minimum grade of a B or higher and NUR 512 Human Pathology - Minimum grade of a B or higher and NUR 515 Introduction to Dose Calculations - Minimum grade of a B or higher

NUR529 Advanced Pathophysiology

Hours 3

This advanced course explores the complex mechanisms of disease processes, providing advanced practice students with a comprehensive understanding of pathophysiology to build a foundation for advanced practice nursing competencies. Emphasizing clinical applications, the course covers the etiology, pathogenesis, and clinical manifestations of various diseases across the lifespan.

NUR531 Nursing Faculty Roles and Responsibilities

Hours 3

This online course will provide an introduction to the roles and responsibilities of nursing faculty. This course will prepare students to participate in the processes of designing, implementing, and evaluating a nursing curriculum. This course will include roles and responsibilities of faculty in teaching, scholarship, service, and practice.

NUR532 Instructional Media for Nursing Education

Hours 3

This course will provide students with an overview of instructional technology and media that can be used in undergraduate and graduate level instruction in nursing education programs. This course will provide students with skills to begin on site and online instruction. It will explore the use of computers, software, models, simulators, and other instructional media.

Prerequisite(s): AIL 600 and AIL 602

Prerequisite(s) with concurrency: AIL 600 and AIL 602

NUR534 Fundamentals of Professional Nursing Practice

Hours 6

This course is an introduction to fundamental nursing concepts and processes that are foundational to nursing care. Content includes an introduction to professional nursing; the nursing process; ethics, theories and models of communication and factors that affect interpersonal communication in health care settings; health assessments and the application of assessment skills and documentation; basic care planning and clinical nursing skills. The nursing process will be presented as a framework for critical thinking, decision-making and nursing practice.

Prerequisite(s): NUR 508 Health Assessment - minimum grade of a B or higher NUR 512 Human Pathophysiology - minimum grade of a B or higher NUR 515 Introduction to Dosage Calculations - minimum grade of a B or higher NUR 523 Conceptual Foundations for Nursing - minimum grade of a B or higher NUR 733 Informatics for Advanced Practice Nursing - minimum grade of a B or higher

Prerequisite(s) with concurrency: NUR 536 Pharmacology for Nursing Practice - minimum grade of a B or higher and NUR 727 Foundations of IS and EBP - minimum grade of a B or higher

NUR536 Pharmacology for Nursing Practice

Hours 3

The purpose of this required course is to introduce the student to the role of pharmaceutical agents in assisting patients with health problems throughout the lifespan. A brief history and a discussion of the legal controls that regulate the field of pharmacology are included. Drug prototypes are utilized to examine the major classifications of drugs. Use of a handheld electronic device and accompanying software facilitates discussion of major drug classification with regard to pharmacokinetics, therapeutic uses, adverse reactions, precautions, and contraindications. Special considerations of diverse cultural backgrounds, ethnic factors, access to financial resources, lifespan issues, and genetic variations impacting drug therapy are included. Health teaching and nursing implications for drug classifications are discussed.

Prerequisite(s): NUR 508 Health Assessment - minimum grade of B or higher NUR 512 Human Pathophysiology - minimum grade of B or higher NUR 515 Introduction to Dosage Calculations - minimum grade of B or higher NUR 523 Conceptual Foundations for Nursing - minimum grade of B or higher NUR 733 Informatics for Advanced Practice Nursing - minimum grade of B or higher

Prerequisite(s) with concurrency: NUR 534 Fundamentals of Nursing Practice - minimum grade of B or higher and NUR 727 Foundations of IS and EBP - minimum grade of B or higher

NUR549 Roles & Leadership in Nursing Administration

Hours 3

The purpose of this course is to provide the student with the tools and resources to embrace the role of the Nurse Administrator and successfully balance leadership and management cohesively. This course will comprehensively cover leadership concepts to include working collaboratively in interdisciplinary teams, professional roles and scopes of practice, human resource management, staffing, conflict resolution, sustainable change, and decision-making practices.

NUR550 Roles & Leadership in Nursing Administration Practicum

Hours 3

The purpose of this clinical course is to provide the student with the opportunity to apply concepts and theory from NUR 549 in an authentic clinical environment to narrow the theory practice gap through application and experiential learning. The focus is on application of leadership concepts to include working collaboratively in interdisciplinary teams, professional roles and scopes of practice, human resource management, staffing, conflict resolution, sustainable change, and decision-making practices.

NUR551 US Healthcare Systems and Quality & Safety

Hours 3

The purpose of this course is to prepare future nurse administrators for the complexities of healthcare management by giving them the tools and resources to understand and critically appraise the unique dynamics of the U.S. healthcare system. This course will include information related to healthcare delivery, quality improvement, public policy, laws, accrediting bodies, and regulatory statutes.

NUR552 US Health Care Systems and Quality & Safety Practicum

Hours 3

The purpose of this clinical course is to provide the nursing administrator student with the opportunity to apply concepts and theory from NUR 551 in an authentic clinical environment to narrow the theory practice gap through application and experiential learning. The focus is on the application of public policy, laws, accrediting bodies, and regulatory statutes as they relate to the delivery of health care in the U.S.

NUR553 Advanced Financing and Strategic Planning in Health Care

Hours 3

The purpose of this course is to prepare future nurse administrators to be highly effective and influential strategic planners and financial leaders within the organization. This course addresses principles of strategic planning and fiscal resource management to include SWOT analyses, business plans, reimbursement models, cost analysis, budgeting, contract development, financial aspects of program development and evaluation, and cost accounting and tracking.

NUR554 Advanced Financing and Strategic Planning in Health Care Practicum

Hours 3

The purpose of this clinical course is to provide the student with the opportunity to apply concepts and theory from NUR 553 in an authentic clinical environment narrowing the theory practice gap through application and experiential learning. The focus is on the application of the principles of strategic planning and fiscal resource management to include SWOT analyses, business plans, reimbursement models, cost analysis, budgeting, contract development, financial aspects of program development and evaluation, and cost accounting and tracking.

NUR555 Professional Nursing Practice: Adults

Hours 7

This required course focuses on actions designed to detect and intervene in actual or potential health problems in adults and to determine actions that will ameliorate or reduce the consequences of adult disease through support or rehabilitation. It will prepare the student to provide care to adult patients experiencing common and/or complex physiological alterations and responses. The course addresses concepts, theories, and research findings essential to promote and restore health of adults from culturally diverse populations. Clinical experiences are designed to develop skills for early detection, diagnosis, and treatment of acute and chronic health problems in adults and prevention of further disability. Clinical requirements are pass/fail. Students are required to pass the clinical component of course to successfully complete the course regardless of grade received in the didactic or theory portion of the course. (Theory and laboratory).

Prerequisite(s): Minimum grade of B or higher: NUR 508 Health Assessment NUR 512 Pathophysiology Basic NUR 515 Introduction to Dose Calculations NUR 523 Conceptual Foundations in Nursing Care Professional NUR 733 Nursing Informatics NUR 534 Fundamentals of Professional Nursing Practice NUR 536 Pharmacology NUR 727 Foundations of IS and EBP

Prerequisite(s) with concurrency: Minimum grade of B or higher: and NUR 556 Professional Nursing Practice: Mental Health Nursing and NUR 740 Health Policy and Politics

NUR556 Professional Nursing Practice: Mental Health

Hours 4

This required course focuses on theory, concepts, and management functions essential to professional nursing practice in the improvement of the mental health of culturally diverse persons and the prevention of further disability. Course content is organized around evidence that contributes to a holistic understanding of mental health conditions and effective intervention strategies that assist the individual and family to adapt, and recover. The social, legal, and ethical implications of providing nursing care to culturally diverse individuals with mental health conditions are integrated throughout the content. Essential skills for the student are therapeutic communication in mental health, identification of practice issues, interprofessional collaboration, evaluation of outcomes, and the application of evidence-based practice models. Actions will be taken to participate in quality improvement by ameliorating or reducing the consequences of mental health problems. These essential skills are designed to provide quality care while improving the mental health of persons and preventing further disability. (Theory and Laboratory).

Prerequisite(s): Minimum grade of B or higher: NUR 508 Health Assessment NUR 512 Pathophysiology Basic NUR 523 Conceptual Foundations for Nursing NUR 515 Introduction to Dose Calculations NUR 733 Nursing Informatics NUR 534 Fundamentals of Professional Nursing Practice NUR 536 Pharmacology for Nursing Practice NUR 727 Foundations of IS & EBP

Prerequisite(s) with concurrency: Minimum grade of B or higher: and NUR 555 Professional Nursing Practice: Adults and NUR 740 Health Policy & Politics

NUR558 Professional Nursing Practice: Childbearing

Hours 4

This required course focuses on the role of the nurse in providing holistic, patient-centered care to the childbearing family. The student will be given simple to complex situations in classroom, clinical and technological-based experiences, emphasizing evidence-based practice and quality improvement as members of an interdisciplinary team. A major focus will be the implementation of nursing care to childbearing families who are experiencing a normal maturational process as well as related acute/chronic health problems to provide holistic, patient-centered care to childbearing families from culturally diverse populations. (Theory and laboratory).

Prerequisite(s): Minimum grade of B or higher: NUR 555 Professional Nursing Practice: Adults NUR 556 Professional Nursing Practice: Mental Health NUR 740 Health Policy and Politics

Prerequisite(s) with concurrency: Minimum grade of B or higher: and NUR 579: Professional Nursing Practice: Community Health and NUR 583: Professional Nursing Practice: Children

NUR567 Family Nurse Practitioner Role & Issues

Hours 3

This course includes the professional role of the Family Nurse Practitioner (FNP) serving diverse populations across the lifespan. Emphasis is on the influence of nurse practitioners on outcomes at the systems level. Students will assess complex demands; plan coordinated, multidisciplinary, evidence-based collaborative approaches to care; and appraise strategies for evaluation of outcomes.

Prerequisite(s): NUR 505, NUR 521, NUR 529 - with a grade of B or better

Prerequisite(s) with concurrency: NUR 568 with a B or Better

NUR568 Clinical Readiness

Hours 3

The clinical readiness course ensures that graduate nursing students acquire the foundational knowledge and skills necessary for safe, effective patient care. Through a variety of learning opportunities, students integrate pharmacology, pathophysiology, and physical assessments (the 3P's), along with clinical reasoning, labs/diagnostics, documentation, and interdisciplinary principles of practice. Emphasis is placed on patient safety, clinical judgement, and person-centered care to prepare students for direct care responsibilities. The course culminates in students, demonstrating clinical competencies aligned with their scope of practice while fostering professional identity, collaboration, and accountability.

Prerequisite(s): NUR 505 and NUR 521 and NUR 529

Prerequisite(s) with concurrency: NUR 567 OR NUR 591

NUR569 Family Nurse Practitioner I

Hours 3

This course integrates theoretical, and evidence-based foundational knowledge in health promotion, disease prevention, diagnosis, and management of adults in a primary care setting with a particular focus on rural and medically underserved populations.

Prerequisite(s): NUR 567

NUR570 Family Nurse Practitioner Clinical I

Hours 3

In this clinical course, the FNP student will apply the theoretical and evidence-based foundational knowledge in health promotion, disease prevention, diagnosis, and management of adults in a primary care setting with a particular focus on rural and medically underserved populations. There are 180 clinical hours required for course completion.

Prerequisite(s): NUR 567 with a grade of B or better

NUR571 Family Nurse Practitioner II

Hours 3

This course integrates theoretical, and evidence-based foundational knowledge in health promotion, disease prevention, diagnosis, and management of women and children in a primary care setting with a particular focus on rural and medically underserved populations.

Prerequisite(s): NUR 569 - Must have a B or better. NUR 570 - Must have a B or better.

NUR572 Family Nurse Practitioner Clinical II

Hours 3

In this clinical course, the FNP student will apply the theoretical and evidence-based foundational knowledge in health promotion, disease prevention, diagnosis, and management of women and children in primary care with a particular focus on rural and medically underserved populations. There are 180 clinical hours divided equally between the two populations are required for course completion.

Prerequisite(s): NUR 569 - Must pass with a B or better. NUR 570 - Must pass with a B or better.

NUR573 Family Nurse Practitioner III

Hours 3

This course integrates theoretical, and evidence based foundational knowledge in health promotion, disease prevention, diagnosis, and management of care across the lifespan with a particular focus on rural and medically underserved populations.

Prerequisite(s): NUR 571, NUR 572 - All prereqs must be completed with a B or better

NUR574 Family Nurse Practitioner Clinical III

Hours 3

In this clinical course, the FNP student will apply the theoretical and evidence-based foundational knowledge in health promotion, disease prevention, diagnosis, and management of care across the lifespan with a particular focus on rural and medically underserved populations. There are 180 clinical hours required for course completion.

Prerequisite(s): NUR 571, NUR 572 - Prerequisites must be completed with a B or better

NUR575 Family Nurse Practitioner IV Review (Didactic) and Clinical Immersion

Hours 5

This immersive course incorporates a concentrated clinical practice experience that prepares the FNP student for full scope of practice and supports preparation for licensure and certification. . Using an evidence-based practice framework the student will apply health promotion, disease prevention, and in the provision of patient-centered care in rural medically underserved areas. There are 240 clinical hours in Across the Lifespan population required for course completion. Students will demonstration knowledge of advanced pathophysiology, and pharmacologic interventions according to current standards of care across the lifespan in primary health care clinical settings while learning the family nurse practitioner's role and responsibilities in the provision of patient-centered, ethical, culturally competent care.

Prerequisite(s): NUR 573 NUR 574

NUR576 Teaching & Learning Strategies

Hours 3

This course will prepare students to apply evidence-based adult teaching and learning strategies in academic and clinical settings designed to enable the student to teach nursing content, promote effective learning environments, and evaluate academic success in a variety of contexts. The student will learn the pedagogy of delivering nursing content in environments that include face-to-face and distance formats, incorporating a variety of technologies, and didactic methods that include the cognitive, affective, and psychomotor domains of learning.

NUR577 Academic Immersion

Hours 4

This course will provide students with the opportunity to apply concepts and skills in curriculum development, didactic teaching, and evaluation methods as well as responsibilities within the nurse educator role. The student can choose from a variety of academic settings in which to interface with students, faculty, administrators, and support services within the chosen academic institution. Practicum hours involve observational and hands on teaching experiences. The student will work with a preceptor to complete 3 credit hours (180 clock hours) of practical experience in the educator role and 1 credit hour in seminar.

Prerequisite(s): NUR 576 with a B or better

NUR578 Clinical Immersion

Hours 4

This course will provide students with the opportunity to apply concepts and skills in clinical teaching and evaluation methods within the nurse educator role. The student will apply specialized, hands on, educational concepts within specialized clinical and practice lab settings. The student will work with a preceptor to complete 3 credit hours (180 clock hours) of practical experience in the educator role and 1 credit hour in seminar.

Prerequisite(s): NUR 577 with a B or better

NUR579 Professional Nursing Practice: Community Health

Hours 4

This course prepares the students with an introduction to health promotion and community-based nursing principles. The course addresses concepts, theories, and research findings essential to promoting the health of culturally diverse aggregates, populations, or communities.

Prerequisite(s): Minimum grade of B and higher: NUR 555 Professional Nursing Practice: Adults NUR 556 Professional Nursing Practice: Mental Health NUR 740 Health Policy and Politics

Prerequisite(s) with concurrency: Minimum grade of B and higher: and NUR 558 Professional Nursing Practice: Childbearing and NUR 583 Professional Nursing Practice: Children

NUR583 Professional Nursing Practice: Children

Hours 4

This course focuses on actions designed to detect and intervene in actual or potential health problems in children and to determine actions that will ameliorate or reduce the consequences of disease in children through support or rehabilitation. Students will develop skills in early detection and diagnosis of disease in children and treatment of acute and chronic health problems and evaluates clinical skills necessary to provide culturally-competent care to children from culturally diverse populations.

Prerequisite(s): Minimum grade of B or higher: NUR 555 Professional Nursing Practice: Adults NUR 556 Professional Nursing Practice: Mental Health NUR 740 Health Policy and Politics

Prerequisite(s) with concurrency: Minimum grade of B or higher: and NUR 558: Professional Nursing Practice: Childbearing and NUR 579: Professional Nursing Practice: Community Health

NUR584 Professional Nursing Practice: Complex Client

Hours 4

This synthesis course provides opportunities for the student to examine complex, acute and chronic health problems. Students will apply concepts from prerequisite and concurrent courses and use clinical reasoning thinking and decision-making skills to evaluate interventions to ameliorate or reduce health problems. Clinical activities will focus on nursing actions used to intervene in care of complex clients. The first portion of this course serves as a bridge from adult health and mental health nursing concepts into a holistic approach to caring for clients with complex and critical health problems.

Prerequisite(s): Minimum grade of B and higher: NUR 558 Professional Nursing Practice: Childbearing NUR 579 Professional Nursing Practice: Community Health Clinical NUR 583 Professional Nursing Practice: Children

Prerequisite(s) with concurrency: Minimum grade of B and higher: and NUR 600: Transition to Practice with a Rural Preceptorship and NUR 601: Preparation for Licensure and NUR 735 Population Health in Advanced Practice Nursing and NUR 737 Interdisciplinary Leadership and Role Development for Practice Excellence

NUR591 Leadership and Advocacy in Psychiatric Mental Health Nurse Practitioner Practice

Hours 3

The purpose of this course is to focus on concepts, theories and research underlying advanced practice psychiatric mental health nursing. The scope and standards of psychiatric-mental health nursing practice will be presented. Mental health treatment modalities across the lifespan including psychotherapy, psychopharmacological interventions, community interventions, case management and consult-liaison activities will be examined. Psychological, biological, social, and cultural influences on coping responses of individuals, families, groups, and communities of people/populations at risk are explored. Intervention models, including preventive care and health promotion are introduced.

Prerequisite(s): NUR 505, NUR 521, NUR 529 with a B or better

NUR592 Diagnosis & Evidence Based Treatment for Vulnerable & Specialized People with Psychiatric Disorders

Hours 5

The purpose of this course is to provide an immersive clinical experience in which the PMHNP student demonstrates competencies for full scope of practice and supports preparation for licensure and certification utilizing evidence-based practice, the student will provide patient-centered mental health care that is culturally congruent. Students will demonstrate competence in the provision of mental health across the treatment trajectory from health promotion and disease prevention to emergent crisis care and chronic illness management across the lifespan. Students will complete 240 clinical hours in across the lifespan population care.

Prerequisite(s): NUR 597 and NUR 598 with a B or better

NUR593 Mastering Diagnosis & Evidence Based Treatment for Children & Adolescents with Psychiatric Disorders

Hours 3

The purpose of this course is to focus on the study of Psychiatric Mental Health Nurse Practitioner (PMHNP) conceptual frameworks, theories, and research findings related to common psychiatric disorders among children and adolescent (birth to 17) patients in urban, suburban, and rural settings. Biological and pharmacologic theories, developmental issues of children and adolescent (birth to 17) patients, psychotherapeutic modalities, primary prevention, and evaluation of treatment will be emphasized.

Prerequisite(s): NUR 595 and NUR 596 with a grade of B or better

NUR594 Evidence Based Advanced Clinical Practice for Children and Adolescents with Psychiatric Disorders

Hours 3

The purpose of this clinical course is to provide the student with the ability to apply treatment of psychopathology. The role of the Psychiatric Mental Health Nurse Practitioner (PMHNP) in the assessment, diagnosis, and treatment of children, adolescents, young adults, and families in urban, suburban, and rural settings will be explored. This course will also provide students the opportunity to apply psychobiological information in conjunction with the use of psychopharmacological and psychotherapeutic interventions with patients. Students must complete 180 clinical hours working with children and adolescents from birth to 17.

Prerequisite(s): NUR 595 and NUR 596 with a B or better

NUR595 Mastering Diagnosis & Evidence Based Treatment of Psychiatric Disorders in the Adult and Older Adult

Hours 3

The purpose of this course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to learn how to critically appraise theoretical approaches for psychotherapeutic interventions with adult and elderly patients and families in urban, suburban, and rural areas. This course provides a theoretical basis for advanced practice of Psychiatric Mental Health Nursing. This course will also provide the student with an understanding of the dynamics, epidemiology, and treatment of selected psychopathology, specifically focused on adult and elderly patients. In addition, the role of the PMHNP in the assessment, diagnosis, and treatment of adult and elderly patients with mental disorders will be explored.

Prerequisite(s): NUR 591 and NUR 568 with a grade of B or better

NUR596 Evidence Based Advanced Clinical Practice in Adult and Older Adults with Psychiatric Disorders

Hours 3

The purpose of this clinical course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to critically appraise and apply theoretical approaches for psychotherapeutic interventions with adult and elderly patients and families in urban, suburban, and rural areas. This course will also provide the student with an opportunity to apply the dynamics, epidemiology, and treatment of selected psychopathology, specifically focused on adult and elderly patients. In addition, the role of the PMHNP in the assessment, diagnosis, and treatment of adult and elderly patients with mental disorders will be applied. Students must complete 180 clinical hours providing psychopharmacotherapeutic and psychotherapeutic interventions to adults, elderly and their families.

Prerequisite(s): NUR 593, NUR 594; must complete with a B or better

NUR597 Mastering Diagnosis & Evidence based Treatment of Psychiatric Disorders Across the Lifespan

Hours 3

The purpose of this course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to demonstrate comprehension of multiple theoretical approaches for psychotherapeutic interventions across the lifespan in urban, suburban, and rural areas. This course also covers the dynamics, epidemiology, assessment, diagnosis, and treatment of selected psychopathologies. Appropriate evidence-based psychopharmacological and psychotherapeutic (individual, family and group) interventions are examined.

Prerequisite(s): NUR 593 and NUR 594 with a grade of B or better

NUR598 Evidence Based Advanced Clinical Practice Across the Lifespan for Psychiatric Disorders

Hours 3

The purpose of this clinical course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to demonstrate application of multiple theoretical approaches for psychotherapeutic interventions across the lifespan in urban, suburban, and rural areas. This course provides PMHNP students an opportunity to apply clinical skills in the assessment, diagnosis, and treatment of selected psychopathologies. Students will apply appropriate evidence-based psychopharmacological and psychotherapeutic (individual, family and group) interventions in a wide range of clinical settings. Students must complete 180 clinical hours treating patients across the lifespan (with a minimum of 40 child and adolescent).

Prerequisite(s): NUR 593 and NUR 594 with a grade of B or better

NUR599 Master's Thesis

Hours 3-6

This course is designed to assist the student in selecting a foundational area of inquiry or phenomenon of interest, and creating original scholarship written under the direction of the faculty advisor. It is expected that the project will culminate in the production of a research product (thesis) that evidences originality, appropriate organization, clarity of purpose, critical analysis, and accuracy and completeness of documentation. The work shall involve an analysis or study related to a professional nursing phenomenon of interest such as, but not limited to: direct patient care concerns, systems level quality improvement, healthcare policy, or nursing administration.

NUR600 Transition to Practice with a Rural Health Preceptorship

Hours 4

This required course focuses on leadership theory and management functions essential to professional nursing. It serves as a capstone course for the MENP. Essential skills are communication, interprofessional collaboration, negotiation, delegation, coordination, evaluation of interdisciplinary work, and the application of evidence-based practice models. Clinical experiences focus on the enactment of the professional nurse role in a concentrated practicum which requires a culmination of knowledge and skill while in the nursing program. Leadership and management principles and clinical judgment skills are applied as students enhance direct care delivery skills, critical thinking, and decision-making. A culminating Capstone Project is required and is designed to give students an experiential learning opportunity at the point of care by working with healthcare providers to demonstrate mastery of the leadership principles and management concepts presented within this course.

Prerequisite(s): Minimum grade of B or higher NUR 558 Professional Nursing Practice: Childbearing NUR 579 Professional Nursing Practice: Community Health Clinical NUR 583 Professional Nursing Practice: Children

Prerequisite(s) with concurrency: Minimum grade of B or higher and NUR 601 Preparation for Licensure and NUR 735 Population Health in Advanced Practice Nursing and NUR 584 Professional Nursing Practice: Community Health and NUR 737 Interdisciplinary Leadership & Role Development for Practice Excellence

NUR601 Preparation for Licensure

Hours 1

The focus of this course is to support students to assess their individual knowledge acquisition and to implement strategies to address identified deficiencies and maximize learning with faculty assistance. Through this course students will use individual, group, and technology-based methods to facilitate critical thinking and problem-solving using client case studies. Students will also complete the NCLEX licensure application process.

Prerequisite(s): Minimum grade of B or higher: NUR 558 Professional Nursing Practice: Childbearing NUR 579 Professional Nursing Practice: Community Health Clinical NUR 583 Professional Nursing Practice: Children

Prerequisite(s) with concurrency: Minimum grade of B or higher: and NUR 600 Leadership & Rural Health Preceptorship and NUR 735 Population Health in Advanced Practice Nursing and NUR 584 Professional Nursing Practice: Complex Client and NUR 737 Interdisciplinary Leadership & Role Development for Practice Excellence

NUR620 Curriculum Theory & Practice

Hours 3

This course critically examines historical and contemporary discourses necessary to understand curriculum as a synergetic field of study and an area of professional practice. Factors related to organizing curriculum will be considered based on analysis, interpretation and synthesis of contextual data. Students will determine directions, outcomes, and goals for curriculum and course design. Methods for curriculum evaluation and a dashboard for successful implementation will be emphasized. Students will demonstrate their ability to develop and critique curriculum in the context of instruction through reflection, observation, documentation, and descriptive analysis and to relate ethical, moral, and social justice concerns to curriculum practice.

Prerequisite(s): NUR 531 with a B or better

NUR696 Doctoral Seminar in Research

Hours 3

Students are expected to utilize knowledge from quantitative methodology and statistics in this course. The seminar will provide students with opportunities to synthesize knowledge gained in this and other courses in order to address topics of for research in nursing education.

NUR700 Clinical Data Mgt & Analysis

Hours 3

This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.

