

**BUILDING THE
FUTURE TOGETHER**

RUBI BRINGS INNOVATION TO COVERINGS 2026 WITH ITS NEW CERAMIC TILE CUTTERS

- As major bets for this edition, RUBI will exhibit the new light and versatile DL-125 table saw and also the first battery-powered circular cutter TC-125 G2 ENERGY CAS for large formats, among other product ranges.

Rubí, 6th March 2026. RUBI is once again participating this year in Coverings exhibition from March 30th to April 2nd in Las Vegas Convention Center of Las Vegas, Nevada.

RUBI will present very relevant product innovations, designed to transform the sector. In the range of electric table saws, RUBI presents the new **DL-125 1200**, it combines **power** (2.4 HP motor) and **portability** (only 31 lb.) making it ideal for jobs where space is limited. Its wide range of cutting sizes (up to 1^{3/16}" thick and 53^{5/32}" long) make it a highly **versatile** tool.

RUBI will also exhibit the **DC-250 SMART ADVANCE, the first intelligent cutter on the market.** Able to instantly analyze the needs of the blade, the type and thickness of the material, it automatically adapts its speed and performance to ensure perfectly uniform cuts. **The true smart cut.**

In the cutting of large-format sheets, RUBI incorporates a new product within the CAS Alliance: the **TC-125 G2 ENERGY CAS, the first battery-powered circular cutter**, which slides on guides to offer a straight and mitre cut with an exceptional finish. Lightweight and compact, it lets you set up, adjust, and start cutting with unmatched ease.

In the range of manual ceramic cutters, we will continue to see the **TK monoguide tile cutter, the world's first asymmetrical monoguide tile cutter.** A cutter that maximizes the visibility of the cut, it provides a separation power of 3.307 lb. and unsurpassed precision.

Attendees will be able to learn first-hand and try out the new RUBI products of 2026, at **stand #4358.**

These product developments reflect RUBI's commitment to innovation and continuous improvement, always seeking to offer professionals solutions that not only exceed their expectations, but also increase the efficiency and productivity of their work.

About RUBI Group RUBI was founded in 1951 in the city of Rubí, Barcelona, and is now a leading brand in tools for tile cutting and installation. It has 11 subsidiaries across the five continents and recurring sales in over 120 countries. It was created by the Boada brothers (formerly Germans Boada, SA now RUBI TOOLS GROUP SA) with the aim of being the best partner for their customers by providing them with a comprehensive service and product solution. It has a focus on end users, offering them the widest range of tools to successfully tackle any tile installation project: tools for cutting, handling, transporting and installing tiles. The company constantly innovates new solutions and manufactures and markets differential products at the forefront of the sector. The aim is to make the tile fitter's work safer, easier and more efficient.
