

How to use:

1. Spray a small amount of product on indoor and outdoor areas in which you would like your pet to urinate.
2. Allow your pet to sniff the spot and praise him when he performs.
3. Continue the training process by adding an additional application and bringing your pet back to the spot often, especially after eating, drinking, playing or napping.
4. The length of time for training will depend on your individual pet and commitment to the training process.