NUR701 Writing for Publication

Hours 3

This course concerns the development of skills in writing, editing, and preparing manuscripts for publication from initial idea to submission of a publishable manuscript. The course emphasizes a writing process that encourages productivity and collegial peer review. Legal and ethical aspects of authorship prepare students for responsible practices expected of scholars. Students should have mastered basic writing skills, e.g., grammar, syntax, and computer skills, prior to enrolling in this course.

Prerequisite(s): NUR 706 with a B or better

NUR706 Introduction to Writing

Hours 1

The purpose of this course is to provide students with an introduction and foundation to the basic principles of scholarly writing with focus on writing for a clinically focused student. The student will explore APA guidelines, the principles of plagiarism, the foundational concepts of writing, and basic guidance in writing for academic/scholarly publications.

NUR713 Special Topics

SP

Hours 1-4

This course focuses on selected DNP topics under the sponsorship of a graduate nursing faculty member with relevant expertise.

Special Topics Course

NUR717 DNP Independent Study - Special Topics

SP

Hours 1-4

The independent study option provides an opportunity for students to identify, structure, implement and evaluate learning experiences consistent with personal learning needs and career plans that are in addition to the current curriculum.

Special Topics Course

NUR727 Foundations of Implementation Science and Evidence-Based Practice

Hours 3

The purpose of this course is to provide students with foundations for implementation science and evidence-based practice (EBP). Students learn to formulate clinical questions in answerable format, and search for and identify best research evidence. The focus of the course is to evaluate and critically appraise evidence for rigor and applicability to the clinical problem and is designed to improve clinical outcomes. Students will translate the evidence into practice environments for safe quality care, gain access to information that will support optimal clinical decision-making, and identify models and theories to support clinical change.

NUR728 Evidence-Based Project Methods and Evaluation

Hours 3

The purpose of this course is to synthesize knowledge related to translational/implementation science models and strategies to improve health outcomes. The emphasis in the course is the use of project evaluation as a strategic planning tool to achieve positive changes in health status, to initiate quality improvement, to engage in risk anticipation and management, and to facilitate organizational and system level changes.

Prerequisite(s) with concurrency: NUR 727 with a B or Better

NUR729 EBP Design and Translation

Hours 3

The purpose of this course is to provide students with models for evidence-based practice (EBP) design and improvement translation. Students learn to formulate clinical questions in answerable format, and search for and identify best research evidence. The focus of the course is to evaluate and critically appraise evidence for rigor and applicability to the clinical problem and is designed to improve clinical outcomes. Students will translate the evidence into practice environments for safe, quality care. Students will gain access to information that will support optimal clinical decision-making. Improvement translation sciences will also be introduced.

NUR731 Philosophical, Theoretical, and Conceptual Foundations for Advanced Practice Nursing

Hours 3

This required core course for the Doctor of Nursing Practice program provides an understanding of the use of theory and conceptual foundations to guide the complexity of specialty nursing practice at the doctoral level. The content is derived from the philosophical and scientific underpinnings of nursing, natural, and psycho-social sciences.

NUR733 Informatics for Advanced Practice Nursing

Hours 3

This required course focuses on the collection, organization, analysis, and dissemination of information in nursing and health care. Students are introduced to the specialty of nursing informatics, the information system life-cycle, telemedicine, and the use of technology to enhance nursing care delivery and patient safety. Also, students learn how to design, use, and manipulate large and small patient databases for the analysis of patient outcomes.

NUR734 Advanced Experiential Clinical Course

Hours 1-7

This course is designed to validate Master's level competencies in clinical and organizational leadership. The course is required for post-master's DNP students who are graduates of programs in nursing with less than 500 clinical hours.

NUR735 Population Health in Advanced Practice Nursing

Hours 3

This required course equips students to implement population-based strategies for disease prevention and health promotion, aligning with national and global goals to enhance health outcomes worldwide. Emphasis is placed on a range of critical health issues, including emerging infectious diseases, emergency preparedness, health disparities, and the influence of behavior and lifestyle choices on overall health.

NUR737 Interdisciplinary Leadership and Role Development for Practice Excellence

W

Hours 3

This course prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.

Writing

NUR740 Health Policy & Politics: Implications in Health Care

Hours 3

This course focuses on the basic principles of health policy and the influence of the political process as a systematic approach to health care in the United States and internationally. The course prepares students to assume complex leadership roles in order to advance specialty practice and health. This course focuses on the unique challenges of engaging and influencing healthcare policy in the U.S. and internationally. It is designed to develop skills, techniques, and approaches to the critical analysis of health policy proposals, health policies, and related issues from the perspective of consumers, nursing, other health professions, and other stakeholders in policy and public forums. The health policy framework is analyzed from a governmental, institutional, and organizational perspective.

NUR742 Project Evaluation and Methods

Hours 3

The purpose of this course is to synthesize knowledge related to translational/implementation science models and strategies to improve health outcomes. The emphasis in the course is the use of project evaluation as a strategic planning tool to achieve positive changes in health status, to initiate quality improvement, to engage in risk anticipation, management and to facilitate organizational and system level changes.

NUR743 EBP Strategies

Hours 3

NUR 743 is a required core Doctor of Nursing Practice Program course, which expands on foundational evidence-based practice concepts to refine a problem statement and derive a searchable and answerable clinical question. Content includes identification and selection of methods, strategies, tools and metrics needed to complete a successful scholarly project. The course also addresses targeted strategies for disseminating evidence associated with scholarly projects.

NUR794 Introduction to the DNP Scholarly Project

Hours 1

This course provides an essential foundation for DNP students preparing for DNP Scholarly Project Immersion. It is designed to be taken in the semester prior to entering NUR 796.

NUR795 DNP Project Seminar

Hours 1

This required course is designed to assist the student to develop professional competencies related to the DNP project. Students participating in the seminar will obtain guidance, be involved in discussion, and receive peer suggestions about the DNP project. Funding opportunities will be explored, presentation preparation will be initiated, and project dissemination will be reviewed. The student will start the development and design of the professional portfolio with current professional information and achievements.

Prerequisite(s): NUR 794

NUR796 DNP Project Immersion I

Hours 3

This required course is the first clinical course in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. An organizational needs assessment is conducted while the final project is selected and planned by the student and the Faculty Advisor. IRB training and preparation is completed. The final project proposal is completed and approved by the Faculty Advisor in this course.

Prerequisite(s): A clinical facility contract and clinical advisor must be approved and in place prior to enrollment in this course. NUR 701 NUR 727 NUR 728 NUR 794

NUR797 DNP Project Immersion II

Hours 3

This required course is the continuation of the clinical courses in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. The DNP Project will be submitted for IRB review and revised until accepted by all required IRB entities. The DNP project will be implemented and evaluated by the student, with guidance from the Faculty Advisor.

Prerequisite(s): NUR 796 A clinical facility contract and clinical advisor must be approved and in place before enrollment in this course.

Prerequisite(s) with concurrency: NUR 795

NUR798 DNP Project Immersion III

Hours 3

This required course is the culmination of the clinical courses in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. The final project is evaluated, analyzed, and disseminated by the student with Faculty and Clinical Advisor guidance in the form of a professional presentation. The final DNP Project report is completed and approved by the Faculty Advisor. Students are strongly encouraged to submit a completed manuscript for publication based on the DNP Project in collaboration with the Faculty Advisor when deemed ready by the Faculty Advisor.

Prerequisite(s): NUR 796 and NUR 797 with a B grade or better

NUS713 Special Topics

SP

Hours 3

This course is designed to offer Joint PhD program students a range of nursing-science focused special topic courses.

Special Topics Course

NUS741 BSN-PhD Research Seminar I

UAH

Hours 1

The purpose of this course is to prepare BSN-PHD students with the foundational skills of deep reading, comprehensive literature review and critique, critical thinking, and writing skills necessary for successful advancement in a doctoral program. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS742 BSN-PhD Research Seminar II

UAH

Hours 1

The purpose of this course is to aid BSN-PHD students in developing skills to assess scientific rigor, develop an argument, critique published research, professionally present (verbally and written) critique findings, develop a manuscript for publication, and will provide an opportunity to obtain hands on research experience. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS743 BSN-PhD Research Seminar III

UAH

Hours 1

The purpose of this course is to prepare BSN-PHD students with the foundational skills of systematically appraising the literature to develop an appropriate and comprehensive significance section, analyzing health policy that directly relates to the students' research areas of interest, and evaluating research methodology and accompanying statistical analyses. These are important for successful advancement in a doctoral program. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS750 Philosophy of Science

UAH

Hours 3

The purpose of this course is to explore the evolution of philosophy and science. Epistemology, knowledge generation, knowledge acquisition, and ways of knowing will be examined. Scientific inquiry will include reasoning, logic, and persuasive argument development.

Prerequisite(s): Admission to the Program

UA-Huntsville Course

NUS752 Informatics and Analytics for Nurse Scientists

Hours 3

The purpose of this course is to prepare nurse scientists to use informatics, electronic tools, and healthcare technologies for the purposes of nursing research. The course will focus on the use of informatics in the data management of individuals, groups, and organizations as the nurse scientist plans and executes a program of research.

Prerequisite(s): NUS 758 NUS 760

NUS754 Ethical Conduct and Legal Issues in Research

Hours 3

The purpose of this course is to introduce the student to doctoral scholarship in support of beginning a program of responsible conduct of research. This course explores current ethical and legal issues in the science of nursing research. The course will delve into best practices in research design with regard to ethics, authorship, data management and record keeping, intellectual property and ownership of data, and human subjects research. In addition, the course will cover conflicts of interest, mentoring, collaborations, peer review, research misconduct, and current ethical issues in research.

Prerequisite(s): Admission to the Joint Nursing Science PhD Program

NUS756 Application of Theoretical Models

UAH

Hours 3

The purpose of this course is to provide students a foundation for contributing to theory development processes, analyzing and critiquing theoretical foundations of research, and applying theoretical models to nursing research. This course addresses the relationship between theory and research and provides an understanding of the use of theoretical models and conceptual foundations to guide nursing research and practice.

Prerequisite(s): NUS 750

UA-Huntsville Course

NUS758 Quantitative Research Methods and Designs

Hours 3

The purpose of this course is to provide students with foundational knowledge related to quantitative research design and methods, and the skills to develop research proposals using these designs and methods. Students will progress from learning quantitative research approaches, to understanding the process and components of quantitative research. Students will end the course by integrating these new principles into a written, defensible, National Institutes of Health-style Research Strategy. Additional content will focus on the evolving role of nurses in quantitative research, the renewed focus on research rigor and reproducibility, and being a nurse scientist on interdisciplinary research teams. Special emphasis will be placed on clinical nursing designs including observational studies, quasi-experimental studies, and repeated-measures intervention studies.

Prerequisite(s): NUS 750

NUS760 Statistics I

UAH

Hours 3

The purpose of this course is to provide the student with the skills to conduct and interpret statistical data. Emphasis will be place on describing types of variables, testing hypotheses, selecting appropriate parametric and nonparametric statistical tests, analyzing data, and interpreting results.

Prerequisite(s): NUS 758

UA-Huntsville Course

NUS762 Healthcare Policy for Rural and Medically Underserved Populations

Hours 3

The purpose of this course is to explore the policy environment that influences and shapes public health and health care service delivery, including rural and medically underserved communities. Students will develop skills, techniques, and approaches to identify gaps, critically analyze and research health related issues. Utilization and delivery of data to promote and impact healthcare policy changes will be an important measure of outcome. Students will develop the ability and confidence to critically assess current health policy issues in a thoughtful, comprehensive and rigorous manner and to engage in the policy process.

Prerequisite(s): Admission in the Joint Nursing Science PhD Program

NUS764 Scientific Writing

UAH

Hours 3

The purpose of this course is to develop writing skills to produce scientific writing that is clear, concise and logical. This course will also explore the publication to include abstract and manuscript development and the submission process. Additional pathways to dissemination of nursing content will be explored as well.

Prerequisite(s): Admission to the Joint Nursing Science PhD program

UA-Huntsville Course

NUS766 Epidemiology

Hours 3

The purpose of this course is to introduce epidemiological methods for measuring population health, designing and implementing observational and experimental studies, critically reading the public health literature, and applying research findings to global and community health.

Prerequisite(s): NUS 760

NUS768 Statistics II

Hours 3

The purpose of this course is to provide advanced coursework in applied statistical approaches to data management and analysis with an emphasis on multivariate statistical approaches. Students will develop improved skills in conceptualizing, executing, analyzing, and interpreting advanced analytic strategies and to enhance their ability to propose strong, tailored analytic approaches for specific study designs and research aims. Students will gain proficiency in using statistical software to enhance their knowledge of regression, ANCOVA, MANOVA/MANCOVA, discriminant analysis, exploratory and confirmatory factor analysis, structural equation modeling, multilevel modeling, and advanced categorical approaches. Emphasis will be placed on the understanding of the mathematics, logic, and application of these techniques.

Prerequisite(s): NUS 760

NUS770 Grant Writing

Hours 3

The purpose of this course is to prepare students in the foundations of writing grants for federal external funding. This course will help students identify a step-wise process to develop a grant proposal through federal funding sources. Strategies for successful grant writing include identifying funding sources for the topic, writing a competitive grant application, developing a collaborative team of researchers for the project, and understanding the review process.

Prerequisite(s): NUS 764

NUS772 Qualitative Research Methods

UAH

Hours 3

The purpose of this course is to assist the student in using selected qualitative research methods. Learning modules will explore qualitative approaches, sampling, data collection, data analysis and dissemination. The course will review and explore the use of technology to assist the qualitative researcher.

Prerequisite(s): NUS 750, NUS 756, NUS 758

UA-Huntsville Course

NUS776 Advanced Research Methods

UAH

Hours 3

The purpose of this course is to assist students in developing the knowledge and skills to design a mixed methods research (MMR) study. MMR is an advanced method for collecting, analyzing, and "mixing" both quantitative and qualitative data within a single study, to understand a research problem more completely.

Prerequisite(s): NUS 752, NUS 758, NUS 760, NUS 768, NUS 772

UA-Huntsville Course

NUS799 Dissertation Hours

Hours 1-12

The purpose of this course is initiation, continuation, or completion of the dissertation for the Doctor of Philosophy (PhD) in Nursing Science degree. This course must be repeated each semester consecutively up to 24 credit hours until successful defense of the dissertation.

Prerequisite(s): Successful completion of 45 hours of NUS courses

Nursing Science Courses**NUS741 BSN-PhD Research Seminar I**

UAH

Hours 1

The purpose of this course is to prepare BSN-PHD students with the foundational skills of deep reading, comprehensive literature review and critique, critical thinking, and writing skills necessary for successful advancement in a doctoral program. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS742 BSN-PhD Research Seminar II

UAH

Hours 1

The purpose of this course is to aid BSN-PHD students in developing skills to assess scientific rigor, develop an argument, critique published research, professionally present (verbally and written) critique findings, develop a manuscript for publication, and will provide an opportunity to obtain hands on research experience. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

[View All Courses](#)**Doctor of Nursing Practice (DNP)**

The DNP is a practice doctorate in nursing that prepares graduates to function at the highest level of nursing practice. Entry into the program is available in spring, summer, and fall. Graduates of the DNP program focus on providing care with an emphasis on improving quality and access to underserved and diverse populations. Graduates employ abilities and skills in these areas to (a) advocate for reasonable, rational, and data-driven health regulations, standards, and practices; (b) sustain collaborative and strategic relationships; (c) promote innovative, effective health care programs; and (d) form partnerships with diverse groups to address health disparities.

Two pathways to the DNP degree are available, post-baccalaureate to DNP (BSN to DNP) and post-masters to DNP (MSN to DNP). The BSN to DNP pathway admits BSN-prepared nurses. The MSN degree will be awarded en route at the start of the DNP project courses. The following MSN concentrations are available: Nurse Executive, Nurse Educator, Family Nurse Practitioner (FNP), Psychiatric Mental Health Nurse Practitioner (PMHNP), or Dual Nurse Psychiatric Mental Health and Family Nurse Practitioner.

The MSN to DNP pathway admits those with a minimum of a Bachelor's in Nursing and a Master's degree in Nursing or other relevant field. Those with a Master's in a field other than nursing may be required to complete additional courses. The program of study offers the opportunity for a focus in nurse education or executive administration through additional elective coursework if desired.

The DNP curriculum includes the development of a clinical practice DNP project. "The DNP project" is designed to synthesize scholarship in an advanced practice specialty or an area of health care leadership.

Practice immersion experiences provide the context within which the project is completed. Students develop the project under the direction of a team, including program faculty, the student, the clinical advisor, and the faculty advisor. All courses are offered in a distance accessible format, with one on-campus intensive conference attended during the DNP project courses.

Note: This program requires a **clinical component (post-baccalaureate range from 1320-2100 clinical hours depending on the concentration; post-master's clinical hours are 540)**. The student's responsibility is to identify a site and an appropriate clinical advisor. **No clinical practice will take place until the student has been notified by CCN of the site and clinical advisor approval.**

Click Here to view the states from which the College of Nursing currently accepts applications for admission.

Admissions

Post-Baccalaureate to Doctor of Nursing Practice (BSN to DNP) Pathway

Applicants for the Post-Baccalaureate to Doctor of Nursing Practice (DNP) pathway will be considered on a competitive basis. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Baccalaureate degree in nursing from an accredited school of nursing.
2. Reside and hold a current unencumbered RN licensure in a state-approved for admission. Click Here to view the states from which the College of Nursing currently accepts applications for admission.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

Post-Master's to Doctor of Nursing Practice (MSN to DNP) Pathway

Applicants for the Post-Baccalaureate to Doctor of Nursing Practice (DNP) pathway will be considered on a competitive basis. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Master's degree in nursing from a CCNE or NLN accredited school of nursing or a Master's degree in another relevant field. Those with Master's in a field other than Nursing may be required to complete additional courses.
2. Reside and hold a current unencumbered RN licensure in a state approved for admission. Click Here to view the states from which the College of Nursing accepts applications for admission.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

Footnotes

- * May test out through the writing competency assessment.
- ** Only eligible in the last 3 semesters of coursework NUR 796, NUR 797, and NUR 798 must be in sequence. NUR 795 may be taken with NUR 796 or NUR 797.

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Admission to Candidacy Requirements

The Director of Graduate Student Services will initiate the Admission to Candidacy when core coursework is completed.

Comprehensive Exam

DNP students do not take comprehensive exams. Successfully securing a clinical site and completing all prerequisites is needed for enrollment into NUR 796-798 (DNP Immersion courses).

DNP Project

Immersion course series requirements.

NUR 796 - Approved proposal, portfolio initiation, 180 clinical hours

- < 75% complete: course failure
- >75% but not 100%: Incomplete with 1 hour of NUR 717 Independent Study for the next semester. If the incomplete is fulfilled prior to the start of the next semester, the student may progress.

NUR 797: IRB approval and project implementation, continued portfolio, 180 clinical hours

- < 75% complete: course failure
- >75% but not 100%: Incomplete with 1 hour of NUR 717 Independent Study for the next semester. If the incomplete is fulfilled prior to the start of the next semester, the student may progress.

NUR 798: Project evaluation DNP part II approval, portfolio completion, dissemination, 180 clinical hours.

- < 75% complete: course failure
- >75% but not 100%: Incomplete with 1 hour of NUR 717 Independent Study for the next semester. If the incomplete is fulfilled prior to the start of the next semester, the student may progress.

The immersion course series cannot have a gap other than summer. NUR 717 (Independent Study) fills the gap for a student to stay in sequence. Any other gap requires the student to begin the series over. If the student will gap the summer but wishes to complete incomplete work from the spring, the student will need to take NUR 717 for 1 credit hour. Any failure during the sequence can allow for a repeat of the failed course IF the project and clinical site remain the same. If the clinical site or the project changes the student will be required to restart the sequence at NUR 796.

Extreme circumstances will be considered on a case-by-case basis.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 21).

Student Progression Requirement

Student progression is monitored and evaluated each semester. Please contact the Director of Graduate Student Services for the Graduate Retention and Progression Policy.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Please contact the Coordinator of Graduate Student Services for assistance with the Leave of Absence process.

Application for Graduation Information

Information on the Application for Graduation (p. 15).

Family Nurse Practitioner Certificate

Click Here to view the states from which the College of Nursing currently accepts applications for admission.

The Nurse Practitioner (NP) Post-graduate Certificate program builds on the graduate level nursing competencies and knowledge base. Nurses who are already prepared at either the master's or doctorate level for other roles may apply for the post-graduate certificate program with advanced specialization as a Family Nurse Practitioner (FNP). The FNP concentration prepares students for certification as an FNP across the lifespan. Students in the Post-graduate Certificate program will enroll in existing FNP population-focused courses, but they will not be required to complete master's graduate nursing core courses.

Admissions

Applicants for the nurse practitioner post-graduate certificate will be considered on a competitive basis. Nurses who are interested in the nurse practitioner post-graduate certificate are encouraged to contact the Capstone College of Nursing (CCN) Coordinator of Graduate Student Services.

Click Here to view the states from which the College of Nursing currently accepts applications for admission.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- Have a Master's degree in nursing from an accredited graduate program in nursing or a master's degree in a health-related field with a baccalaureate degree in nursing from an accredited program.
- Reside and hold a current unencumbered RN licensure in a currently approved state.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

NUR 505 Advanced Health Assessment	3
NUR 521 Advanced Pharmacology	3
NUR 529 Advanced Pathophysiology	3

Transfer Requirements

Graduate School information on Transfer Credit (p. 15).

Time Limits for Degree Completion

Graduate School information on Time Limits (p. 15).

Clinical Hours

Clinical hours are completed under the supervision of advanced practice providers specific to each specialty concentration (FNP, PMHNP, or NE)

Graduate Student Clinical Placements

1. The Capstone College of Nursing (CCN) will initiate a Clinical Affiliation Agreement (CAA) for all clinical experiences involving direct or indirect patient care by graduate students.
2. Students will not be permitted to start clinical experiences involving direct or indirect patient care until a CAA has been executed.
3. Faculty are responsible for sending written notification to the student that he/she is approved to begin the clinical experience.

Student Progression

Student progression is monitored and evaluated each semester. Please contact the Coordinator of Graduate Student Services for the Graduate Retention and Progression Policy.

Additional Academic Requirements

The MSN will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework

- Participate in virtual orientation and on-campus intensive if required by concentration.

Annual Graduate Student Background Checks and Drug Screening

1. Students accepted to the graduate nursing programs are required to have an annual background screen and drug screen.
2. Students accepted to the graduate nursing programs are required to pass a background screen and have a negative drug screen.
3. The College of Nursing must certify to clinical agencies where students practice that each student has had an acceptable background screen and negative drug screen.
4. The background screen and drug testing screen will be conducted by a qualified agency using established methods and procedures. Confidentiality of the student will be protected. All costs associated with screenings are the responsibility of the student.
5. Initial acceptance to graduate nursing courses will be withdrawn for students who have a positive drug screen.
6. A student who has a positive drug screen while taking graduate nursing courses will follow the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy. Any readmission consideration will be based on the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy.
7. Initial acceptance to graduate nursing courses will be withdrawn for students who have been convicted of or have pending a charge that would not be acceptable for clinical practice.
8. A student whose acceptance to graduate nursing courses is withdrawn or is dismissed from the College of Nursing due to findings from a background screen will be considered for readmission on a case-by-case basis depending upon the situation.

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted before the removal of the initial registration hold and during progression through the program. Failure to comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN, DNP, and Post-Graduate programs must upload the following into the document management system:

1. Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
2. Completion of the program on OSHA Standards.
3. Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
4. Proof of Health Insurance.
5. Graduate Nursing Student Health & Physical Exam Form signed by a Certified Registered Nurse Practitioner (CRNP), DO, or MD.
6. Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray

completed within the month immediately prior to document submission.

7. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

All graduate students (e.g., MSN, DNP, and Post-Graduate programs) must upload the following into the document management system:

1. Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN, DNP and Post-Graduate programs must:

1. Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - a. Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - b. Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.
2. Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
3. No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student Annual Influenza Vaccine Form. Exceptions for allergies only. **This vaccine cannot be declined.**
4. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

Annually, all graduate students, EXCEPT EdD and PhD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Upon admission, students must upload into the document management system proof of immunization or a titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form for the vaccines listed below. Vaccination or titer testing are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines. Failure to submit documentation of immunization will result in the inability to continue attendance and/or progression courses in the college of nursing.

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are

insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. **FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.**

Tetanus Vaccination

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider. Exceptions for allergies only. **This vaccine cannot be declined.**

Measles, Mumps & Rubella (MMR) Vaccine

Upon admission, students must upload into the document management system proof of immunization for MMR or an MMR titer that shows adequate antibody protection as noted on the Immunization Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the MMR series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 MMR Booster vaccine (administered after titer).

Varicella (Chicken Pox) Vaccine

Upon admission, students must upload into the document management system proof of immunization for Varicella or a Varicella titer that shows adequate antibody protection as noted on the Immunization Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the Varicella series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 Varicella Booster vaccine (administered after titer).

Master's Entry to the Profession of Nursing, MSN

The Master's Entry to the Profession of Nursing (MEPN)(MSN) degree program is an accelerated program designed to offer individuals who already hold a baccalaureate degree or higher in another field an opportunity to obtain the prelicensure knowledge and skills that will prepare and make them eligible for licensure at a faster rate than the traditional prelicensure programs (e.g., BSN). This program will provide graduates with expanded advanced skills in population health, nursing leadership, health systems policy, healthcare informatics, and evidence-based translational science. Graduates of the MEPN program will effectively serve in both urban and rural communities as entry level nurses.

Admissions

- Applicants to the Master's Entry to the Profession of Nursing (MEPN) program must hold a baccalaureate or higher degree from an accredited college or university. Prior work experience is not required.

We want to engage in efforts to promote holistic admissions. We also want to be mindful of the burden/complexity of the application.

