House Bill No. 1710

***EXPLANATORY NOTE***

This Bill seeks to create an independent and non-regulatory agency mandated to effectively investigate transportation accidents, assembling the broad spectrum of technical expertise that is needed to solve complex transportation safety problems on land, sea, and air, including railway and pipeline systems.

One of the biggest challenges in our country is the occurrence of various transportation accidents. This growing problem remains unresolved and oftentimes, agencies tasked to investigate such accidents are faced with a lot of criticism due to their failure to resolve such incidents.

Thus, the creation of the Philippine Transport Safety Board (PTSB) is necessary to take the lead in conducting an impartial investigation and provide thorough accident and incident reports that will determine the probable cause or causes thereof. This independent body shall also provide recommendations and conclusions to prevent future accidents, save lives, reduce injuries, and property damages.

PTSB shall have extensive training and experience in the respective field of marine, air, highway and rail transportation systems, and must have adequate knowledge in investigation, analysis, and evaluation of transportation accidents, particularly in the field of accident reconstruction, safety engineering, or transportation safety.

Safety in our transportation system is of primordial concern. It is indeed envisioned that the PTSB will be an effective vehicle to ensure that all modes of transportation in the country are conducted safely.

This initiative was motioned under the 18<sup>th</sup> Congress but was vetoed by the President. Hence, this measure.

In view of the foregoing, the support of the Members of the Congress is earnestly sought for the prompt passage of this bill.
