## OUR PHILOSOPHY

The Oleant philosophy is as unique as our lighting. Our sophisticated customers demand a team with creative vision, quality products, and impeccable customer service. That is precisely why these elements have become the cornerstones of our company.

**Vision:** We do not simply design lighting. We create art. By masterfully blending together the fields of astronomy and engineering, we create lighting to perfectly illuminate any room. Planetary elements such as the sun, stars, and eclipses are embedded into unique, state-of-the-art designs. Every piece is classically sculpted by hand around each individual customer's desires. The result is stunning luminaires which embody the celestial spirit of our customer's imagination. This sets us light years apart from other lighting options.

**Quality:** The quality of our luminaires exceeds all expectations. Every Oleant luminaire is hand designed and inspected by our master craftsman, Peter Danczkay. Standard luminaires are manufactured with aluminium or brass frames which evenly dissipate heat preserving the longevity of the light. Custom luminaires can be crafted with other materials, such as steel, per customer request. We hand-select and procure the highest quality LED's available for perfect, multi-directional light posing no strain on vision. Our integrated suspension and power cable allow for ease of installation and exhibits seamless beauty when installed. The final touch is a signature silky finish adorning them with the glamorous appearance our customers' desire. We pride ourselves in outshining others and stand behind the quality of our product.

**Service:** Our one-to-one customer service initiative begins before a sale is even made. You can expect to be greeted with a free, personalized consultation with Peter to discuss your needs. Our customers are provided with all requisite information so they may order the exact product to fulfill their needs. We strive to anticipate problems before they occur, and deliver promptly on all of our customer needs. Our warranties cover all facets of the luminaire for up to five years. Even after expiration of the warranty, we continue to offer our customers a sense of tranquility and assurance by consistently making ourselves available for any and all issues throughout the long life of their Oleant luminaire.

Our greatest reward is watching the light in our customers' eyes when the final product is unveiled - the moment when they witness the beauty and sophistication of an Oleant luminaire.

## OUR CREATOR

Peter Danczkay, our chief designer and lighting expert, draws inspiration from the most magnificent light fixture in the universe: the sun. While earning his degree in astronomy, Peter was captivated by the beauty of the natural, homogenous, multidirectional light of the Sun.

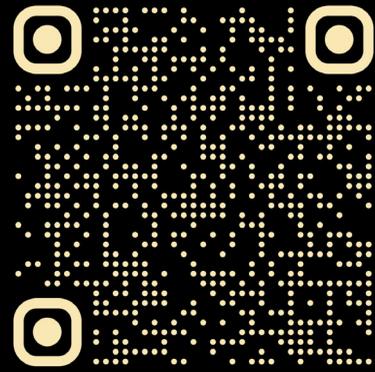

The creative and inspired use of light is perfected by detailed designs stemming from Peter's background in engineering. The fabrication of each handcrafted luminaire is directly supervised, and meticulously cared for by Peter from conception through installation.

Personalized consultations allow him to design each luminaire as an artistic expression of a customer's desires. Once designed, materials and manufacturers are hand selected for a luminous work of art intended to exceed all customer expectations. In addition to the standard light fixtures created by Oleant, Peter relishes in any opportunity to design custom lighting for both residential and commercial customers. Any room, in any space, will get an immediate, luxurious upgrade with an Oleant luminaire.

Peter has been designing lighting for those with discerning taste for over 20 years. While Canadian born, he earned degrees in Planetary and Space Science and Construction Engineering from Boston University and Stanford University in the United States. After graduating, Peter returned home to his European ancestral roots where he founded Oleant Lighting.

Peter utilized his unique background and passion for lighting as the sole inventor of Spectravibe, an adjustable 3D multicolor wave generator used in mood lighting. He was awarded a patent for this masterful work in 2000. From there, his ingenuity was further recognized at the 2002 Music Inside Rimini Exhibition in Rimini, Italy where his designs were awarded the distinguished title of "Most Innovative Product."

Today, Peter continues to perfect his craft in Budapest, Hungary celebrated by customers for his quality, creativity, and ingenuity.

WE DO NOT SIMPLY DESIGN LIGHTING. WE CREATE ART.

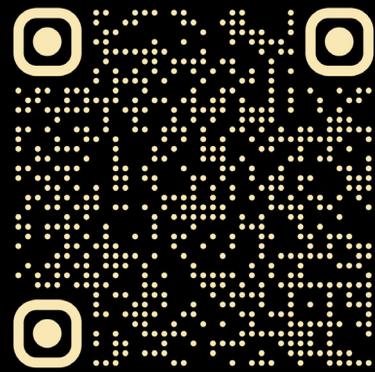

Since 2014, Oleant Lighting has served clients from 20 countries.

Every project was successful in large part due to cooperation and consultation.

Some of these projects required completely custom designs, others more "standard products".

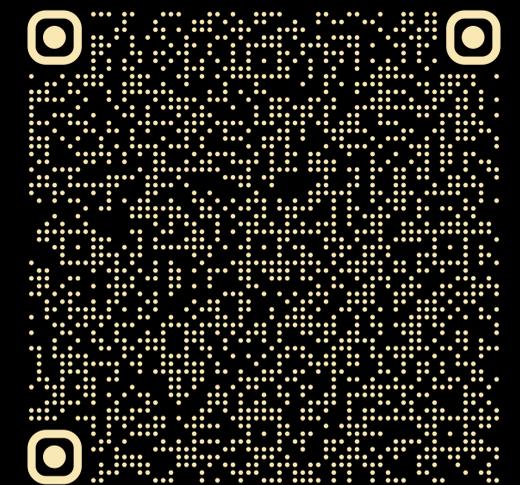

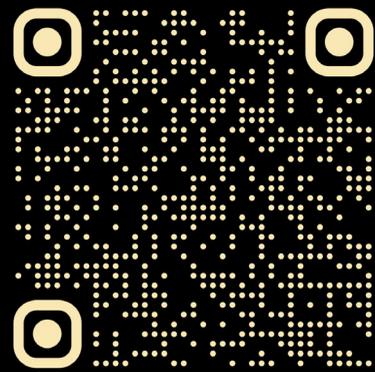

Many required novel custom solutions for suspension and control.

Oleant Lighting would like to thank all of our clients for our success, and we look forward to all future cooperation.

Respectfully,

Peter Danczkay  
CEO/ Designer