- UA Graduate school options for GPA include: undergraduate GPA of 3.0 overall, 3.0 for the last 60 semester hours in a degree program, OR 3.0 for a completed graduate degree program.
- Prerequisite courses: A minimum of a B is required for each course. These courses must transfer to be equivalent with the following UA courses:
 - Human Anatomy & Physiology with Lab I & II
 - Biology with Lab (or Chemistry with Lab
 - Microbiology with lab
 - Statistics
 - Human Growth and Development
 - Humanities (Ethics preferred)
- Personal statement
- Interview
- Letters of Recommendation

- Two required
- At least one should be a professional reference
- No academic letter required
- Current CV/Resume
- Test of Essential Academic Skills (TEAS) exam

Curricular Requirements

Transfer Requirements

Graduate School information on Transfer Credit.

Clinical Hours

Clinical hours are completed under the supervision of advanced practice providers specific to each specialty concentration (FNP, PMHNP, ED or NE)

Graduate Student Clinical Placements

1. The Capstone College of Nursing (CCN) will initiate a Clinical Affiliation Agreement (CAA) for all clinical experiences involving direct or indirect patient care by graduate students.
2. Students will not be permitted to start clinical experiences involving direct or indirect patient care until a CAA is fully executed.

3. Faculty are responsible for sending written notification to the student that he/she is approved to begin the clinical experience.

from a background screen will be considered for readmission on a case-by-case basis depending upon the situation.

Thesis (Optional)

A thesis is an original research project conducted by one student and directed by a graduate committee. The student must register for a minimum of six semester hours of thesis credit (NUR599) and successfully complete the thesis to complete the program. An oral public defense of the thesis is required. The thesis must conform to the guidelines of the Graduate School.

Comprehensive Exams

MSN students do not complete comprehensive exams. Students must complete all of their clinical coursework and clinical hours to graduate.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits.

Student Progression Requirement

Student progression is monitored and evaluated each semester.

Additional Academic Requirements

The MSN will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework
- NP Student must participate in orientation and on-campus intensive if required by concentration.

Annual Graduate Student Background Checks and Drug Screening

1. Students accepted to the graduate nursing programs are required to have an annual background screen and drug screen.
2. Students accepted to the graduate nursing programs are required to pass a background screen and have a negative drug screen.
3. The College of Nursing must certify to clinical agencies where students practice that each student has had an acceptable background screen and negative drug screen.
4. The background screen and drug testing screen will be conducted by a qualified agency using established methods and procedures. Confidentiality of the student will be protected. All costs associated with screenings are the responsibility of the student.
5. Initial acceptance to graduate nursing courses will be withdrawn for students who have a positive drug screen.
6. A student who has a positive drug screen while taking graduate nursing courses will follow the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy. Any readmission consideration will be based on the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy.
7. Initial acceptance to graduate nursing courses will be withdrawn for students who have been convicted of or have pending a charge that would not be acceptable for clinical practice.
8. A student whose acceptance to graduate nursing courses is withdrawn or is dismissed from the College of Nursing due to findings

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted before the removal of the initial registration hold and during progression through the program. Failure to comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN, DNP, and Post-Graduate programs must upload the following into the document management system:

1. Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
2. Completion of the program on OSHA Standards.
3. Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
4. Proof of Health Insurance.
5. Graduate Nursing Student Health & Physical Exam Form signed by a Certified Registered Nurse Practitioner (CRNP), DO, or MD.
6. Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray completed within the month immediately prior to document submission.
7. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

All graduate students (e.g., MSN, DNP, and Post-Graduate programs) must upload the following into the document management system:

1. Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN, PG, and DNP programs must:

1. Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - a. Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - b. Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.
2. Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
3. No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student

Annual Influenza Vaccine Form. Exceptions for allergies only. ***This vaccine cannot be declined.***

4. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

Annually, all graduate students, EXCEPT EdD and PhD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Upon admission, students must upload into the document management system proof of immunization or a titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form for the vaccines listed below. Vaccination or titer testing are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines. Failure to submit documentation of immunization will result in the inability to continue attendance and/or progression courses in the college of nursing.

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.

Tetanus Vaccination

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider.

Measles, Mumps & Rubella (MMR) Vaccine

Upon admission, students must upload into the document management system proof of immunization for MMR or an MMR titer that shows adequate antibody protection as noted on the Immunization Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the MMR series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 MMR Booster vaccine (administered after titer).

Varicella (Chicken Pox) Vaccine

Upon admission, students must upload into the document management system proof of immunization for Varicella or a Varicella titer that shows adequate antibody protection as noted on the Immunization Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the Varicella series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 Varicella Booster vaccine (administered after titer).

Nursing Science, Ph.D.

The Joint Nursing Science Ph.D. program prepares nurse scholars who will advance nursing science by generating new knowledge through Interprofessional research initiatives and to improve the health of rural and medically underserved populations. This program provides students with faculty and educational resources housed on both The University of Alabama in Huntsville (UAH) and The University of Alabama (UA)

campuses. Two pathways to the PhD degree are available, the post-master's to PhD (MSN to PhD) and the post-baccalaureate to PhD (BSN to PhD). All courses are offered in a distance accessible format with one on-campus intensive conference attended each year. The PhD program is offered as both full-time and part-time programs of study.

Entry into the program is available every summer. Students admitted to the program are mentored and taught by faculty from both The University of Alabama Capstone College of Nursing and the University of Alabama in Huntsville College of Nursing.

Admissions

We accept BSN-prepared and MSN-prepared students into the Joint Ph.D. program. Admission requirements are the same except where noted below.

Admission to the Ph.D. program is determined by the Joint Ph.D. Oversight Committee who will assess the entire composite of information gained from a variety of sources. Each applicant must meet the following criteria and/or provide:

Please note: We cannot accept applications from International Students who do not reside within the United States.

- An application to the Joint Ph.D. Graduate Program [Apply online](#)[Opens in a new window.](#)
- Official transcripts from each university or college attended sent to:

UAH Graduate Admissions
 301 Sparkman Drive
 SSB, Suite 222
 Huntsville, AL 35899
- BSN-prepared applicants must have evidence of successful completion of a bachelor of science in nursing degree at an accredited program.
- MSN-prepared applicants must have bachelor of science in nursing degree and a master's degree in nursing or a closely related health field from accredited programs.
- A minimum graduate Grade Point Average (GPA) of 3.0 on a 4.0 scale.
- Resume or curriculum vitae.
- Three (3) letters of reference from professionals or professors who can adequately evaluate the applicant and the applicant's previous work or potential for success. Two of the letters are strongly preferred from nurses with doctoral degrees.
- Scientific Writing Sample — This sample of your written work should demonstrate your intellectual ability (such as logic, critical thinking, analysis, or synthesis) and your technical writing skills (composition, grammar, references, or citations). For example, you could submit an academic paper, essay, published article, or a professional report written by you. If someone other than you contributed to this document (including editing), explain your contribution and the contributions of others.
- Statement of Purpose — In four double-spaced pages respond to the following:
 - Why do you want to pursue a Ph.D. in Nursing Science?
 - What professional goals do you hope to achieve during and beyond your Ph.D. program?
 - Describe prior experiences that have prepared you for doctoral study (e.g. research, presentations, publications, leadership roles in practice, education, or professional organizations).

- What are your research interests?
- How might research in this area advance the science of nursing?
- RN Licensure Requirement —
 - Applicants must have an active, unencumbered license as a Registered Nurse in the United States. Applicants who hold an equivalent certification or licensure outside of the U.S. will be considered on a case-by-case basis.
 - Applicants who are not yet licensed will be considered for conditional admission, but proof of licensure must be submitted prior to completing 12 credit hours of Ph.D. coursework
- Transfer applicants — Evidence of good academic standing at the current institution. Determination of whether or not credits may be transferred will be based on evaluation of comparability of requested transfer course to Ph.D. course and university policy, and is completed after admission.

After the first review of the application and at the request of the Joint Ph.D. Oversight Committee, applicants will be asked to successfully complete personal interviews with Oversight Committee members. Research interests, professional involvement, and motivation for successful completion of doctoral study in the Ph.D. program will be assessed.

Completed applications are reviewed by the Oversight Committee throughout the year for summer enrollment. Applications (transcripts, etc.) must be completed by **April 1** if enrollment in the program is desired for that summer. Applicants must register for courses within one (1) years of acceptance into the Ph.D. program, or the acceptance is void.

Upon admission, you will receive written notification of admission from the Deans of the Joint Ph.D. Program. You will also receive a letter from the graduate advisors at both UA and UAH outlining requirements for entry into the Ph.D. program. Admission is contingent upon providing documentation of a background check and drug screen and results were acceptable to the admission committee.

Students who are enrolled in the Joint Nursing Science Ph.D. program will be divided evenly between UA and UAH for administrative purposes. Applicants who are employees of either UA or UAH will be enrolled in the University of their employment because of the restriction that employee tuition waivers can only be used on the campus of the individual's employment.

The Joint Ph.D. program requires students to visit campus for three days each year program for an intensive experience. **This is a mandatory intensive experience and all students are expected to attend at least two intensives.**

Curricular Requirements

PhD Nursing Science		Hours
BSN to PhD Required Courses		
NUS 741	BSN-PhD Research Seminar I	1
NUS 742	BSN-PhD Research Seminar II	1
NUS 743	BSN-PhD Research Seminar III	1
BSN and MSN to PhD Required Courses		
NUS 750	Philosophy of Science	3
NUS 752	Informatics and Analytics	3
NUS 754	Ethical Con Legal Iss Research	3
NUS 756	Appl of Theoretical Models	3
NUS 758	Quant Resrch Methods & Designs	3
NUS 760	Statistics I	3

NUS 762	HC Policy Rural Undrsvd Popul	3
NUS 764	Scientific Writing	3
NUS 766	Epidemiology	3
NUS 768	Statistics II	3
NUS 770	Grant Writing	3
NUS 772	Qualitative Research Methods	3
NUS 774	Measurement in Research	3
NUS 776	Advanced Research Methods	3
NUS 799	Dissertation Hours	18
Total Hours		63

Students enrolled in the Joint Nursing Science PhD will have the following requirements:

1. Required online orientation that will take place the first week of classes during the first summer semester. This provides an opportunity to meet faculty and access student resources such as library, writing centers and financial aid.
2. Two required residencies to be hosted on alternating campuses. All residencies will be attended by faculty from both campuses.
3. Qualifying Examination. At the end of semester 6, students will be given a take home exam that will evaluate writing and critical thinking skills and to assess synthesis of knowledge of the program's core concepts.
4. Final Dissertation Defense. At the conclusion of the 18 required dissertation hours, students will be required to present the findings and implications of their dissertation.

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Comprehensive Exams Eligibility

- Completion of Ph.D. coursework with B or higher in all courses

Examination Schedule and Procedures*

- Students will be advised at the residencies and the semester prior to the comprehensive exam about the comprehensive exam procedures and expectations.
- Written portion of the comprehensive exam will be sent to students the first week of May. Students will be given 2 weeks to complete the comprehensive exam. Written exam will be graded and students will be notified of results.
- Written comprehensive exam will consist of three questions with a maximum 21-page limit.
- The comprehensive exam will be graded as pass/fail for UA home students and satisfactory/unsatisfactory for UAH home students.
- Each exam will be graded by two members of the Comprehensive Exam Committee. If the two members disagree, a third member will grade the exam and be the deciding tie breaker.
- An oral portion will be given during the Summer semester to students who did not pass the written exam.
- Students who did not pass the written portion will be given direction on which question or questions to prepare for the oral presentation.
- If a student fails both the oral exam the first time, the student will be given a second chance to take the written comprehensive exam. The

oral portion will not be given a second time. If the student fails the second written exam, that student will be dismissed from the Joint Nursing Science Ph.D. program.

Re-Examination

The procedure for a second written Ph.D. Comprehensive Examination is the same as for the original comprehensive examination. The second examination date is planned to accommodate remediation recommendations. The procedure for administration and evaluation of the second comprehensive examination is the same as with the first attempt. The student who fails the second attempt of the examination is not eligible for progression in the Joint Nursing Science Ph.D. program and may not enroll in future Ph.D. course work in the program.

Notification of Results

Ph.D. Comprehensive Examination results are sent to the gradebook in Canvas. A copy of the results letter is placed in the student's academic file. Notification of individual students' examination performance is sent by the ADGP to the Dean of the Graduate School.

Graduation School information on Comprehensive Exams (p. 21).

Admission to Candidacy Requirements

Upon the successful defense of the dissertation proposal, an application for candidacy is submitted to the Graduate School of the student's home institution. The application for candidacy is initiated by the Coordinator of Graduate Student Services.

Continuous Enrollment Policy

Candidacy is retained by maintaining continuous enrollment in NUS 799 Dissertation Hours each fall and spring semester, up to and including the term in which the dissertation is defended. Failure to enroll continuously in NUS 799 until the Ph.D. degree is awarded terminates candidacy.

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

NUS 799, Dissertation Hours

Students are required to take dissertation credit (NUS 799) to begin the dissertation proposal and continue until graduation. Student and the chair (in consultation with the committee) must decide the number of hours per semester. The number of course hours is related to the objectives/student learning outcomes to be accomplished in a given semester. At the beginning of each semester, student objectives are to be determined. These objectives will be used for determining tasks and deadlines as well as the course grade. Failure to successfully complete the dissertation assignments according to the syllabus will result in a grade of fail/unsatisfactory for the course.

Dissertation Proposal

While registered in NUS 799, students have 12 months to complete the dissertation proposal from the date of the successful completion of the comprehensive exam. If the dissertation proposal is not completed in this time period, the Chair of the Dissertation Committee will meet with the student about her/his progress. The student is then responsible for developing a written plan for completion of the dissertation proposal and submitting this to the dissertation committee for approval within two weeks following the meeting with the Dissertation Committee Chair.

The proposal defense is graded on a Pass, Pass with revisions, or Fail basis by unanimous vote of the dissertation committee members. If revisions are requested in order to determine the status of the proposal, the Chair of the Dissertation Committee, in consultation with committee

members, will monitor the completion of the revisions as requested by the dissertation committee members. After revisions are received, the committee determines whether a student passes with revisions or fails.

For a failure, a second proposal defense will be held within six (6) months from the date of the defense of the first proposal defense, and the Dissertation Committee Chair makes the required notifications about the second proposal defense. The candidate may re-attempt the proposal defense once.

Dissertation Proposal Format

Two formats for the dissertation are acceptable in the Joint Nursing Science Ph.D. Program: 1) a five-chapter dissertation (see page 16 for further description) or 2) a 3-article dissertation (see page 17 for further description, http://services.graduate.ua.edu/etd/article_style.html). Students must choose the format prior to the Dissertation Proposal Defense and the format is defended to and approved by the committee at the Dissertation Proposal Defense.

The student must submit for approval by the Dissertation Committee a written dissertation proposal for the doctoral dissertation research. For both styles of dissertation, the student will complete the dissertation proposal as outlined below.

The dissertation proposal includes:

- Title Page
- Chapter One: Background, Significance and Specific Aims. This section should: (1) provide an introduction, significance, and purpose of the research and the specific aims of the project; (2) state the research questions to be addressed or hypotheses to be tested; and, (3) provide a conceptual/theoretical framework that is clearly described.
- Chapter Two: Review of literature. This section should: (1) provide a review of the literature leading to the research proposal, critically evaluate existing knowledge, and specifically identify the gap(s) which the proposal is intended to address.
- Chapter Three: Research Design and Methods. This section should: (1) describe the research design (design, sample, variables and measures) and the procedures to be used to accomplish the specific aims of the project; identify instruments to be used and describe procedures for addressing the specific aims. (2) include any pilot work or preliminary studies related to the proposal; and (3) include how the data were collected, analyzed, and interpreted.
- References in APA style
- Appendices as needed

With submission of the dissertation proposal, the student also submits the following in writing. These items are discussed and approved during the proposal defense:

- Dissertation Format. Identify the dissertation format. If the 3-article option is chosen, outline the subject of each article (manuscript) and the journal(s) chosen for submission.
- Projected Timeline. Identify a complete timeline for the research study from submission of the IRB application(s) to graduation. Included in this timeline will be how often the student will apprise the committee members of their progress.

Review Appendix E, Dissertation Guidelines carefully for additional assistance.

Process for the Dissertation Proposal Defense

The completed dissertation proposal must be submitted to the dissertation committee. There may be multiple drafts of the proposal necessary to achieve the quality expected to progress to the proposal defense. The student primarily works with the dissertation chair on the chapters that comprise the dissertation proposal. Committee members are consulted as needed and are kept apprised of the progress of the proposal according to the agreed upon timeline. Students may ask for committee members to read sections of the proposal during its development, in order to obtain direction based on the members' areas of expertise. Once the dissertation chair determines student readiness to defend the proposal, and after an agreed upon date among all committee members, a two weeks' notice to the Graduate School is required; see below for school specific paperwork that is required. All dissertation committee members are required to be in attendance. The defense may be scheduled virtually, but video presentation is required.

The proposal defense is a formal meeting in which the student presents the proposed research, and answers questions posed by the dissertation committee members. Areas to be included in the oral presentation will be specified by the student's Dissertation Committee. The dissertation proposal must be defended orally and approved by the Dissertation Committee before submission of the Institutional Review Board application(s), see below.

The approved dissertation proposal serves as a written agreement between the student and the dissertation committee regarding the expectations, limitations, and scope of the dissertation work.

Institutional Review Board

The student must gain Institutional Review Board (IRB) approval at the home institution following successful completion of the dissertation proposal defense and prior to implementation of the dissertation research. In some instances, one or more agencies may also require IRB approval. For more information please contact the UAH IRB chair, Ann L. Bianchi Ph.D., ann.bianchi@uah.edu or the UA Member,

Dissertation

After the completion of work proposed in the dissertation proposal, the student is expected to submit the completed work as a dissertation.

The dissertation is the final milestone to be completed by a doctoral student to fulfill the objectives of the Ph.D. in Nursing Science degree. The goal of the dissertation is to engage the student in the research process. The purpose of the dissertation is to demonstrate the student's development as a scholar through implementation of the research process.

A student successfully completes the dissertation when the dissertation committee members confirm that he or she:

1. Articulates a theoretical framework that extends or advances knowledge and/or contributes to human/reality understanding of the patient care phenomenon selected for study.
2. Conducts an investigation of a research question relating to some aspect of nursing science and patient care.
3. Completes an investigation that lends itself, in part or in whole, to publication in a refereed journal.
4. Writes a scholarly dissertation and defends the dissertation.

Dissertation Format

Doctoral students, in consultation with their committee members, may choose a traditional dissertation format or the manuscript (article style) option format.

Traditional Dissertation Format

The traditional dissertation should be formatted in a standardized way, using APA (7th ed.) as a guideline. Within these three parts, the following are included:

- **Abstract:** An abstract of no more than 350 words (not counting title and author's name), with structure determined by the doctoral dissertation committee).
- **Chapter One: Background, Significance and Specific Aims.** This section should: (1) 17 Date Approved: Fall 2021 provide an introduction, significance, and purpose of the research and the specific aims of the project; (2) state the research questions to be addressed or hypotheses to be tested; and (3) provide a conceptual/theoretical framework that is clearly described.
- **Chapter Two: Review of literature.** This section should: (1) provide a review of the literature leading to the research proposal, critically evaluate existing knowledge, and specifically identify the gap(s) which the proposal is intended to address.
- **Chapter Three: Research Design and Methods.** This section should: (1) describe the research design (design, sample, variables and measures) and the procedures to be used to accomplish the specific aims of the project; (2) include any pilot work or preliminary studies related to the proposal; and (3) include how the data were collected, analyzed, and interpreted.
- **Chapter Four: Results.** Describe in detail the results of the completed data analysis. Include relevant tables and graphs to illustrate findings.
- **Chapter Five: An integrative summary of findings, strengths, limitations and implications for research and practice, and recommendations for future exploration.**

Manuscript (article style) Dissertation Format

The 3-manuscript (article-style) dissertation is formatted, as with traditional dissertations, elements of the preliminary pages, the text, and the reference matter are described.

As with traditional dissertations, the article-style dissertation must be the student's original idea resulting from research conducted while enrolled in the doctoral program. Furthermore, the article-style dissertation must contain three articles of publishable quality centered around a single scholarly focus with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework and an explanation of the work's originality and significance to the field of nursing.

The main body (text) of the article-style dissertation must include:

- An introductory chapter containing a statement of purpose, background information, a description of the articles, a description of how the articles are related (theoretical/conceptual framework), and an explanation of the unified work's originality and significance to the field of nursing.
- First article
- Second article
- Third article

- A summarizing chapter that reiterates the importance of the unified work's significance to the field of nursing, synthesizes and integrates the major findings, connects study findings to the guiding theoretical/conceptual framework, outlines the implications of the findings, discusses limitations, and provides recommendations for future research.

NOTE: At least one of the three articles must be a data-based report of the dissertation research. A data-based manuscript should include a review of the literature and use an acceptable convention for data-based reports.

The dissertation committee will provide oversight and direction for the focus of non-data-based articles. Some examples of non-data-based manuscripts are concept analysis papers, scoping reviews, systematic reviews, policy papers, clinical guidelines, or a description of a unique research methodology.

Manuscripts/articles in this type of dissertation may be published, in press, or developed but not yet submitted for journal review. The student will be the lead or sole author on each of the three articles. The inclusion of any articles that are previously published or accepted for publication requires permission from the copyright holder. Please note that not all journals will allow copyright release. It is important to discuss any previously published articles with your dissertation chair and committee members early in the dissertation process, to determine if these will be accepted as part of your dissertation. If approved by your chair and committee, it will also be important to check with the journal editor where the article was published before submitting a published manuscript in your dissertation.

Items that may be helpful to students during the dissertation phase of the Ph.D. program.

The first three chapters of the dissertation make up the proposal and are written for the proposal defense, regardless of whether proposing to complete a traditional or a 3-manuscript dissertation. However, it is expected that these three chapters may require revision prior to submission of the final dissertation.

It is important to consult with the committee chair and members throughout the dissertation process for discussion of ideas and for guidance.

Reviewing other dissertation products may be helpful as the plan develops and as the dissertation product(s) are written.

Coursework and textbooks from throughout the program can be useful in writing the chapters or papers comprising the dissertation.

The dissertation process involves independent work and can be a solitary experience. Maintaining regular contact with the committee chair and members and obtaining social support from peers in the program can help you to stay engaged and productively moving forward in the process.

Dissertation Defense: Final Oral Examination

In order to be awarded the Ph.D. degree, each student will successfully complete a final oral examination of the dissertation and submit a final version of the dissertation document, approved by the Dissertation Committee to the home institution Graduate School. The Dissertation Committee serves as the final oral examining committee.

A copy of the dissertation must be submitted to all members of the Committee at least three (3) weeks before the pre-defense meeting. The Committee then meets to decide if the document is acceptable and

defendable. When accepted, the oral final examination is scheduled. Students also are required to submit an email announcement (including dissertation title and brief abstract) to their Dissertation Chair at least three weeks prior to the scheduled defense so that faculty and students can be invited to attend the oral dissertation defense. The defense is open to the public and members of the University community.

The Committee administers the examination. A 30 - 45-minute presentation is given by the student using presentation software. Anyone attending may ask questions. After the public presentation, the audience is dismissed, and the Dissertation Committee may further question the candidate. The success of the oral defense is determined by a vote of the official committee. The decision to award the degree must be unanimous. The Dissertation Committee may request changes to the final written document, and the Dissertation Committee Chair will be responsible for assuring that the student has made the changes before final approval. The Dissertation Committee Chair notifies the ADGP and Graduate School of the student's home campus of the outcome of the oral dissertation defense. The candidate will be informed of the outcome after the oral defense. If necessary, reexamination will be held within six (6) months from the date of the defense of the first examination, and the Dissertation Committee Chair makes the required notifications about the second oral dissertation defense. The candidate may re-attempt the final oral examination once.

Report of Completion of Requirements for Doctoral Degree

An Application for Degree/Graduation must be completed and submitted by the student according to the timeline of the home institution. If students do not meet the requirements, they must reapply for the degree. The dissertation chair will report to the ADGP and the Graduate School of the student's home campus regarding the acceptance of the dissertation. Upon completion of a successful defense, faculty must complete and submit the appropriate forms, signed by all committee members and the ADGP of the student's home university.

Submission of Final Dissertation

UA home students will submit their dissertations electronically according to the instructions at <https://www.etdadmin.com/main/home?siteId=176>.

Graduate School information on Degree Requirements (p. 21).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Student progression is monitored and evaluated each semester.

Additional Academic Requirements

Each summer, however, is devoted to intensives, a time when students are required to be in residence (physically present) on either The University of Alabama or University of Alabama in Huntsville campus. During this week, students meet with their major advisors and advisory committees, attend scheduled enrichment activities, and interact within and among student cohorts to form important bonds for social support. The schedule for intensives week is developed by the Ph.D. Program Oversight Committee with feedback from students and faculty. The schedule is sent

to students at least 2 months in advance to allow students to make travel plans.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Leave of Absence Policy

Under compelling circumstances beyond the student's control, a graduate student may request that the department petition the Graduate School with the rationale for granting a leave of absence. If granted by the Graduate School, a leave of absence will cover one or more upcoming semesters rather than any prior semester(s). A leave of absence is not a method of avoiding continuous registration requirements, and it does not lengthen the time limit for degree completion. When a student returns from a leave of absence, the Graduate School must be notified and will work with the department and student to determine the number of semesters remaining on the time limit and the degree requirements that remain.

Process for Requesting a Leave of Absence

- The student contacts the academic advisor at his/her home campus to request a leave of absence (LOA).
- The academic advisor discusses the LOA policy, time limits, and revised POS.
- The academic advisor informs the Ph.D. Coordinator or Associate Dean at home campus and joint campus.
- The academic advisor sends the LOA form to the student.
- The student returns the completed and signed form to the academic advisor, who forwards it to the Graduate school for a decision.
- Once a decision is received from the Graduate School, the academic advisor at the home campus informs the student, the advisor at the other campus and the coordinators of the decision and updates information in the database or tracking system.

