THE 2000 SERIES

The 2000 series was created by selecting the best features of previous designs, combining them, and adding even more space.

This model greets you with a large covered front porch perfect for entertaining or enjoying a quiet evening outside. The 1st floor has an open concept featuring a kitchen and walk-in pantry. There is a powder bathroom and mudroom off the rear that leads to another great outdoor space.

The second floor consists of a spacious master bedroom and bathroom, two guest bedrooms and a bathroom. This design includes a large master closet and a separate laundry room.

The 2000 series includes a desired basement with a multipurpose living room, an additional bedroom bathroom combination, and a large storage room.
