Experience

Sr. Manager, Software Engineering :: Ligonier Ministries
Sanford, FL (Remote) :: 2020 - 2025
- Provide leadership and mentorship to a cross-functional team of 15+ engineers, designers, and business analysts across 4 time-zones to deliver high-quality software solutions.
- Define and execute strategic roadmap for $2M technology budget, driving 90% on-time project delivery
- Spearhead the organization, design, and development of 60+ web, mobile, backend, and integration systems utilizing Figma, TypeScript, Python, React, and React Native while enforcing best practices.
- Architect scalable solutions that reduced technical debt by 70% while strengthening security compliance and aligning with overall data strategy.

Engineering Lead :: G2i
Delray Beach, FL (Remote) :: 2019 - 2020
- Managed and led a global team of engineers across 5 time zones utilizing Figma, Gatsby, React, GraphQL, Node, and AWS.
- Implemented agile practices including daily standup and backlog grooming, leading to 30% more focused development time.
- Pioneered team and personal OKR framework that increased velocity and quarterly objectives.
- Fostered strong remote team culture through pair programming, culture meetings, and office hours, resulting in reduced onboarding times.

Chief Technology Officer :: Simpeo
Birmingham, AL (Remote) :: 2018 - 2019
- Managed personnel and collaborated with C-suite to develop company-wide product roadmap and overall technology vision.
- Drove innovation in product management, design, development, and daily operations of core product and internal pricing calculator.
- Developed company website as a PWA to increase SEO visibility and sales potential.
- Designed and built a well-documented, tested, and fully accessible internal design system and component library.
- Orchestrated the completion of multiple Gatsby, React, GraphQL, Node, and AWS projects with strict deadlines, delivered on-time and within budget.

Web Developer :: Envy Labs
Orlando, FL :: 2017 - 2018
- Committed to product exploration and preliminary research with new clients, executed new feature developments, and resolved code errors and failures.
- Focused on feature development for Cisco Systems learning platform built with Ruby on Rails.
- Built internal client dashboard to handle billing, project communication, and project analysis built with React and TypeScript.

Senior Web Applications Developer :: Viva Health, Inc.
Birmingham, AL :: 2013 - 2016
- Appointed for overall look, feel, and UX of robust enterprise-ready healthcare applications using JavaScript frameworks (Meteor, React), web services (Java), and other backend technologies.
- Served as primary technical resource for design/development of internal/external applications.
- Responsible for gathering requirements, needs analysis, design, prototypes, and wireframes.