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Graduate School information on Grades and Academic Standing (p. 28).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

Nursing, MSN

Since its inception, the graduate program has sought out excellent nurses in pursuit of advanced nursing education. Baccalaureate-prepared nurses have the option of multiple concentrations in the Master's of Science in Nursing (MSN) program: Nurse Executive, Nurse Educator,

Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and Dual Psychiatric Mental Health and Family Nurse Practitioner.

In addition, there is a postgraduate certificate program with Family Nurse Practitioner and Psychiatric Mental Health Nurse Practitioner options. For the registered nurse (RN) who holds an associate degree in nursing and meets the required admission criteria, we offer an RN to BSN program with a pathway to the MSN program.

Admissions

Admission requirements are consistent with those of the Graduate School. Applicants for the MSN Program will be considered on a competitive basis. Nurses who are interested in the MSN are encouraged to contact the Director of Graduate Student Services.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Baccalaureate degree in nursing from a school of nursing that is both regionally and CCNE or CNEA accredited.
- Current unencumbered RN licensure in the United States.
- Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

Master's of Science in Nursing Program: Nurse Practitioner Concentrations

NOTE: Click Here to view the states from which the College of Nursing currently accepts applications for admission.

The Capstone College of Nursing (CCN) offers the online Master of Science in Nursing (MSN) degree with specialization in the Dual Nurse Practitioner (NP) Concentration in Psychiatric Mental Health and Family Nurse Practitioner. This dual NP concentration prepares students to sit for both the Psychiatric-Mental Health Nurse Practitioner (PMHNP) – across the lifespan and the Family Nurse Practitioner (FNP) national board certification exams. Single-role concentrations in these NP specialties are also offered. The FNP concentration prepares students for certification as an FNP, and the PMHNP concentration prepares students for certification as a PMHNP – across the lifespan. Students complete coursework online, attend a virtual orientation, and a clinical intensive before beginning clinical. Students are expected to secure their clinical sites and preceptors to complete their clinical courses. Once identified, CCN will assist students in securing a Clinical Affiliation Agreement (legal contract) with the clinical site.

Master's of Science in Nursing Program: Nurse Educator Concentration

NOTE: Click Here [to view the states from which the College of Nursing currently accepts applications for admission.](#)

The Master's of Science in Nursing with Nurse Educator concentration (MSN-ED) prepares bachelors prepared nurses with a passion for teaching to prepare and develop new nurses. Nurse educators have the flexibility to adapt curriculum and teaching methods in response to innovation in nursing science and ongoing changes in the practice environment. Given the increasing shortage of nurse faculty, there is a demand for individuals needed to teach in schools of nursing, hospitals, public health agencies, and other settings.

Master's of Science in Nursing: Nurse Executive

Click here [to view the states from which the Capstone College of Nursing currently accepts applications for admission.](#)

The Capstone College of Nursing (CCN) offers the distance-based Master of Science in Nursing (MSN) with all courses offered online. The Nurse Executive (NE) program incorporates the AACN MSN Essentials and the AONE Nurse Executive Competencies to provide a comprehensive educational experience for the student.

Nurse Executives are licensed Registered Nurses (RNs) who have formal administrative and managerial positions within health care organizations. They oversee day-to-day and long-term operations for the provision of nursing care. These responsibilities may include managing budgets and human resources, coordinating the distribution of material assets, managing and developing strategic plans, and providing professional leadership. Nursing administration (NE) and management covers a diverse field of formal leadership from those who supervise individual units within a medical facility as front-line managers to higher-level nurse Executives and executives who oversee nursing operations for an entire hospital or healthcare organization.

Front-line nurse managers typically hold a bachelor's degree in addition to an RN license. A Master of Science in Nursing (MSN) program and/or programs in business and healthcare administration may be necessary for career advancement in nursing management. The NE program uniquely prepares future nurse executives for the challenges of providing cost-effective high-quality patient care outcomes in a chaotic health care environment.

The MSN program of study for NE is offered as both full-time and part-time programs of study, with the part-time program being more suitable for working professionals. The NE program has a significant clinical/ executive component to support learning objectives. Overall, the program focuses on navigating the complexities of the American healthcare system, the challenges of personnel management, quality improvement, budgeting, and other resources in healthcare organizations, as well as professional political advocacy for nursing and quality patient care.

Note: This program requires a **clinical/administration immersion** component, and it is the student's responsibility to identify a site with an appropriate clinical facilitator. Prior to the clinical/ administrative immersion, the student will start the process of obtaining a CCN Letter of Agreement (LOA) or a Clinical Affiliation Contract with the agency. **No clinical practice will take place until the student has been notified by CCN of approval.**

Curricular Requirements

The MSN program with a Nurse Executive concentration can be completed in one-two years.

Transfer Requirements

Graduate School information on Transfer Credit. (p. 15)

Clinical Hours

Clinical hours are completed under the supervision of advanced practice providers specific to each specialty concentration (FNP, PMHNP, ED or NE)

Graduate Student Clinical Placements

1. The Capstone College of Nursing (CCN) will initiate a Clinical Affiliation Agreement (CAA) for all clinical experiences involving direct or indirect patient care by graduate students.
2. Students will not be permitted to start clinical experiences involving direct or indirect patient care until a CAA is fully executed.
3. Faculty are responsible for sending written notification to the student that he/she is approved to begin the clinical experience.

Thesis (Optional)

A thesis is an original research project conducted by one student and directed by a graduate committee. The student must register for a minimum of six semester hours of thesis credit and successfully complete the thesis to complete the program. An oral public defense of the thesis is required. The thesis must conform to the guidelines of the Graduate School.

Comprehensive Exams

MSN students do not complete comprehensive exams. Students must complete all of their clinical coursework and clinical hours to graduate.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 15).

Student Progression Requirement

Student progression is monitored and evaluated each semester.

Additional Academic Requirements

The MSN will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework
- NP Student must participate in orientation and on-campus intensive if required by concentration.

Annual Graduate Student Background Checks and Drug Screening

1. Students accepted to the graduate nursing programs are required to have an annual background screen and drug screen.
2. Students accepted to the graduate nursing programs are required to pass a background screen and have a negative drug screen.
3. The College of Nursing must certify to clinical agencies where students practice that each student has had an acceptable background screen and negative drug screen.
4. The background screen and drug testing screen will be conducted by a qualified agency using established methods and procedures. Confidentiality of the student will be protected. All costs associated with screenings are the responsibility of the student.
5. Initial acceptance to graduate nursing courses will be withdrawn for students who have a positive drug screen.
6. A student who has a positive drug screen while taking graduate nursing courses will follow the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy. Any readmission consideration will be based on the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy.
7. Initial acceptance to graduate nursing courses will be withdrawn for students who have been convicted of or have pending a charge that would not be acceptable for clinical practice.
8. A student whose acceptance to graduate nursing courses is withdrawn or is dismissed from the College of Nursing due to findings from a background screen will be considered for readmission on a case-by-case basis depending upon the situation.

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted before the removal of the initial registration hold and during progression through the program. Failure to comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN, DNP, and Post-Graduate programs must upload the following into the document management system:

1. Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
2. Completion of the program on OSHA Standards.
3. Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
4. Proof of Health Insurance.
5. Graduate Nursing Student Health & Physical Exam Form signed by a Certified Registered Nurse Practitioner (CRNP), DO, or MD.
6. Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray completed within the month immediately prior to document submission.
7. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

All graduate students (e.g., MSN, DNP, and Post-Graduate programs) must upload the following into the document management system:

1. Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN, PG, and DNP programs must:

1. Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - a. Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - b. Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.
2. Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
3. No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student Annual Influenza Vaccine Form. Exceptions for allergies only. **This vaccine cannot be declined.**
4. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

Annually, all graduate students, EXCEPT EdD and PhD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Upon admission, students must upload into the document management system proof of immunization or a titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form for the vaccines listed below. Vaccination or titer testing are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE

DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines. Failure to submit documentation of immunization will result in the inability to continue attendance and/or progression courses in the college of nursing.

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. **FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.**

Tetanus Vaccination

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider.

Measles, Mumps & Rubella (MMR) Vaccine

Upon admission, students must upload into the document management system proof of immunization for MMR or an MMR titer that shows adequate antibody protection as noted on the Immunization Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the MMR series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 MMR Booster vaccine (administered after titer).

Varicella (Chicken Pox) Vaccine

Upon admission, students must upload into the document management system proof of immunization for Varicella or a Varicella titer that shows adequate antibody protection as noted on the Immunization Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the Varicella series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 Varicella Booster vaccine (administered after titer).

Psychiatric Mental Health Nurse Practitioner Certificate

Click Here to view the states from which the College of Nursing currently accepts applications for admission.

The nurse practitioner (NP) Post-graduate Certificate program builds on the graduate level nursing competencies and knowledge base. Nurses who are already prepared at either the master's or doctorate level for other roles may apply for the post-graduate certificate program with advanced specialization as a Psychiatric Mental Health Nurse Practitioner (PMHNP). The PMHNP concentration prepares students for certification as a PMHNP across the lifespan. Students in the Post-graduate Certificate program will enroll in existing PMHNP population-focused courses, but they will not be required to complete master's graduate nursing core courses.

Admissions

Applicants for the nurse practitioner postgraduate certificate will be considered on a competitive basis. Nurses who are interested in the nurse practitioner postgraduate certificate are encouraged to contact the Capstone College of Nursing (CCN) Coordinator of Graduate Student Services.

Click Here to view the states from which the College of Nursing currently accepts applications for admission.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- Have a Baccalaureate degree in nursing from a school of nursing that is both regionally, and CCNE or CNEA accredited.
- Reside and hold a current unencumbered RN licensure in an approved state.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted before the removal of the initial registration hold and during progression through the program. Failure to comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN, DNP, and Post-Graduate programs must upload the following into the document management system:

1. Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
2. Completion of the program on OSHA Standards.
3. Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
4. Proof of Health Insurance.
5. Graduate Nursing Student Health & Physical Exam Form signed by a Certified Registered Nurse Practitioner (CRNP), DO, or MD.
6. Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray completed within the month immediately prior to document submission.
7. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

All graduate students (e.g., MSN, DNP, and Post-Graduate programs) must upload the following into the document management system:

1. Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN, DNP and Post-Graduate Certificate programs must:

1. Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - a. Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - b. Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.
2. Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
3. No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student Annual Influenza Vaccine Form. Exceptions for allergies only. **This vaccine cannot be declined.**
4. Completion of HIPAA Training in the UA Learning Management System that can be accessed through the MyBama Student Tab.

Annually, all graduate students, EXCEPT EdD and PhD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Upon admission, students must upload into the document management system proof of immunization or a titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form for the vaccines listed below. Vaccination or titer testing are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO

ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines. Failure to submit documentation of immunization will result in the inability to continue attendance and/or progression courses in the college of nursing.

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. **FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.**

Tetanus Vaccination

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider. Exceptions for allergies only. **This vaccine cannot be declined.**

Measles, Mumps & Rubella (MMR) Vaccine

Upon admission, students must upload into the document management system proof of immunization for MMR or an MMR titer that shows adequate antibody protection as noted on the Immunization Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the MMR series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 MMR Booster vaccine (administered after titer).

Varicella (Chicken Pox) Vaccine

Upon admission, students must upload into the document management system proof of immunization for Varicella or a Varicella titer that shows adequate antibody protection as noted on the Immunization

Form. However, students can either submit using the form, an official immunization records or other official documentation from their provider.

If a student has not already completed the Varicella series or cannot provide history of vaccination documentation to satisfy this requirement, adherence to one of the following is required:

- 2 Vaccinations OR
- Positive antibody titer (lab report required)

If the titer submitted was negative or equivocal, the student will need to receive 1 Varicella Booster vaccine (administered after titer).

Academic Misconduct Information

School of Social Work

Degree Programs

Social Work, MSW (p. 789)

The School of Social Work offers a Master of Social Work and two coordinated degree programs. The MSW/MPH is offered in coordination with UAB Public Health. The MSW/JD is offered in coordination with The University of Alabama Law School. More information can be found at the Social Work, MSW page (link above).

Social Work, PhD (p. 794)

The PhD program may be pursued concurrently with the MSW program.

Social Work, DSW (p. 782)

The School of Social Work offers a Doctor of Social Work program.

Students will have an opportunity to apply for practicum in the MSW Program. We place students using a holistic perspective. Not only do we consider input from students, but we also consult with faculty, advisors, and the Experiential Programs Committee.

Most students have many questions about practicum. The Office of Experiential Programs is always available to answer questions you may have. If there is anything that is unclear or if you have specific questions regarding your situation, do not hesitate to contact them.

Additional Available Practicum Placement Opportunities:

- Washington, D.C Program
- International Practicum Placement Program

Courses are subject to modification without advance notice.

Admission to 500-level courses is limited to graduate social work students only, unless consent of the instructor and the assistant dean is obtained. See the School of Social Work Master's Degree Program Student Handbook for additional course eligibility requirements.

SW500 Social Welfare Policy

Hours 3

Overview of the evolution of social welfare policies and services, and of how social problems affect societal groups. Includes examination of the tools and approaches that social workers might use in analysis and policy formulation.

SW501 Social Welfare Advanced Policy Analysis

Hours 3

The focus of this course is on social welfare policy analysis with particular emphasis on the influence of economic and political issues. This course emphasizes comparative research at both state and national levels.

Prerequisite(s): SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

Social Work, D.S.W.

Mission Statement of the DSW Program

The DSW Program at The University of Alabama is designed to increase specialization, independence, and leadership of social workers across systems and agencies in underserved communities. The program prepares advanced practitioners to lead efforts in promoting social and economic justice through service, advocacy, teaching, and research.

DSW Program

The DSW program is a part-time, primarily online, three-year program designed for experienced professional social workers seeking to advance their knowledge and skills. The program offers two specializations: **Advanced Clinical Practice** and **Organizational Leadership**. Students complete 45 credit hours of coursework, 27 credit hours of which are core courses and 18 credit hours of concentration courses. Students enroll in six credit hours each semester, Fall, Spring, and Summer. Courses are mostly asynchronous with several synchronous evening sessions required per course. Synchronous session dates are posted at the time of registration, two months before the start of each semester. The program is designed to be completed in three years.

DSW Program Curriculum

The DSW program is a part-time, primarily online, three-year program designed for experienced professional social workers seeking to advance their knowledge and skills. Students complete 45 credit hours of coursework, 18 of which are completed in the first year of study, 18 credits in the concentration year, and 9 capstone credits in the third year.

Students take six credit hours each semester, Fall, Spring, and Summer. Courses are completed asynchronously with several synchronous evening sessions per semester. Synchronous session dates are posted at the time of registration, two months before the start of each semester. Students select their concentration at the start of their studies.

Learning Outcomes for the DSW Program

Upon completing the DSW Program, graduates will be able to:

- Demonstrate advanced social work practice skills in assessment, intervention and supervision at the micro, mezzo, and/or macro levels.
- Play an independent/leadership role in integrating advanced knowledge and theory on the social, economic, political, and philosophical conditions into health and human service delivery.
- Integrate knowledge about research methodology with social work practice knowledge to develop and lead strategies for continued evidence-based practice, practice evaluation, and scientific knowledge-building.
- To disseminate complex information about social work evidence, practice skills, scholarship, and interventions clearly and creatively to professional and academic audiences in written and oral formats.
- Identify, evaluate, and implement innovative and cutting-edge strategies to address complex social and health conditions.
- Lead teams to develop and implement social work advocacy and policy practice strategies to advanced clinical practice or organizational leadership, especially within the context of services for vulnerable and underserved communities.
- Independently develop, implement, and evaluate innovative interventions into practice that are theoretically and evidence-based.

Graduates of the Advanced Clinical Practice concentration will be able to:

- Demonstrate knowledge about new and advanced therapies and clinical assessment techniques with disadvantaged populations.
- Articulate the roles that institutional and societal discrimination have impacted clinical issues affecting disadvantaged populations.

Graduates of the Organizational Leadership concentration will be able to:

- Leverage evidence and human and organizational resources to design and implement new and innovative services for complex, disadvantaged client populations.
- Describe and implement ethical, effective, and innovative approaches to developing and managing community and organizational resources.

The Goals of the DSW Program

The programmatic goals are:

- To provide a rich, supportive environment that enables a diverse group of students to pursue and attain their academic, professional, clinical and/or leadership goals.
- To prepare students to integrate theory, evidence, and critical thought to develop innovative solutions for complex challenging issues experienced by agencies and populations at the local, regional, national, and/or global levels.
- To prepare graduates to be innovative and successful educators of future social workers.
- To prepare practitioners to use social work research methodologies to evaluate practice and translate evidence-based interventions into practice settings.

- To prepare advanced practitioner-scholars to incorporate theory, research, practice, and policy to contribute to existing knowledge on social work practice and advance social justice.
- To develop stewards of the social work profession within interprofessional settings who apply and enforce ethical standards and address ethical dilemmas in health and social service systems.
- To prepare advanced social workers to be effective and ethical managers within clinical, administrative, and/or community settings.
- To prepare students to communicate evidence-based social work knowledge through teaching, scholarship, and professional writing.

Admissions

Admission to the DSW Program is determined by a committee of faculty members within the School of Social Work, who will assess the entire composite of information gained from a variety of sources. Each applicant must meet the following criteria and/or provide in their application:

- An MSW degree from a CSWE-accredited institution (there are no exceptions to this requirement).
- A grade-point average (GPA) of at least 3.0 on a 4.0 scale (overall) in your MSW program.
- Three (3) years of post-MSW social work practice experience (there are no exceptions to this requirement).
- Currently practicing in the social work field.
- Three letters of recommendation are required for all applicants.
 - At least two of these letters should come from professional sources (preferably from social workers, but may come from professionals in related disciplines).
 - One reference may be from an academic source (e.g. former professor or department head).
 - Applicants may choose to have all three references come from professional sources if an academic reference is not available.
 - All references are due/uploaded by the deadline for an application to be complete and considered.
- Statement of Purpose: Instructions on what to include in the statement can be found [here](#).
- Current resume or CV.
- Transcripts: In addition to the Graduate School's requirements:
 - Applicants should note that if they attended a community college where they completed 15 or more credit hours and later transferred to a different institution to complete their undergraduate degree, the graduate school requires that transcripts from both the community college and undergraduate degree-awarding institution be included with the application.
 - All unofficial transcripts must be uploaded by the deadline for an application to be complete and considered.
- Applicants may be asked to complete an interview with a faculty member if there are questions regarding their application.
- For Graduate School Admission requirements and information, please refer to their website.

International Applicants

- The university will no longer accept applications to UA online programs from international applicants who are residing outside of the US.

- International applicants who are in the US on a valid visa type (for example, H-1B), will not be impacted.
- Please make sure that your transcript includes a grading scheme, especially if your university does not use a letter-based (e.g. A, A-, B) grading scheme.
- For applicants from countries other than Canada, you will be required to have your transcripts undergo the International Social Work Degree Recognition and Evaluation Service by the Council on Social Work Education. This must be completed before the deadline.
- Graduate School requirements for admission of International applicants can be found here.

Note Regarding Social Work Licenses

The DSW coursework demands the practical application of course content in a real-world setting, making a social work license mandatory for applicants seeking admission to the Advanced Clinical Practice specialization. Applicants to the Organizational Leadership specialization are not required to hold a social work license.

Application Review and Admissions Decisions

Applications are initially evaluated by the Graduate School for completion. Only those applications that are complete and meet the Graduate School requirements are forwarded to the School of Social Work for review. (See the Admissions Criteria section of this catalog for more information.) A committee of social work faculty members reviews the applications and makes final admission decisions. The DSW Program Director does not evaluate applications nor make admissions decisions. Admissions decisions are not made until after the application deadline. Applicants will be sent decision letters approximately 4 weeks after the application deadline. The acceptance letter from the School of Social Work will contain important information regarding fall registration and the required on-campus orientation. Students admitted to the program are required to participate in an on-campus orientation. Failure to register for fall courses or attend the orientation may result in the acceptance becoming void.

Degree Requirements

The DSW degree requires a total of 45 credit hours, which includes core courses and specialization courses. Coursework is typically completed during the first two years of the program. Additional degree requirements, e.g., comprehensive paper, capstone proposal, capstone project and defense, orientation, and two summer residencies are described below.

DSW Core Courses		Hours
SW 700	Adv Theories on Oppression	3
SW 701	Research for Practice I	3
SW 702	Research for Practice II	3
SW 705	Adv Advocacy Policy Practice	3
SW 706	Teaching Social Work Practice	3
SW 750	Intro to Capstone Project	1
SW 751	Capstone Prep Ind Study	2
SW 799	Capstone Project	9
Credit Hours Subtotal:		27
Specialization Courses (see Concentrations Below)		
Specialization Required Courses		12
Specialization Elective Courses		6
Credit Hours Subtotal:		18
Total Hours		45

Specializations

Specializations are a focused area of study within the broader DSW curriculum. They are designed for the student to gain expertise in a specific subfield of social work practice. The DSW program offers specialization in two areas of practice: Advanced Clinical Practice and Organizational Leadership. Students must declare a specialization upon starting the DSW Program and complete the specialization requirements.

It is possible for students to change specializations after beginning the program, though this may result in a delay in degree completion. Although the specialization year is completed during the student's second year of study, students are introduced to the first course in their declared specialization in the second semester of their first year. If a student wishes to change their specialization after completing this course, they must still complete the first course of their newly declared specialization.

Specialization Requirements

Students will be required to complete 12 credit hours (four courses) in their declared specialization and 6 credit hours (two courses) of specialization electives for a total of 18 credit hours. Students will also be required to complete two specialization electives (6 credit hours).

SW 723 Complementary & Alt Therapies and SW 724 Social Work and Emotion Trauma are offered as electives in the Advanced Clinical Practice specialization, and SW 733 Human Serv Finance Budgeting and SW 734 Hum Res Mgt Health Pub Nonprof are offered as electives in the Organizational Leadership specialization. However, students may take different courses to satisfy their elective requirements.

- Students may take courses in the other program concentration to satisfy their electives (e.g., an Organizational Leadership student takes SW 703 Neuroscience in Clinical Pract in Social Work as their elective; an Advanced Clinical Practice Student takes SW 734 Hum Res Mgt Health Pub Nonprof).
- Students may take one MSW-level course for their elective as long as it isn't a course they have taken before in their own MSW curriculum.
- Students may also take one 500-level or higher course outside of the School of Social Work in other programs across campus.

Students will need to seek the approval of the Capstone Project Committee chair or the DSW Program Director if they have not selected a Chair for their committee before taking courses outside of the School of Social Work to satisfy their electives.

Academic Advising and Capstone Project Committee Formation

Upon entering the DSW Program, students are academically advised by the DSW Program Director. The DSW Program Director will serve as the student's academic advisor until the student identifies a Capstone Project Committee Chair and a second committee member by the end of the Fall semester of their second year. If before selecting a Chair, the student has established a mentoring relationship with a faculty member who is doing research related to their area of practice, the academic advisor can be formally changed. This advisor could also become the Chair of the student's Capstone Project Committee, but it is not a requirement. Students are encouraged to seek clarification as to the extent of the mentoring relationship.

When the student begins work on the Comprehensive Paper and the Capstone Project proposal, the official Chair of the student's Capstone Committee will assume primary responsibility, along with the second committee member, for further technical and professional assistance and guidance.

Students are encouraged to discuss their ideas for a Capstone Project with faculty or their academic advisor (the DSW Program Director) early in their DSW studies, but they should not feel pressure to select a chair until they are ready to begin writing their Comprehensive Paper in the spring of their second year of studies. Students should consider how their individual course assignments may focus on topics that can inform or contribute to their Capstone Project, but this is also not a requirement.

Comprehensive Paper

Upon completion of the fall semester of the specialization coursework (2nd year), students will begin to write a comprehensive paper. The paper will cover the specialization focus areas (Advanced Clinical Practice or Organizational Leadership) the student declared at enrollment. Comprehensive papers must be completed under the guidance and approval of their Capstone Project Committee before applying for candidacy.

Comprehensive Paper Requirements

A Comprehensive Paper is a form of assessment that demonstrates a student's understanding of a comprehensive body of knowledge within their specialization area. Students select one of three options for the Comprehensive Paper.

They serve several purposes:

1. It allows the student to demonstrate the acquisition of knowledge of the latest published research in the area of their specialization;
2. It allows the student to demonstrate their familiarity with research/evaluation methods learned in their coursework and residencies.
3. It allows the student to demonstrate that they possess the critical and analytic skills and knowledge needed to undergo a Capstone Project.

There are three options for the Comprehensive Paper. The student must select one. The student should select the option that best fits their educational, capstone, and career goals. Full descriptions of the three Comprehensive Paper options can be found in the DSW Program Handbook.

In preparation for their Comprehensive Paper, students must identify a Chair for their Capstone Project Committee (a chair and second committee member) before the end of the spring semester during their second year of study. Ideally, students will identify a second member of their committee at the same time, though students may require more time to identify the second member. This is the committee that will review and approve the students' Comprehensive Papers and Capstone Projects.

Students should strive to have their Comprehensive Paper approved by the end of the summer of their second year. However, students can submit their paper to their Capstone Committee Chair for review and approval at any time they feel they are ready for a review by their committee.

Students should establish a communication plan with the Chair of their committee, e.g., how often to meet, turnaround time, flow of communication with the second committee member, etc. Students should understand that they may have to submit several drafts of the Comprehensive Paper, have multiple meetings with committee members, receive feedback from the committee, and incorporate requested edits to the paper before their committee gives the paper their final approval.

Comprehensive paper approval requires the signature of both members of their student's committee. Once a student receives approval, the Chair will contact the DSW Program Director, who will have the Comprehensive Paper Approval Form circulated for signatures.

Admission to Candidacy Requirements

Students who successfully pass their Comprehensive Paper and have completed and/or are registered for all of their required non-Capstone Project coursework may advance to candidacy. The DSW Program Director or DSW Program Assistant will initiate this form, which will be submitted to the UA Graduate School.

