

THE PHARMACOS COLLECTION

TYPE III PHARMACEUTICAL GRADE GLASS PACKAGING FOR PERSONAL CARE AND WELLNESS BRANDS

The PharmaCos Collection is a premium range of Type III pharmaceutical grade glass packaging engineered to meet the performance, safety, and aesthetic demands of today's beauty, personal care, pharmaceutical, and nutraceutical products. Designed to protect sensitive formulations while elevating shelf appeal, PharmaCos combines technical reliability with sustainable design—supporting brands from concept to consumer.

PERFORMANCE, PROTECTION & SUSTAINABILITY

Type III Pharmaceutical Grade Glass: Provides excellent chemical resistance and formulation stability across a wide range of liquid, solid, and semi-solid products.

Inert & Non-Reactive: Glass is 100% natural, tasteless, and non-porous, ensuring no interaction with contents and preserving product integrity.

High Recycled Content: Up to 70% recycled content in amber glass and 38% in flint glass.

UV Protection: Amber glass offers superior light-filtering properties, helping protect light-sensitive formulations and extend product shelf life.

Sustainably Engineered: Manufactured to support a circular economy using infinitely recyclable materials and lightweight design to reduce environmental impact.

A FLEXIBLE RANGE BUILT FOR DIVERSE PRODUCT LINES

A comprehensive assortment of glass containers designed to support all applications and brands.

Flat-Shoulder Bottles: Available from 20 ml to 150 ml in amber and flint glass.

Industry-Standard Compatibility: Neck finishes comply with 22/400 GPI and 24/410 GPI standards for seamless closure integration.

Glass Jars: Sizes ranging from 5 ml to 500 ml in amber glass with standard screw neck finishes.

Specialty Formats: Including Boston rounds, syrup bottles, dropper bottles, and roller ball bottles for targeted dispensing and specialty use cases.

ONE-STOP PACKAGING SOLUTIONS

Create complete, functional packaging systems with a wide selection of closures.

Closure Materials: Wood, aluminum, acrylic, vegan materials, and standard PP/PE options.

Dispensing Solutions: Cream pumps, spray pumps, cosmetic pipettes, dosing syringes, and roller ball applications.

Safety & Compliance: Child-resistant closures (CRC) available for dropper bottles and jars to support pharmaceutical and nutraceutical requirements.

INNOVATIVE DECORATING & CUSTOMIZATION

PharmaCos offers over 20 advanced decoration techniques for premium differentiation.

Precision Spraying: Custom colors with glossy, satin, opaque, or transparent effects.

Eco-Conscious Ink Innovation: Sustainable black ink produced from 100% recycled rubber waste (end-of-life tires) to further reduce environmental impact.

Advanced Screen Printing: High-definition single- or multi-color printing using organic, UV, or enamel inks.

Frosted Finishes: Soft-touch matte effects, ideal for pairing with hot stamping for elevated brand expression.
