SEAMLESS
DESIGN

O P U S TENDER

AN IMPRESSIVE EXPERIENCE AT SEA

From bow to stern, the Opus Tender is designed to deliver an unforgettable experience on the water. The sleek, aerodynamic lines of the bow cut effortlessly through the waves, providing smooth navigation and a stable ride in all conditions. Every inch of the tender exudes sophistication and functionality, ensuring a perfect balance between performance and comfort. Whether you're cruising along the coast or navigating open waters, the Opus Tender guarantees an impressive and seamless experience at sea.

DESIGN PHILOSOPHY

BATHING IN THE SUN

The Opus Tender provides the perfect space to soak in the sun's warmth and enjoy the serenity of the open sea. Designed for ultimate comfort, the sunbathing area features spacious, cushioned lounges crafted from premium, weather-resistant materials. Whether you're unwinding after a swim or simply enjoying the breeze, this sun-drenched space invites you to relax in complete comfort and style.

DESIGN PHILOSOPHY

OPUS TENDER

Feel the wind in your hair and the sun on your face as you embrace the true sense of open-air freedom aboard the Opus Tender. With ample space for up to 12 guests and two crew members, the expansive deck ensures everyone can fully enjoy the beauty of their surroundings. Whether cruising along the coast or anchored in a secluded bay, the open design offers to be seen.

OPEN-AIR FREEDOM

Dimensions and weights			
Maximum length ^{L_{MAX}}	Maximum beam ^{B_{MAX}}	Draught ^{T_{MAX}}	0.48 m
9.55 metres	2.76 metres	Height ^{H_A} (air draft)	1.73 m
		Mass in the light craft condition (mLC)	2800 kg
		Maximum load for builder's (mMBP)	1310 kg
		Loaded displacement (mLDC)	4.400 kg

Tank capacity	
Diesel (total)	Fresh water
240 litres	70 litres

Ship Construction

The Opus tender is purposefully engineered to be safe, functional, and low-maintenance. To ensure maximum safety, it is built to be unsinkable. The space under the deck is filled with closed-cell foam, which provides more than twice the required flotation. This means that even if the boat is fully loaded, caught in bad weather, or involved in an incident causing it to fill with water, it will not sink.

The hull and deck are both constructed using a vacuum infusion. This method results in a one-piece molded hull and a one-piece molded deck.