Capstone Project

All students will be required to complete and defend a Capstone Project to fulfill graduation requirements for the DSW Degree. Students must have submitted an approved comprehensive paper and have a signed Comprehensive Paper Approval form and must have been admitted to candidacy before beginning the Capstone Project. Capstone Projects will consist of three parts: 1) a proposal, 2) a proposal defense, and 3) a final project defense.

The Capstone Project Proposal

Students will start the Capstone Project Proposal in the fall semester of the second year in SW 750 – Introduction to the Capstone Project Course (1 credit hour). Students will complete the Capstone Proposal in SW 751 Capstone Proposal Independent Study Proposal course (2-3 hours) during the summer of the second year. Students must successfully defend the Capstone Proposal to register for SW 799 Capstone Project hours. If a student does not successfully defend their proposal during the summer semester, they must reenroll in SW 751 in the fall of the third year until they defend their capstone proposal.

The Capstone Project

All students will be required to complete and defend a Capstone Project to fulfill graduation requirements for the DSW Degree. Students must register for at least 9 credit hours of SW 799 Capstone Project. Students must successfully defend the Capstone Project to fulfill the DSW degree requirements. Students are encouraged to meet with their Capstone committee throughout each phase of the Capstone process.

Capstone Project Requirements

All students are required to complete and defend a final Capstone Project to fulfill all of the requirements for obtaining the DSW Program at the University of Alabama. The Capstone Project may be initiated during the third year of the program and will require you to demonstrate advanced knowledge and skills in evidence-based social work practice, theory, and research/evaluation.

The topics and scope of Capstone Projects will vary, due to the varying social work practice settings where DSW students currently practice. In general, the Capstone Project is not designed to be a dissertation that demonstrates a candidate's ability to conduct independent research that will contribute to the academic research literature. Instead, a Capstone Project is designed to address real-world problems or challenges faced by experienced professional social workers in their field setting.

Students have three options for the Capstone Project and must choose one. Full descriptions of the three Capstone Project options can be found in the DSW Program Handbook. Note that none of these options should be compared to a Ph.D. dissertation, where the primary goals and assessment for these projects focus on advanced research methodologies. The Capstone Project allows the DSW student to demonstrate an understanding of a range of research methods to effectively contribute to the field of social work practice, e.g., program development, program evaluation, policy analysis, action research, and continuous improvement.

At the conclusion of their Capstone Project, the student will have to submit a final written report and undergo either an on-campus or virtual capstone defense of their project. The student must use the DSW Capstone Project Report Template for final approval. All virtual presentations must comply with University Graduate School policy (p. 21).

Capstone Project approval requires the signature of both members of the Capstone Project committee. Approval may be obtained after the student successfully passes their capstone project. Once the student receives approval from their committee, the Chair will contact the DSW Program Director, who will have the Capstone Approval Form circulated for signatures. Students who choose to publish a peer-reviewed article for their Capstone Project must also include the Capstone Project Authorship Contribution Form. Final versions of the Capstone Project Report must be submitted to the DSW Program Director before the Graduate School deadline for graduation in any given semester. These deadlines can be found here: <https://graduate.ua.edu/current-students/student-deadlines/>

Ideally, students will have their final Capstone Project Report approved by the end of the summer semester of their third year. Though the timeline for students to successfully pass their Capstone Project will vary slightly from student to student, students are cautioned that the DSW program curriculum is designed to be completed as a three-year program and it is not advisable to attempt to complete the requirements ahead of schedule.

Additional Academic Requirement

Summer Residencies

Due to the fact that the DSW program is primarily a distance program, there is no residency requirement for enrolled students to complete their coursework. However, during the summers in years 1 and 2, DSW students must attend on-campus residency programs. These residencies will last 4 days in year 1 and 5 days in year 2.

During residencies, students will travel to campus and attend workshops and trainings each day. The workshops will supplement the content learned in courses and also include opportunities to meet with faculty in person for feedback on coursework and/or support in advancing through the DSW program.

Attendance for On-campus and Synchronous Activities

DSW students enrolled in the program **must** make arrangements to participate in the on-campus activities that are planned as part of the program, such as the on-campus orientation and annual residency retreats. Students **must** also participate in all synchronous activities required by their classes. Failure to do so may result in termination from the program. Excused absences for on-campus requirements will only be granted in extreme circumstances. Such cases include:

- Significant medical condition experienced by the student and/or immediate family member.
- Death of an immediate family member.
- Required military service.
- Unexpected travel delays or cancellations when using public transit (Planes, trains, and bus).

Note that documentation will be required for an excused absence. In some cases, students may be asked to make up assignments that were missed during the on-campus content.

Requirement for Continuing Social Work Practice

Students are expected to be actively practicing social work throughout their time in the DSW Program, either through paid employment or volunteer work. The practice setting for students is not provided by the School of Social Work Field Office and students are expected to meet this requirement on their own.

Advanced Clinical Practice Concentration		Hours
SW 703	Neuroscience in Clinical Pract	3
SW 720	Clinical Supervision Ethics	3
SW 721	Cognitive Behavioral Therapy	3
SW 722	Assess Diagn Clin Prct	3

Credit Hours Subtotal:		18
DSW Core (see above)		27
Total Hours		45

Organizational Leadership concentration		Hours
SW 704	Org Leadership Theory Practice	3
SW 730	Lead Org Change	3
SW 731	Lead Human Serv Dev	3
SW 732	Ethics Comm Org Lead	3
SW 733	Human Serv Finance Budgeting	3
SW 734	Hum Res Mgt Health Pub Nonprof	3
Credit Hours Subtotal:		18
DSW Core (see above)		27
Total Hours		45

Transfer Credit

Requirements for Transfer Credits

Students who have completed doctoral coursework at other universities may request that a portion of their previously-earned credits be transferred towards their completion of the DSW degree at UA. Evaluation of credit for transfer will not officially be determined until the student is enrolled in the UA Graduate School and the UA School of Social Work. Acceptance of credits requires the approval of the School of Social Work and the UA Graduate School. The Graduate School has policies for transfer credits. (p. 21)

Requests for transfer credits will be evaluated on a case-by-case basis and must conform to the guidelines established by the DSW Program Committee in addition to Graduate School requirements:

- Credits should be from another doctoral degree program (PhD, EdD, DSW).
- Coursework that does not overlap with or duplicate required courses if the DSW curriculum may generally be accepted as transfer credits for electives.
- Requests to transfer credits that would replace required DSW courses will receive more scrutiny to make sure they align appropriately with required courses.
- Since the DSW Program allows students to take up to one MSW-level course as an elective, up to 3 credits of master's level coursework will be considered as long as they are not credits earned for the MSW degree that students are required to have to be eligible for the DSW Program. It must be coursework that was taken in addition to the required master's degree.

Transfer Credit

The following process has been established for reviewing and approving transfer of credits:

- Students must initiate a request for transfer credits using the Graduate School form.
- The student must also submit the syllabus for each course transfer request directly to the DSW Program Director for review. Transfer requests without a course syllabus will not be approved.
- The Graduate School reviews the student's initial request and forwards the request to the DSW Program Director if it meets the Graduate School's requirements.
- The DSW Program Director will approve transfer credits that clearly follow the guidelines outlined above. Any request that is unclear whether it meets these guidelines will be reviewed by the DSW Program Committee.
- Transfer credits that meet the DSW Program guidelines for replacing elective courses will be approved by the DSW Program Director, with consultation of the DSW Program Committee, as needed. Requests for transfer credits that would replace required courses for the program will be reviewed and approved by the DSW Program Committee.
- The DSW Program Director or DSW program assistant will initiate the final approval form.

Students are cautioned that the DSW Program curriculum is designed so that the work completed in its courses contribute to their Comprehensive Paper and Capstone Project. Therefore, transferring credits to replace DSW courses could possibly delay student progress on those requirements. Students are strongly recommended to discuss transferring credits with their advisor and/or the DSW Program Director.

Comprehensive Paper Requirement

To move forward to working on the Capstone Project, you are required to successfully complete a Comprehensive Paper assignment. There are a number of purposes that the Comprehensive Paper serves:

1. It allows you to demonstrate the advanced social work knowledge and research/evaluation methods learned in your coursework and residencies.
2. It allows you to demonstrate that you have acquired the skills and knowledge needed to complete your Capstone Project.
3. Its format serves as the design for the final Capstone Project.

There are three options for the Comprehensive Paper. You must select one. You should select the option that best fits in with your educational, capstone, and career goals. Full descriptions of the three Comprehensive Paper options can be found in the DSW Program Handbook.

To prepare for their Comprehensive Paper, students must identify a Chair for their Capstone Project Committee before the end of spring semester during their second year. Ideally, students will identify a second member of their committee at the same time, though students may require more time to identify the second member during the summer of their second year. This is the committee that will review and approve students' Comprehensive Papers and Capstone Projects.

You should strive to have your Comprehensive Paper approved by the end of the summer semester of your second year so you can start their Capstone Project at the beginning of your third year. However, you can submit your paper for review and approval at any time before this point if you feel that your Comprehensive Paper is ready for review. If more time

is needed, you can submit your paper after your second summer, though this may delay the start of your Capstone project.

You may have to submit several drafts of the Comprehensive Paper, have multiple meetings with committee members, receive feedback from the committee, and incorporate requested edits to the paper before it is deemed successfully approved. When the members are prepared to approve the Comprehensive Paper, the student should meet with the committee for additional feedback and support in moving forward. You should submit drafts first to your chair before submitting them to the second member of your committee for review.

Comprehensive paper approval requires the signature of both members of their committee. Once a student receives approval, the advisor will contact the DSW Program Director, who will have the Comprehensive Paper Approval Form circulated for signatures. Ideally, students will have their paper approved by the end of summer semester their second year, though the timeline for students to successfully pass their Comprehensive Papers will vary from student to student. Some students may successfully complete their papers before the summer of their second year and it is also common for students to require additional time to successfully pass their Comprehensive Paper.

Capstone Project

You are required to complete a final Capstone Project in order to fulfill all of the requirements for obtaining the DSW Program at the University of Alabama. This Capstone Project may be initiated during the third year of the program and will require you to demonstrate advanced knowledge and skills (depending on the scope of the project) in evidence-based social work practice, theory, and research/evaluation.

The topics and scope of Capstone Projects will vary, due to the varying social work practice settings where DSW students currently practice within. In general, the Capstone Project is not designed to be a dissertation.

You are encouraged early in your DSW studies to discuss your ideas for the Capstone Project with faculty and the DSW Program Director. Also, you should consider how your individual course assignments may focus on topics that can inform or contribute to your Capstone Project.

You have three options for the Capstone Project and must choose one. Full descriptions of the three Capstone Project options can be found in the DSW Program Handbook. Note that none of these options should be compared to a PhD dissertation, where the primary goals and assessment for these projects focus on advanced research methodologies. While DSW students must learn and demonstrate an understanding of research and evaluation methods, the Capstone Project reflects an intersection between advanced practice skills and research methodologies.

At the conclusion of their Capstone Project, you will have to submit a final written report and complete either an on-campus or virtual defense presentation of your project. You must use the DSW Capstone Project Report Template for final approval. All virtual presentations must comply with University Graduate School policy (p. 21).

Capstone Project approval requires the signature of both members of the Capstone Project committee. Approval may be obtained after you successfully complete the defense presentation. Once you receive approval, your advisor will contact the DSW Program Director, who will have the Capstone Approval Form circulated for signatures. Students who choose to publish a peer-reviewed article for their Capstone Project must also have the Capstone Project Authorship Contribution Form. Final versions of the Capstone Project Report must be submitted to the DSW

Program Director before the Graduate School deadline for graduation in any given semester. These deadlines can be found here: <https://graduate.ua.edu/current-students/student-deadlines/>

Ideally, students will have their final Capstone Project Report approved by the end of summer semester their third year, though the timeline for students to successfully pass their Capstone Project will vary from student to student. Some students may successfully complete their papers before the summer of their third year and it is also common for students to require additional time to successfully pass their final Capstone Project.

Capstone Committee Formation

The purpose of the Capstone Project Committee is to guide the student through the Comprehensive Paper and Capstone Project requirements. Students may select members of their Capstone Committee based on the individuals' social work area of expertise, expertise in research and evaluation methodologies, or some other skill/expertise that will be helpful for the student in developing, implementing, and writing the report for their projects. School of Social Work faculty have a wide range of areas of expertise, including: children's services, health and human service management, aging, policy, rural populations, school social work, criminal/juvenile justice, social work and health care, and behavioral health. Second committee members may not necessarily be a social worker or have obtained a doctorate degree if their area of expertise is relevant to the student's work.

Upon entering the DSW Program, students are assigned an academic advisor to help them plan course work. In their first year, the student's initial advisor will be the DSW Program Director until another advisor is identified. If the student finds that another faculty member may be doing work more related to their area of practice, advisor assignments may change. Usually, though not always, this advisor will become the student's Capstone Project Advisor or second committee member. When the student begins work on the Capstone Project proposal, the advisor will take primary responsibility, along with the second committee member, for further technical and professional assistance and guidance. The same faculty member may serve as advisor and committee member throughout the DSW Program Committee doctoral program of study.

All members of Capstone Project Committees must be members of the Graduate Faculty. Those who serve as Committee Chairs must be full-time faculty within the School of Social Work who have full/associate member Graduate Faculty status and be appointed at the rank of Assistant Professor or higher. Instructors within the school of social work, as well as faculty and practitioners outside of the School of Social Work and University of Alabama are also eligible to serve on Capstone Committees. In such cases, the DSW Program Director must submit a request that they be accepted as members to the University Graduate Faculty. To do so, the student must send the Director a copy of the individual's CV and a statement on why their expertise will be supportive in the Capstone Project process. Students should consult with their Chair before selecting an external second member. Students should also evaluate whether an external committee member may pose a conflict of interest for them.

The DSW Program Director or DSW Program Assistant will circulate the Capstone Committee form via DocuSign.

Admission to Candidacy Requirements

Students who successfully pass their Comprehensive Paper and have completed and/or are registered for all of their required non-Capstone Project coursework may advance to candidacy. The DSW Program

Director or DSW Program Assistant will initiate this form, which will be submitted to the UA Graduate School.

Continuous Enrollment Policy

Please refer to the Graduate School Policy (p. 21).

Time Limits for Degree Completion Requirements

Please refer to the Graduate School Policy (p. 21).

Student Progress Requirement

There may be cases where a student is dismissed from the program for reasons that include: (a) Failure to meet academic standards set by the Graduate School (Please see below); (b) Failure to meet professional preparedness standards, as determined by the School of Social Work; or (c) Academic misconduct.

Additional Academic Requirement

Summer Residencies

Due to the fact that the DSW program is primarily a distance program, there is not residency requirement for enrolled students to complete their coursework. However, during the summers in years 1 and 2, DSW students must attend on-campus residency programs. These residencies will last 4 days in year 1 and 5 days in year 2. The residencies will take place during the first 2 weeks of June each summer.

During residencies, students will travel to campus and attend workshops and trainings each day. The workshops will supplement the content learned in courses and also include opportunities to meet with faculty in-person for feedback on coursework and/or support in advancing through the DSW program.

Attendance for On-campus and Synchronous Activities

DSW students enrolled in the program **must** make arrangements to participate in the on-campus activities that are planned as part of the program, such as the on-campus orientation and annual residency retreats. Students **must** also participate in all synchronous activities required from their classes. Failure to do so may result in termination from the program. Excused absences for on-campus requirements will only be granted in extreme circumstances. Such cases include:

- Significant medical condition experienced by the student and/or immediate family member.
- Death of an immediate family member.
- Required military service.
- Unexpected travel delays or cancellations when using public transit (Planes, trains, and bus).

Note that documentation will be required for an excused absence. In some cases, students may be asked to make-up assignments that was missed during the on-campus content.

Requirement for Continuing Social Work Practice

Students are expected to be actively practicing social work throughout their time in the DSW Program, either through paid employment or volunteer work. The practice setting for students is not provided by the School of Social Work Field Office and students are expected to meet this requirement on their own.

Academic Misconduct Information

Please refer to the Graduate School policy (p. 7).

Withdrawals and Leave of Absence Information

Please refer to the Graduate School policy (p. 244).

Academic Grievance Information

Students who have concerns about issues that are having a negative impact on student learning or barrier to student achievement may report these concerns to the DSW Program Director. The DSW Program director will consult with the Associate Dean for Student Services for consensus in how to address the issue.

When reported concerns regard quality of instruction, the DSW Program Director will:

- consider the number of students being impacted and the context of the issue (e.g., Title IX complaint, quality of course content) when formulating a response;
- encourage students to discuss the issue with the instructor directly, if deemed appropriate for students to do so;
- follow-up with the instructor to discuss the course;
- discuss the matter with School of Social Work and university departments, as deemed appropriate; and
- follow-up with the student(s) afterwards to see if the issue has been resolved.

Students who do not believe that the issue has been resolved may file a subsequent grievance with School of Social Work Grievance Committees or university offices, as deemed appropriate.

Students should be aware that full-time university faculty typically instruct their courses under the shared assumption of academic freedom.

As a result, there are significant limits on instructional changes that the administration can require a faculty member to make at the request of administration. Therefore, it is strongly encouraged that students document issues they report in writing and also emphasize feedback in the Student Opinions of Instruction (SOIs). Student feedback and SOI reports will be reviewed by the DSW Program Director as well as the Associate Dean for Student Services and Dean of the School of Social Work (when appropriate) to determine if issues reported should be used in future decisions about DSW course instruction. Students should understand that a number of factors are considered in making course instruction decisions and students' complaints are only one of these factors. Students should also understand that complaints about individual course instructors will not be discussed or handled by the DSW Program Committee.

Please refer to the Graduate School information (p. 255).

Grades and Academic Standing

Please refer to the Graduate School policy (p. 28).

Graduate School Deadlines Information

Please refer to the Graduate School information.

Application for Graduation Information

Please refer to the Graduate School policy (p. 21).

Social Work, M.S.W.

MSW Program

The mission of the Master of Social Work Program at The University of Alabama School of Social Work is to prepare advanced scholar practitioners to improve the lives of individuals and families, enhance community well-being, and advocate for policies that support systemic change.

Graduates of the MSW Program will be able to:

- Deliver evidence-based social work practice to diverse client systems.
- Advocate for vulnerable populations across the lifespan.
- Engage in culturally competent advanced social work practice at the micro, mezzo, and macro levels.
- Analyze, formulate, and influence policies that impact individuals, families, organizations, and communities.
- Apply social work values and ethics at all levels of practice.

Curriculum

The MSW Program is fully accredited by the Council on Social Work Education. The curriculum follows the curriculum policy requirements of the Council on Social Work Education. The curriculum focuses on the following:

- **Social Work Practice:** This area of the curriculum is designed to provide practice knowledge and competencies in working with individuals, groups, families, communities, and organizations.
- **Human Behavior and the Social Environment:** This area of the curriculum helps the student to understand the whole person and the process of growth, change, adaptation, social functioning, and dysfunction of the environmental context, including family, groups, formal organizations, and communities. Courses in this area cover prenatal stages through the process of aging.
- **Social Welfare Policy and Services:** This area of the curriculum is designed to help the student identify, appraise, analyze, and understand social change in its dynamic perspectives; the role and responsibility of social work as a profession in influencing social policy; and the delivery of service to individuals and society.
- **Research Methods:** This area of the curriculum is designed to help the student understand social work and related research and the use of research for the improvement of services to individuals, groups, organizations, and communities.
- **Practicum Education:** This area of the curriculum provides opportunities for students to integrate and apply knowledge, skills, and values in social work practice context.

MSW Curriculum Themes

The MSW Program emphasizes the following five themes:

- **Life Course Perspective:** Social workers understand that the growth and development of individuals, families, groups, organizations, and communities are influenced by a range of psychological, social, historical, political, and economic factors. The interaction of these factors with life events and life transitions contribute to the subsequent outcomes. This theme also serves as the conceptual framework for the entire MSW curriculum.
- **Valuing Diversity:** Social workers value and work respectfully with people who are different from themselves.

- **Critical and Reflective Thinking:** Critical and reflective thinking that challenges assumptions, and that is based on evidence to arrive at creative solutions, is the basis for competent social work practice.
- **Evidence-Based Practice:** Social workers favor interventions with demonstrated effectiveness. They are prepared to carefully evaluate practice and program outcomes.
- **Services to the Poor and Underserved:** Alabama's poor and underserved receive social services primarily from public and non-profit social service agencies. Social workers must be prepared to practice in these contexts and to challenge social injustice.

The MSW Program emphasizes the following theoretical frameworks:

Social Justice Framework

The University of Alabama School of Social Work is committed to educating students for advanced generalist practice by integrating a social justice framework throughout our MSW curriculum. This social justice framework reflects a commitment to ethical social work practice as described in the NASW Code of Ethics and includes the following three tenets: (1) Promoting the general welfare of society from local to global levels, (2) Challenging social injustice on behalf and with communities that have been marginalized, and (3) Practicing cultural humility and responsiveness thereby recognizing clients as experts of their own culture. These tenets will be discussed within a historical, social, environmental, and economic context to provide students with the knowledge, skills, and values they need to act as social justice advocates in collaboration with the persons and communities they are educated to serve.

Trauma-Informed Framework

The University of Alabama School of Social Work (UA SSW) is committed to educating students for advanced generalist practice. This model integrates behavioral health trauma-informed frameworks, community resiliency approaches, and the social justice framework into the concentration year of the MSW curriculum. Students will understand how the combined impact of disproportionate exposure to adverse childhood and life experiences can shape the biopsychosocial development across the lifespan. The UA SSW educates students with the knowledge, skills, and values necessary to implement a trauma-informed framework across micro, mezzo, and macro levels of social work.

MSW Program Objectives

MSW students will exhibit the ability to:

- Demonstrate Ethical and Professional Behavior
- Advance Human Rights and Social, Racial, Economic, and Environmental Justice
- Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice
- Engage in Practice-Informed Research and Research-Informed Practice
- Engage in Policy Practice
- Engage with Individuals, Families, Groups, Organizations, and Communities
- Assess Individuals, Families, Groups, Organizations, and Communities
- Intervene with Individuals, Families, Groups, Organizations, and Communities
- Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- A resume
- 5-6 pages "Statement of Purpose"

Prospective students with a GPA less than 3.0 but greater than 2.5 will be considered for Admission with Permission to Continue for part-time enrollment.

Please note no academic credit, course waivers, or credit for field practicum shall be granted for life experience or previous work experience.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

MSW Program Tracks: Two formats, campus or primarily online

Advanced Standing (42 credit hour)

- Students holding a Bachelor of Social Work degree from a CSWE accredited institution.
- Admission requires a "B" average or better in all professional foundation Social Work courses including field education, with no more than one "C" in upper level Social Work courses.
- Offered Summer term only

Two Year (60 credit hour)

- Students who hold a bachelors degree from a regionally accredited institution.
- Students who do not meet Advanced Standing criteria must apply to 60 hour program.
- Offered Fall term only

MSW Program Requirements: Two formats, campus or primarily online

Advanced Standing (42 credit hour)

The Advanced-Standing Program is a 42-credit-hour program for only those who **hold** a CSWE-accredited BSW. It can be completed in one year when pursued full-time. Advanced-standing students fulfill professional foundation requirements by successfully completing 'bridge' courses offered in the summer before beginning the concentration year.

Two Year (60 credit hour)

The 60-credit-hour program is for those who currently **do not hold** a CSWE-accredited BSW. It can be completed in two years when pursued full-time. Coursework is offered in two formats, campus or primarily online.

MSW Program Concentrations

The MSW Program offers two concentrations

- Children, Adolescence and their Families (CAF)
 - SW 532 & SW 533
- Adults and their Families (AF)
 - SW 564 & SW 565

REVIEW SPECIFIC COURSES Under Concentration Options (p. 791)

Student must select one concentration to fulfill degree requirements for this program.

Field Education Practicum Requirements

Advanced Standing (42 credit hour)

- One supervised field placement
- Field practicum is taken in the spring
- A minimum of 500 clock hours
- In a field placement Monday-Friday for 32-40 hours per week for 15 weeks
 - Optional: Two variable courses in the spring and summer for 16 hours per week (varies)
- Required: SW 595

Two Year (60 credit hour)

- Two supervised field placements
- Field practicum is taken in the fall and spring
- A minimum of 500 clock hours, respectively
- In field placements Monday-Friday for 20 hours per week for 25 weeks
- Required: SW 590, SW 591, SW 595, and SW 596

The MSW Program offers additional field placement opportunities (p. 782) unique to the Capstone experience.

MSW/MPH Coordinated Degree (p. 791)

The University of Alabama School of Social Work in Tuscaloosa and The University of Alabama at Birmingham School of Public Health jointly offer an MSW/MPH coordinated degree program designed for people with career goals in community-oriented health services for families and children.

Students who are interested in this coordinated degree should separately apply to UA's MSW Program and to the Department of Health Care Organization and Policy at The University of Alabama-Birmingham School of Public Health for admission to the MPH Program.

For UAB curriculum guides and admission requirements, please visit the University of Alabama at Birmingham School of Public Health website.

MSW/JD Coordinated Degree Program

The Master of Social Work/Juris Doctorate Degree Program is coordinated between the School of Social Work and The University of Alabama School of Law.

Before being classified as a MSW/JD coordinated degree student, applicants must be accepted in the School of Law and then the MSW program. Separate admission to each program is required. Admission requirements for the coordinated degree program are exactly the same as those currently established for the MSW Program (p. 791) and the JD Program separately. All prerequisites for both programs must be met.

Students in the MSW/JD Coordinated Degree Program must complete all the required MSW courses necessary for the degree; students have the option to complete their elective requirements (currently nine credit hours) in the Law School.

Advanced Standing and 2-year MSW/JD (only offered on-campus)

Law electives approved to count towards the MSW		Hours
LAW 633	Gender & The Law	
LAW 655	Immigration Law	
LAW 674	Family Law I	
LAW 683	Administrative Law	
LAW 696	Health Care Law	
LAW 726	Civil Rights Actions	
LAW 731	Special Topics in Law	
LAW 769	Poverty Law	
LAW 791	Juvenile Justice Jurisprudence	
LAW 819	International Human Rights Law	
LAW 821	Public Interest Lawyering	
LAW 822	Spanish for Lawyers	
LAW 834	Mental Health Law	
LAW 843	Lawyers & Social Change	

The JD program currently requires at least 90 hours of coursework, of which six hours may be fulfilled with approved courses offered outside of the Law School. The JD is a cohort-based program completed over 3-4 years. Students in the coordinated degree program are required to complete 9 hours of MSW courses as part of the 90 hours constituting study for the JD. The following MSW courses will count towards the JD, contingent upon the student having first completed a year of the JD program. MSW courses taken before that year will not count toward the JD degree. Courses taken in an online or primary online format will not count towards the JD degree.

MSW courses approved to count towards the JD		Hours
SW 500	Social Welfare Policy	
SW 501	Soc Welfare Adv Pol Analysis	
SW 578	Social Welfare Policy	
SW 532	SW Pract w/Adults Mental Hlth	
SW 533	Mod/Meth Gerontologl SW Pract	
SW 564	SW Prac Child Adol Ment Hlth	
SW 565	SW Prac Child Welfare Fam Serv	

The coordinated degree program requires 114 credit hours for students admitted as MSW advanced standing **42 credit hour program** and 132 credit hours for students admitted as MSW **60 credit hour program**.

Required Courses for Social Work with Children, Adolescents, and Their Families

Code and Title	Hours
SW 564 SW Prac Child Adol Ment Hlth	3
SW 565 SW Prac Child Welfare Fam Serv	3
SW 595 Field Education II-A	9
Total Hours	15

Required Courses for Social Work with Adults, and their Families

Code and Title	Hours
SW 532 SW Pract w/Adults Mental Hlth	3
SW 533 Mod/Meth Gerontologl SW Pract	3
Total Hours	6

Transfer Credit

Applicants interested in transferring graduate credit to the MSW program from another institution or graduate program must make a formal request after admission to the program. The proposal is initiated in the Graduate School with the Request for Transfer Credit Form form. Review the master's degree transfer credit details (p. 15) provided by the Graduate School.

*Please note the School of Social Work allows a maximum of 9 hours of transfer work for the **42 credit hour program** and a maximum of 12 hours of transfer work for the **60 credit hour program** upon approval by the program director.*

Time Limits for Degree Completion Requirements

All requirements for a master's degree must follow the Graduate School's time limit guideline (p. 15).

Academic Misconduct Information

MSW students are subject to the academic performance criteria (p. 7) of the Graduate School.

Withdrawals & Leave of Absence Information

A graduate student may withdraw from the University. It is the student responsibility to initiate a withdrawal online.

Discontinuation of One of the degrees

If a student enrolled in the coordinated degree program were to discontinue enrollment in the program and continue seeking only one degree (MSW or JD), the student would have to meet the full requirements of that degree.

Academic Grievances Information

The School of Social Work follows the University-wide Academic Grievance Procedures (p. 255).

Grades and Academic Standing

The School of Social Work follows the University-wide Grades and Academic Standing (p. 28).

Graduate School Deadline Information

REVIEW IMPORTANT DEADLINES

Application for Graduation Information

READY TO GRADUATE - APPLY NOW

Coordinated Degrees Conferred in same Commencement

Both degrees are conferred during a single commencement exercise, once all degree requirements have been met. Neither degree will be granted until both degrees are earned, except in cases in which a student formally withdraws from the coordinated degree program.

Social Work, Ph.D.

PhD Program

The University of Alabama's Social Work PhD program prepares social work scholars who develop and disseminate knowledge. As with other members of the Group for the Advancement of Doctoral Education in Social Work (GADE), our PhD program focuses on preparing scholars, researchers, and educators who will function as stewards of the discipline.

Specific goals of the PhD Program:

- To provide a rich, supportive environment that enables a diverse group of students to pursue and attain their academic and professional goals.
- To prepare social work scholars committed to social justice, advocacy, the social work profession, and those the profession serves.
- To equip students to produce quality research and engaged scholarship that effects meaningful change.
- To prepare students to translate research for use by relevant stakeholders.
- To prepare our graduates to be successful educators of future social workers.

The PhD Program builds on a base of professional knowledge and practice in social work. In addition to a rigorous grounding in research, the program offers students the opportunity to develop a comprehensive understanding of a selected area of focus and, through the dissertation, to contribute to knowledge development in that area.

Students are provided with in-depth study of research methodologies and methods supporting skill development necessary for the design of scientific investigations, data collection, management, and analysis, along with writing for publication. The PhD Program includes a strong research methods curriculum. In addition, students take substantive courses in theory and other topics and elective courses. As soon as they enter the program students begin working with the Program Director for program planning and guidance. PhD students select advisors to guide their professional development and dissertation research typically by the end of the first year of the program with the first year devoted to getting to know faculty.

Obtaining Information

Inquiries about the program should be to: The University of Alabama School of Social Work, PhD Program Office, Box 870314, Tuscaloosa, AL 35487-0314; telephone 205-348-0798; mtsiler@ua.edu.

Admissions

The School of Social Work determines eligibility for regular or "admission with permission to continue" admission partially on the basis of previous academic records, but also based on each applicant's unique Statement of Purpose and information from their references. Successful applicants must meet the minimum admission requirements of the Graduate School prior to consideration by the School of Social Work PhD Program.

School of Social Work PhD Program Admissions Requirements and Additional Information About Supporting Documentation:

- A master's degree in social work (MSW) or simultaneous separate applications to the UA MSW and PhD Programs to enter the Concurrent Program to work on the two degrees simultaneously.
- Letters from three references, one of whom must be a university professor or social work scholar who has personal knowledge of the applicant's intellectual and scholarly abilities. If the applicant has earned the MSW degree, at least one letter should be from a former instructor in the applicant's MSW program.
- A Statement of Purpose indicating the reasons the applicant wishes to pursue a PhD in social work and indicating the applicant's research interests. There is no standard length, generally, the statement ranges from 900 to 2,250 words in length.
- Evidence of scholarly writing ability, supported by evidence the applicant supplies (e.g., a sole-authored paper published in a journal or presented at a conference or workshop, a design of a service program or a research proposal, and/or a course syllabus written by the applicant).
- In addition to the above program requirements, it is recommended that the applicant also possess a minimum of two years of employment experience in social work after earning the MSW degree.

Applicants seeking admission to the program who do not meet the above requirements may be considered on an individual basis for "admission with permission to continue". If an applicant desires such consideration, they should file all application materials as directed above. In addition to the materials required of all students, applicants seeking exception from admission requirements must notify the PhD Program Director by filing a specifically labeled "Petition for Exception" identifying from which of one or more requirements the exception is sought. In addition to identifying the specific requirement(s) from which exception is sought, applicants should provide information supporting the petition. After the application file is complete and referred to the social work PhD program by the Graduate School, the applicant may be invited to schedule an interview with the program director or other member of the admissions committee, in order to assess individually the applicant's qualifications for PhD studies in social work. A summary of this interview and the petition for an exception will be made available to the Admissions Committee for consideration prior to its decision regarding an admissions recommendation. Please contact the School of Social Work PhD Program Director directly for questions about this possibility.

If seeking exception from the requirements, the applicant should be aware that they may be required to register for courses other than the standard curriculum, including courses at the MSW level. The amount and type of such work may be decided by the Admissions Committee before admission and/or by the applicant's academic advisor after admission.

Concurrent Enrollment in the MSW and PhD Degrees Programs

The University of Alabama School of Social Work offers an MSW/PhD concurrent program for **truly exceptional** individuals who hold, or are candidates for, bachelor's degrees who have very strong academic credentials and aptitude for scholarly careers in social work. Such individuals may be admitted simultaneously to the MSW and PhD programs and work on both degrees concurrently, following a strict, rigorous curriculum. Those admitted to the concurrent program will complete all current requirements for the PhD degree. Specific required PhD coursework will be applied to specific MSW degree requirements, reducing the number of semester hours required for the MSW and PhD degrees by 12 hours typically. The MSW degree will be awarded when all requirements for the MSW are completed, and the student will continue to work on the PhD requirements.

Successful applicants **must exceed the minimum admission requirements** of the Graduate School and the School of Social Work MSW and PhD programs.

See the Admission Criteria section of this catalog for more information.

	9		9

Total Hours: 67

Transfer Credit

Graduate School information on Transfer Credit.

Doctoral Plan of Study Requirement

The Social Work PhD Program requires 50 hours of coursework. Specific requirements are as follows:

- Thirty-four semester hours of core social work courses, including a one-credit professional seminar.
- Nine semester hours in an electives supportive of a planned research area taken in or outside of the School of Social Work.

- A statistical research competency demonstrated by successful completion of an approved statistics two-course sequence.
- A dissertation showing the student's ability to conduct independent research that adds to the knowledge of the profession (includes a minimum of 18 hours of SW 699 Dissertation Research credit).
- Completion of all courses with a grade point average of 3.0 ("B") or better.

These requirements are minimum standards. Additional work may be required, depending on the student's preparation and career interests.

Comprehensive Exams

Upon completion of required coursework, students will take comprehensive exams. Exams will be offered two times during the academic year, near the end of the fall and spring semesters. To take exams, students must submit a "Comprehensive Exams Registration Form" to the PhD program office by the designated mid-semester date.

All students taking the exams at any given time will receive the same question options. Questions will require application of essential social work concepts and knowledge. Exam takers will receive three question options in each of three content areas: research, policy, and practice/theory.

The exams will take place over three days, with question options from one content area distributed to all exam takers at the same designated time each day. Exam takers will have four hours and 5 minutes to write and return a response electronically.

Exam takers may not consult with others (in other words, no digital or live communication with any other individuals, except the program chair or his or her designee) about the questions or the responses. Exam takers may rely on any other digital or written materials they desire to answer the questions (using appropriate APA citation style).

Questions will be written by members of the PhD committee or others invited by the program director. At each exam offering, the program director will solicit questions from committee members or others they designate and prepare the exam. Three faculty members will submit questions for each of the three areas.

The same three faculty members who submit questions for any content area or areas will grade the responses from the same area or areas or each response they grade, graders will submit a grade of "pass," "fail," "pass with distinction," or "Permission to Retake." Exam takers' identities will not be disclosed to graders nor will graders' identities be disclosed to exam takers. A student must receive a grade of at least "pass" from a majority of graders to pass each content area. If a student fails in any content area or areas, he or she will have one re-take opportunity following a grade of "fail".

Standards. In responding to examination questions, PhD students are expected to demonstrate a strong grasp of issues salient to the questions. Normally, this will involve demonstration of knowledge of theory, research findings, and relevant research methods. Answers should show that the student knows the literature well and should reflect the student's ability to critically summarize the important issues and conclusions in the literature. Further, the student should show evidence of the ability to integrate knowledge and to apply concepts.

Answers should be well written. Writing quality can obscure intended meaning. The clarity, specificity, relevance, integration, and application of knowledge demonstrated in the student's response are more important than the length of the response. The student must demonstrate the ability to apply relevant material to challenging questions with

clearly-reasoned, well-informed responses that bear specifically on the point of the question. All sub-sections of each question should be specifically addressed. The student should exhibit mastery in each area: policy analysis/research, theory-informed research on practice, and research methods. Mastery means, among other things, that the student has command over essential information and can use it to resolve issues and solve professional problems. Because the Comprehensive Examination is an important part of the educational experience, a high standard of performance is expected. It is understood that Comprehensive Examination question answers are, in a sense, first drafts, but nonetheless, strong written communication skills should be demonstrated.

Re-Examination. If a student fails one or more sections of the examination, those sections may be re-taken once in accordance with Graduate School policy. Faculty members selected by the PhD Program Director will write a new set of questions for each section to be re-examined. Any re-takes should take place at the next exam offering (at the end of the next fall or spring semester). **Results of the second examination will be final.** A second failure of any section of the Comprehensive Examination will result in dismissal from the PhD Program and the Graduate School will be notified of this decision.

Students who fail one or more parts of the Comprehensive Examination twice may submit a written petition to the PhD Program Director if they believe an exception should be made because of extenuating circumstances. PhD Program Committee members and the PhD Program Director will review the request and decide whether an exception is in order, in consultation with the Associate Dean for Academic Programs.

Admission to Candidacy Requirements

Following the successful completion of the Comprehensive Examination, the student will be admitted to Doctoral Candidacy.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

NOTE: It is **imperative** that all students take time to read and review the Graduate School Electronic Thesis or Dissertation (ETD) web page beginning at the dissertation proposal writing stage. This gives a step-by-step guide to the whole ETD submission process and answers nearly all of the questions that students have in regard to formatting and their ETD submission.

In particular, students *must* follow Graduate School guidelines regarding preparation of the dissertation. See *A Student Guide to Preparing Electronic Theses and Dissertations*, published by the Graduate School.

Doing so at the beginning of the proposal stage will facilitate later success.

When dissertations are rejected, it is usually because there are errors in document formatting and the preparation and inclusion of the preliminary pages. Candidates need to make time to review the required formatting and the sample preliminary pages on the Graduate School ETD website.

Dissertation Committee

After the student passes the Comprehensive Examination, they must focus on the dissertation proposal. The student should successfully defend the dissertation proposal within one calendar year of passing the comprehensive examination. The first step is to select a Dissertation Chair and the other members of the Dissertation Committee. The student consults with the Dissertation Chair regarding the composition of the

committee. The Dissertation Committee must be composed of at least five members of the Graduate Faculty of the University. The Chair of the Dissertation Committee must be a Full Member of the School of Social Work's Graduate Faculty. At least two additional committee members must be members of the School of Social Work Graduate Faculty. At least one, and no more than two, members of the Dissertation Committee must be from another division of The University of Alabama and one can come from another institution. Students should be sure that prospective committee members will be available for the anticipated duration of the dissertation research. The Dissertation Committee should include members who can guide the student's dissertation research, including experts in the student's substantive area of research specialization and experts in the research methods that the student will use, including a statistician if the dissertation research will involve the analysis of quantitative data or a qualitative data analysis expert if the research will involve qualitative or mixed methods.

Faculty members from other universities and other expert individuals may, at times, be appointed to dissertation committees. There should be clear and compelling rationale for such appointments and the faculty member must receive an *Affiliate Appointment* to the Graduate Faculty.

The curriculum vitae of each such proposed Dissertation Committee member must be submitted to the PhD Program Director who will advise the Dean of the School of Social Work to recommend appointment to the Graduate Faculty to the Dean of the Graduate School.

The composition of the proposed Dissertation Committee must be approved by the PhD Program Director, the Dean of the School of Social Work, and the Dean of the Graduate School. To compose or change the composition of the Dissertation Committee, the student does this through the Graduate Student Portal.

The dissertation is the major scholarly endeavor of the PhD experience. A broad range of subjects and methods can be used in the dissertation. All dissertations, however, should focus on issues of concern to social work so that the findings will have meaning and implications for social work. The dissertation is expected to contribute knowledge and to demonstrate the student's technical research skills and her or his mastery of the subject matter in the chosen area of specialization. The following list offers examples (but by no means constitutes an exhaustive list) of the range of dissertation options that would usually be considered appropriate. Exploration of the database *ProQuest Dissertations and Theses Global* using the search term "social work" offers insights to potential inquiry paths.

- **Social Policy or Program Evaluations.** Evaluations of on-going programs and existing policies using administrative records, field studies, interviews, survey data, or some combination of these and other types of data.
- **Case Studies.** Intensive analyses of persons, social groups, organizational components, or communities, with an emphasis on depth rather than breadth.
- **Theory Generation.** Use of qualitative methods, e.g., grounded theory, to generate theory.
- **In-depth Exploration.** Use of qualitative methods to explore conduct in-depth investigations of phenomena, concepts, ideas, and/or experiences.
- **Hypothesis-Formulation Studies.** Exploratory research of a quantitative or qualitative nature on problems or issues with little or no previous study. The goal is to formulate theories and hypotheses for future research. The state of development of relevant theory will determine the appropriate designs to be used.

- **Hypothesis-Testing Studies.** Research on problems that have received sufficient empirical and theoretical attention for clear hypotheses to be stated in advance. The main goal of the research would usually be to test these hypotheses with systematic quantitative data, as a step in the refinement of knowledge.
- **Methodological Studies.** Development, standardization, and validation of research tools such as scales for measuring phenomena of importance in social work. The constructs investigated in such studies should be grounded in theory.
- **Survey Research.** Use of purposive or random sampling techniques to investigate and/or to estimate the prevalence or intensity of various phenomena of interest to social work. These studies can include epidemiological studies, attitude surveys, and demographic analyses. All would attempt to make inferences about populations based on data collected from samples.

Dissertation Proposal

While the subject matter of proposals may vary greatly, there are certain elements common to all dissertation proposals. The proposal, whether for a monograph dissertation or a three-article dissertation, must have:

1. A clear statement of the research problem or area of investigation.
2. A comprehensive synthesis and summary of the relevant literature and prior research.
3. Unambiguous and comprehensive research procedures including, where applicable, a description of the data to be collected, how the data will be obtained, and a detailed description of how the data will be analyzed. This should include a draft of proposed instruments, interview or question protocols, document audit procedures, and scales. If appropriate, evidence of data availability from archived sources or agency records should be provided.
4. A description of units of observation (subjects, records), how they will be selected and accessed. If data will come from human participants, measures taken to ensure availability and provide for protection of rights and welfare along with informed consent should be described.
5. In the case of multiple-article dissertations, methods should be clearly and thoroughly described for all studies or all parts of the study planned for each article in the dissertation.
6. In the case of multiple-article dissertations, the proposal must include an introduction which introduces the common theme or framework, describes the articles, explains how they are related, and explains their expected significance. There must be connecting language to bridge each planned article description to the next. There must be a summary section that addresses the expected importance of the articles and discusses the potential implications of the overall product. This section should provide a clear description of how the parts of the project fit together.
7. Explication of potential risks or harm to human participants, where applicable, and steps that will be taken to minimize such risks. This will be important when preparing forms for submission to the Institutional Review Board (IRB). All members of the UA community (students, faculty, staff) hold an obligation to adhere to Office of Research Compliance policies and procedures.
8. A timetable, including critical milestones and potential sources of delays.
9. A budget (if needed). This will be particularly important if a subsidy to defray dissertation costs will be requested from the UA Graduate School.
10. Potential results and the potential usefulness of the results for social work.
11. An outline and tentative table of contents for the dissertation.
12. The proposal should be concise and to the point. It should clearly demonstrate that the student has mastered subject matter, methodology, and the logistics of carrying out a major research investigation.

Institutional Review Board

The Office for Human Research Protections (OHRP) of the US Department of Health and Human Services requires that any research that involves the collection of data from human participants must have approval from the UA Institutional Review Board (IRB). Guidelines, forms, and other information can be obtained by calling the Office for Sponsored Programs at (205)348-5152 or visiting the website.

Where students receive approval from the IRB a copy of the certification must be included in the dissertation as the final appendix.

Proposal Defense

When the student and the Dissertation Committee Chair believe the proposal is ready for defense, a Proposal Defense, or formal oral examination, will be scheduled. This meeting should be scheduled through the PhD Program Assistant well in advance, but at a minimum three weeks, of the time set in order for the Program Assistant to reserve space for the Proposal Defense. Copies of the defense-ready dissertation proposal must be provided to all committee members at least two weeks in advance of the oral defense. The student is responsible for presenting her or his dissertation proposal to the Dissertation Committee.

As a "working meeting" between the student and their committee members, the Dissertation Proposal Defense meeting can be conducted in various ways depending on the needs of the student and the preference of the Dissertation Committee Chair. The agenda may include a formal presentation by the student of their proposed project and then a discussion of the proposal by the committee with the student, but the formal presentation is not a requirement (e.g., committee members may be familiar enough with the project that no "reminding" may be necessary via a presentation).

A student, after discussion and agreement by their Dissertation Committee Chair, may invite guests for that portion of the meeting when the student presents details of their proposed project. If guests are invited, they will leave the meeting for the portion of the meeting where the student and the committee discuss the proposal and committee members offer feedback about the project to the student.

As a result of the defense process, the committee may find that the proposal is:

- *Acceptable* (without modification);
- *Acceptable* (with modification); or
- *Not Acceptable*

If the committee finds that the proposal is *Acceptable* (without modifications), the student may proceed with the dissertation research.

If the committee finds that modifications are necessary, the student will be given a list of recommended changes for improvement of the proposal. The Dissertation Chair is responsible for seeing that these changes are made to the satisfaction of the committee. If the committee

finds that the proposal is *Not Acceptable*, the Dissertation Chair will provide the student with a list of reasons for its unacceptability and a record of the Dissertation Committee's vote. This document will be kept in the student file. If the proposal was *Not Acceptable*, the student must schedule another proposal defense.

A successful defense of the proposal is defined as an *Acceptable* vote (with or without modification) by a majority of the Dissertation Committee members. After the defense, a copy of the approved dissertation proposal must be submitted to the Director of the PhD Program. The student should successfully defend the dissertation proposal within one calendar year of passing the comprehensive examinations.

General Outline of a Traditional Monograph Dissertation

The student should work closely with the Dissertation Committee, under the supervision and guidance of the Dissertation Chair. As with dissertation proposals, organization and content of dissertations may vary, especially across methods. Listed below are some suggested headings for chapters.

- **Chapter I. Research Problem.** A description of the question, issue, or phenomenon being investigated, including the research questions being addressed. Definitions of major concepts should be given. The significance of the project to social work should be discussed.
- **Chapter II. Theoretical Considerations.** The relevant literature should be described in detail. A conceptual framework synthesizing several theories or conceptual schemes may be developed. Hypotheses to be tested (if appropriate) should be discussed within the context of the existing literature.
- **Chapter III. Research Methods.** This chapter should contain a complete description of the research methods used in the study. It should be clear that these approaches were a direct result of the questions asked and/or hypotheses tested. The chapter should contain a description of the following:
 - the research design or general plan of approach;
 - sampling strategy, access to units of observation, and any sources of bias;
 - procedures;
 - instruments, scales, record audit procedures, protocols, or questionnaires, including information about properties such as reliability, validity, and inter-coder agreement (as relevant for respective research approaches);
 - data collection procedures;
 - data analysis procedures, and
 - Statement of Institutional Review Board (IRB) approval.
- **Chapter IV. Results.** This section should present a complete description of the findings of the study. It should include a description of the sample, and, if appropriate, a description of how the sample was different from expectations. Findings should be specifically linked to the questions that were asked or the hypothesis that were tested in the research.
- **Chapter V. Interpretation and Summary.** This section should interpret the findings of the study with particular emphasis on the contribution made by the research. It should discuss implications for the profession and for other disciplines, if appropriate. It should also discuss limitations of the research and appropriate next steps in the overall research plan represented by the dissertation.
- **Appendices.** IRB documents, etc.

Three-Article Dissertation Option

For students who choose this option, the dissertation will include three manuscripts or articles. As with traditional dissertations, the work in a three-article dissertation must be based on research completed while the student is enrolled at The University of Alabama. For each article, the student must be the sole author.

The dissertation must reflect the student's original work. Each of the three papers will be of publishable quality, focusing on a single theme or framework. In one of the articles or across all three, the product must include a comprehensive review of the literature, and the dissertation must illustrate an in-depth understanding of the unifying theme or framework. At least two of the articles must be empirical.

The product must include an introduction which introduces the common theme or framework, describes the articles, explains how they are related, and explains their significance. There must be connecting language to bridge each article to the next. There must be a summary section that addresses the importance of the articles, integrates the major findings, and discusses the implications of the overall product.

All parts of the dissertation must conform to the provisions set forth in the *UA Student Guide to Preparing Theses and Dissertations*, except when the circumstances of a specific project require deviation. Articles submitted to journals should follow the style requirements of the particular publications, but for the three-article dissertation, the articles must follow UA Graduate School guidelines with respect to formatting and presentation.

A maximum of one sole-authored article published or accepted for publication prior to the proposal defense may be included in a three-article dissertation. This article must represent work undertaken while the student was enrolled at UA and must be approved by the student's dissertation committee at the time of the proposal defense.

If a previously published article is approved by the committee, the student will be responsible for securing necessary permissions from the copyright holder, as the article will be reprinted as part of the dissertation.

As with traditional dissertations, students choosing this option will work with a dissertation committee of five members. In addition to the considerations included in a traditional review of a dissertation, the committee will be responsible for assessing whether the articles are of publishable quality, evaluating the quality of the integration into a unified theme, and evaluating the quality of the implications. Note also that the dissertation defense will be comprehensive; in addition to the component parts, it will focus on the entire dissertation.

Community-Friendly Dissemination of Dissertation Findings

In addition to the customary dissertation document, students who entered the SSW PhD Program in the Fall of 2020 and later, are required to also create a community-friendly document summarizing dissertation findings and implications. The community-friendly document itself, along with the plan for dissemination, should be included as an appendix to the dissertation.

The "document" could take a variety of forms including, but not limited to: an infographic, website, Facebook page, flyer, short report, slide presentation, video, and/or poster.

It could be distributed to a range of audiences including, but not limited to: research participants, community members, and/or social work students. It could be distributed through a variety of means including, but not limited to: electronic mail, postal mail, in-person meetings or presentations, and/or social media. When applicable, students should consult with research participants and/or community members about the format and distribution method.

The purpose of this requirement is to encourage students to adopt practices consistent with community-engaged research and social work values and ethics. Values reflected in the requirement include: (1) social work research should have relevance to community members, research participants, and others outside academia; (2) research participants and community members should be informed of research findings having relevance to their lives; and (3) research findings should be shared with participants.

Dissertation Defense

Students are responsible for familiarizing themselves with the requirements and expectations laid out by the Graduate School and described in the *Graduate Catalog* related to dissertations, their defense, and other PhD degree requirements (<https://catalog.ua.edu/graduate/about/academic-policies/degree-requirements/#doctoraldegreetext>), including initiation of the Public Notice of Defense Form (visit The Graduate Student Portal).

The student has the primary responsibility for determining their readiness to defend the dissertation. However, the dissertation defense should not be scheduled until the Dissertation Chair and members of the Dissertation Committee have indicated that the dissertation is ready to be defended. When the student, the Dissertation Chair, and the other members of the Dissertation Committee believe the time is right, the student and Dissertation Chair will arrange for the defense of the dissertation. This meeting should be scheduled through the Doctoral Programs Assistant well in advance, but at a minimum three weeks, of the time set in order for the Program Assistant to reserve space for the Defense. At least three weeks in advance of the defense, the Dissertation Chair should inform the PhD Program Director and the PhD Program Assistant, so the date and time of the defense can be publicized internally. Dissertation defenses will take place in Little or Farrah Hall unless compelling circumstances warrant that the defense takes place outside of Little or Farrah Hall (see section on virtual defenses below). Dissertation defenses are public, and thereby publicized, in accordance with University policy.

Copies of the dissertation, in complete and legible form, must be provided to all committee members at least two weeks in advance of the time selected for the oral defense. This version should, in substance and format, be presented as the final report of the dissertation research.

The Dissertation Committee will conduct an oral examination based on the copy of the dissertation the student has provided to them. When the defense is completed, the chairperson will poll the committee members for their recommendation. The decision will be either:

- *Acceptable* (if the committee determines that little or no revision of the manuscript is required).
- *Not Acceptable* (if the committee determines that major revisions are required before the dissertation can be considered acceptable).

In the case of a *Not Acceptable* recommendation, the Dissertation Chair will compile a complete list of detailed instructions/requested revisions from the various committee members, including whether or not another defense should be scheduled. The student should incorporate the recommendations into the dissertation as quickly as possible and, if needed, schedule another defense.

Virtual Defenses

In accordance with Graduate School Policy all members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus.

However, the need occasionally arises for virtual participation in the oral examination. Under extenuating circumstances, a virtual defense may be possible based on the discretion of the Dissertation Chair in consultation with the PhD Program Director. In these cases, graduate programs must ensure adherence to the Graduate School policy regarding technical and attendance requirements if any graduate-level oral examination involving the student's partial or entire thesis/dissertation committee includes virtual participation: <https://catalog.ua.edu/graduate/about/academic-policies/degree-requirements/#doctoraldegreetext>

Following Successful Defense of the Dissertation

The PhD Dissertation Chair should alert the PhD Program Director of the successful defense so the Program Director can initiate the Committee Acceptance Form and publicize the successful defense. The notification to the PhD Director needs to include the following information:

- The student's name and email address,
- Date of the defense,
- Manuscript title,
- The name and email address for each regular committee member,
- The name and email address of the committee chair.

After the Dissertation Chair has notified the PhD Director, all committee members can sign the Committee Acceptance Form initiated by the PhD Program Director via the DocuSign process. The PhD Program Director will provide a final signature on the Committee Acceptance Form once the ETD confirmation notification is received by the PhD Program Director from the student.

If the student is unable to complete the dissertation prior to the deadline for regular commencement, the student may defend later in the semester, between semesters, or whenever the Dissertation Committee can be convened. After the successful defense and approval of the dissertation by the Dean of the Graduate School, a Certificate of Degree will be issued to potential employers, as needed. The official degree will be conferred at the next commencement. Other appropriate letters documenting completion of the degree will be written to assist the student in matters related to employment or credentialing.

Submission of the ETD

The final dissertation as approved by the dissertation committee and in the format required for ETDs must be submitted online to the Graduate School through the ProQuest/UMI submission portal. In addition, the student must complete the information about his or her degree and dissertation in the online submission. There is an easy step-by-step process to follow, simply go to the Graduate School ETD web pages to prepare for the process. It is very helpful to familiarize yourself with this process prior the time when you need to engage with this process.

Graduate School Review

The final version of the dissertation must follow the requirements of the Graduate School for the preparation and submission of dissertations as stated in *A Student Guide to Preparing Electronic Theses and Dissertations*, published by the Graduate School and available on-line. **This section of the PhD Handbook contains cautions based on past experiences but does not contain complete information about the process.** The Graduate School provides complete information and students must consult and follow those policies and procedures.

In preparing to submit the dissertation to the Graduate School, the student should pay particular attention to the requirements listed under *Format*. The instructions contained in this section must be followed

exactly. Failure to do this can result in a considerable delay, perhaps even to the next semester.

The results of the defense, and the dissertation, must be in the hands of the Dean of the Graduate School in accordance with Graduate School deadlines. The Graduate School determines the exact calendar deadlines for each semester; these are available online at the Graduate School website for Current Students. The student needs to pay attention to this information well in advance of at the beginning of the semester in which they intend to graduate. **The student should be aware that she/he will be required to register for more dissertation credits if all paperwork is not completed by a certain date.**

The manuscript prepared by each student should be fully proofread and corrected *BEFORE* submission online to the Graduate School. It is the primary responsibility of the student for reviewing and proofing the document before submission. Some students engage external editors to help with this process.

As part of the submission the committee and the student must sign and certify that the electronic copy of the manuscript is a true copy of the final approved version. The PhD Program Director initiates the Committee Acceptance Form for the Electronic Thesis or Dissertation; **the thesis or dissertation cannot be accepted unless this form has been completed via the Graduate School's process.**

Each doctoral candidate must also submit to the Graduate School at the same time as the ETD is submitted a completed Publication Agreement Form. This is the publishing agreement between the student and UA and mirrors the Electronic Publishing Agreement the student completes online as part of the submission to ProQuest/UMI, UA's publishing partners. **Any embargo period selected MUST be the same on both of these publishing agreements; any inconsistencies will result in a rejection of the submission.**

Also, each doctoral candidate is required to complete an online NORC Survey of Earned Doctorates. Again, **unless and until this has been completed, the submission will be deemed incomplete and may be subject to rejection.**

The Graduate School then conducts a final editorial review of each master's thesis or doctoral dissertation to ensure that the general requirements of this manual and the student's style guide have been met. However, the primary responsibility for reviewing a thesis or dissertation has always belonged to the student and the thesis or dissertation committee.

The Graduate School's review focuses on **grammar** and **format** rather than the scholarly content, which is the responsibility of the student and committee.

The Graduate School reviews the following key areas:

- **Organization of the pages** – preliminaries are all present and in the correct order;
- **Format** - print font, margins, and page numbering are all correct;
- **Grammar and spelling** – the Graduate School will review the manuscript for spelling errors and to ensure that the sentences and use of English are grammatically correct;
- **References** – bibliographies will be reviewed to ensure that all references and quotations are included and correctly formatted;
- **Abstract** – this will be read to ensure that it satisfies the Graduate School requirements for length and content;
- **Table of Contents, List of Figures, List of Tables** – these will be reviewed to ensure that wording is consistent between table/list and main body of the manuscript; and

- **Publishing Agreement and Survey of Earned Doctorates** – the Graduate School will ensure that all necessary forms have been completed and signed.

If, in reviewing a manuscript, the Graduate School determines that major corrections must be made, the dissertation will be rejected for a more thorough editing and proofing by the student and the Committee Chair. Thereafter, a changed pdf must be re-submitted using the online electronic submission process.

If the Graduate School requires minor corrections to the dissertation, the student will need to complete these within the deadline set by the Graduate School (typically 10 days) and create a changed pdf file for re-submission.

The student will be notified under either of the above instances via email, please make sure that the email address input to the UMI Administrator is current and valid as **ALL** ETD correspondence will be made using this address.

Once the dissertation has been approved by the Graduate School, the student will also receive confirmation via email.

Publication Requirements

You can make your work available either as soon as it is published under either of the above publishing options or place an embargo (delay) for one of the following periods of time: 6 months, 1 year, 2 years, or 5 years. The decision to place an embargo on your work must be made in conjunction with your committee advisor and funding agency.

Candidates must satisfy publication requirements by having their dissertations published online with ProQuest/UMI and through the University of Alabama Libraries. There is no charge for the Traditional Publishing option with ProQuest, and this is the recommended choice. Students will satisfy the requirement for wide dissemination of their material by publishing the ETD "Open Access" with UA Libraries, for which there is also no charge. Where an embargo period is selected, the student must ensure that the same period is selected with both ProQuest and UA Libraries.

Time Limits for Degree Completion Requirements

Although the UA Graduate School has established a nine-year time-to-degree deadline for PhD students, entering Social Work PhD students have a seven-year internal deadline to complete the degree. Students who reach Year 7 will be held accountable for reaching due dates and deadlines distributed each year. If a student fails to meet a due date or deadline in Year 7, yet wants to pursue degree completion, the student must apply for an extension to the social work degree completion deadline.

To apply for an extension, a student should prepare a statement explaining why an extension is justified and why the student is confident he or she will be able to meet new deadlines if an extension is granted.

The statement must first be approved in writing (e.g., via e-mail) by the student's advisor. Prior to approval, the advisor has the option of convening the full dissertation committee for consultation.

If the extension request is approved by the student's advisor, the statement and advisor's approval should be forwarded to the PhD program director. If the PhD program director approves the extension request, they will work with the School of Social Work registrar to propose new due dates and deadlines. The PhD program director will submit a memo explaining their reasons for supporting an extension, the proposed new due dates and deadlines, the advisor's approval, and the student

statement to the Associate Dean for Academic Programs and the Dean for their approval.

If a request is approved by all parties, the student must agree in writing to meet the newly established due dates and deadlines. After approval and student agreement, if a student fails to meet any due dates or deadlines, the student's registration can be dropped and he or she can be dismissed from the School of Social Work.

No School of Social Work extensions will extend beyond the UA Graduate School's graduation deadline.

Student Progress Requirement

Every spring semester, each student in the PhD Program completes the *Doctoral Student Planning and Annual Review Form* with advisor assistance.

The form is to be submitted to the PhD Program Director, along with current *curriculum vitae*. Together with reports from the student's advisor, instructors of courses the student has taken, and supervisors of the student's graduate research and teaching assistantships, this information provides the basis for an Annual Review of each PhD student's progress in the program conducted by the PhD Program Committee. Attendance by the student at the end of year annual review is mandatory. Attendance by the advisor is highly recommended.

Additional Academic Requirements

Professional Preparedness Review Policy

Members of the School of Social Work community have an obligation to the social work profession to make reasonable efforts to ensure that graduates of its professional programs are emotionally and ethically prepared for the demands of ethical practice. This duty is consistent with the Code of Ethics of the National Association of Social Workers (2.09, 2.10 and 2.11) and with the objectives of our academic programs that require students to "understand the value base of the profession and its ethical standards and principles and practice accordingly."

Therefore, the appropriate program director will consult with any student in his/her respective program who (a) exhibits "impairment that is due to personal problems, psychosocial distress, substance abuse, or mental health difficulties" that is deemed by that program director likely to interfere with social work practice effectiveness, or (b) who engages in other behavior proscribed by the National Association of Social Workers. The program chair will (if appropriate) make reasonable efforts to assist the student in resolving behavioral concerns regarding the student's ability to practice effectively and responsibly in the social work profession.

The results of this student/program director consultation may include:

- a) a determination that the alleged behavior does not constitute an ethical violation or impairment serious enough to interfere with practice effectiveness;
- b) the development of a plan for remediation of the behavior while the student continues in the social work program;
- c) the student's temporary withdrawal from the social work program; or
- d) the student's indefinite withdrawal from the social work program.

Academic Misconduct Information

Graduate School information on Academic Misconduct.

Withdrawal and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 244).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 255).

Grades and Academic Standing

Students in the UA School of Social Work PhD program must meet the UA Graduate School requirements for good academic standing of a 3.0 grade point average on a 4.0 scale. Failure to meet this standard will result in dismissal from the PhD program.

Note that a grade of "I" (incomplete) should be removed within four weeks during the next term of enrollment. If a student's overall grade point average drops below a "B" as a result of the incomplete, the result could be either an academic warning or dismissal.

Graduate School information on Grades and Academic Standing (p. 28).

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation.

Financial Assistance

The PhD program is demanding and, therefore, generally requires taking a break from full-time employment. As a result, there are multiple opportunities to receive financial assistance. Most PhD students receive Graduate Assistantships in the form of Graduate Research Assistantship and Graduate Teaching Assistantship positions, which provide full tuition scholarships, health insurance, and monthly stipends. Others receive fellowships from the Graduate Council or external sources. There are also opportunities for employment as an instructor in the School of Social Work's BSW Programs and as Graduate Research Assistants on externally funded research grants (no separate application for these funding opportunities is necessary as part of the program application process). In recent years, full-time students have received at least three years of financial support (unless other options were available to the student). The PhD Program aims to continue providing support for students for a minimum of three years, given the student's substantial continued progress in the program and the program's adequate financial resources. For more information about financial assistance for graduate students in the School of Social Work, contact the PhD Program Director.

Graduate Assistantships

A limited number of Graduate Assistantships are available for PhD students. Three duties of Assistantships are offered and assigned based on the needs of the School and faculty with acknowledgment of the preferences of the student. Graduate assistants are expected to provide service to a supervisor, usually a faculty member. The School of Social Work typically offers .50 FTE graduate assistantships, although .25 FTE graduate assistantships are possible. A student with a .25 FTE graduate assistantship is expected to provide 10 hours of service per week and receives a 50 percent tuition scholarship, partial payment of health insurance, and a monthly stipend; a student with a .50 FTE graduate assistantship is expected to provide 20 hours of service per week.

and receives a 100 percent tuition scholarship, full payment of health insurance, and a monthly stipend. Any student who has an assistantship may not be employed more than at a .50 status. Graduate School policy does not allow for overloads. Please see the Graduate School policy about the minimum required enrollment for tuition-bearing assistantships or fellowships.

A Graduate Administrative Assistant is assigned to an administrator to assist with some aspects of the School's administration. A Graduate Research Assistant is assigned to a faculty member to assist with research. Duties may include literature searches and reviews, data analysis, drafting of sections of proposals or articles, or any other aspect of research. A Graduate Teaching Assistant is assigned to a faculty member to provide assistance in teaching either a BSW- or MSW-level course. Duties may include developing course activities, grading assignments, giving lectures, leading discussions, or any other aspects of the teaching process. At times, a student may have a .25 teaching assistantship with one professor and a .25 research assistantship with another professor. It is important for the supervisor and the student to be clear about expectations and responsibilities. Students with a GTA may also be assigned to teach independently after completion of the teaching preparation required in the PhD program.

Continuation of Graduate Assistantships at any time is contingent upon continued enrollment in the School of Social Work PhD program, the availability of funding, satisfactory progress toward your degree objectives, remaining in good academic standing (3.0 or better overall GPA), and satisfactorily completing the duties associated with the assistantship.

Students in the School of Social Work PhD Program may hold graduate assistantships administered by other divisions of the University.

Fellowships and Scholarships Administered by the School

Several endowed scholarships are awarded to BSW, MSW, or PhD students at the discretion of the Associate Dean of Educational Programs and Student Services and/or the scholarship committee. Please see the School of Social Work Financial Aid webpage for more information. Typically, scholarships awarded to PhD students are awarded based on student performance in the PhD program. Several scholarships have been established specifically for PhD students.

The Ben Avis Orcutt Fellowship is awarded to a PhD student who has displayed outstanding dedication and commitment to the social work profession. The recipient of the scholarship has the MSW and two years of competent social work practice. To promote doctoral education at the University of Alabama School of Social Work, Dr. Ben Avis Orcutt and others established the Ben Avis Orcutt Endowed Doctoral Fellowship Fund in 1984. Dr. Orcutt served as Professor of Social Work and Director of the Doctoral Program at the University from 1976 until she retired in 1983.

The Ben Avis Orcutt Summer Fellowship Program allows for summer support of doctoral students who would otherwise face hardship in continuing their academic work between the spring and fall semesters when other assistantships and academic employment might be more available. The PhD Program solicits application for these funds during the academic year preceding the summer for which the support would be intended. This Fellowship Program was funded from 2021 through 2025.

The Leslie J. Shellhase Endowed Scholarship for Doctoral Students in Social Work is awarded to an outstanding PhD student. It is specifically intended to provide support for a student who is beginning work on the

dissertation. The late Dr. Leslie Shellhase established the scholarship in 1994 to promote the education of deserving students pursuing a PhD degree in social work at The University of Alabama. Priority consideration for this scholarship is given to students who have been advanced to candidacy for degree. Dr. Shellhase was instrumental in the founding of the doctoral program and served on the Doctoral Program Committee from the time of its inception until he retired.

The Social Work Board of Friends Summer Research and Education Scholarships. Historically, each summer scholarships are awarded to PhD students by the SW Board of Friends. These scholarships require an application. A research scholarship is intended to support a summer writing project. An education scholarship is intended to support summer course work.

Each spring the PhD Program Director notifies students of the application guidelines and due dates.

Fellowships Administered by the Graduate School and External Organizations

A number of fellowships and other awards are administered by the Graduate School and by external organizations. For more information, see the Graduate School's Financial Assistance webpage.

Office of Student Financial Aid

To apply for financial assistance through other sources, students may contact the Office of Student Financial Aid, 106 Student Services Center, (205)348-6756. Assistance can take the form of scholarships, grants, or loans.

Conference Attendance and Research Funding

School of Social Work (SSW) PhD students can receive funding to partially cover costs for travel to academic conferences and to support research endeavors. Pending the availability of funding, students can apply to receive:

- Up to \$1,000 (combining SSW and Graduate School funds) when presenting at a conference for one conference in the academic year;
- Up to \$700 per academic year from the SSW when presenting at a conference for up to two additional conferences in the academic year (dependent on availability of funding);
- Up to \$500 (from SSW only) for conference registration and partial costs for travel to an academic conference when not presenting for one conference in the academic year. Please note that funding requests to support presentations will take priority over those for attendance only.

Research Funding: SSW PhD Students can receive funding to defray costs of research up to \$600 (combining Graduate School and School of Social Work match funds). For Research Awards, priority goes to pre-dissertation or dissertation research. Funds may be used for travel related to data collection and exploratory research or for the processing of data or equipment.

See the PhD Program Toolkit linked on the PhD Program Website for application procedures.

Interdisciplinary Programs

Interdisciplinary Studies (p. 803)

Materials Science (MTLS) (p. 810)

Interdisciplinary Studies

- Majors
 - Interdisciplinary Studies, MA (p. 804)
 - Interdisciplinary Studies, MS (p. 805)
 - Interdisciplinary Studies, PhD (p. 807)

Coordinator

- Dr. Andrew Goodliffe, Associate Dean

Unlike other programs at The University of Alabama, the Interdisciplinary Studies Masters and Doctoral programs are administered directly by the Graduate School, not an academic department. Consequently, there is not a pool of research or teaching assistantships available to students in the program. Many full-time Interdisciplinary Ph.D. student do receive assistantship funding from their home department (usually through their advisor). Interdisciplinary Studies students are eligible for Graduate School fellowships. Please see financial assistance (p. 254) page in this catalog for more details.

IDGR597 Non-Thesis Research

Hours 1-6

This independent study course provides master's students the opportunity to engage in research under the direct supervision of a graduate faculty mentor. Students will design, implement, and analyze research projects that contribute to their field of study, focusing on developing expertise in research methodologies, data interpretation, and scholarly writing. This pass/fail course is designed to foster skills and knowledge that support future dissertation work or other scholarly pursuits. Regular progress reports and meetings with the faculty supervisor are required.

IDGR598 Capstone Project Practicum

Hours 3-6

A workplace-based internship or practicum during which the principles learned in Interdisciplinary Master's coursework will be integrated into a real-world setting, to solve a problem (the "capstone project"). Under the supervision of the advisory committee, students will develop and present the results of their Capstone Project in both written and oral form.

IDGR599 Thesis Research

Hours 1-6

This independent research course partially fulfills required research hours toward a Plan I interdisciplinary master's degree. A minimum of 6 thesis research hours are required, at 1-6 hours per semester. The course is conducted under the guidance of the primary advisor, with support from the advisory committee. Material covered will be of an advanced nature aimed at providing students with an understanding of the latest research and current developments within the field. Discussion and advisor guidance will be focused on readings of research articles and development of research methodology, with the aim of producing an original thesis evidencing research capacity, independent thought, integration of the disciplines represented in the plan of study, and the student's ability to interpret research materials in the student's field.

IDGR650 Preparing Future Faculty and Scholars

Hours 1

The Preparing Future Faculty & Scholars course is designed to provide Doctoral and MFA students with a series of topics, discussions, and activities that expose them more fully to the realities of post-graduate life inside and outside of academia. Through participation in coursework, workshops, online training, and/or mentoring, this course increases students' awareness of expectations for pre-tenure faculty performance, in addition to the foundational information needed to find, sustain, and enhance their future in academia and/or non-academic careers.

IDGR651 Innovation and Commercialization in Academic Research

Hours 1

This advanced graduate seminar course is designed for doctoral students who aspire to transform their scientific research into marketable innovations. It provides a comprehensive overview of the journey from laboratory discovery to commercial product or service. The curriculum blends theoretical knowledge with practical insights, equipping students with the tools and strategies necessary for successful commercialization.

IDGR698 Non-Dissertation Research

Hours 1-6

This independent study course provides doctoral students the opportunity to engage in doctoral-level research under the direct supervision of a graduate faculty mentor. Students will design, implement, and analyze research projects that contribute to their field of study, focusing on developing expertise in research methodologies, data interpretation, and scholarly writing. This pass/fail course is designed to foster skills and knowledge that support future dissertation work or other scholarly pursuits. Regular progress reports and meetings with the faculty supervisor are required.

IDGR699 Dissertation Research

Hours 1-12

Dissertation Research.

Each Interdisciplinary Studies student is assigned a home department. It is the intention of the Graduate School that this student is given the same access to departmental resources as any other student in that department. In addition to the traditional departmental resources, it is intended that all Interdisciplinary Studies students take full advantage of professional development resources offered through the Graduate School and other units on campus.

Interdisciplinary Studies, MA

The goal of the Interdisciplinary Studies MA program is to train bachelor's degree recipients in new and emerging areas that lie at the intersection of two or more disciplines. A student can tailor the program to their professional goals and interests. The Interdisciplinary Studies MA program is intended for those whose degree goals are focused in the arts and humanities. Upon completion of the program, graduates will be able to critically examine multiple sources of information, formulating responses to particular problems or questions. They will be able to demonstrate communication skills relevant to their disciplinary focuses and show competence in the processes of inquiry, at a level appropriate to a master's degree.

Participants in the program can choose to follow a thesis (Plan I) or non-thesis (Plan II) track. Those following the thesis track must demonstrate their ability to articulate and address a research question utilizing appropriate methodologies. Non-thesis students must complete a Capstone Project. Through this project, they must demonstrate leadership and problem-solving skills relevant to their professional field. The Capstone Project can involve a graded internship.

The Interdisciplinary Studies MA as a Vessel Degree

Students who have earned one or more graduate certificates as non-degree-seeking students may be able to apply their certificates toward the Interdisciplinary Studies master's degree. In this situation, related graduate certificates are connected to a coherent master's degree through a Capstone Project.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. 3 letters of recommendation
2. A CV/resume.
3. The answers to four directed questions (used in place of a Statement of Purpose)
 - What are the academic disciplines at The University of Alabama from which you propose to draw classes? If you are applying to complete this program online, these classes must be available at the graduate (masters/doctoral) level in online format.
 - Describe your academic and/or professional preparation and how this relates to the Interdisciplinary Master's program that you envision.
 - Describe the personal and/or professional goals that you wish to achieve by completing the Interdisciplinary Master's program.
 - The final stage of the Interdisciplinary Master's program involves a thesis or project that pulls together the different types of expertise you will have acquired. If you have an idea now about the potential focus of that thesis or project – a question you might explore or a problem you might solve - please briefly describe that idea. (We recognize that this idea may evolve during the course of your studies.)

Upon submission, the Graduate School will form an application review committee comprising graduate program directors from the two to three departments identified in your statement of purpose. If there are questions regarding the statement of purpose or program/career goals, the applicant will be contacted for clarification. The initial review

committee will make the admission recommendation to the Graduate School.

Post-Admission

On admission, students will be assigned to a home department. Students will form an advisory committee representative of two to three disciplines involved in the Plan of Study. This committee, led by the primary advisor, who is from the home department, will work with the student to formulate the Plan of Study. The Plan of Study will include the decision of whether to follow Plan I (thesis option) or Plan II (Capstone Project option). The Plan of Study will also include the advisory committee's decision regarding the format of the comprehensive exam, Capstone Project, and/or the thesis defense. Students pursuing the thesis option will be encouraged to take a research methods or theory course in one of the participating departments during their first semesters. Advisors may wish to have students enroll in an independent study course during the first semester, during which they create an in-depth proposal to be approved by the advisory committee.

Curricular Requirement

The Interdisciplinary MA requires the completion of 30 semester hours

Thesis Option

Elective Courses		Hours
Elective Courses		24
IDGR 599	Thesis Research	6
Total Hours		30

Non-Thesis Option

Code and Title		Hours
Elective Courses		24-27
IDGR 598	Capstone Project Practicum	3 to 6
Total Hours		27-33

Transfer Credit

Graduate School information on Transfer Credit (p. 15).

Comprehensive Exam/Capstone

The content and administration of the comprehensive exam are the responsibility of the Advisor and the Advisory Committee and are determined post admission (preferably before the start of classes). Typically the format of the comprehensive examination will follow that described in the Graduate Catalog for the home department. The comprehensive examination can be retaken once. The Advisory Committee Chair must inform the Graduate School of the results of the comprehensive exam.

The Capstone Project is the culminating experience of the non-thesis path. The Capstone Program will consist of a written report and a presentation, public performance, exhibition, or other product that can be assessed by the three-member faculty committee. This assessment will constitute the final examination.

Fieldwork/Practicum/Internship Requirements:

Students who choose to pursue the Capstone Project option may opt to enroll in credit-bearing or non-credit-bearing internships or practicums (IDGR 598 Capstone Project Practicum). These work-based learning activities may be, but are not required to be, related to their current field

of employment. The internship or practicum would provide the real-world data and experience for the research and defense of the Capstone Project.

Plan I – Thesis Process Requirements

Students electing the Thesis option (Plan I) will follow Graduate School guidelines for all such programs, naming an advisory committee consisting of two co-directors and a third member drawn from one of the participating disciplines. All members must be approved as graduate faculty by the Dean of the Graduate School. The thesis must involve a written manuscript and a final oral defense. The results of the defense must be reported promptly to the Dean of the Graduate School on appropriate forms. A student may take the final oral examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Human Subjects: If human subjects are involved, the student and his/her Advisor/Chair are responsible for complying with the Institutional Review Board requirements before beginning research.

Plan II – Non-Thesis Process Requirements

Non-thesis students will enroll in 3-6 hours of IDGR 598 Capstone Project Practicum (or the 598 course of one of the participating departments) while carrying out the requirements of the Capstone Project. These courses will constitute part of the 30-hour coursework requirement of Plan II. The final assessment for the Capstone Project must take place at least two weeks before the date of graduation, and the results reported promptly to the Dean of the Graduate School on appropriate forms. A student may take the final examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Time Limits for Degree Completion

Interdisciplinary Studies, MS

The goal of the Interdisciplinary Studies MS program is to train bachelor's degree recipients in new and emerging areas that lie at the intersection of two or more disciplines. A student can tailor the program to their professional goals and interests. The Interdisciplinary Studies MS program is intended for those whose degree goals are focused in the STEM fields. Upon completion of the program, graduates will be able to critically examine multiple sources of information, formulating responses to particular problems or questions. They will be able to demonstrate communication skills relevant to their disciplinary focuses and show competence in the processes of inquiry, at a level appropriate to a master's degree.

Participants in the program can choose to follow a thesis (Plan I) or non-thesis (Plan II) track. Those following the thesis track must demonstrate their ability to articulate and address a research question utilizing appropriate methodologies. Non-thesis students must complete a Capstone Project. Through this project, they must demonstrate leadership and problem-solving skills relevant to their professional field. The Capstone Project can involve a graded internship.

The Interdisciplinary Studies MS as a Vessel Degree

Students who have earned one or more graduate certificates as non-degree-seeking students may be able to apply their certificates toward the Interdisciplinary Studies master's degree. In this situation, related graduate certificates are connected to a coherent master's degree through a Capstone Project.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. 3 letters of recommendation
2. A CV/resume.

Interdisciplinary Studies, Ph.D.

The Interdisciplinary Studies Ph.D. program is designed for highly motivated students whose goals for research and classwork do not fit into one of The University of Alabama department-based Ph.D. programs. There is no such thing as a "typical" IDS Ph.D. student. Students have ranged in age from 22 to 85. Although many Interdisciplinary Studies Ph.D. students pursue their studies full time, others are working professionals who balance their studies with full time employment. As a pre-requisite to admission, IDS Ph.D. students work with the Graduate School to identify faculty members who can help guide the proposed research. The Graduate School also works with prospective students to make sure that we can support your research goals with classes that are offered at The University of Alabama.

To ensure that The University of Alabama can help students achieve research, classwork and career goals, all prospective students must meet with the Graduate School Associate Dean for Admissions, Recruitment, and Fellowships (amg@ua.edu) prior to starting an application for the Interdisciplinary Studies, PhD. The Associate Dean will help prospective students identify a home department, advisor and advisory committee members (a prerequisite for admission).

To be eligible for consideration, prospective candidates must meet the following criteria:

1. A completed master's degree (at the time of admission) or its equivalent from an accredited university.
2. GPA of 3.3 or higher (on a 4.0 scale) or equivalent. If the GPA is less than a 3.3, there must be other areas of strength that demonstrate excellence.

Note: The Interdisciplinary Studies, PhD program is not available to students who have been unsuccessful in previous graduate work.

Admissions

Prospective Interdisciplinary Studies (IDS) Ph.D. students are required to meet with the Graduate School Associate Dean for Admissions, Recruitment and Fellowships to discuss program fit. During this meeting, ideally held prior to application submission, the research, classwork, and career goals of the prospective student are discussed. If the program goals are a good fit with the IDS Ph.D. program, potential advisory committee members will be considered for additional meetings.

In addition to the initial meeting with the Graduate School Associate Dean for Admissions, Recruitment and Fellowships, required application materials include:

1. Transcripts showing a completed master's degree (at the time of admission) or equivalent from an accredited university. GPA of 3.3 or higher (on a 4.0 scale) or equivalent. Admission with Permission to Continue is not permitted for the IDS Ph.D. program.
2. The email addresses of three recommenders.
3. A CV/resumé.
4. Language scores (for non-native English speakers; conditional language admission is not permitted).
5. Statement of purpose. The Statement of Purpose is where the applicant will discuss professional/academic preparation, the reason for choosing The University of Alabama, research goals and intended future career path.

6. A complete IDS Ph.D. form. This will be circulated among the committee members, home department Chair, and prospective student by the Graduate School Associate Dean for Admissions, Recruitment and Fellowships). This form will include:
 - a. A statement of proposed research. This one to two-page document must include:
 - i. The research question that will be addressed
 - ii. The significance of the research
 - iii. A brief literature review describing the present state of the research question
 - iv. The objectives of the research
 - v. The methods that will be used
 - vi. A description of how the proposed research will build on the existing literature, including the gap in the field that will be filled by this research.
 - vii. A clear indication of a minimum of two distinct fields that will be incorporated into the research.
 - b. The names and emails addresses of five Advisory Committee members, including an Advisor/Chair. All committee members must be members of the Graduate Faculty at The University of Alabama. The applicant's Advisory Committee chair is expected to have competence in the proposed major area(s) of study and be willing to devote time to being an academic mentor for the student throughout the Ph.D. program. The Advisory Committee Chair and at least one additional committee member must have experience in directing and supervising doctoral-level research.
 - c. The name of the home department. The home department or program will include the IDS Ph.D. student in the intellectual-social life of the unit, e.g., department mailing lists, colloquia, social functions, etc. The home department may also consider an IDS Ph.D. student for Graduate Teaching Assistant and Graduate Research Assistant appointments, and for office space.
 - d. Proposed course list. In consultation with the Advisory Committee and Advisor/Chair, the prospective IDS Ph.D. student will create a preliminary plan of study. This must include transfer classes (up to half of the required coursework), classes to be taken at The University of Alabama, and dissertation research hours. The following is required:
 - i. A minimum of 36 hours of coursework (not including 18 hours of dissertation research)
 - ii. the majority of the courses must be at the doctoral level
 - iii. the courses should clearly reflect at least two different academic departments
 - iv. the coursework must include a minimum of 15 hours in research methods or research theory and design theory, and/or design courses
 - e. Written explanation (prepared by the proposed Advisor in consultation with the Advisory Committee) explaining how the comprehensive examination requirement will be fulfilled. It is expected that the comprehensive examination for the IDS Ph.D. will be as rigorous and use the same general procedures as the home department. The specifics of the examination (including where the exam will be taken, the number of questions, the number of evaluators, the grading process, the process for reporting results to the student, etc.) will be detailed.

The application materials, once submitted, will be reviewed by the proposed Advisory Committee members.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Code and Title	Hours
Elective Courses	21
Research Methods or Research Theory and Design	15
IDGR 699 Dissertation Research	18
Total Hours	54

The University of Alabama Graduate School requires that IDS Ph.D. students complete a minimum of 36 hours of coursework reflecting two or more distinct academic areas. The coursework should include a minimum of 15 hours in research methods or research theory and design. The majority of this coursework should be at the 600 level. In addition, 18 hours of dissertation research must be completed. All students are encouraged to take AHE 591 Seminar Higher Education if the course is offered during the first 4 semesters of coursework.

Advanced Drug Delivery Concentration

Advanced Drug Delivery Coursework	Hours
Required Courses for the Concentration	
TSM 660 Drug Delivery	4
TSM 661 Imaginary Logic to DD	1
BSC 530 Introduction to Pharmacology	3
BSC 535 Immunology	4
Note: With advisor's approval, listed BSC courses may be replaced with other courses based on previous academic/professional experience and current course offerings.

Dissertation Research	
IDGR 699	Dissertation Research
Total Hours	

As stated above, the Interdisciplinary Studies PhD program requires all students to have (a) coursework from two or more distinct academic areas, (b) at least 18 hours of dissertation research, (c) a minimum of 15 hours in research methods or research theory and design, and (d) a majority of courses at the 600 level (<https://catalog.ua.edu/graduate/interdisciplinary-program/interdisciplinary-studies/phd/#requirementstext>).

The proposed list of coursework for the Advanced Drug Delivery concentration meets these requirements. Coursework is from multiple academic areas across campus. Required courses are from the College of Community Health Sciences and Biological Sciences. The research methods coursework requires 9 hours of classes from the

College of Community Health Sciences and 6 additional hours from Biological Sciences, Chemistry, Engineering, or other disciplines. The interdisciplinary electives are from eleven programs across campus. The interdisciplinary nature of this concentration is also reinforced through its participating faculty (listed below) and support from multiple departments across campus (see attached letters of support).

Participating Faculty

College of Community Health Sciences

Arora, Meenakshi
Ganugula, Raghu
Kumar, M. N. V. Ravi

Department of Biological Sciences

Caldwell, Guy
Caldwell, Kimberly
Chtarbanova-Rudloff, Stanislava
Ciesla, Lukasz
Kim, Brandon

Department of Chemical & Biological Engineering

Bao, Yuping
Kim, John
Rao, Shreyas
Zhao, Chao

Department of Computer Science

Gong, Jiaqi (Jackey)

Department of Chemistry and Biochemistry

Ghosh, Ayanjeet

Department of Human Nutrition and Hospitality Management

Crowe-White, Kristi
Park, Han-A

Department of Civil, Construction and Environmental Engineering

Clement, Prabhakar
Jiang, Daqian

Transfer Credit

Up to half of the required graduate, coursework hours may be transferred from other institutions with the approval of the Advisory Committee.

Doctoral Plan of Study

For IDS Ph.D. students, an initial Plan of Study was established during the admission process in consultation with the Advisory Committee and Advisor/Chair. Any changes to the Plan of Study require the approval of the Advisory Committee and Advisor/Chair.

See the Graduate School Policy on Doctoral Plan of Study (p. 21).

Comprehensive Exam

The content and administration of the comprehensive exam are the responsibility of the Advisor and Advisory Committee and are determined at the time of admission. The comprehensive examination is taken just before the completion of all coursework. The comprehensive

examination can be retaken once. The Advisory Committee Chair must inform the Graduate School Associate Dean for Admissions, Recruitment, and Fellowships of the results of the comprehensive exam and submit the completed IDS Comprehensive Examination Rubric.

Admission to Candidacy Requirements

When the Advisory Committee, using the Admission to Candidacy form, certifies to the Graduate School that the comprehensive exam has been passed and all other requirements set out in the Plan of Study (except the completion of dissertation research hours) have been satisfactorily completed, the Graduate School admits the student to candidacy.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 21).

Dissertation Requirements

Human Subjects: If human subjects are involved, the student and his/her Advisor/Chair are responsible for complying with the Institutional Review Board requirements before beginning research.

Committee: The Advisory Committee formed on admission to the program continues to serve for the duration of the program.

Dissertation Proposal: The purpose of the dissertation proposal defense is to evaluate the potential of the student to complete the dissertation research project. It comprises an oral presentation of a written dissertation proposal, focusing on areas relevant to the dissertation research. The dissertation proposal defense may be retaken once. All Advisory Committee members must be in attendance for the duration of the defense. The Advisory Committee Chair must inform the Graduate School Associate Dean for Admissions, Recruitment, and Fellowships of the results of the dissertation proposal.

Dissertation Research Hours: Interdisciplinary PhD students are not permitted to enroll in dissertation research hours (IDGR 699) prior to admission to candidacy. The required 18 credit hours must be taken as IDGR 699. Any IDGR 699 hours taken must be accompanied by a syllabus that includes: 1) specific learning outcomes for the semester; and 2) how the learning outcome must be satisfied to earn a passing grade. The instructor of record (normally the Advisor) must upload the syllabus to The University of Alabama Simple Syllabus site.

Final Oral Examination: The final oral exam for the Ph.D. is administered and evaluated by the Advisory Committee. The Graduate School must be notified of the date of the oral examination at least one month in advance. Final oral examinations are open to the University community. The examination must be scheduled such that a representative from the Graduate School can attend. The Committee Advisor/Chair should inform the Associate Dean of the Graduate School of the results of the final oral exam using the Doctoral Final Defense form and submit a completed IDS Final Oral Examination Rubric.

Submission of Dissertation: An outcome of the final oral examination is almost always additional edits to the dissertation. It is at this stage that Interdisciplinary Ph.D. students are encouraged to use a copy editor to ensure that the final dissertation meets the requirements of the Graduate School. Approval of the final version of the dissertation by the committee is indicated by the completion of the Committee Acceptance Form by the advisor. The student must upload a PDF-formatted version of the final dissertation to ProQuest. Should additional edits be required, the Graduate School will contact the student.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 15).

Student Progress Requirement

Degree Progression: Interdisciplinary Studies Ph.D. students must ensure that coursework is completed in a timely manner and that satisfactory progress is made towards completing all degree requirements (coursework, comprehensive exam, admission to candidacy, dissertation proposal, dissertation research, and final oral examination). All requirements must be completed within the time limits specified in the Graduate Catalog at the time of admission.

Candidacy: It is expected that full-time students will have advanced to candidacy by the beginning of the third year in the program. Failure to advance to candidacy before the end of the fourth year in the program is grounds for dismissal.

Dissertation Proposal: The dissertation proposal requirement must be fulfilled no later than one year after advancement to candidacy. Failure to complete this requirement within one year of advancement to candidacy is grounds for dismissal.

Advisory Committee Meetings: During each year of the program, there must be at least one meeting between the student and the Advisory Committee to review progress. The student is responsible for scheduling this meeting such that all members can be in attendance either in person or virtually (e.g. via Zoom). Individual meetings or communications via email cannot be used as a substitute for this meeting.

Annual Report: Each Interdisciplinary Studies PhD student will, in collaboration with their Advisor, prepare an annual written summary of progress towards degree requirements. This report will be due to the Associate Dean for Admissions, Recruitment and Fellowships (amg@ua.edu) on the Monday following finals week each year.

Annual Meeting: Following submission of the progress report, the student will schedule a 60 minute meeting (to be attended by the student, Advisor, and Associate Dean for Admissions, Recruitment and Fellowships (amg@ua.edu)). This meeting must be completed by the end of May each year.

Materials Science (MTLS)

The University of Alabama (UA), The University of Alabama at Birmingham (UAB), and The University of Alabama in Huntsville (UAH) offer a joint interdisciplinary program leading to a doctor of philosophy degree in materials science. The PhD program in materials science is coordinated by the Tricampus Materials Science Coordinating Committee. On each campus, the program is administered by the Campus Materials Science Program Committee.

For practical purposes, students will matriculate at a single campus. Once the student chooses a campus, that campus becomes the home campus, and the student's records will be managed by the graduate school on that campus. However, once registered at one campus, a student is free to pursue, with minimum barriers, coursework or research opportunities at the other University of Alabama System campuses. Some courses may require travel to the other campuses, alternately some courses are offered online.

At all three universities, the interdisciplinary PhD program in materials science draws on various colleges and academic divisions. At UA, the program is supported by departments in both the College of Arts and Sciences and the College of Engineering. At UAB, the Schools of Medicine, Dentistry, and Optometry are involved, as are the School of Engineering and the School of Natural Science and Mathematics. At UAH, the College of Engineering and the College of Science participate in the program. The degree awarded to each successful candidate is the PhD Degree in Materials Science.

- Majors
 - Materials Science (Ph.D.) (p. 810)

UA Program Director

- Professor Mark L. Weaver

Materials Science, Ph.D.

Doctor of Philosophy in Materials Science

The Materials Science PhD Program is an interdisciplinary, interdepartmental, and intercampus doctoral program linking the three universities that comprise the University of Alabama System – the University of Alabama (UA), in Tuscaloosa, the University of Alabama at Birmingham (UAB), and the University of Alabama in Huntsville (UAH) – through the Tri-Campus Materials Science PhD Program.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. A CV/resume
2. Three (3) letters of recommendation

Approved Shared Content from /shared/grad-admission-criteria/
Last Approved: Apr 23, 2024 12:18pm

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Per UA Graduate School requirements, enrolled doctoral students must complete a minimum of 48 coursework hours, of which 80% or 38 credits must be grade-based and 20% or 10 credits pass/fail, and 24 hours of dissertation research. Graded courses must be in the 5xx/6xx level; pass/fail courses may include department graduate seminar enrollment, non-dissertation research credit, etc.

The materials science program requires a minimum of 6 credits (two courses) in each of the three themed topic areas:

1. Structure and Properties of Materials
2. Characterization and Testing
3. Thermodynamics and Processing.

Of the coursework credits, an enrolled doctoral students must take a minimum of 6 credits (i.e., two courses) outside of their home department to ensure an interdisciplinary education.

Core/Required Courses	Hours
Core/Required Courses	
Structure and Properties of Materials	6
Characterization and Testing	6
Thermodynamics and Processing	6
Elective Courses ¹	30
Dissertation Research	24
Total Hours	72

¹ Courses must be advisor approved. At least 6 elective hours must be from outside the student's home department

Transfer Credit

Transfer credit requests are evaluated by the Graduate School and the Graduate Program Coordinator and follow Graduate School policy.

Doctoral Plan of Study Requirement

Please see the Graduate School Policy on Doctoral Plans of Study

Comprehensive/Qualifying Exams

After completing the core competency course requirements, the student is now eligible to complete the Dissertation Proposal Examination. The guidelines for the proposal examination are as follows:

1. The student will prepare and present a research proposal to the graduate committee that integrates the graduate course work and a literature review of the topic that demonstrates scholarly proficiency and capacity for independent, original investigation in his/her specialized field of research. This proposal should be given to the committee within two semesters after completing the core competency course requirements. This should be completed in less than three years of continuous graduate school attendance.
2. The research proposal will be written following the current National Science Foundation (NSF) grant proposal guidelines. Prior work completed in the lab by the student should be used sparingly. **The proposal is not a summary of research completed but is an accounting of what is being planned.**
3. The proposal is given to the supervisory committee **a minimum of three (3) weeks before the scheduled oral defense date** whereupon the student will answer questions related to relevant course work and the research proposal which satisfies the oral examination requirement for the doctoral degree examination.

4. The committee will read the proposal and each committee member can provide up two (2) written questions within ten (10) days of receiving the proposal. These questions provide the written portion of the doctoral degree exam. The committee chair will coordinate the collection of these questions, assemble them, and then disseminate them to the student. These questions are based upon fundamental materials science principles that can be derived from the proposal and prior course work in the plan of study. **The student will provide a written response to each question and submit them to the committee chair within five (5) days of receiving them.** The committee chairperson will then disseminate the student answers to the committee members for evaluation. As a courtesy to the committee, the primary advisor should submit the student responses to the committee at least five (5) days prior to the oral exam date.
5. At the oral examination of the proposal, the student will present a series of slides (which should be numbered) based on the written proposal. It is recommended that the number of slides be no more than twenty (20). This presentation can be open to the public and is recommended to be thirty (30) minutes. At the conclusion of the presentation, the public is excused and the oral examination by the committee members occurs. The closed-door examination is not to exceed ninety (90) minutes. The committee will ask questions related to the topic of the proposal to ascertain the student's competency of the subject, ability to compile information to conduct doctoral-level research, and follow-up questions (if necessary) related to the written responses to the questions previously provided by the committee.

Upon completion of the oral examination, the student will be excused, and the committee will discuss the quality of the student's written proposal and oral responses to the questions centered on the proposal topic as well as responses to the written questions provided earlier. A majority vote of the committee approves the student to candidacy.

If the student does not receive a majority vote, the student is eligible to resubmit a revised proposal, if directed by the committee, and the examination procedure is repeated within the next following semester. If the student is unable to receive a majority vote upon the second proposal examination, the student is ineligible to receive a doctoral degree from the program. If the vote is tied, this is equivalent to not receiving a majority positive vote.

Admission to Candidacy Requirements

To be admitted to candidacy students must successfully pass the MSE Qualifying Exam. An up-to-date Plan of Study detailing courses completed and transferred is required. Students may then start enrolling in Dissertation Research Hours upon attaining candidacy.

Continuous Enrollment Policy

Graduate School Policy

Dissertation Requirements

Students should form their dissertation committee during their first year of enrollment. A doctoral committee requires a minimum of five (5) approved graduate faculty members, with the majority being from the UA campus. The make-up of the committee must also include at least one (1) faculty member from either the UAB and/or UAH campus.

Dissertation submission deadlines, document formatting, and graduate semester enrollment requirements follow the Graduate School calendar and policy including submitting the Public Notice of a Dissertation Defense form at least two-weeks prior to the scheduled dissertation date.

Time Limits for Degree Completion Requirements

Graduate School Policy

Student Progress Requirement

Students are expected to progress through their degree program in a timely manner and with consultation with their advisor.

Additional Academic Requirements

Any ancillary requirements such as graduate teaching (aka practicum), seminar attendance, etc. will defer to the Ph.D. program requirements of the student's home department.

Acquisition of Financial Support

Students admitted to the Materials Science PhD program will be affiliated with the academic department of their advising professor. This unit will serve as the student's "home" department. Admission into the Graduate School and the Materials Science PhD program does not include a commitment of financial assistance from the program. Unfortunately, the Materials Science PhD program itself does not have assistantships or fellowships to offer.

Students in good standing in the Materials Science PhD program are generally supported by a graduate research assistantship (GRA) funded through their advisor, a graduate teaching assistantship (GTA) funded by their home academic Department, or by a fellowship which can be internal to UA or from an external source. Each type of assistantship provides an equivalent stipend and benefits along with paid tuition and fees. Funding amounts for fellowships will depend upon the fellowship program in question, but will follow all UA funding guidelines.

Being admitted to the program places the applicant on a list of students who are eligible to receive financial support from the faculty members associated with the program. Should a faculty member have funds, such as a grant or contract, that faculty member may elect to review the listing of accepted students and may potentially reach out to them to assess their availability for enrollment and support. Because faculty funding varies and potential advisors might not review the list in a timely manner, it is recommended that applicants proactively contact potential faculty with whom they have an interest in working (this is best done via email) to inquire whether the faculty member is currently seeking to add a new

student. The prospective student may wish to include their CWID and CV (resume) in that communication.

Applicants in need of financial assistance, but with no financial offers, can apply for deferment of their enrollment for up to one year through the application portal to maintain eligibility for consideration during that period.

Any questions concerning this process should be directed to the admission officer in the graduate school.

Terms of Financial Support:

The terms of financial support depend upon the funding source and the criteria set forth by the applicant's home academic Department.

Fellowship Nominations:

Eligible students who excel in the program may be nominated by the Materials Science program, their advisors, or their home academic department for UA or external fellowships. Nominees are selected by the respective entity (i.e., program, advisor, or home department) based upon prospective nominee research productivity, academic performance, and contributions. Fellowship recipients are guaranteed paid tuition and fees, a stipend, and benefits commensurate with the fellowship applied for and is generally at least commensurate with those provided through GRA or GTA support.

Performance Expectations for Continuing Financial Support:

- The student must be in good academic standing in the Materials Science PhD program.
- The student must remain clear of all infractions outlined under Conditions for Termination of Financial Support
- The student must complete all mandatory annual training and abide by all rules and policies held by The University of Alabama, The UA Graduate School, UA Environmental Health and Safety, and their home department.
- Graduate teaching assistants must adequately perform all duties assigned to them in a timely manner as defined by the instructor of record or their designee for all courses to which the student is assigned teaching, grading, and/or laboratory preparative responsibilities.

Conditions for Termination of Financial Support

Students in the Materials Science PhD program are subject to the Conditions for Termination of Financial Support outlined by their home department. Potential criteria for termination include the following:

- *Dereliction of duty.* Dereliction of duty includes but is not limited to: failure to comply with all UA safety and interpersonal conduct policies; absence from scheduled obligations without prior notification to the instructor of record or designee (for teaching assistants) or the research advisor (for research assistants); or failure to satisfactorily complete all activities associated with the funded position as defined by the instructor of record or designee (for teaching assistants) or by the research advisor (for research assistants) and the student's departmental memorandum of appointment (MOA).
- *Resolved finding of Academic Misconduct.* Penalties, including potential loss of financial support, will be determined with guidance from the UA Graduate School and/or the UA College of Arts and Sciences.
- *Failure to have a department-approved research advisor for more than one semester.* Students without an approved research advisor may not enroll in CH 660 or CH 699 courses and, therefore, cannot proceed toward degree completion. Students without an advisor may be

relegated to the Plan I Master's Program with one additional semester of financial support, at the discretion of the Graduate Director and Department Chair.

- *Loss of good academic standing.* Students not in good academic standing have one probationary academic semester after notification of their change in academic status to return to good academic standing—with the non-passing grade exception noted below. Financial support will be terminated if good academic standing is not restored by the end of the probationary academic semester. Students who earn more than two grades of 'C' or at least one grade of 'D' or 'F' in graduate courses will have a compulsory academic performance review by the Graduate Committee. This review will determine whether the student should continue to receive financial support and/or be dismissed from the program at the end of the semester in which the non-passing grade is earned or at the end of the following semester. A decision will be rendered prior to the end of the semester in which a third 'C' and/or a 'D' or 'F' grade is reported.
- *Insufficient continuous research progress.* The dissertation committee determines by majority vote if a student is making adequate research progress commensurate with their time in the program during required annual reviews. If the committee determines the student is not making adequate research progress, the student will be granted one probationary semester (i.e., academic semester or full summer term) with financial support to remedy productivity deficiencies, as assessed by the dissertation committee. Failure to meet minimum research expectations by the end of the probationary semester will result in immediate termination of financial support and may prompt relegation to the Master's Program, at the discretion of the Graduate Director and Department Chair.

Students should consult the criteria for their home department for details. They can additionally contact the Department Chair or Graduate Director from their home department for specific policies.
